GROUP V A-frame winch truck; Asphalt plant or concrete batch plant; Asphalt spreading machine (spreader bar and similar); Bit sharpener; Boxman or mixerman (asphalt or concrete); Concrete joint machine (canal and similar type); Concrete planer; Drilling machine (water wells); Equipment greaser (mobile and grease rack); Ford Ferguson or similar type (w/drag attachments); Forklift (under 5 ton capacity); Hydra-hammer-Aero stomper; Hydrographic seeder machine (straw, pump or seed); Instrumentman; Machine tool; Maginnis internal full slab vibrator; Mechanical berm, curb or gutter (concrete or asphalt); Mechanical finisher (concrete, Clary-Johnson-Bidwell or similar); Pavement breaker (truck mounted); Road oil mixing machine; Roller; Ross carrier (jobsite); Self-propelled tar pipe-lining machine; Skiploader (wheel or track type over 3/4 yd up to and incl. 1-1/2 yds.); Slip form pump (power driven hydraulic lifting device for concrete forms); Stinger crane (Austin-Western or similar type); traveling pipe wrapping, cleaning and bending machine; Truck type loader; Tugger hoist (1-drum)	$7.81	.75	1.20	.30	.02	

POWER EQUIPMENT OPERATORS (cont'd)	Basic Hourly Rates	Fringe Benefits Payments				
		H & W	Pensions	Vacation	App. Yr.	Oth
GROUP XI Asphalt or concrete plant engineer; Asphalt or concrete spreading (tamping or finishing); Asphalt paving machine (Barber Greene or similar type); belt spliter or vulcanizer; Bill Lane Road Packer, Wagner Factor or similar; Bridge crane; Bridge type unloader and turntable; Cast-in-place pipe laying machine; Combination mixer and compressor (gunite work); Concrete mixer-paving; Crane (up to and incl. 25 ton capacity - long boom pay applicable); Cru hing plant; Deck engine; Drill doctor; Elevating grader; Forklift (over 5 tons); Gradeall; Grade checker; Grouting machine; Heading shield; Heavy duty lubrigram; Hoist (single drum-buck hoist-chicago boom and similar type); Hoist (2 to 3 drum); Kolman belt loader and similar type; LeTourneau blob compactor or similar type; Lift mobile; Litt slab machine (Wagtberg and similar types); Material hoist (1 drum); Mucking machine (1/4 yd. rubber-tired, rail or track type); Piledriver; Pneumatic concrete placing machine (Prescrete, Prescwell or similar type); Pneumatic heading shield (tunnel); Pumpcrete gun; Rotary drill (excl. Gaisen type); Rubber-tired earth moving equipment (single engine, Euclid, Athey wagon, Water Pulls and similar types with any and all attachments up to 50 cu. yds. struck); Rubber-tired scraper (self-loading paddle wheel type John Deere, 10-0 and similar single unit); Skiploader (wheel or track type, over 1½ yds. up to and incl. 6½ yds.); Surface heaters and planer; Tractor-compressor-drill combination; Tractor, (Bulldozer, Tamper, Scraper and Push Tractor, single engine); Trenching machine (over 6' depth cap., manufacturers' rating); Tunnel locomotive (10 to 30 tons); Universal equipment (shovel, backhoe, dragline, clamshell, up to and incl. 1 cu. yd. BRC) (long boom pay applicable)	$7.91	.75	1.20	.30	.02	

POWER EQUIPMENT OPERATORS (cont'd)	Basic Hourly Rates	Fringe Benefits Payments				
		H & W	Pensions	Vacation	App. Yr.	Oth
GROUP VII Crane (over 25 tons up to and incl. 100 ton BRC) (long boom pay applicable); Derrick barge; Dual drum mixer; Hoist (2 or 3 drum w/boom attachment); Hoist (Stiff legs, Guy derricks or similar type up to 100 ton capacity - Oiler or long boom pay applicable); Loader (Athey, Euclid, Sierra or similar type); Monorail locomotive (Diesel, gas or electric); Motor patrol - Blade; Multiple engine tractor (Euclid and similar type, except Quad 9 Cat); Party chief; Rubber-tired earth moving equipment (Multiple engine, Euclid, Caterpillar and similar type up to 50 cu. yds. struck); Tractor (boom attachments - over 40' boom); Tractor loader (Crawler and wheel type over 6-1/2 yds.); Tower crane (2 operators required); Tower crane repairman; Universal equipment (Shovel, Backhoe, Dragline, Clamshell, over 1 cu. yd. BRC); Welder (heavy duty repairman) combination; Wood raker and other similar Pugmill equipment	$8.01	.75	1.20	.30	.02	

POWER EQUIPMENT OPERATORS (cont'd)	Basic Hourly Rates	Fringe Benefits Payments				
		H & W	Pensions	Vacation	App. Yr.	Oth
GROUP VIII Auto grader; Automatic slip form crane, over 100 tons (long boom pay applicable); Hoist (Stiff legs, Guy derricks or similar types, capable of hoisting over 100 tons - long boom pay applicable); Mass excavator (less than 750 cu. yds.); Mechanical finishing machine; Mobile form traveler; Motor patrol (multi-engine); Pipe mobile machine; Rubber-tired earth moving equipment (Multiple engine, Euclid, Caterpillar and similar type over 50 cy. struck); Rubber-tried scraper (pushing one another, w/o Push Cat, Push-Pull - $.50 p/h additional to base rate); Rubber-tired self-loading scraper (Paddle wheel - Auger type self-loading, 2 or more units); Tandem equipment (2 units); Tandem equipment (2 units only); Tandem tractor (Quad 9 or similar type) (Art. XV-V.10.); Tunnel mole boring machine	$8.15	.75	1.20	.30	.02	
GROUP IX Canal liner operator: Canal trimmer operator; Helicopter pilot; Highline cableway; Remote controlled earth moving equipment ($1.00 p/h additional to base rate); Shovel excavator operator (over 750 cy.)	8.50	.75	1.20	.30	.02	

TRUCK DRIVERS:	Basic Hourly Rates	Fringe Benefits Payments				
		H & W	Pensions	Vacation	App. Yr.	Oth
PICKUPS, (3/4 tons and under); Swampers and helpers; Traffic control pilot car (excl. moving heavy equipment)	$5.27	.65	.65	.90		
TRUCK REPAIRMAN; Welder helper	5.47	.65	.65	.90		
INDUSTRIAL LIFT	5.60	.65	.65	.90		
DUMP (Less than 8 yds.); Dump of flat-bed (2 axle); Concrete pumping; Forklift (under 15,000 lbs.)	5.63	.65	.65	.90		
DUMP (8 yds. and under 12 yds.); Dump or flatbed (3 axle); Bunkerman	5.68	.65	.65	.90		
FORKLIFT (15,000 lbs and over); Ross carrier	5.75	.65	.65	.90

BUILDING, HEAVY & HIGHWAY CONSTRUCTION

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:
a. Employer contributes $1.00 per hour to Annuity Fund.

b. Employer contributes $7.00 per day to Annuity Fund.

c. Holidays: A through F; Lincoln's Birthday, Washington's Birthday, Columbus Day, Election Day, Armistice Day.

d. Employer contributes 6.4% basic hourly rate for 5 years or more of service or 4.2% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

e. Holidays: A through F; Washington's Birthday and Good Friday, providing employee has worked 45 full days during the 120 calendar days prior to the holiday, and the regular scheduled work days immediately preceding and following the holiday.

f. $3.00 per day contribution for each man to special annuity fund.

g. Employer contributes $2.35 per hour combined to the Welfare, Pension and Vacation Fund.

h. Holidays: A through F; Lincoln's Birthday, Washington's Birthday, Columbus Day, Election Day, Veteran's Day, providing employee works two days in the calendar week in which the holiday falls, and shapes each remaining work day during such calendar week

i. For each 15 days worked within the contract year an employee will receive one day's vacation with pay, with a maximum vacation of three weeks per year.

k. Employer contributes $28.86 per month to Health and Welfare Fund.

m. Employer contributes $29.13 per month to Pension Fund.

n. Holidays: A through F; Lincoln's Birthday, Washington's Birthday, Good Friday, Columbus Day, Armistice Day and Election Day.

o. Holidays: A through F; Election Day and Washington's Birthday.

p. Holidays: A and F, provided the employee works a full half day preceding the holiday.

q. Employer contributes $.60 per hour to a trust fund and $.15 per hour to an annuity Fund

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

EXECUTIVE ORDERS—
Amending Section 104(b)(1) of Executive Order No. 11157 as it relates to incentive pay for hazardous duty involving aerial flight 18861
Amending Executive Order No. 11710 of April 4, 1973, relative to the National Commission for Industrial Peace 18863

CLEAN AIR—
EPA proposed transportation control plans for Alaska, Arizona, California, Illinois, Utah, and Washington (6 documents); comments by 8–15–73 18937
EPA disapproves certain portions of Rhode Island and Massachusetts plans 18878
EPA prescribes requirements for Rhode Island and Massachusetts emission data reporting; effective 7–16–73 18879
EPA proposal on air quality deterioration prevention plans; comments by 10–15–73 18985

RAILROAD SAFETY—DOT proposals on passenger train visibility standards and maximum operating speeds (2 documents); comments by 8–30 and 8–16–73 respectively 18905, 18906

OCCUPATIONAL SAFETY—Labor Department proposes to adopt permanent standards for certain carcinogens; comments by 9–5–73 18900

INTERNATIONAL BROADCASTING—FCC amendments on procedures and services 18886

DOMESTIC TELEGRAPH—Proposed FCC amendments on speed of service studies; comments by 8–30–73 18908

MEDICARE—HEW rules on participation of home health agencies; effective 7–16–73 18977

FEDERAL RESERVE SYSTEM—Increased reserve requirements of member banks; effective 7–19–73 18869

CHIROPRACTIC PHYSICIANS—DOT invites comments by 12–31–73 on petition to perform examinations on commercial vehicle drivers 18904

REMINDERS

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER after October 1, 1972.

page no. and date

COAST GUARD—Isthmus Slough, Oregon; drawbridge operation regulations. 13561; 5–23–73

FCC—Local government services; mobile communication units in certain emergency and other vehicles..... 15366; 6–11–73

—Special Industrial Radio Service; use of frequency..... 15448; 6–12–73

FCC—Table of assignments, FM broadcast stations, Jackson, Wyo..... 15838; 6–18–73

federal register

Area Code 202 - Phone 962-8626

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

HIGHLIGHTS—Continued

DANGEROUS CARGO—Coast Guard amends rules on shipments of metal borings, shavings, turnings, and cuttings; effective 10–19–73..... 18884

EMERGENCY SCHOOL AID—HEW proposal on waivers of ineligibility; comments by 8–6–73..... 18899

MEETINGS—
Defense Department: Industry Advisory Committee on Maritime Policy, 7–25–73..... 18916
USDA: Challis National Forest Livestock Advisory Board, 7–27–73..... 18916
NASA: Medical Isotopes Advisory Subcommittee of the Johnson Space Center Radiation Safety Committee, 7–20–73..... 18927
FCC: Equipment Standards for Non-Barrier PBX Task Group, 7–23 and 7–24–73..... 18922
EPA: Effluent Standards and Water Quality Information Advisory Committee, 7–23 to 7–27–73..... 18921
CLC: Food Industry Advisory Committee, 7–23 and 7–24–73..... 18932
AEC: Advisory Committee on Reactor Safeguards, General Electric Subcommittee, 8–1 and 8–2–73..... 18919

Contents

THE PRESIDENT

Executive Orders

Amending E.O. No. 11710 of Apr. 4, 1973, relative to the National Commission for Industrial Peace 18863
Amending section 104(b)(1) of E.O. No. 11157, as it relates to incentive pay for hazardous duty involving aerial flight..... 18861

EXECUTIVE AGENCIES

AGRICULTURAL MARKETING SERVICE

Rules and Regulations

Irish potatoes grown in certain counties in Idaho and Malheur County, Ore.; limitation of handling 18865
Onions grown in designated counties in Idaho and Malheur County, Ore.; limitation of handling 18867

Proposed Rules

Irish potatoes grown in Colorado; handling regulation..... 18897

AGRICULTURE DEPARTMENT

See Agricultural Marketing Service; Animal and Plant Health Inspection Service; Forest Service; Soil Conservation Service.

ALIEN PROPERTY OFFICE

Notices

Mrs. Mikiye Morikawa; intention to return vested property..... 18916

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Rules and Regulations

Meat exports; clearance of vessels and exceptions to prohibition of transportation without certificate 18868
Meat and poultry products inspection; clarification of date when Federal provisions apply in any designated State..... 18869

ATOMIC ENERGY COMMISSION

Proposed Rules

Procedures for receiving and opening packages; extension of time for comments..... 18908

Notices

Acceptance criteria for emergency core cooling systems; resumption of hearing (environmental phase) 18920
Advisory Committee on Reactor Safeguards; General Electric Subcommittee; meeting..... 18919
Carolina Power and Light Co.; reconstitution of board..... 18920
Duquesne Light Co., et al.; receipt of application for construction permits and environmental report 18920
Jersey Central Power and Light Co.; issuance of construction permit 18920
Kerr-McGee Corp.; notice of hearing 18921

COAST GUARD

Rules and Regulations

Transportation of metal borings, shavings, turnings, and cuttings 18884

COMMERCE DEPARTMENT

See Economic Development Administration; National Oceanic and Atmospheric Administration; Patent Office.

COST OF LIVING COUNCIL

Notices

Food Industry Advisory Committee; meeting..... 18932

CUSTOMS BUREAU

Notices

Foreign currencies; certification of rates 18916

DEFENSE DEPARTMENT

Notices

Industry Advisory Committee on Maritime Policy; meeting..... 18916

ECONOMIC DEVELOPMENT ADMINISTRATION

Rules and Regulations

Public works, business development, and financial assistance programs; miscellaneous amendments 18869

EDUCATION OFFICE

Proposed Rules

Emergency school aid; waivers of ineligibility 18899

ENVIRONMENTAL PROTECTION AGENCY

Rules and Regulations

Massachusetts and Rhode Island air quality implementation plans (2 documents)..... 18878, 18879
Procurement forms for negotiated architect-engineer contracts..... 18880

Proposed Rules

Air quality standards; implementation plans for certain States:
Alaska 18938
Arizona 18942
California 18948
Illinois 18961
Utah 18964
Washington 18969
Air quality standards; prevention of significant air quality deterioration 18985

Notices

Effluent Standards and Water Quality Information Advisory Committee; meeting and agenda 18921

FEDERAL AVIATION ADMINISTRATION

Rules and Regulations

Avions Marcel Dassault Fan Jet Falcon airplanes; airworthiness directive 18870
Control zone and transition areas; alterations and designation (4 documents) 18870, 18871

(*Continued on next page*)

V 38 I 135 JUL 16 73 XUM

Proposed Rules
Terminal control area; proposed adoption (2 documents) 18904

FEDERAL COMMUNICATIONS COMMISSION
Rules and Regulations
International broadcasting stations 18886
Table of assignments; FM broadcast stations in Woodstock and Rutland, Vt 18896
Proposed Rules
Domestic telegraph speed of service studies 18908
FM broadcast stations; table of assignments; extension of comment period 18915
Notices
Equipment Standards for Non-Barrier PBX Task Group; meeting 18922

FEDERAL DISASTER ASSISTANCE ADMINISTRATION
Notices
Major disaster and related determinations:
Colorado 18918
Texas 18918

FEDERAL HIGHWAY ADMINISTRATION
Proposed Rules
Medical examination of commercial vehicle drivers by chiropractic physicians 18904

FEDERAL INSURANCE ADMINISTRATION
Rules and Regulations
Flood insurance program; areas eligible for sale of insurance 18877

FEDERAL MARITIME COMMISSION
Notices
Agreements filed:
American Great Lakes-Mediterranean Eastbound Freight Conference 18922
Italpacific Line 18923
Pacific Westbound Conference 18923
Henry E. Kloch & Co., Inc., et al.; applicants for independent ocean freight forwarder license 18922
Japan-Atlantic & Gulf Freight Conference; petition filed 18923

FEDERAL POWER COMMISSION
Rules and Regulations
Specialized training costs; uniform systems of accounts 18871
Notices
Pennzoil Offshore Transmission Co.; amendment to application 18923

FEDERAL RAILROAD ADMINISTRATION
Proposed Rules
Passenger train visibility; proposal and notice of hearing 18906
Track safety standards; maximum operating speeds of more than 110 m.p.h.; notice of public hearing 18905
Notices
Safety of Penn Central rail commuter operations in New York and Connecticut; notice of hearing 18919

FEDERAL RESERVE SYSTEM
Rules and Regulations
Reserve requirements for member banks 18869
Notices
Acquisition of bank:
Midatlantic Banks, Inc 18926
Union Bancshares Co 18926
Iron City Eagle Coal, Inc.; order approving formation of bank holding company 18926
Order approving acquisition of bank:
First Bancshares of Florida, Inc 18924
First National Charter Corp 18925
First Union Inc 18925

FISCAL SERVICE
Proposed Rules
Surety companies doing business with the United States 18897

FOOD AND DRUG ADMINISTRATION
Rules and Regulations
Registration of drug producers and drug listing; labeling requirements; stay of effective date 18875
Notices
Advisory committees; notice of meeting; correction 18917
Panel on Review of Contraceptives and Other Vaginal Drug Products; establishment 18917

FOREST SERVICE
Notices
Challis National Forest Livestock Advisory Board; meeting 18916

HEALTH, EDUCATION, AND WELFARE DEPARTMENT
See Education Office; Food and Drug Administration; Public Health Service; Social Security Administration.

HOUSING AND URBAN DEVELOPMENT DEPARTMENT
See Federal Disaster Assistance Administration; Federal Insurance Administration.

IMMIGRATION AND NATURALIZATION SERVICE
Rules and Regulations
Nonimmigrant documentary waivers 18868

INTERIM COMPLIANCE PANEL (COAL MINE HEALTH AND SAFETY)
Notices
Peter Cave Coal Co.; application for renewal permit; opportunity for public hearing 18926

INTERIOR DEPARTMENT
See Land Management Bureau.

INTERNAL REVENUE SERVICE
Proposed Rules
Time for performance of acts where last day falls on a legal holiday 18897

INTERSTATE COMMERCE COMMISSION
Rules and Regulations
Chicago, Rock Island and Pacific Railroad Co.; car service 18876

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 3—The President

EXECUTIVE ORDER 11728

Amending Section 104(b)(1) of Executive Order No. 11157, As It Relates to Incentive Pay for Hazardous Duty Involving Aerial Flight

By virtue of the authority vested in me by section 301(a) and (f) of title 37, United States Code, and as President of the United States and Commander in Chief of the Armed Forces of the United States, section 104(b)(1) of Executive Order No. 11157 [1] of June 22, 1964, as amended, is amended to read as follows:

"(1) During one calendar month: 2 hours of aerial flight; however, hours of aerial flight performed during the immediately preceding five calendar months and not already used to qualify for incentive pay may be applied to satisfy the aerial flight requirement for that month."

Richard Nixon

EXECUTIVE ORDER 11729

Amending Executive Order No. 11710 of April 4, 1973, Relative to the National Commission for Industrial Peace

By virtue of the authority vested in me as President of the United States of America and pursuant to the Economic Stabilization Act of 1970, as amended, the Federal Advisory Committee Act (Public Law 92–463; 86 Stat. 770), and section 301 of title 3 of the United States Code, section 4 of Executive Order No. 11710 [1] of April 4, 1973, is amended to read as follows:

"SEC. 4. The Department of Labor, the Department of Commerce, and the Cost of Living Council, to the extent permitted by law, shall provide support and technical assistance for the Commission. The Cost of Living Council shall perform such other functions with respect to the Commission as may be required by the provisions of the Federal Advisory Committee Act (Public Law 92–463; 86 Stat. 770)."

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 945—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Limitation of Handling

This regulation, designed to promote orderly marketing of Idaho-Eastern Oregon potatoes, imposes minimum quality standards and requires inspection of fresh shipments to keep low quality potatoes from being shipped to consumers.

Notice of rulemaking with respect to a proposed handling regulation, to be made effective under Marketing Agreement No. 98 and Order No. 945, both as amended (7 CFR Part 945) regulating the handling of Irish potatoes grown in designated counties in Idaho and Malheur County, Oregon, was published in the FEDERAL REGISTER June 26, 1973 (38 FR 16782). This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

The notice afforded interested persons an opportunity to file written data, views, or arguments pertaining thereto not later than July 3, 1973.

The manager of the Idaho-Eastern Oregon Potato Committee filed an exception stating that the committee unanimously recommended that all 50-pound cartons be U. S. No. 1 grade or better. The proposed regulation as published, inadvertently required only 50-pound containers marked with a count, size or similar designation to be U. S. No. 1 grade or better. Accordingly, the regulation is hereby corrected.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice which was recommended by the Idaho-Eastern Oregon Potato Committee, established pursuant to said marketing agreement and order, it is hereby found and determined that this handling regulation, as hereinafter set forth, will tend to effectuate the declared policy of the act.

The recommendations of the Idaho-Eastern Oregon Potato Committee reflect its appraisal of the crop and prospective market conditions and are consistent with the marketing policy it unanimously adopted. Shipments of new crop potatoes from the production area are expected to begin July 15, however, storage potatoes from last year's crop will be also shipped during July.

Intended planted fall acreage is forecast at 1,067.9 million acres, about 1 percent more than 1972. Prospective plantings in Idaho and Malheur County, Oregon, for 1973 are 337,000 acres, slightly more than the 320,000 acres planted last year.

As usual, yields and timeliness of harvest will have an important influence on potato supplies. However, total supplies in 1973–74 are expected to be at least as large as in 1972–73 when prices for Idaho potatoes averaged approximately $2.47 per hundredweight, which was about 70 percent of parity. Therefore, average prices to Idaho farmers for 1973 crop potatoes are not expected to exceed parity.

The grade, size, cleanliness and maturity requirements provided herein, which are the same as those currently in effect (37 FR 13632) through July 31, 1973, are necessary to prevent potatoes of low quality, undesirable sizes and of lesser maturities from being distributed in the fresh market channels of commerce. They will promote orderly marketing and standardize the quality of the potatoes shipped from the production area, in order to provide the consumer with a more acceptable product.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

A specified quantity of potatoes may be handled without regard to maturity requirements (1) in order to permit growers to make test diggings without loss of the potatoes so harvested or (2) if, after regrading, a lot meets the grade and size requirements but then fails to meet the maturity requirements, possibly due to further "skinning" as a result of running the potatoes over the grader again.

Shipments may be made to certain special purpose outlets without regard to minimum grade, size, cleanliness, maturity and pack requirements, provided that safeguards are used to prevent such potatoes from reaching unauthorized outlets. Since no purpose would be served by regulating potatoes used for charity purposes such shipments are exempt. Certified seed and seed pieces cut from stock eligible for certification as certified seed are so exempted because requirements for this outlet differ greatly from those for fresh market. Potatoes used for experimentation have special requirements and do not normally enter commercial channels of trade. Exemption of potatoes for most processing uses is mandatory under the legislative authority for this part and therefore shipments to processing outlets are unregulated.

Requirements for export shipments differ from those for domestic markets; while the standard quality requirements are desired in foreign outlets, smaller sizes are more acceptable. In commercial prepeeling, operators can use potatoes with surface defects which would be undesirable for the tablestock market, and smaller sizes are acceptable. For these reasons potatoes for export and prepeeling are provided with different requirements.

It is hereby found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that shipments of 1973–74 crop potatoes grown in the production area will shortly be made and the regulation should become effective at the time herein provided to maximize the benefits to producers. The Idaho-Eastern Oregon Potato Committee held an open meeting on June 8, 1973, to consider recommendations for a handling regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; information regarding the provisions of the recommendation by the committee has been disseminated among the growers and handlers of potatoes in the production area; and compliance with this section will not require any special preparation of potato sorting and packing equipment on the part of handlers subject thereto which cannot be completed on or before the effective time hereof.

§ 945.332 Handling regulation.

During the period July 16, 1973, through July 31, 1974, no person shall handle any lot of potatoes unless such potatoes meet the requirements of paragraphs (a), (b), (c) and (g) of this section, or unless such potatoes are handled in accordance with paragraphs (d), (e), or (f) of this section.

(a) *Minimum quality requirements*—(1) *Grade—All varieties*—U.S. No. 2 or better grade.

(2) *Size*—(i) *Round red varieties*—1⅞ inches minimum diameter.

(ii) *All other varieties*—2 inches minimum diameter, or 4 ounces minimum weight.

(iii) *All varieties*. Size B if U.S. No. 1 or better grade.

(3) *Cleanliness—All varieties*—"generally fairly clean."

(b) *Minimum maturity requirements*.—(1) *White Rose and red skin* varieties: Beginning the effective date hereof through December 31, 1973, "moderately skinned"; thereafter, no maturity requirements.

V 38-135 JUL 16 73 XUM

(2) *All other varieties.* "Slightly skinned."

(3) *Exceptions.* (i) Subject to compliance with paragraph (b)(3)(iii) of this section any lot of potatoes not exceeding a total of 50 hundredweight of each variety may be handled for any producer without regard to the foregoing maturity requirements.

(ii) If an officially inspected lot of potatoes meets the foregoing maturity requirements, but fails to meet the grade and size requirements, the lot may be regraded. If, after regarding, such lot then meets the grade and size requirements but fails to meet the maturity requirements, as indicated by the applicable Federal-State inspection certificate, such lot if not exceeding 100 hundredweight shall be exempt from the foregoing maturity requirements: *Provided,* That the handler complies with paragraph (b)(3)(iii) of this section.

(iii) Prior to each shipment of potatoes exempt from the foregoing maturity requirements, the handler thereof shall report to the committee the name and address of the producer of such potatoes, and each such shipment shall be handled as an identifiable entity.

(c) *Pack.* (1) When 50 pound containers (except master containers) of long varieties of potatoes are marked with a count, size or similar designation they must meet the count, average count and weight ranges for the count designation listed below.

Count	Range: Average Count* (10 percent over or under)	Range: Average Count* (5 percent over or under)	Range: Weight (15 oz. or larger)
Larger than 50 count			
50 "	45–55	48–53	12–19
60 "	54–66	57–63	10–16
70 "	63–77	67–73	9–15
80 "	72–88	76–84	8–13
90 "	81–99	86–95	7–12
100 "	90–110	95–105	6–10
110 "	99–121	105–116	5–9
120 "	108–132	114–126	4–8
130 "	117–143	124–137	4–8
140 "	126–154	133–147	4–8
Smaller than 140 "	10 percent over or under	5 percent over or under	

*Applicable to lots.

The following tolerances by weight, are provided for potatoes in any lot which fail to meet the weight range for the designated count:

(*a*) Not to exceed 5 percent for undersize; and

(*b*) Not to exceed 10 percent for oversize.

(2) Potatoes packed in 50-pound cartons shall be U.S. No. 1 or better grade.

(d) *Special purpose shipments.* (1) The minimum grade, size, cleanliness, maturity and pack requirements set forth in paragraphs (a), (b) and (c) of this section shall not be applicable to shipments of potatoes for any of the following purposes:

(i) Charity;

(ii) Certified seed;

(iii) Seed pieces cut from stock eligible for certification as certified seed;

(iv) Experimentation; and

(v) Canning, freezing and "other processing" as hereinafter defined: *Provided,* That shipments of potatoes for the purpose specified in paragraph (d)(1)(v) of this section shall be exempt from inspection requirements specified in § 945.65 and paragraph (g) of this section and from assessment requirements specified in § 945.42.

(2) The minimum grade, size, cleanliness, maturity and pack requirements set forth in paragraphs (a), (b) and (c) of this section shall be applicable to shipments of potatoes for each of the following purposes:

(i) *Export. Provided,* That potatoes of a size not smaller than 1½ inches in diameter may be shipped if the potatoes grade not less than U.S. No. 2; and

(ii) *Prepeeling. Provided,* That potatoes of a size not smaller than 1½ inches in diameter may be shipped if the potatoes grade not less than Idaho Utility or Oregon Utility grade.

(e) *Safeguards.* (1) Each handler making shipments of potatoes for charity, certified seed, seed pieces cut from stock eligible for certification, experimentation, export, or for prepeeling pursuant to paragraph (d) of this section shall:

(i) First, apply to the committee for and obtain a Certificate of Privilege to make shipments for each purpose;

(ii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iii) At the time of applying to the committee for a Certificate of Privilege, or promptly thereafter furnish the committee with a receiver's or buyer's certification that the potatoes so handled are to be used only for the purpose stated in the application and that such receiver will complete and return to the committee such periodic receiver's reports that the committee may require;

(iv) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable receiver.

(2) Each handler making shipments of potatoes for canning, freezing, or "other processing" pursuant to paragraph (d) of this section shall:

(i) First apply to the committee for and obtain a Certificate of Privilege to make shipments for processing;

(ii) Make shipments only to those firms whose names appears on the committee's current list of approved manufacturers of potato products;

(iii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iv) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable processor.

(3) Each receiver of potatoes for processing pursuant to paragraph (d) of this section shall:

(i) Complete and return an application form for listing as a manufacturer of potato products;

(ii) Certify to the committee and to the Secretary that potatoes received from the production area for processing will be used for such purpose and will not be placed in fresh market channels;

(iii) Report on shipments received as the committee may require and the Secretary approve.

(f) *Minimum quantity exception.* Each handler may ship up to, but not to exceed, 5 hundredweight of potatoes any day without regard to the inspection and assessment requirements of this part, but this exception shall not apply to any shipment that exceeds 5 hundredweight of potatoes.

(g) *Inspection.* (1) During the period beginning the effective date hereof through July 31, 1974, no handler shall handle potatoes unless such potatoes are inspected by either the Idaho Federal-State Inspection Service or Oregon Federal-State Inspection Service and are covered by a valid inspection certificate except when relieved of such requirement pursuant to paragraphs (d), (e), or (f) of this section.

(2) Each lot moving by truck shall be accompanied by a copy of a valid inspection certificate.

(h) *Definitions.* The terms "U.S. No. 1," "U.S. No. 2," "Size B," "fairly clean," "moderately skinned," and "slightly skinned," shall have the same meaning as when used in the United States Standards for Potatoes (§§ 51.1540–51.1566 of this title effective September 1, 1971, as amended February 5, 1972, 37 FR 2745), including the tolerances set forth therein. The term "prepeeling" means potatoes which are clean, sound, fresh tubers prepared commercially in a prepeeling plant by washing, removal of the outer skin or peel, trimming, and sorting preparatory to sale in one or more of the styles of peeled potatoes described in § 52.2422 of this title (United States Standards for Grades of Peeled Potatoes §§ 52.2421–52.2433 of this title). The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural

form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, or dicing, or the application of material to prevent oxidation does not constitute "other processing." The terms "Idaho Utility grade" and "Oregon Utility grade" shall have the same meaning as when used in the respective standards for potatoes for the respective States. Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 98 and Order No. 945, both as amended.

(i) *Applicability to imports.* Pursuant to section 8e of the act and § 980.1 *Import regulations* (7 CFR 980.1), Irish potatoes of the long varieties imported during the effective period of this section shall meet the grade, size, cleanliness and maturity requirements specified in paragraphs (a) and (b) of this section.

§ 945.331 [Superseded]

This new § 945.332 supersedes § 945.331 which is hereby terminated.

Effective date. This regulation will become effective July 16, 1973.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Dated: July 10, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73–14316 Filed 7–13–73;8:45 am]

PART 958—ONIONS GROWN IN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Limitation of Handling

This regulation, designed to promote orderly marketing of Idaho-Eastern Oregon onions, imposes minimum quality standards and requires inspection of fresh market shipments to keep low quality onions from being shipped to consumers.

Notice of rule making with respect to a proposed handling regulation to be effective under Marketing Agreement No. 130 and Order No. 958, both as amended (7 CFR Part 958), regulating the handling of onions grown in the production area defined therein, was published in the June 29, 1973, issue of the FEDERAL REGISTER (38 FR 17238). This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.). The notice afforded interested persons an opportunty to file data, views, or arguments pertaining thereto not later than July 6, 1973. None was filed.

Findings. After consideration of all relevant matters, including the proposal set forth in the aforesaid notice which was recommended by the Idaho-Eastern Oregon Onion Committee, established pursuant to the said marketing agreement and order, it is hereby found that the handling regulation, as hereinafter set forth, will tend to effectuate the declared policy of the act.

The recommendations of the committee reflect its appraisal of the composition of the 1973 crop of Idaho-Eastern Oregon onions and the marketing prospects for this season. Harvesting of onions is expected to begin about mid-July.

The grade, size and quality requirements provided herein are necessary to prevent onions of poor quality or undesirable sizes from being distributed in fresh market channels. They will also provide consumers with good quality onions consistent with the overall quality of the crop.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable. Shipments may be made to certain special purpose outlets without regard to the grade, size, quality, pack and inspection requirements, provided that safeguards are met to prevent such onions from reaching unauthorized outlets.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after its publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of onions grown in the production area will begin on or about the effective date specified herein, (2) to maximize benefits to producers, this regulation should apply to as many shipments as possible during the marketing season, (3) information regarding the provisions of this regulation, which are similar to those which were in effect during the previous season, has been made available to producers and handlers in the production area, (4) compliance with this regulation will not require any special preparation by handlers which cannot be completed by the effective date, and (5) notice of the proposed regulation was published in the FEDERAL REGISTER of June 29, 1973.

§ 958.318 Handling regulation.

During the period July 16, 1973, through April 30, 1974, no person may handle any lot of yellow or white varieties of onions unless such onions are at least "moderately cured," as defined in paragraph (f) of this section, and meet the requirements of paragraphs (a) and (b) of this section, or unless such onions are handled in accordance with paragraphs (c), (d), or (e) of this section.

(a) *Grade, size, and pack requirements*—(1) *Yellow varieties.* U.S. No. 1, 2¼ inches minimum diameter; or U.S. No. 1, 1½ inches minimum to 2¼ inches maximum diameter, if packed separately; or U.S. No. 2 grade, 3 inches minimum diameter, if not more than 30 percent of the lot is comprised of onions of U.S. No. 1 quality.

(2) *White varieties.* U.S. No. 1, 1½ inches minimum diameter; or U.S. No. 2, if not more than 30 percent of the lot is comprised of onions of U.S. No. 1 quality, 1½ inches minimum diameter; or U.S. No. 2, 1 inch minimum to 2 inches maximum diameter if packed separately.

(b) *Inspection.* No handler may handle any onions regulated hereunder unless such onions are inspected by the Federal-State Inspection Service and are covered by a valid applicable inspection certificate, except when relieved of such requirement pursuant to paragraphs (c) and (e) of this section.

(c) *Special purpose shipments.* The minimum grade, size, quality, pack and inspection requirements of this section shall not be applicable to shipments of onions for any of the following purposes:

(1) Planting;
(2) Livestock feed;
(3) Charity;
(4) Dehydration;
(5) Canning; and
(6) Freezing.

(d) *Safeguards.* Each handler making shipments of onions for dehydration, canning, or freezing pursuant to paragraph (c) of this section shall:

(1) First apply to the committee for and obtain a Certificate of Privilege to make such shipments;

(2) Prepare, on forms furnished by the committee, a report in quadruplicate on each individual shipment to such outlets authorized in paragraph (c) of this section;

(3) Bill or consign each shipment directly to the applicable processor; and

(4) Forward one copy of such report to the committee office, and two copies to the processor for signing and returning one copy to the committee office. Failure of the handler or processor to report such shipments by promptly signing and returning the applicable report to the committee office shall be cause for cancellation of such handler's Certificate of Privilege and/or the processor's eligibility to receive further shipments pursuant to such Certificate of Privilege. Upon cancellation of any such Certificate of Privilege the handler may appeal to the committee for reconsideration.

(e) *Minimum quantity exception.* Each handler may ship up to, but not to exceed, 1 ton of onions each day without regard to the inspection and assessment requirements of this part, if such onions meet minimum grade, size, and quality requirements of this section. This exception shall not apply to any portion of a shipment that exceeds 1 ton of onions.

(f) *Definitions.* The terms "U.S. No. 1" and "U.S. No. 2" have the same meaning except for sizes of grades regulated as when used in the "United States Standards for Grades of Onions," as amended (§§ 51.2830–51.2854 of this title; 36 F.R. 19243). The term "moderately cured" means the onions are mature and are more nearly well cured than fairly well cured. Other terms used in this section have the same meaning as when used in Marketing Agreement No. 130 and this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated July 11, 1973, to become effective July 16, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

V 38-135 JUL 16 73 XUM

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

Nonimmigrant Documentary Waivers

In recognition of the forthcoming independence of the Bahama Islands on July 10, 1973, the Administrator of the Bureau of Security and Consular Affairs, Department of State, in an order dated June 28, 1973, with the concurrence of the Acting Commissioner, Immigration and Naturalization, amended 22 CFR 41.6(a) to clarify that the waiver of visa privilege provided by that section will apply to nationals of the Bahamas after it becomes an independent country. A minor technical amendment was made in 22 CFR 41.6(e)(1) to delete the words "Soviet Zone of Germany" formerly used in referring to the German Democratic Republic. In the light of the aforementioned order of the Department of State, corresponding amendments to §§ 212.1(a) and 212.1(e)(1) in Part 212, Chapter I, Title 8 of the Code of Federal Regulations, are hereby prescribed:

Section 212.1 is amended in the following respects: In paragraph (a), the heading is amended and the third sentence is amended to clarify that the waiver of visa privilege is applicable to nationals of the Bahamas upon the independence of the country; and in paragraph (e)(1), the last sentence is amended by deleting the words "Soviet Zone of Germany" formerly used in referring to the German Democratic Republic. As amended, §§ 212.1(a) and 212.1(e)(1) read as follows:

§ 212.1 Documentary requirements for nonimmigrants.

* * * * *

(a) *Canadian nationals, and aliens having a common nationality with nationals of Canada or with British subjects in Bermuda, Bahamian nationals or British subjects resident in Bahamas, Cayman Islands, and Turks and Caicos Islands.* A visa is not required of a Canadian national, and a passport is not required of such a national except after a visit outside of the Western Hemisphere. A visa is not required of an alien having a common nationality with Canadian nationals or with British subjects in Bermuda, who has his residence in Canada or Bermuda, and a passport is not required of such an alien except after a visit outside of the Western Hemisphere. A visa and a passport are required of a Bahamian national or a British subject who has his residence in the Bahamas except that a visa is not required of such an alien who, prior to or at the time of embarkation for the United States on a vessel or aircraft, satisfies the examining United States immigration officer at Nassau, Bahamas, that he is clearly and beyond a doubt entitled to admission in all other respects. A visa is not required of a British subject who has his residence in, and arrives directly from, the Cayman Islands or the Turks and Caicos Islands and who presents a current certificate from the Clerk of Court of the Cayman Islands or the Turks and Caicos Islands indicating no criminal record.

* * * * *

(e)(1) *Direct transits—(1) Transit without visa.* A passport and visa are not required of an alien who is being transported in immediate and continuous transit through the United States in accordance with the terms of an agreement entered into between the transportation line and the Service under the provisions of section 238(d) of the Act on Form I-426 to insure such immediate and continuous transit through, and departure from, the United States en route to a specifically designated foreign country: *Provided*, That such alien is in possession of a travel document or documents establishing his identity and nationality and ability to enter some country other than the United States. This waiver of visa and passport requirements is not available to an alien who is a citizen of Cuba. This waiver of visa and passport requirements is not available to an alien who is a citizen of North Korea ("Democratic Peoples' Republic of Korea"), North Vietnam ("Democratic Republic of Vietnam"), or the German Democratic Republic and is a resident of one of said countries, and is, on a basis of reciprocity, available to a national of Albania, Bulgaria, Czechoslovakia, Estonia, Hungary, Latvia, Lithuania, Outer Mongolia ("Mongolian People's Republic"), People's Republic of China, Poland, Romania, or the Union of Soviet Socialist Republics resident in one of said countries, only if he is transiting the United States by aircraft of a transportation line signatory to an agreement with the Service on Form I-426 on a direct through flight which will depart directly to a foreign place from the port of arrival.

* * * * *

(Sec. 103, 66 Stat. 173; 8 U.S.C. 1103)

Compliance with the provisions of section 553 of Title 5 of the United States Code (80 Stat. 383) as to notice of proposed rule making and delayed effective date is unnecessary in this instance because the amendments to §§ 212.1(a) and 212.1(e)(1) conform Service regulations to corresponding regulations promulgated by the Department of State.

Effective date. This order shall become effective July 10, 1973.

Dated: July 10, 1973.

JAMES F. GREENE,
Acting Commissioner of Immigration and Naturalization.

[FR Doc.73-14442 Filed 7-13-73;8:45 am]

Title 9—Animals and Animal Products

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE (MEAT AND POULTRY PRODUCTS INSPECTION), DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—MANDATORY MEAT INSPECTION

PART 322—EXPORTS

Clearance of Vessels and Exceptions to Prohibition of Transportation Without Certificate

On April 1, 1972, there was published in the FEDERAL REGISTER (37 FR 6694), in accordance with the administrative procedure provisions in 5 U.S.C. 553, a notice of proposed rulemaking under the Federal Meat Inspection Act, as amended (21 U.S.C. 601 et seq.), to amend the regulations governing Federal meat inspection (9 CFR, Chapter III, Subchapter A) for the purpose of limiting the amount of federally inspected meat and meat food products that may be exported without an official export certificate, and clarifying the requirements with respect to exports of inedible product. Interested persons were given 30 days in which to submit written data, views, or arguments concerning the proposed amendment. No response was received.

Therefore, on the basis of all relevant information before the Department, the proposed amendment to the regulations is hereby adopted as set forth below.

(Sec. 21, 34 Stat. 1260, as amended, 21 U.S.C. 621; 37 FR 28464, 28477)

This amendment shall become effective August 20, 1973.

Done at Washington, D.C., on: May 24, 1973.

CLAYTON YEUTTER,
Assistant Secretary, Marketing and Consumer Service.

§ 322.4 Clearance of vessels and transportation without certificate prohibited; exceptions.

No clearance shall be given to any vessel having on board any product destined to any foreign country, and no person operating any vessel, and no railroad or other carrier, shall receive for transportation or transport from the United States to any foreign country, any products, unless and until an official export certificate covering the same has been issued and delivered as provided in this part; except in the case of inspected and passed ship stores and not more than 50 pounds of inspected and passed product for the exclusive personal use of the consignee and not for sale or distribution, and except for exempted product eligible for exportation under the provisions of the Act and the regulations in this subchapter and inedible product that is not capable of use as human food and is eligible for exportation under other provisions of said regulations.

[FR Doc.73-14490 Filed 7-13-73;8:45 am]

PART 331—SPECIAL PROVISIONS FOR DESIGNATED STATES AND TERRITORIES; AND FOR DESIGNATION OF ESTABLISHMENTS WHICH ENDANGER PUBLIC HEALTH AND FOR SUCH DESIGNATED ESTABLISHMENTS

SUBCHAPTER C—MANDATORY POULTRY PRODUCTS INSPECTION

PART 381—POULTRY PRODUCT REGULATIONS

Clarification of Date When Federal Provisions Apply in Any Designated State or Territory

Statement of considerations. Section 301(c) of the Federal Meat Inspection Act (FMIA) and section 5(c) of the Poultry Products Inspection Act (PPIA) set forth the provisions for designating any State as being subject to the provisions of titles I and IV, FMIA, or sections 1–4, 6–10, and 12–22, PPIA. Section 301(c), FMIA, and section 5(c), PPIA, provide that the Secretary shall publish such a designation in the FEDERAL REGISTER, and upon the expiration of 30 days after such publication, said provisions shall apply to operations and transactions and to persons, firms, and corporations engaged therein in the State to the same extent and in the same manner as if such operations and transactions were conducted in or for commerce.

Upon promulgation of 9 CFR Part 331, of the Federal meat inspection regulations, and 9 CFR Part 381, of the poultry products inspection regulations, the heading over the column of calendar dates used is "Effective date of designation" in §§ 331.2 and 381.221. However, these dates are the dates on which the provisions of the FMIA and PPIA, referred to above, became applicable in the specified States. In order to avoid confusion and clarify the meaning of the headings over the column of calendar dates in §§ 331.2 and 381.221, those headings are changed to read "Effective date of application of Federal provisions."

This amendment is made to clarify the regulations. It does not appear that other information could be brought to the Department's attention which would substantially affect this matter. Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning the amendment are impracticable and unnecessary, and good cause is found for making the amendment effective less than 30 days after publication hereof in the FEDERAL REGISTER.

This amendment shall become effective July 13, 1973.

Done at Washington, D.C., on July 10, 1973.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

[FR Doc.73-14491 Filed 7-13-73;8:45 am]

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. D]

PART 204—RESERVES OF MEMBER BANKS

Reserve Requirements

The Board of Governors has increased reserve requirements on all but the first $2 million of net demand deposits at member banks by one-half of one percentage point. This action was taken in an effort to restrain continuing excessive expansion in money and credit.

There is no notice, public participation, or deferred effective date with respect to this amendment since such procedure would result in delay that would be contrary to the public interest and serve no useful purpose. See § 262.2(e) of the Board's rules of procedure, 12 CFR 262.2(e).

Effective July 19, 1973, § 204.5(a)(1)(iii) and (2)(iii) of the Board's Regulation D is amended to read as follows:

§ 204.5 Reserve requirements.

(a) *Reserve percentages.* Pursuant to the provisions of section 19 of the Federal Reserve Act and § 204.2(a) and subject to paragraph (c) of this section, the Board of Governors of the Federal Reserve System hereby prescribes the following reserve balances that each member bank of the Federal Reserve System is required to maintain on deposit with the Federal Reserve Bank of its district:

(1) If not in a reserve city—

* * * * *

(iii) (*a*) 8 per cent of its net demand deposits if its aggregate net demand deposits are $2 million or less, (*b*) $160,000 plus 10½ per cent of its net demand deposits in excess of $2 million if its aggregate net demand deposits are in excess of $2 million but less than $10 million, (*c*) $1 million plus 12½ per cent of its net demand deposits in excess of $10 million if its aggregate net demand deposits are in excess of $10 million but less than $100 million, or (*d*) $12,250,000 plus 13½ per cent of its net demand deposits in excess of $100 million.

* * * * *

(2) If in a reserve city (except as to any bank located in such a city that is permitted by the Board of Governors of the Federal Reserve System, pursuant to § 204.2(a)(2), to maintain the reserves specified in subparagraph (1) of this paragraph)—

* * * * *

(iii) $52,750,000 plus 18 per cent of its net demand deposits in excess of $400 million.

* * * * *

By order of the Board of Governors, June 29, 1973.

[SEAL] CHESTER B. FELDBERG,
Assistant Secretary of the Board.

[FR Doc.73-14416 Filed 7-13-73;8:45 am]

Title 13—Business Credit and Assistance

CHAPTER III—ECONOMIC DEVELOPMENT ADMINISTRATION, DEPARTMENT OF COMMERCE

PUBLIC WORKS, BUSINESS DEVELOPMENT, AND FINANCIAL ASSISTANCE PROGRAMS

Miscellaneous Amendments

On January 23, 1973, the Economic Development Administration completely revised Title 13, Chapter III of the Code of Federal Regulations. That revision expanded, reorganized, and brought current the rules and regulations of the Economic Development Administration.

The purpose of these amendments is to correct certain omissions in the revised regulations as they pertain to the Economic Development Administration's public works and development facilities program; business development program; general requirements for financial assistance; in programs funded by the Economic Development Administration.

Therefore, Parts 305, 306, and 309 of Title 13 of the Code of Federal Regulations are amended as follows:

PART 305—PUBLIC WORKS AND DEVELOPMENT FACILITIES PROGRAMS

1. Section 305.5(b)(3)(v), (vi) and (vii) is revised to read as follows:

§ 305.5 Supplementary grants.

* * * * *

(b) * * *

(3) * * *

(v) Projects located in areas designated under Title I or Title IV of the Act in which the median annual family income is $3,743 or below or the annual unemployment rate is 12 percent or higher	80
(vi) Projects located in areas designated under Title I or Title IV of the Act in which the median annual family income is $3,744 to $4,094 or the annual average unemployment rate is 10 percent to 11.9 percent	70
(vii) Projects located in areas designated under Title I or Title IV of the Act in which the median annual family income is $4,095 to $4,445 or the annual average unemployment rate is 8 percent to 9.9 percent	60

* * * * *

PART 306—BUSINESS DEVELOPMENT PROGRAM

2. Section 306.8(a) is revised to read as follows:

§ 306.8 Financing.

* * * * *

(a) Letters from at least two lending institutions declining to lend to the applicant on terms which, in the opinion of the Assistant Secretary, would permit accomplishment of the project. Letter(s) from the lending institution providing loan(s) secured by a lien senior to EDA's security interest declining to lend the EDA share or to participate with EDA will satisfy this requirement.

* * * * *

PART 309—GENERAL REQUIREMENTS FOR FINANCIAL ASSISTANCE

3. Section 309.10(a) is revised to read as follows:

V 38 I 135 JUL 16 73 XUM

§ 309.10 Assurance of job opportunities for the unemployed.

(a) Applicants for business development loans under section 202 of the Act and direct and substantial beneficiaries of EDA assisted public works projects must submit to EDA assurances of compliance with the EDA policy of assuring job opportunities for the unemployed and underemployed, unless in the case of business development loans under section 202 of the Act, EDA determines that the applicant shall obtain for EDA such assurances from other parties. The assurances shall indicate the intention of the applicant to give preferential consideration for employment, wherever possible, to the long term unemployed and underemployed residing in the project area, in connection with the project assisted by EDA.

. . . . . .

4. A new § 309.25 is added to read as follows:

§ 309.25 Procedures in disaster areas.

In disaster areas the Assistant Secretary may waive or modify those EDA administrative procedural conditions which are non-statutory in character relating to grants, loans, or contracts which would otherwise prevent the giving of assistance if the inability to meet such procedures is a result of the disaster.

WILLIAM W. BLUNT, JR.,
Acting Assistant Secretary for Economic Development

[FR Doc.73-14476 Filed 7-13-73;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 12173; Amdt. 39-1688]

PART 39—AIRWORTHINESS DIRECTIVES

Avions Marcel Dassault Fan Jet Falcon Airplanes

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD), applicable to Avions Marcel Dassault Fan Jet Falcon airplanes, was published in the FEDERAL REGISTER on September 1, 1972 (37 FR 17856). It was proposed to require repetitive inspections of—(1) the studs which retain the SEMCA coupling on pipe, P/N MY20-721-28-1 for scoring or bending, (2) the holes receiving those studs for stretching or elongation, and (3) the weld beads and adjoining areas at the junction of the pipes, P/N's MY20-721-28-1 and MY20-721-61-1, for cracks. In addition, it was also proposed to require the replacement of aluminum alloy pipes, P/N's MY20-721-28-1 and MY20-721-61-1, if defects are found during an inspection, and either the repetitive replacement of those pipes with pipes of the same part number or replacement with pipes made from stainless steel.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No objections were received; however, based upon further review by the FAA the proposed AD has been revised as follows:

(1) Proposed paragraph (a) has been clarified by referencing the applicable manufacturer's service bulletins; and

(2) Proposed paragraph (d) has been revised by deleting the requirement that subparagraph (a)(2) be complied with for replacement pipes and to require the initial inspection in accordance with subparagraph (a)(1) within 200 hours' time in service after installation.

Since these changes impose no additional burden on any person, further notice and public procedure hereon is unnecessary.

(Sec. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new airworthiness directive:

AVIONS MARCEL DASSAULT. Applies to Fan Jet Falcon airplanes, Serial Numbers 1 through 111, which have aluminum alloy air conditioning pipes, P/N's MY20-721-28-1 and MY 20-721-61-1, installed.

Compliance is required as indicated.

To prevent the leakage of very hot air into the rear compartment, accomplish the following, unless already accomplished:

(a) Within the next 100 hours' time in service after the effective date of this AD, comply with subparagraphs (1) and (2), and thereafter comply with subparagraph (1) at intervals not to exceed 200 hours' time in service from the last inspection.

(1) Visually inspect the studs which retain the SEMCA coupling on pipe, P/N MY20-721-28-1, for scoring or bending, and inspect the holes receiving those studs for stretching or elongation, in accordance with Dassault Service Bulletin No. 430 (21-30) dated February 16, 1972, or an FAA-approved equivalent.

(2) Inspect the weld beads and adjoining areas at the junction of the pipes, P/N's MY20-721-28-1 and MY20-721-61-1, for cracks using a magnifying glass of 5 power or greater and a dye penetrant, in accordance with Dassault Service Bulletin No. 430 (21-30) dated February 16, 1972, or an FAA-approved equivalent.

(b) Within the next 100 hours' time in service after the effective date of this AD or before the accumulation of 600 hours' time in service on an aluminum alloy air conditioning pipe, P/N MY20-721-28-1 or MY20-721-61-1, whichever occurs later—

(1) Replace the pipes, P/N's MY20-721-28-1 and MY20-721-61-1, with pipes of the same part number and thereafter continue to replace aluminum alloy pipes before the accumulation of 600 hours' time in service thereon and comply with paragraph (d); or

(2) Replace the pipes, P/N's MY20-721-28-1 and MY20-721-61-1, with stainless steel pipes, P/N's MY20-721-28-2 and MY20-721-61-2, in accordance with Dassault Service Bulletin No. 442 (21-31) dated February 16, 1972, or an FAA-approved equivalent.

(c) If scoring or bending of the studs or stretching or elongation of the holes are found during an inspection specified in paragraph (a)(1) or cracks are found during an inspection specified in paragraph (a)(2) before further flight comply with subparagraph (1) or (2) of paragraph (b).

(d) For aluminum alloy pipes installed as replacement in accordance with subparagraph (1) of paragraph (b)—

(1) Before the accumulation of 200 hours' time in service thereon, inspect in accordance with subparagraph (1) of paragraph (a); and

(2) Thereafter, inspect in accordance with subparagraph (1) of paragraph (a) at intervals not to exceed 200 hours' time in service from the last inspection.

(e) Operators who have not kept records of hours' time in service on pipes, P/N's MY20-721-28-1 and MY20-721-61-1, shall substitute airplane hours' time in service in lieu thereof.

(f) The inspections required by paragraphs (a) and (d) and the replacements specified in subparagraph (1) of paragraph (b) may be discontinued when the aluminum alloy air conditioning pipes, P/N's MY20-721-28-1 and MY20-721-61-1, are replaced with stainless steel pipes, P/N's MY20-721-28-2 and MY20-721-61-2, in accordance with Dassault Service Bulletin No. 442 (21-31), dated February 16, 1972, or an FAA-approved equivalent.

This amendment becomes effective August 15, 1973.

Issued in Washington, D.C., on July 5, 1973.

C. R. MELUGIN, JR.,
Acting Director, Flight Standards Service.

[Airspace Docket No. 73-EA-32]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area

On page 13566 of the FEDERAL REGISTER for May 23, 1973, the Federal Aviation Administration published proposed regulations which would alter the Philadelphia, Pa., control zone (38 FR 411) and Philadelphia, Pa., (38 FR 555) and Pitman, N.J., transition areas (38 FR 557).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulations are hereby adopted, effective 0901 G.m.t. September 13, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749; 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on July 2, 1973.

ROBERT H. STANTON,
Acting Director, Eastern Region.

1. Amend § 71.171 of part 71 of the Federal Aviation regulations by deleting the description of the Philadelphia, Pa. control zone and by substituting the following in lieu thereof:

Within a 5-mile radius of the center, 39°52'31" N., 75°14'20" W. of Philadelphia International Airport, Philadelphia, Pa.; within a 6-mile radius of the center of the airport extending clockwise from a 264° bearing to a 011° bearing from the airport; within 2 miles each side of the New Castle, Del., VORTAC 055° radial extending from 18.5 miles northeast to 22.5 miles northeast of the VORTAC; within 1.5 miles each side of the Philadelphia International Airport Runway 9L ILS localizer course, extending from the 5-mile-radius zone to 1.5 miles each of the Chester OM.

2. Amend § 71.181 of part 71 of the Federal Aviation regulations by deleting the description of the Philadelphia, Pa. transition area and by substituting the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within an 11-mile radius of the center, 39°52'31" N., 75°14'20" W. of Philadelphia International Airport, Philadelphia, Pa., extending clockwise from a 256° bearing to a 016° bearing from the airport; within a 10-mile radius of the center of the airport, extending clockwise from a 016° bearing to a 045° bearing from the airport; within an 8.5-mile radius of the center of the airport, extending clockwise from a 045° bearing to a 136° bearing from the airport; within a 9-mile radius of the center of the airport, extending clockwise from a 136° bearing to a 256° bearing from the airport; within 4.5 miles north and 6.5 miles south of the Philadelphia International Airport Runway 9R ILS localizer course, extending from 5.5 miles east of the Claymont OM to 11.5 miles west of the OM; within 4.5 miles each side of the Modena, Pa., VORTAC 097° radial, extending from 24 miles east to 33 miles east of the VORTAC; within a 5.5-mile radius of the center, 39°47'50" N., 75°20'35" W. of Bridgeport Airport, Bridgeport, N.J.; within 2 miles each side of the Woodstown, N.J., VORTAC 350° radial extending from the 5.5-mile-radius area to the Woodstown, N.J., VORTAC, excluding the portion which coincides with the Wilmington, Del., transition area.

3. Amend § 71.181 of part 71 of the Federal Aviation regulations by deleting the description of the Pitman, N.J., transition area and by substituting the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 5.5-mile radius of the center, 39°45'15" N., 75°08'30" W. of Pitman Airport, Pitman, N.J.; and within 2 miles each side of the Woodstown, N.J., VORTAC 047° radial, extending from the 5.5-mile-radius area to 1 mile northeast of the VORTAC, excluding the portion within the Philadelphia, Pa., transition area. This transition area is effective from sunrise to sunset, daily.

[FR Doc.73-14406 Filed 7-13-73;8:45 am]

[Airspace Docket No. 73-CE-2]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On pages 10461 and 10462 of the FEDERAL REGISTER dated April 27, 1973, the Federal Aviation Administration published a notice of proposed rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Iowa Falls, Iowa.

Interested persons were given 30 days to submit written comments, suggestions or objections regarding the proposed amendment.

No objections have been received and the proposed amendment is hereby adopted without change and is set forth below.

This amendment shall be effective 0901 G.m.t., September 13, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Kansas City, Missouri, on June 26, 1973.

JOHN M. CYROCKI,
Director, Central Region.

In § 71.181 (38 FR 435) the following transition area is added:

IOWA FALLS, IOWA

That airspace extending upward from 700 feet above the surface within a 6.5 mile radius of the Iowa Falls Municipal Airport (lat. 42°28'10" N.; long. 93°16'00" W.); and within 3 miles on each side of the 154 degree bearing from the airport reference point extending from the 6.5 mile radius 8.5 miles southeast of the airport; and that airspace extending upward from 1,200 feet above the surface bounded on the west by V13, on the north by V100, on the east by the Waterloo 29 DME arc and on the south by a 20 mile arc of the Iowa Falls Airport.

[FR Doc.73-14408 Filed 7-13-73;8:45 am]

[Airspace Docket No. 73-EA-30]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On page 13657 of the FEDERAL REGISTER for May 24, 1973, the Federal Aviation Administration published a proposed rule which would alter the Sidney, NY, transition area (38 FR 579).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 G.m.t. September 13, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat 749; 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on July 2, 1973.

ROBERT H. STANTON,
Acting Director, Eastern Region.

1. Amend § 71.181 of part 71, Federal Aviation regulations by deleting the text of the Sidney, N.Y. 700-foot floor transition area and substituting the following in lieu thereof:

SIDNEY, N.Y.

That airspace extending upward from 700 ft above the surface within a 12.5-mile radius of the center, lat. 42°18'22" N., long. 75°-24'57" W. of Sidney Municipal Airport, Sidney, N.Y.; within a 16-mile radius arc from the center of the airport extending clockwise from a 080° bearing to a 215° bearing from the airport excluding the airspace within a 2-mile radius area of the Harmony Crest Airpark (lat. 42°13'56" N., long. 75°38'00" W.).

[FR Doc.73-14407 Filed 7-13-73;8:45 am]

[Airspace Docket No. 73-EA-33]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On page 13566 of the FEDERAL REGISTER for May 23, 1973, the Federal Aviation Administration published a proposed rule which would alter the Cambridge, Md., transition area (38 FR 457).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 G.m.t. September 13, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749; 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on July 2, 1973.

ROBERT H. STANTON,
Acting Director, Eastern Region.

1. Amend § 71.181 of part 71 of the Federal Aviation Regulations by deleting the description of the Cambridge, Md., transition area and by substituting the following in lieu thereof:

That airspace extending upward from 700 ft above the surface within a 6.5-mile radius of the center, 38°32'16" N., 76°01'47" W. of Cambridge Municipal Airport, Cambridge, Md.; and within 3 miles each side of the 145° bearing from the Cambridge, Md., RBN, 38°32'17" N., 76°01'56" W., extending from the 6.5-mile-radius area to 8.5 miles southeast of the RBN.

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

[Docket No. R-456; Order 486]

UNIFORM SYSTEM OF ACCOUNTS

Specialized Training Costs

JULY 3, 1973.

On October 2, 1972, the Commission issued a notice of proposed rulemaking in this proceeding (37 FR 21181, October 6, 1972) proposing to amend:

(A) Uniform System of Accounts for Class A and Class B Public Utilities and Licensees, prescribed by Part 101, Chapter I, Title 18, CFR.

(B) Uniform System of Accounts for Class C Public Utilities and Licensees, prescribed by Part 104, Chapter I, Title 18, CFR.

(C) Uniform System of Accounts for Class A and Class B Natural Gas Companies, prescribed by Part 201, Chapter I, Title 18, CFR.

(D) Uniform System of Accounts for Class C Natural Gas Companies, prescribed by Part 204, Chapter I, Title 18, CFR.

The purpose of this rulemaking is to establish uniform accounting procedures for the costs of training employees to operate or maintain new and unique facilities. We recognize that training costs

V 38 135 JUL 16 73 XUM

of this type are becoming increasingly significant in amount and the existing Uniform Systems of Accounts do not clearly specify whether such costs are to be capitalized or charged to expense currently. The new facilities referred to are those which are constructed under a non-conventional technology where new training is required for their operation and maintenance, and include nuclear power generating plants and other new type generating facilities.

The Commission recognizes that during the construction of such facilities it is necessary that company employees be trained to a degree of competence so as to be able to operate and maintain the facilities when they are ready for service. It is also recognized that the training required under such circumstances usually involves the investment of a considerable amount of time and money.

We proposed to clarify the accounting by one of two methods referred to hereinafter as Proposal A and Proposal B. Proposal A would expense all training costs as a current operational expense item, with the exception of those large significant amounts associated with unique type facilities that are not now conventional in nature which would be capitalized. This capitalized expense would be amortized over the period of its expected benefit, not to exceed five years. Proposal B would treat all training costs, regardless of their relationship to new type facilities as current operational expense items.

Proposal A envisioned that the cost invested in employee training associated with non-conventional facilities which is new to the companies operations is similar to other costs invested in plant which are subject to recovery after the plant is placed in service. To match the recovery of the training costs, under Proposal A, the costs would be spread over the period during which the benefits from such training will be realized. This proposal was based on the belief that such training costs should be capitalized as an intangible asset includible in the rate base just like any other element of plant in service, and amortized to expense over the period of expected benefit from the training received by the related employees. We noted, further, that unlike other plant elements, training costs are related to human resources and trained personnel are subject to reassignment or replacement during the service life of a new type facility. Therefore, training costs capitalized under Proposal A would be recovered by amortization charges to operating expenses over a reasonable period not to exceed five years.

Proposal B envisioned expensing all training costs as a current operational expense. This proposal was based on the premise that such training costs will be common in companies' operations hereafter and that for the foreseeable future there will be increasing changes in technology that will cause continued training for new type plants. Under this premise, therefore, such costs should be expensed currently since they cannot be deemed to be nonrecurring or unusual.

All data, views, comments or suggestions concerning the rulemaking proposals were to be submitted not later than November 16, 1972. An extension of time was requested on October 12, 1972, by the American Gas Association, and an extension to February 14, 1973, was granted on October 27, 1972. A total of forty-one comments and suggestions were received. (Appendix A) A conference was not requested by any respondent.

We found in our review of the comments that all the respondents were in favor of the general purpose of the proposed rulemaking to recognize and make provision for training costs associated with non-conventional facilities. There was also general agreement among the majority that Proposal A was far more reasonable than Proposal B if one or the other was to be imposed, but an overwhelming majority registered disapproval and advocated modification of Proposal A for various reasons. A few of the respondents were actually opposed to the implementation of either proposal as stated.

The major criticisms of Proposal A went to the vague definitions of "normal," "excess," and "non-conventional," and to the selection of a 5-year amortization period as arbitrary. Many respondents expressed the opinion that training costs are an integral part of the operation of new facilities, and should therefore be capitalizable as plant cost to be depreciated over the life of the plant. It was pointed out that in the case of nuclear units some employees are trained and licensed for a specific unit.

Those respondents who advocated capitalization and depreciation of specialized training costs over the life of the plant suggested this treatment only for the original personnel. Costs of training future personnel would be expensed. They commented that the arbitrary 5-year period ignored the permanency of training efforts in that some trained personnel remain available to train new employees, and therefore the original training benefits the life of the plant. It was also suggested that any treatment of specialized training costs not be limited to non-conventional facilities.

Proposal B, although not presenting the definitional problems of Proposal A, was rejected by all but a few of the respondents. The main objection was that charging all or most training costs to current expenses would inevitably result in a distortion of earnings. One respondent, Public Service Commission of New York, did suggest the adoption of Proposal B, albeit with an important modification. It urged that distorting amounts be deferred in a specific account and then amortized over a period determined by the Commission. This would allow the Commission to decide whether the costs were really unusual and nonrecurring.

We think that it is reasonable and desirable to implement the general purpose of the proposed rulemaking. We agree, however, with the majority of respondents who expressed the belief that neither of the two proposals adequately treat the problem of specialized training costs. It appears to us that those training costs associated with new or non-conventional facilities are in the nature of a pre-operating cost, and are therefore properly capitalizable as an integral cost of the facility (includable in rate base). This cost would be recoverable through depreciation over the useful life of the facility, and therefore not subject to an artificial amortization period.

Obviously, newly-trained personnel are subject to the same attrition factors as all employees. However, we think that the benefits of the original training in operation and maintenance of the facility provide an input that lasts throughout the life of the project. The original training is as essential to the first year of operation as any other element of the physical plant. This concept incorporates the cost of replacement training being charged to current operations.

In implementing this accounting for specialized training costs, we also adopt the suggestion that this treatment not be restricted to non-conventional facilities, i.e., nuclear generating plants, but expanded to include any conventional facilities that are altogether new to the utility's operations.

The Commission finds:

(1) The notice and opportunity to participate in this rulemaking proceeding with respect to the matters presently before this Commission through the submission, in writing, or views, comments, and suggestions in the manner described above, are consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) The amendments to Parts 101 and 104 of the Commission's Uniform Systems of Accounts for Public Utilities and Licensees, prescribed by Chapter I, Title 18 of the Code of Federal Regulations, are necessary and appropriate for the administration of the Federal Power Act.

(3) The amendments to Parts 201 and 204 of the Commission's Uniform System of Accounts for Natural Gas Companies, prescribed by Chapter I, Title 18 of the Code of Federal Regulations, are necessary and appropriate for the administration of the Natural Gas Act.

The Commission, acting pursuant to the provisions of the Federal Power Act, as amended, particularly sections 301, 302, 303, 304, and 309 thereof (49 Stat. 854, 855, 858; 16 U.S.C. 825, 825a, 825b, 825c, 825h), and of the Natural Gas Act, as amended, particularly sections 8, 9, 10, and 16 thereof (52 Stat. 825, 826, 830; 15 U.S.C. 717g, 717h, 717i, 717o), orders:

(A) The Commission's Uniform Systems of Accounts for Class A, B, and C Public Utilities and Licensees prescribed by Parts 101 and 104, and for Natural Gas Companies prescribed by Parts 201 and 204, Chapter I, Title 18 of the Code of Federal Regulations, are revised and amended as follows:

PART 101—UNIFORM SYSTEM OF ACCOUNTS PRESCRIBED FOR CLASS A AND CLASS B PUBLIC UTILITIES AND LICENSEES

1. The Electric Plant Instructions are amended by:

a. Adding a new item (19) entitled, (19) Training to instruction "3. *Components of Construction Cost.*"

b. Adding a new instruction 17 entitled, "17. Training Costs," immediately following "16. Nuclear Fuel Records Required."

As amended, this portion of the Electric Plant Instructions reads:

Electric Plant Instructions

* * * * *

3. *Components of construction cost.*

* * * * *

(19) "Training." (See Electric Plant Instruction 17).

* * * * *

17. *Training costs.*

When it is necessary that employees be trained to operate or maintain plant facilities that are being constructed and such facilities are not conventional in nature, or are new to the company's operations, these costs may be capitalized as an item of intangible plant and recorded in account 303, Miscellaneous Intangible Plant. The amount so capitalized shall be amortized over the estimated useful life of the related plant from the time the related plant is placed in or ready for service. Once plant is placed in service, the capitalization of training costs shall cease and subsequent training costs shall be expensed. (See Operating Expense Instruction 4.)

2. The Operating Expense Instructions are amended by:

a. Amending item 7 of the instruction "1. Supervision and Engineering."

b. Adding a new instruction 4. *Training Costs* to the instructions.

As amended, this portion of the Operating Expense Instructions reads:

Operating Expense Instructions

1. *Supervision and engineering.*

* * * * *

ITEMS

Labor

* * * * *

7. * * * (See Electric Plant Instruction 17.)

* * * * *

4. *Training costs.*

When it is necessary that employees be trained to specifically operate or maintain plant facilities that are being constructed, the related costs shall be accounted for as a current operating and maintenance expense. These expenses shall be charged to the appropriate functional accounts currently as they are incurred. However, when the training costs involved relate to facilities which are not conventional in nature, or are new to the company's operations, then see Electric Plant Instruction 17, for accounting.

3. Account "303, Miscellaneous Intangible Plant," of the Electric Plant Accounts is amended by amending the text of paragraph "B", by adding a new paragraph "C", and by recodifying the present paragraph "C" as "D". As amended account 303 reads:

Electric Plant Accounts

1. INTANGIBLE PLANT

* * * * *

303 Miscellaneous intangible plant.

* * * * *

B. When any item included in paragraph A above of this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or account 111, Accumulated Provision for Amortization of Electric Utility Plant, as appropriate.

C. This account shall also include the cost of training employees who will be directly responsible for the operation or maintenance of plant facilities constructed under a new technology where new special type training is required. Amortization from this account shall be debited to account 404, Amortization of Limited-term Electric Plant, and account 111, Accumulated Provision for Amortization of Electric Utility Plant, shall be credited. (See Electric Plant Instruction 17.)

D. [Recodified from "C" without change in text.]

* * * * *

4. Account "404, Amortization of Limited-term Electric Plant," of the Income Accounts is amended by revising the first sentence. As amended, this portion of account 404 reads:

Income Accounts

1. UTILITY OPERATING INCOME

* * * * *

404 Amortization of limited-term electric plant.

This account shall include amortization charges applicable to amounts included in the electric plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, expenditures on leased property where the service life of the improvements is terminable by action of the lease, and training costs. * * *

PART 104—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C PUBLIC UTILITIES AND LICENSEES

* * * * *

B. The Uniform System of Accounts for Class C and Class D Public Utilities and Licensees prescribed by Part 104, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

1. The Electric Plant Instructions are amended by adding a new plant instruction entitled "14. Training costs." As amended, this portion of the Electric Plant Instructions reads:

Electric Plant Instructions

* * * * *

14. *Training costs.*

When it is necessary that employees be trained to operate or maintain plant facilities that are being constructed and such facilities are not conventional in nature or are new to the company's operations, these costs may be capitalized as an item of intangible plant and recorded in account 303, Miscellaneous Intangible Plant. The amount so capitalized shall be amortized over the estimated useful life of the related plant from the time the related plant is placed in or ready for service. Once plant is placed in service, the capitalization of training costs shall cease, and subsequent training costs shall be expensed. (See Operating Expense Instruction 3.)

2. The Operating Expense Instructions are amended by adding a new instruction 3 entitled "3. Training costs." As amended, the Operating Expense Instructions read:

Operating Expense Instructions

* * * * *

3. *Training costs.*

When it is necessary that employees be trained to specifically operate or maintain plant facilities that are being constructed, the related costs shall be accounted for as a current operating and maintenance expense. These expenses shall be charged to the appropriate functional accounts currently as they are incurred. However, when the training costs involved relate to facilities which are not conventional in nature, or are new to the company's operations, then see Electric Plant Instruction 14, for accounting.

3. Account "303, Miscellaneous Intangible Plant," of the Electric Plant Accounts is amended by amending the text of paragraph "B", by adding a new paragraph "C", and by recodifying the present paragraph "C" as "D". As amended account 303 reads:

Electric Plant Accounts

1. INTANGIBLE PLANT

* * * * *

303 Miscellaneous intangible plant.

* * * * *

B. When any item included in paragraph A above in this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or account 110, Accumulated Provision for Depreciation and Amortization of Electric Utility Plant, as appropriate.

C. This account shall also include the cost of training employees who will be directly responsible for the operation or maintenance of plant facilities constructed under a new technology where new special type training is required. Amortization from this account shall be debited to account 404, Amortization of Limited-term Electric Plant, and account 110, Accumulated Provision for Depreciation and Amortization of Electric Utility Plant, shall be credited. (See Electric Plant Instruction 14.)

D. [Recodified from "C" without change in text].

* * * * *

4. Account "404, Amortization of Limited-term Electric Plant," of the Income Accounts is amended by revising the first

V 38 I 135 JUL 16 73 XUM

sentence. As amended, this portion of account 404 reads:

Income Accounts

1. UTILITY OPERATING INCOME

* * * * * *

404 Amortization of limited-term electric plant.

This account shall include amortization charges applicable to amounts included in the electric plant accounts for limited-term franchises, licenses, patent rights, limited-term interest in land, expenditures on leased property where the service life of the improvements is terminable by action of the lease, and training costs. * * *

* * * * * *

PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES

C. The Uniform System of Accounts for Class A and Class B Natural Gas Companies prescribed by Part 201, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

1. The Gas Plant Instructions are amended by:

a. Adding a new item (19) entitled "(19) Training" to instruction "3. Components of construction cost."

b. Adding a new instruction 16 entitled, "16. Training costs," immediately following "15. Fees for applications filed with the Commission." As so amended, this portion of the Gas Plant Instructions reads:

Gas Plant Instructions

* * * * * *

3. *Components of construction cost.*

* * * * * *

(19) "Training." (See Gas Plant Instruction 16).

* * * * * *

16. *Training costs.*

When it is necessary that employees be trained to operate or maintain plant facilities that are being constructed and such facilities are not conventional in nature or are new to the company's operations, these costs may be capitalized as an item of intangible plant and recorded in account 303, Miscellaneous Intangible Plant. The amount so capitalized shall be amortized over the estimated useful life of the related plant from the time the related plant is placed in or ready for service. Once plant is placed in service, the capitalization of training costs shall cease, and subsequent training costs shall be expensed. (See Operating Expense Instruction 4.)

2. The Operating Expense Instructions are amended by:

a. Amending item 7 of the instruction "1. Supervision and engineering."

b. Adding a new instruction 4. "Training costs." As amended, this portion of the Operating Expense Instructions reads:

Operating Expense Instructions

1. *Supervision and engineering.*

* * * * * *

ITEMS

Labor:

* * * * * *

7. * * * (See Gas Plant Instruction 16.)

* * * * * *

4. *Training costs.*

When it is necessary that employees be trained to specifically operate or maintain plant facilities that are being constructed, the related costs shall be accounted for as a current operating and maintenance expense. These expenses shall be charged to the appropriate functional accounts currently as they are incurred. However, when the training costs involved relate to facilities which are not conventional in nature, or are new to the company's operations, then see Gas Plant Instruction 16, for accounting.

3. Account "303, Miscellaneous intangible plant" of the Gas Plant Accounts is amended by amending the text of paragraph "B", by adding a new paragraph "C", and by recodifying the present paragraph "C" as "D". As amended account 303 reads:

Gas Plant Accounts

1. INTANGIBLE PLANT

* * * * * *

303 Miscellaneous intangible plant.

* * * * * *

B. When any item included in paragraph A above of this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or account 111, Accumulated Provisions for Amortization and Depletion of Gas Utility Plant, as appropriate.

C. This account shall also include the cost of training employees who will be directly responsible for the operation or maintenance of plant facilities constructed under a new technology where new special type training is required. Amortization from this account shall be debited to account 404.3, Amortization of Other Limited-term Gas Plant, and account 111, Accumulated Provision for Amortization and Depletion of Gas Utility Plant in Service, shall be credited. (See Gas Plant Instruction 16.)

D. [Recodified from "C" without change in text.]

* * * * * *

4. Account "404.3, Amortization of other limited-term gas plant" of the Income Accounts is amended by revising the first sentence. As amended, this portion of account 404.3 reads:

Income Accounts

1. UTILITY OPERATING INCOME

* * * * * *

404.3 Amortization of other limited-term gas plant.

This account shall include amortization charges applicable to amounts included in the gas plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land, expenditures on leased property where the service life of the improvements is terminable by action of the lease, and training costs. * * *

* * * * * *

PART 204—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C NATURAL GAS COMPANIES

D. The Uniform System of Accounts for Class C and Class D Natural Gas Companies prescribed by Part 204, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

1. The Gas Plant Instructions are amended by adding a new plant instruction entitled "15. Training costs." As amended, this portion of the Gas Plant Instructions reads:

Gas Plant Instructions

* * * * * *

15. *Training costs.*

When it is necessary that employees be trained to operate or maintain plant facilities that are being constructed and such facilities are not conventional in nature or are new to the company's operations, these costs may be capitalized as an item of intangible plant and recorded in account 303, Miscellaneous Intangible Plant. The amount so capitalized shall be amortized over the estimated useful life of the related plant from the time the related plant is placed in or ready for service. Once plant is placed in service, the Capitalization of training costs shall cease, and subsequent training costs shall be expensed. (See Operating Expense Instruction 3.)

2. Amend the Operating Expense Instructions by adding a new instruction 3 entitled, "3. Training costs." As amended the Operating Expense Instruction reads:

Operating Expense Instructions

* * * * * *

3. *Training costs.*

When it is necessary that employees be trained to specifically operate or maintain plant facilities that are being constructed, the related costs shall be accounted for as current operating and maintenance expense. These expenses shall be charged to the appropriate functional accounts currently as they are incurred. However, when the training costs involved relate to facilities which are not conventional in nature, or are new to the company's operations, then see Gas Plant Instruction 15, for accounting.

3. Account "303, Miscellaneous intangible plant" of the Gas Plant Accounts is amended by amending the text of paragraph "B", by adding a new paragraph "C", and by recodifying the present paragraph "C" as "D". As amended account 303 reads:

Gas Plant Accounts

1. INTANGIBLE PLANT

* * * * * *

303 Miscellaneous intangible plant.

* * * * * *

B. When any item included in paragraph A above of this account is retired or expires, the book cost thereof shall be credited hereto and charged to account 426.5, Other Deductions, or account 110, Accumulated Provision for Depreciation, Depletion and Amortization of Gas Utility Plant, as appropriate.

C. This account shall also include the cost of training employees who will be directly responsible for the operation or maintenance of plant facilities constructed under a new technology where new special type training is required. Amortization from this account shall be debited to account 404, Amortization of Limited-term Gas Plant, and account 110, Accumulated Provision for Depreciation, Depletion and Amortization of Gas Utility Plant, shall be credited. (See Gas Plant Instruction 15.)

D. [Recodified from "C" without change in text.]

* * * * * *

4. Account "404, Amortization of limited-term gas plant" of the Income Accounts is amended by revising the first sentence. As amended, this portion of account 404 reads:

Income Accounts

1. UTILITY OPERATING INCOME

* * * * * *

404 Amortization of limited-term gas plant.

This account shall include amortization charges applicable to amounts included in the gas plant accounts for limited-term franchises, licenses, patent rights, limited-term interests in land other than land rights held for the production of natural gas expenditures on leased property where the service life of the improvements is terminable by action of the lease, and training costs. * * *

* * * * * *

(B) The amendments and revisions adopted herein shall be effective January 1, 1974.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS

PART 130—NEW DRUGS

PART 132—REGISTRATION OF PRODUCERS OF DRUGS AND LISTING OF DRUGS IN COMMERCIAL DISTRIBUTION

Stay of Effective Date for Labeling Requirement

In the FEDERAL REGISTER of March 7, 1973 (38 FR 6258) the Commissioner of Food and Drugs published a final order implementing regulations for the Drug Listing Act of 1972. This order provided for an effective date of March 7, 1973, except that § 132.8(b)(3) was not effective for labeling bearing a National Drug Code number printed prior to July 1, 1973.

In the FEDERAL REGISTER of July 6, 1973 (38 FR 18041), the Commissioner proposed that § 132.8(b)(3) not be effective until printing plates are revised in the normal course of business or until July 1, 1975, whichever occurs first. All interested persons were invited to file, on or before September 4, 1973, with the Hearing Clerk, Food and Drug Administration, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, written comments regarding this proposal.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 510, 701(a), 52 Stat. 1053, as amended, 1055 as amended; 21 U.S.C. 360, 371(a)), and the Drug Listing Act of 1972 (Public Law 92-387; 865 Stat. 559-562) and under authority delegated to the Commissioner (21 CFR 2.120), the July 1, 1973 effective date for § 132.8(b)(3), as published in the FEDERAL REGISTER on March 7, 1973, is hereby stayed until a decision is reached on the July 6, 1973 proposal.

Dated: July 9, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Title 22—Foreign Relations

CHAPTER I—DEPARTMENT OF STATE

[Dep. Reg. 108.689]

PART 41—VISAS: DOCUMENTATION OF NONIMMIGRANTS UNDER THE IMMIGRATION AND NATIONALITY ACT, AS AMENDED

Nonimmigrant Documentary Waivers

In recognition of the forthcoming independence of the Bahama Islands on July 10, 1973, Part 41 Chapter I, Title 22 of the Code of Federal Regulations is amended to insert the words "A Bahamian national" in the third sentence of § 41.6(a) to make it clear that the waiver of visa privilege provided by this sentence will apply to nationals of the Bahamas after it becomes an independent country. A minor technical amendment has been made in § 41.6(e)(1) to delete the words "Soviet Zone of Germany" formerly used in referring to the German Democratic Republic.

1. The heading and the third sentence of paragraph (a) and the last sentence of paragraph (e)(1) of § 41.6 are amended to read as follows:

§ 41.6 Nonimmigrants not required to present passports, visas, or border-crossing identification cards.

* * * * * *

(a) *Canadian nationals, and aliens having a common nationality with nationals of Canada or with British subjects in Bermuda, Bahamian nationals or British subjects resident in Bahamas, Cayman Islands, and Turks and Caicos Islands.* * * * A Bahamian national or a British subject who has his residence in the Bahamas shall require a passport and a visa for admission to the United States except that a visa shall not be required of such an alien who, prior to or at the time of embarkation for the United States on a vessel or aircraft, satisfies the examining United States immigration officer at Nassau, Bahamas that he is clearly and beyond a doubt entitled to admission in all other respects. * * *

(e) *Aliens in immediate transit.*—(1) *Aliens in bonded transit.* * * * This waiver of visa and passport requirements is not available to an alien who is a citizen of North Korea ("Democratic Peoples' Republic of Korea"), North Viet-Nam ("Democratic Republic of Viet-Nam"), or the German Democratic Republic, and is a resident of one of the said countries, and is on a basis of reciprocity, available to a national of Albania, Bulgaria, Czechoslovakia, Estonia,

V 38 135 JUL 16 73 XUM

Hungary, Latvia, Lithuania, Mongolian People's Republic, People's Republic of China, Poland, Romania, or the Union of Soviet Socialist Republics resident in one of said countries, only if he is transiting the United States by aircraft of a transportation line signatory to an agreement with the Immigration and Naturalization Service on Form I-426 on a direct through flight which will depart directly to a foreign place from the port of arrival.

* * * * *

Effective date. The amendments to the regulations contained in this order shall become effective July 10, 1973.

The provisions of the Administrative Procedure Act (80 Stat. 383; 5 U.S.C. 553) relative to the notice of proposed rulemaking are inapplicable to this order because the regulations contained herein involve foreign affairs functions of the United States.

(Sec. 104, 66 Stat. 174; 8 U.S.C. 1104)

Dated: June 23, 1973.
For the Secretary of State.

[SEAL] BARBARA M. WATSON,
Administrator Bureau of Security and Consular Affairs, Department of State.
JAMES F. GREENE,
Acting Commissioner of Immigration and Naturalization, Immigration and Naturalization Service Department of Justice.

Title 37—Patents, Trademarks and Copyrights

CHAPTER I—PATENT OFFICE, DEPARTMENT OF COMMERCE

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

Lawful Use for Supplemental Register and Size of Facsimiles

The Patent Office is revising §§ 2.47 and 2.57 of the trademark rules of practice. Section 2.47 is being revised to set forth that the year's use which is the basis for registration on the Supplemental Register must be lawful use. Existing § 2.47 states that the year's use for the Supplemental Register must be "continuous use," whereas section 23 of the Trademark Act of 1946 specifies that such use must be "lawful use." The purpose of this revision is to conform the wording of § 2.47 to the wording of the statute. This revision does not effect any change in practice, as in applying the rule the term "continuous use" has been treated as having the same meaning as the term "lawful use" in the statute.

Section 2.57 is being revised to set forth that facsimile-specimens are not to exceed 8½ inches wide and 13 inches long. Existing § 2.57 states that facsimiles shall be not larger than specified for the drawing. That statement is now incorrect due to a recent amendment of the drawing length to 11 inches. The purpose of this revision is to correct the wording of § 2.57, and to conform the wording of rule 2.57 to the wording of § 2.56 (Specimens) which has already been amended to specify that specimens are not to exceed 8½ inches wide and 13 inches long.

Since these revisions impose no burden on any person, notice and public procedures thereon are deemed unnecessary.

Therefore, pursuant to the authority contained in section 41 of the Act of July 5, 1946 (60 Stat. 440; 15 U.S.C. 1123), and section 6 of the Act of July 19, 1952 (66 Stat. 793; 35 U.S.C. 6, as amended October 5, 1971, 85 Stat. 364), Part 2 of Chapter I of Title 37 of the Code of Federal Regulations is hereby revised as follows:

1. Section 2.47 is revised to read as follows:

§ 2.47 Supplemental register.

In an application to register on the Supplemental Register, the application shall so indicate and shall specify that the mark has been in lawful use in commerce, specifying the nature of such commerce, by the applicant for the preceding year, if the application is based on such use. When an applicant requests registration without a full year's use of the mark, in accordance with the last paragraph of section 23 of the act, the showing required must be separate from the application.

(Sec. 23, 60 Stat. 435; 15 U.S.C. 1091)

2. Section 2.57 is revised to read as follows:

§ 2.57 Facsimiles.

When, due to the mode of applying or affixing the trademark to the goods, or to the manner of using the mark on the goods, or to the nature of the mark, specimens as above stated cannot be furnished, five copies of a suitable photograph or other acceptable reproduction, not to exceed 8½ inches wide and 13 inches long, and clearly and legibly showing the mark and all matter used in connection therewith, shall be furnished.

Effective date. These revisions shall become effective on July 16, 1973.

Dated: July 5, 1973.

RENE D. TEGTMEYER,
Acting Commissioner of Patents.

Approved:

BETSY ANCKER-JOHNSON,
Assistant Secretary for Science and Technology.

[FR Doc.73-14453 Filed 7-13-73;8:45 am]

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1142]

PART 1033—CAR SERVICE

Chicago, Rock Island and Pacific Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 9th day of July 1973.

It appearing, that the Chicago, Rock Island and Pacific Railroad Company (RI) is unable to operate over its line between Herrington, Kansas, and Salina, Kansas, because of track damage; that RI operations to and from Salina can be accomplished by use of the Missouri Pacific Railroad Company (MP) between Herrington and Salina, a distance of approximately 36 miles; that the MP has consented to use of such tracks by the RI; that operation by the RI over the aforementioned tracks of the MP is necessary in the interest of the public and the commerce of the people; that notice and public procedure herein are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1142 Service Order No. 1142.

(a) *Chicago, Rock Island and Pacific Railroad Company authorized to operate over tracks of Missouri Pacific Railroad Company.* The Chicago, Rock Island and Pacific Railroad Company (RI) be, and it is hereby, authorized to operate over tracks of the Missouri Pacific Railroad Company (MP) between Herrington, Kansas, and Salina, Kansas, a distance of approximately 36 miles.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the RI over tracks of the MP is deemed to be due to carrier's disability, the rates applicable to traffic moved by the RI over these tracks of the MP shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) *Effective date.* This order shall become effective at 11:59 p.m., July 11, 1973.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., October 15, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-171]

PART 1914—AREAS ELIGIBLE FOR THE SALE OF INSURANCE

Status of Participating Communities

Section 1914.4 of Part 1914 of Subchapter B of Chapter X of Title 24 of the Code of Federal Regulations is amended by adding in alphabetical sequence a new entry to the table. In this entry, a complete chronology of effective dates appears for each listed community. Each date appearing in the last column of the table is followed by a designation which indicates whether the date signifies the effective date of the authorization of the sale of flood insurance in the area under the emergency or the regular flood insurance program. The entry reads as follows:

§ 1914.4 Status of participating communities.

* * * * * * *

State	County	Location	Map No.	State map repository	Local map repository	Effective date of authorization of sale of flood insurance for area
*	*	*	*	*	*	*
Colorado	Adams	Westminster, City of.				July 13, Emergency.
Connecticut	New Haven	North Haven, Town of.				Do.
Michigan		Saginaw, Township of.				Do.
North Carolina	Durham	Durham, City of				Do.
Pennsylvania	Potter	Coudersport, Borough of.				Do.
Do	Carbon	Lehighton, Borough of.				Do.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968), effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended (secs. 408-410, Public Law 91-152, Dec. 24, 1969), 42 U.S.C. 4001-4127; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, Feb. 27, 1969)

Issued: July 9, 1973.

CHARLES W. WIECKING,
Acting Federal Insurance Administrator.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 525-73]

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

Subpart G-1—Office of Watergate Special Prosecution Force

DELEGATION OF AUTHORITY TO DESIGNATE ATTORNEYS TO CONDUCT LEGAL PROCEEDINGS

The Office of Watergate Special Prosecution Force was established effective May 25, 1973. (38 FR 14688). The purpose of this order is to make clear that the Special Prosecutor has full authority to exercise the Attorney General's authority under 28 U.S.C. 515(a) to designate attorneys to conduct legal proceedings, including grand jury proceedings.

By virtue of the authority vested in me by 28 U.S.C. 509, 510 and 5 U.S.C. 301, Subpart G-1 of Part 0 of Chapter I of Title 28, Code of Federal Regulations, is amended by adding the following new § 0.38 at the end thereof:

§ 0.38 Designation of attorneys.

The Special Prosecutor is authorized to designate attorneys to conduct legal proceedings, including grand jury proceedings.

Dated: July 8, 1973.

ELLIOTT RICHARDSON,
Attorney General.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 156—RURAL SERVICE

Approved Manufacturers of Rural Mailboxes

The list of approved manufacturers and suppliers of rural and contemporary style suburban mailboxes is amended by deleting the names of firms which are no longer engaged in such business, and by correcting the name of one listed firm. Accordingly paragraph (a)(5) of § 156.5 is amended, effective on July 16, 1973, as follows:

1. The Deshler Mail Box Company, 101 East Maple Street, Deshler, OH 43516 and the Northern Fabricators Corp., Post Office Box 89, Worthington, OH 43085 are hereby deleted, together with notations as to the types of mailboxes manufactured or supplied;

(2) The reference to "The Parker Co." is hereby changed to "Parker Mailboxes, Inc.". The address of the firm and the notations as to the types of mailboxes manufactured or supplied remain the same.

(39 U.S.C. 401)

ROGER P. CRAIG,
Deputy General Counsel.

PART 171—MONEY ORDERS

Caution in Use of Tables

Tables of foreign currencies published in this title may not reflect current exchange rates, because of fluctuations in exchange rates.

Accordingly, paragraph (b)(2) of § 171.2 is amended, on July 16, 1973, by adding a new subdivision (iv) to read as follows:

§ 171.2 International money orders.

• • • • • •

(b) • • •

(2) *Caution in use of tables.* • • •

(iv) Due to possible fluctuations in exchange rates, international money order exchange rates quoted in the following tables may not reflect the current exchange rates used by postal employees in carrying out money order transactions.

• • • • • •

(39 U.S.C. 401)

ROGER P. CRAIG,
Deputy General Counsel.

[FR Doc.73-14271 Filed 7-13-73;8:45 am]

PART 171—MONEY ORDERS

Change in Monetary Conversion Rate for Money Orders Payable in Canada

Existing Table No. 1, under § 171.2 *International money orders*, is based upon a conversion rate of American and Canadian money which is no longer applicable. Since March 8, 1973, the conversion rate has been $1.01 in United States dollars for $1.00 in Canadian dollars. Accordingly, Table No. 1 is revised to read as follows:

TABLE No. 1 2-7

(Rate: U.S. dollar equals .99 Canadian money)

FROM 1 CENTS TO 100 DOLLARS

United States money	Canadian money	United States money	Canadian money	United States money	Canadian money	United States money	Canadian money

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Massachusetts and Rhode Island

On April 30, 1971, pursuant to section 109 of the Clean Air Act, as amended, the Administrator promulgated national primary and secondary ambient air quality standards for six pollutants. The Act requires that the primary standards protect the public health with an adequate margin of safety and that the secondary standards protect the public welfare from any known or anticipated adverse effects. Under section 110 of the Act, States are required to prepare and submit to the Administrator plans for implementing the national ambient air quality standards in each air quality control region in the State. The Administrator published on May 31, 1972, his initial approvals and disapprovals of the State implementation plans developed and submitted under these provisions of Federal law.

On April 11, 1973, the United States Court of Appeals for the First Circuit decided the cases of "Natural Resources Defense Council, Inc., et al. v. Environmental Protection Agency," Case Nos. 72-1219 and 72-1224. These cases were filed pursuant to section 307(b)(1) of the Act and challenged the Administrator's approval of certain portions of the Massachusetts and Rhode Island implementation plans. The Court ordered that the Administrator disapprove several portions of these plans.

The Court first found that the Rhode Island plan did not expressly provide for revision after public hearings on the occasions and under the circumstances described in section 110(a)(2)(H) of the Clean Air Act. The Rhode Island plan is disapproved below insofar as it does not contain such provisions.

The Court also found that both Massachusetts and Rhode Island had variance statutes which allowed the State air pollution agencies to grant variances even after the mandatory dates for attainment of the national ambient air quality standards established in section 110 of the Clean Air Act. The Clean Air Act was interpreted to preclude States from granting variances after such dates except as provided in section 110(f) of the Clean Air Act. The Court held that the provisions of the Clean Air Act "not only empower, but also require, the Administrator to disapprove State statutes and regulations, or portions thereof, which are not in accordance with the requirements of the Clean Air Act." Accordingly, the Massachusetts and Rhode Island State variance statutes and the State regulations implementing that authority are herein disapproved insofar as they permit the granting of variances beyond the statutory attainment dates, without the approval of the Administrator, and under conditions inconsistent with the Court's opinion.

The authority of the Rhode Island State air pollution Director to issue abatement orders was also challenged and the Court applied the same interpretation of the Clean Air Act to this part of the Rhode Island law as it did to the variance procedure. That portion of the Rhode Island statutes is also disapproved below.

With respect to the Massachusetts plan provisions relating to reporting of emission data and the public availability of such data, the Court held that the discretionary aspect of the Massachusetts reporting requirements, which would require reports only upon a request by the State, should have been disapproved since the Clean Air Act provides that the State plan must require periodic reporting.

Finally, the Court found that the Massachusetts statute which prohibits the release of certain information obtained during inspections suggested that the State does not have the authority to compel public disclosure of emission data, requiring disapproval by the Administrator.

In addition to the disapprovals required by the Court order which are published below, the Administrator must promulgate regulations to replace the disapproved sections of the two State plans. Those regulations are published elsewhere in this issue of the FEDERAL REGISTER. The amendments set forth below are effective from the date of publication in the FEDERAL REGISTER since they are made pursuant to the Court order which requires the Administrator to disapprove these portions of the Massachusetts and Rhode Island State implementation plans.

(42 U.S.C. 1857c-5)

Dated July 11, 1973.

ROBERT W. FRI,
Acting Administrator,
Environmental Protection Agency.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart W—Massachusetts

1. Subpart W is amended by adding new §§ 52.1129, 52.1130, and 52.1131, as follows:

§ 52.1129 Legal authority.

(a) The requirements of § 51.11(a)(6) of this chapter are not met because G.L. c. 111 section 2B and G.L. c. 111 § 142B prevent the State from compelling public disclosure of emission data. These two statutory provisions are therefore disapproved to the extent they preclude the release of emission data.

§ 52.1130 Source surveillance.

(a) The reporting requirements of the Massachusetts plan are not adequate because Regulation 14 of the Department of Public Health Regulations for the Control of Air Pollution in the Berkshire Air Pollution Control District, Central Massachusetts Air Pollution Control District, Merrimack Valley Air Pollution Control District, Metropolitan Boston Air Pollution Control District, Pioneer Valley Air Pollution Control District and Southeastern Massachusetts Air Pollution Control District does not require periodic reports. Reports on emissions are only required by Regulation 14 if requested by the State, and it is therefore disapproved to that extent.

§ 52.1131 Variances.

(a) Regulations 50.1 and 2.4 of the Massachusetts Department of Public Health Regulations for the Control of Air Pollution in the Berkshire Air Pollution Control District, Central Massachusetts Air Pollution Control District, Merrimack Valley Air Pollution Control District, Metropolitan Boston Air Pollution Control District, Pioneer Valley Air Pollution Control District and Southeastern Massachusetts Air Pollution Control District are disapproved insofar as they permit the granting of variances (1) beyond the dates required for attainment of the national standards, (2) without the approval of the Administrator, and (3) for reasons not permitted by the Clean Air Act.

Subpart OO—Rhode Island

2. Subpart OO is amended by adding new §§ 52.2077, 52.2078, and 52.2079 as follows:

§ 52.2077 Revisions.

(a) The revision procedures of the Rhode Island plan are not adequate since the plan does not expressly provide for revisions at the times and under the conditions set forth in § 51.6 of this chapter.

§ 52.2078 Enforcement.

(a) Sections 23-25-5(h) and 23-25-8(a) of the General Laws of Rhode Island are disapproved insofar as they permit the Rhode Island Director of the Department of Health to issue abatement orders (1) that defer compliance with plan requirements beyond the dates required for attainment of the national standards, (2) without the approval of the Administrator, and (3) for reasons not permitted by the Clean Air Act.

§ 52.2079 Variances.

(a) Chapter 23-25-15 of the General Laws of Rhode Island is disapproved insofar as it permits the granting of variances (1) beyond the dates required for attainment of the national standards, (2) without the approval of the Administrator, and (3) for reasons not permitted by the Clean Air Act.

[FR Doc.73-14479 Filed 7-13-73;8:45 am]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Massachusetts and Rhode Island

On May 31, 1972 (37 FR 10842) pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved with specific exceptions State plans for implementation of the national ambient air quality standards. On April 11, 1973, the United States Court of Appeals for the First Circuit decided the cases of the "Natural Resources Defense Council, Inc., et al. v. Environmental Protection Agency," Case Nos. 72-1219 and 72-1224. The Court ordered the disapproval of certain portions of the Massachusetts and Rhode Island implementation plans, which had been approved by the Administrator on May 31, 1972. That formal disapproval is published in this issue of the FEDERAL REGISTER. The Court also required the Administrator to promulgate regulations amending the two plans in accordance with the terms of its order.

The regulations set forth below prescribe requirements in the Massachusetts plan for periodic reporting and public availability of emission data reported by sources in the State. Regulations setting forth revision requirements for the Rhode Island plan are also prescribed.

With respect to both the Massachusetts and Rhode Island plans, regulations are promulgated which specify the procedures and circumstances under which each State will be authorized to issue variances to sources subject to the provisions of its implementation plan. With respect to the Rhode Island plan, a similar provision is also set forth with respect to its enforcement authority.

Should Massachusetts or Rhode Island, following publication of these regulations, adopt identical or equivalent regulations, the Administrator will make an appropriate modification of his determination with respect to approvability of the affected portion of the State's plan and will rescind the pertinent Federal regulation.

The amendments set forth below are effective from the date of publication in the FEDERAL REGISTER since they are made to comply with the Court order.

(42 U.S.C. 1857c-5)

Dated: July 11, 1973.

ROBERT W. FRI,
Acting Administrator,
Environmental Protection Agency.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart W—Massachusetts

1. Section 52.1130 is amended by adding paragraph (b) as follows:

V 38 135 JUL 16 73 XUM

§ 52.1130 Source surveillance.

(a) • • •

(b) *Regulation for source recordkeeping and reporting.* (1) The owner or operator of any stationary source in the State of Massachusetts shall maintain records of the nature and amounts of emissions from such source and/or any other information as may be deemed necessary by the Massachusetts Department of Health to determine whether such source is in compliance with applicable emission limitations or other control measures.

(2) The information recorded shall be reported to the Department every six (6) months on June 30 and December 31 of each year. The information shall be submitted on such forms as the Department may prescribe.

(3) Information recorded by the owner or operator and copies of the reports submitted to the Department shall be retained by the owner or operator for two (2) years after the date on which the report is submitted.

2. Section 52.1131 is amended by adding paragraph (b) as follows:

§ 52.1131 Variances.

• • • • •

(b) *Regulation limiting variances.* (1) No variance from any requirement of the Massachusetts Implementation Plan shall be granted which does not meet the following requirements:

(i) A variance must require compliance with the plan requirement within the times and under the conditions specified in §§ 51.15(b) (1) and (2) of this chapter.

(ii) A variance may not defer compliance beyond the last date permitted by § 110 of the Act for attainment of the national standard which the plan implements unless the procedures and conditions set forth in section 110(f) of the Act are met.

(iii) A variance shall not be effective until it has been submitted to and approved by the Administrator in accordance with §§ 51.6, 51.8, 51.15 (b) and (c), and, if applicable, § 51.32(a)–(e) of this chapter.

(2) Notwithstanding the limitations of paragraph (b)(1)(ii) of this section, a variance may be granted which provides for compliance beyond the statutory attainment date for a national standard where compliance is not possible because of breakdowns or malfunctions of equipment, acts of God, or other unavoidable occurrences. However, such variance may not extend for more than three (3) months unless the procedures and conditions set forth in section 110(f) of the Act are met.

3. A new § 52.1132 is added as follows:

§ 52.1132 Public availability of emission data.

Emission data obtained from owners or operators of stationary sources pursuant to § 52.1130(b) shall be correlated with applicable emissions limitations and other control measures. All such emission data and correlations shall be available during normal business hours at the office of the Division of Environmental Health, Room 320, 600 Washington Street, Boston, Massachusetts, and/or at such other places as the Department shall specify.

Subpart OO—Rhode Island

4. Section 52.2077 is amended by adding paragraph (b) as follows:

§ 52.2077 Revisions.

• • • • •

(b) *Regulation for plan revisions.* (1) The Rhode Island implementation plan shall be revised:

(i) When necessary to take account of a revision of the national primary or secondary ambient air quality standard which it implements;

(ii) When improved or more expeditious methods of attaining a national standard which it implements become available;

(iii) When the Administrator finds that the plan is substantially inadequate to attain or maintain the national standard which it implements and issues notice of such finding pursuant to § 51.6 of this chapter.

(2) The Rhode Island implementation plan may be revised from time to time to the extent such revisions are consistent with the requirements applicable to implementation plans set forth in this chapter and the Act.

(3) No revision shall be effective until the hearing requirements of § 51.4 of this chapter have been satisfied.

5. Section 52.2078 is amended by adding paragraph (b) as follows:

§ 52.2078 Enforcement.

• • • • •

(b) *Regulation limiting administrative abatement orders.* (1) No order deferring compliance with a requirement of the Rhode Island Implementation Plan shall be issued by the Director of the Department of Health which does not meet the following requirements:

(i) An order must require compliance with the plan requirement within the times and under the conditions specified in § 51.15(b)(1) and (2) of this chapter.

(ii) An order may not defer compliance beyond the last date permitted by § 110 of the Act for attainment of the national standard which the plan implements unless the procedures and conditions set forth in § 110(f) of the Act are met.

(iii) An order shall not be effective until it has been submitted to and approved by the Administrator in accordance with §§ 51.6, 51.8 51.15(b) and (c), and, if applicable, 51.32(a)–(e) of this chapter.

(2) Notwithstanding the limitations of paragraph (b)(1)(ii) of this section, an order may be granted which provides for compliance beyond the statutory attainment date for a national standard where compliance is not possible because of breakdowns or malfunctions of equipment, acts of God, or other unavoidable occurrences. However, such order may not defer compliance for more than three (3) months unless the procedures and conditions set forth in section 110(f) of the Act are met.

6. Section 52.2079 is amended by adding paragraph (b) as follows:

§ 52.2079 Variances.

• • • • •

(b) *Regulation limiting variances.* (1) No variance from any requirement of the Rhode Island Implementation Plan shall be granted which does not meet the following requirements:

(i) A variance must require compliance with the plan requirement within the times and under the conditions specified in § 51.15(b)(1) and (2) of this chapter.

(ii) A variance may not defer compliance beyond the last date permitted by section 110 of the Act for attainment of the national standard which the plan implements unless the procedures and conditions set forth in section 110(f) of the Act are met.

(iii) A variance shall not be effective until it has been submitted and approved by the Administrator in accordance with §§ 51.6, 51.8, 51.15(b) and (c), and, if applicable, 51.32(a)–(e) of this chapter.

(2) Notwithstanding the limitations of paragraph (b)(1)(ii) of this section, a variance may be granted which provides for compliance beyond the statutory attainment date for a national standard where compliance is not possible because of breakdowns or malfunctions of equipment, acts of God, or other unavoidable occurrences. However, such variance may not extend for more than three (3) months unless the procedures and conditions set forth in section 110(f) of the Act are met.

Title 41—Public Contracts and Property Management

CHAPTER 15—ENVIRONMENTAL PROTECTION AGENCY

PART 15–16—PROCUREMENT FORMS

Subpart 15–16.7—Forms for Negotiated Architect-Engineer Contracts

ADDITIONAL GENERAL PROVISIONS

On pages 8458, 8459, 8460, and 8461 of the FEDERAL REGISTER dated April 2, 1973, there was published a notice of rule making to issue an amendment to 41 CFR Ch. 15, by adding a new § 15–16.701–50, Additional General Provisions to U.S. Standard Form 253, to Part 15–16. Interested persons were given until June 1, 1973, to submit written comments or objections to the proposed amendment. One comment was received which resulted in the substitution of the Government Rights (Unlimited) clause for the clause entitled "Drawings and other Data to Become the Property of the Government." The amendment is adopted with this one change.

Dated: July 10, 1973.

ROBERT W. FRI,
Acting Administrator.

Subpart 15–16.7—Forms for Negotiated Architect-Engineer Contracts

Sec.
15-16.701-50 Additional General Provisions to U.S. Standard Form 253.

AUTHORITY: 40 U.S.C. 486(c), sec. 205(c), 63 Stat. 377, as amended.

§ 15–16.701–50 Additional general provisions to U.S. Standard Form 253.

14. METHOD OF PAYMENT

(a) Estimates shall be made monthly of the amount and value of the work and services performed by the Architect-Engineer under this contract, such estimates to be prepared by the Architect-Engineer and accompanied by such supporting data as may be required by the Contracting Officer.

(b) Upon approval of such estimate by the Contracting Officer payment upon properly certified vouchers shall be made to the Contractor as soon as practicable of 90 percent of the amount as determined above, less all previous payments: *Provided, however,* That if the Contracting Officer determines that the work is substantially complete and that the amount of retained percentages is in excess of the amount considered by him to be adequate for the protection of the Government, he may at his discretion release to the Architect-Engineer such excess amount.

(c) Upon satisfactory completion by the Architect-Engineer of the work called for under the terms of this contract, and upon acceptance of such work by the Contracting Officer, the Architect-Engineer will be paid the unpaid balance of any money due for such work, including the retained percentages relating to this portion of the work.

(d) Upon satisfactory completion of the construction work and its final acceptance, the Architect-Engineer shall be paid the unpaid balance of any money due hereunder. Prior to such final payment under the contract, or prior settlement upon termination of the contract, and as a condition precedent thereto, the Architect-Engineer shall execute and deliver to the Contracting Officer a release of all claims against the Government arising under or by virtue of this contract, other than such claims, if any, as may be specifically excepted by the Architect-Engineer from the operation of the release in stated amounts to be set forth therein.

15. INTEREST

Notwithstanding any other provision of this contract, unless paid within 30 days all amounts that become payable by the Architect-Engineer to the Government under this contract (net of any applicable tax credit under the Internal Revenue Code) shall bear interest at the rate of six percent per annum from the date due until paid. Amounts shall be due upon the earliest one of (i) the date fixed pursuant to this contract, (ii) the date of the first demand for payment, consistent with the contract including demand consequent upon default termination, (iii) the date of a supplemental agreement fixing the amount, or (iv) if this contract provides for revision of prices, the date or written notice to the Architect-Engineer stating the amount of refund payable in connection with a pricing proposal or in connection with a negotiated pricing agreement not confirmed by contract supplement.

16. GRATUITIES

(a) The Government may by written notice to the Architect-Engineer, terminate the right of the Architect-Engineer to proceed under this contract if it is found, after notice and hearing, by the Administrator or his duly authorized representative, that gratuities (in the form of entertainment, gifts, or otherwise) were offered or given by the Architect-Engineer, or any agent or representative of the Architect-Engineer, to any officer or employee of the Government with a view toward securing a contract or securing favorable treatment with respect to the awarding or amending, or making of any determinations with respect to the performing of such contract: *Provided,* That the existence of the facts upon which the Administrator or his duly authorized representative makes such findings shall be in issue and may be reviewed in any competent court.

(b) In the event this contract is terminated as provided in paragraph (a) hereof, the Government shall be entitled (i) to pursue the same remedies against the Architect-Engineer as it could pursue in the event of a breach of the contract by the Architect-Engineer, and (ii) as a penalty in addition to any other damages to which it may be entitled by law, to exemplary damages in an amount (as determined by the Administrator or his duly authorized representative) which shall be not less than three nor more than ten times the costs incurred by the Architect-Engineer in providing any such gratuities to any such officer or employee.

(c) The rights and remedies of the Government provided in this caluse shall not be exclusive and are in addition to any rights and remedies provided by law or under this contract.

17. NOTICE TO THE GOVERNMENT OF DELAYS

Whenever the Architect-Engineer has knowledge that any actual or potential situation is delaying or threatens to delay the timely performance of this contract, the Architect-Engineer shall within ten (10) days give notice thereof, including all relevant information with respect thereto, to the Contracting Officer.

18. COMPOSITION OF CONTRACTOR

If the Architect-Engineer hereunder is comprised of more than one (1) legal entity, each such entity shall be jointly and severally liable hereunder.

19. LISTING OF EMPLOYMENT OPENINGS

(This clause is applicable pursuant to 41 CFR Part 50–250 if this contract is for $10,000 or more and will generate 400 or more man-days of employment.)

(a) The Contractor agrees that all employment openings of the Contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occurring at an establishment of the Contractor other than the one wherein the contract is being performed but excluding those of independently operated corporate affiliates, shall, to the maximum extent feasible, be offered for listing at an appropriate local office of the State employment service system wherein the opening occurs and to provide such periodic reports to such local office regarding employment openings and hires as may be required.

(b) Listing of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruitment source or effort and shall involve only the normal obligations which attach to the placing of a bona fide job order but does not require the hiring of any job applicant referred by the employment service system.

(c) The periodic reports required by paragraph (a) of this clause, shall be filed at least quarterly with the appropriate local office or, where the Contractor has more than one establishment in a State, with the central office of that State employment service. Such reports shall indicate for each establishment the number of individuals who were hired during the reporting period and the number of hires who were veterans who served in the Armed Forces on or after August 5, 1964, and who received other than a dishonorable discharge. The Contractor shall maintain copies of the reports submitted until the expiration of one (1) year after final payment under the contract, during which time they shall be made available, upon request, for examination by any authorized representatives of the Contracting Officer or of the Secretary of Labor.

(d) Whenever the Contractor becomes contractually bound to the listing provisions of this clause, he shall advise the employment service system in each State wherein he has establishments of the name and location of each such establishment in the State. As long as the Contractor is contractually bound to these provisions and has so advised the State employment service system, there is no need to advise the State system of subsequent contracts. The Contractor may advise the State systems when it is no longer bound by this contract clause.

(e) This clause does not apply (1) to the listing of employment openings which occur outside of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, and the Virgin Islands, and (2) to contracts with State and local governments.

(f) This clause does not apply to openings which the Contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once an employer decides to consider applicants outside of his own organization or employer-union arrangement for that opening.

(g) As used in this clause:

(1) "All employment openings" includes, but is not limited to, openings which occur in the following job categories: Production and nonproduction; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative, and professional openings which are compensated on a salary basis of less than $18,000 per year. This term includes full-time employment, temporary employment of more than three days' duration, and part-time employment.

(2) "Appropriate office of the State employment service system" means the local office of the Federal-State national system of public employment offices with assigned responsibility for serving the area of the establishment where the employment opening is to be filled, including the District of Columbia, the Commonwealth of Puerto Rico, Guam, and the Virgin Islands.

(3) "Openings which the Contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement," means employment openings for which no consideration will be given to persons outside the Contractor's organization (including any affiliates, subsidiaries, and parent companies) or outside of a special hiring arrangement which is part of the customary and traditional employment relationship which exists between the Contractor and representatives of his employees and includes any openings which the Contractor proposes to fill from regularly established "recall" or "rehire" lists or from union hiring halls.

(4) "Man-day of employment" means any day during which an employee performs more than one (1) hour of work.

V 38 I 135 JUL 16 73 XUM

(h) The Contractor agrees to place this clause (excluding this paragraph (h)) in any subcontract directly under this contract.

20. UTILIZATION OF MINORITY BUSINESS ENTERPRISES

(a) It is the policy of the Government that minority business enterprises shall have the maximum practicable opportunity to participate in the performance of Government contracts.

(b) The Architect-Engineer agrees to use his best efforts to carry out this policy in the award of his subcontracts to the fullest extent consistent with the efficient performance of this contract. As used in this contract, the term "minority business enterprise" means a business, at least 50 percent of which is owned by minority group members or, in case of publicly owned businesses, at least 51 percent of the stock of which is owned by minority group members. For the purposes of this definition, minority group members are Negroes, Spanish-speaking American persons, American-Orientals, American-Indians, American-Eskimos, and American Aleuts. Contractors may rely on written representations by subcontractors regarding their status as minority business enterprises in lieu of an independent investigation.

21. AUDIT

(a) For purposes of verifying that certified cost or pricing data submitted, in conjunction with the negotiation of this contract or any contract change or other modification involving an amount in excess of $100,000.00 was accurate, complete, and current, the Contracting Officer, or his authorized representatives, shall, until the expiration of three (3) years from the date of final payment under this contract or of the time periods for the particular records specified in Part 1–20 of the Federal Procurement Regulations (41 CFR Part 1–20), whichever expires earlier, have the right to examine those books, records, documents, papers, and other supporting data which involve transactions related to this contract or which will permit adequate evaluation of the cost or pricing data submitted, along with the computations and projections used therein.

(b) The Architect-Engineer agrees to insert this clause, including this paragraph (b), in all subcontracts hereunder when entered into exceed $100,000.00, unless the price is based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation. When so inserted, changes shall be made to designate the higher-tier subcontractor at the level involved as the contracting and certifying party; to add "of the Government prime contract" after "Contracting Officer;" and to add, at the end of (a) above, the words: "*Provided*, That, in the case of any contract change or modification, such change or modification results from a change or other modification to the Government prime contract." In each such excepted subcontract hereunder which when entered into exceeds $100,000.00, the Contractor shall insert the following clause:

AUDIT-PRICE ADJUSTMENTS

(a) This clause shall become operative only with respect to any change or other modification of this contract which involves a price adjustment in excess of $100,000.00 unless the price adjustment is based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public or prices set by law or regulation: *Provided*, That such change or other modification to this contract results from a change or other modification to the Government prime contract.

(b) For purposes of verifying that certified cost or pricing data submitted in conjunction with such a contract change or modification were accurate, complete, and current, the Contracting Officer of the Government prime contract, or his authorized representatives, shall, until the expiration of three (3) years from the date of final payment under this contract, or of the time periods for the particular records specified in Part 1–20 of the Federal Procurement Regulations (41 CFR Part 1–20), whichever expires earlier, have the right to examine those books, records, documents, papers, and other supporting data which involve transactions related to this contract or which will permit adequate evaluation of the cost or pricing data submitted, along with the computations and projections used therein.

(c) The subcontractor agrees to insert this clause, including this paragraph (c), in all subcontracts hereunder which when entered into exceed $100,000.00.

22. PRICE REDUCTION FOR DEFECTIVE COST OR PRICING DATA

(The provisions of this clause shall be applicable only if the amount of this contract exceeds $100,000.00.)

(a) If the Contracting Officer determines that any price, including profit or fee, negotiated in connection with this contract or any cost reimbursable under this contract was increased by any significant sums because the Architect-Engineer, or any subcontractor pursuant to the clause of this contract entitled "Subcontractor Cost or Pricing Data" or "Subcontractor Cost or Pricing Data—Price Adjustments," or any subcontract clause therein required, furnished incomplete or inaccurate cost or pricing data or data not current as certified in his Contractor's Certificate of Current Cost or Pricing Data, then such price or cost shall be reduced accordingly and the contract shall be modified in writing to reflect such reduction.

(b) Failure to agree on a reduction shall be a dispute concerning a question of fact within the meaning of the "Disputes" clause of this contract.

NOTE—Since the contract is subject to reduction under this clause by reason of defective cost or pricing data submitted in connection with certain subcontracts, it is expected that the Architect-Engineer may wish to include a clause in each such subcontract requiring the subcontractor to appropriately indemnify the Architect-Engineer. It is also expected that any subcontractor subject to such indemnification will generally require substantially similar indemnification for defective cost or pricing data required to be submitted by his lower tier subcontractors.

23. SUBCONTRACTOR COST AND PRICING DATA

(The provisions of this clause shall be applicable only if the amount of this contract exceeds $100,000.00.)

(a) The Architect-Engineer shall require subcontractors hereunder to submit in writing cost or pricing data under the following circumstances:

(1) Prior to award of any cost-reimbursement type, time and material, labor-hour, incentive, or price redeterminable subcontract, change or other modification, the price of which is expected to exceed $100,000.00; and

(2) Prior to the award of any other subcontract, the price of which is expected to exceed $100,000.00 or to the pricing of any subcontract change or other modification for which the price adjustment is expected to exceed $100,000.00, where the price or price adjustment is not based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation.

(b) The Architect-Engineer shall require subcontractors to certify, in substantially the same form as that used in the certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief, the cost and pricing data submitted under (a) above are accurate, complete, and current as of the date of the execution, which date shall be as close as possible to the date of agreement on the negotiated price of the subcontract or subcontract change or modification.

(c) The Architect-Engineer shall insert the substance of this clause including this paragraph (c) in each of his cost-reimbursement type, time and material, labor-hour, price redeterminable, or incentive subcontracts hereunder, and in any other subcontract hereunder which exceeds $100,000.00 unless the price thereof is based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation. In each such excepted subcontract hereunder which exceeds $100,000.00, the Architect-Engineer shall insert the substance of the following clause:

SUBCONTRACTOR COST AND PRICING DATA-PRICE ADJUSTMENTS

(a) Paragraphs (b) and (c) of this clause shall become operative only with respect to any change or other modification made pursuant to one or more provisions of this contract which involves a price adjustment in excess of $100,000.00. The requirements of this clause shall be limited to such price adjustments.

(b) The Architect-Engineer shall require subcontractors hereunder to submit cost or pricing data under the following circumstances:

(1) Prior to award of any cost-reimbursement type, time and material, labor-hour, incentive, or price redeterminable subcontract, the price of which is expected to exceed $100,000.00; and

(2) Prior to award of any other subcontract, the price of which is expected to exceed $100,000.00, or to the pricing of any subcontract change or other modification for which the price adjustment is expected to exceed $100,000.00, where the price or price adjustment is not based on adequate price competition, established catalog or market prices of commercial items sold in substantial quantities to the general public, or prices set by law or regulation.

(c) The Architect-Engineer shall require subcontractors to certify, in substantially the same form as that used in the Certificate by the Prime Contractor to the Government, that, to the best of their knowledge and belief, the cost and pricing data submitted under (b) above are accurate, complete, and current as of the date of the execution, which date shall be as close as possible to the date of agreement on the negotiated price of the contract modification.

(d) The Architect-Engineer shall insert the substance of this clause including this paragraph (d) in each subcontract hereunder which exceeds $100,000.00.

24. NOTICE OF MAXIMUM PERMISSIBLE ESCALATION IN WAGE AND PRICE STANDARDS

Offerors are advised of standards established under Executive Orders 11615, 11627, and 11640 setting maximum permissible percentage of escalation in wage rates and price increases. Such standards call for wage rate increases of no more than 5.5 percent per annum unless specific exceptions have been granted by the Pay Board. The price standard established by the Price Commission has the objective of holding economy-wide price increases to 2.5 percent per annum (three percent (3%) per annum in the case of small business firms). To achieve this target, firms are allowed to increase prices to reflect allowable costs incurred since the last price increase or since January 1, 1971, whichever was later, and such costs as firms are continuing to incur, adjusted to reflect productivity gains. These price increases may not result in profit margins on sales which exceed the firm's profit margins for the highest two of the last three fiscal years ending before August 15, 1971. Average productivity gains are estimated to be 3 percent or higher for the economy annually for 1972 and 1973.

25. PRICE CERTIFICATION

(a) By submission of this bid (offer) bidder (offeror) certifies (1) that he is in compliance and will continue to comply with the requirements of Executive Order 11640, January 26, 1972, or (2) that he is a small business concern (as determined in accordance with the regulations of the Cost of Living Council in 6 CFR 101.51.37, FR 8939, May 3, 1972) and as such is exempt from wage and price controls (except where health services or construction are involved).

(b) Prior to the payment of invoices under this contract, the Contractor shall place on, or attach to, each invoice submitted one of the following certifications, as appropriate:

I hereby certify that the amounts invoiced herein do not exceed the lower of (1) the contract price, or (2) maximum levels established in accordance with Executive Order 11640, January 26, 1972.

I hereby certify that I am a small business concern employing 60 or fewer employees (as determined in accordance with the regulations of the Cost of Living Council in 6 CFR 101.51.37 FR 8939, May 3, 1972, and any subsequent amendments) and as such am exempt from wage and price controls as provided by the Council's regulation.

(c) The Contractor agrees to insert the substance of this clause, including this paragraph (c), in all subcontracts for supplies or services issued under this contract.

26. PRICING ADJUSTMENTS

When costs are a factor in any determination of a contract price adjustment pursuant to the "Changes" clause or any other provision of this contract, such costs shall be in accordance with the contract cost principles and procedures in Part 1-15 of the Federal Procurement Regulations (41 CFR Part 1–15) or section XV of the Armed Services Procurement Regulation in effect on the date of this contract.

27. PAYMENT OF INTEREST ON CONTRACTORS' CLAIMS

(a) If an appeal is filed by the Contractor from a final decision of the Contracting Officer under the disputes clause of this contract, denying a claim arising under the contract, simple interest on the amount of the claim finally determined owed by the Government shall be payable to the Contractor. Such interest shall be at the rate determined by the Secretary of the Treasury pursuant to Public Law 92–41, 85 Stat. 97, from the date the Contractor furnishes to the Contracting Officer his written appeal under the disputes clause of this contract, to the date of (1) a final judgment by a court of competent jurisdiction, or (2) mailing to the Contractor of a supplemental agreement for execution either confirming completed negotiations between the parties or carrying out a decision of a board of contract appeals.

(b) Notwithstanding (a), above, (1) interest shall be applied only from the date payment was due, if such date is later than the filing of appeal, and (2) interest shall not be paid for any period of time that the Contracting Officer determines the Contractor has unduly delayed in pursuing his remedies before a board of contract appeals or a court of competent jurisdiction.

28. ALTERATIONS

The following alterations are made in Standard Form 253:

Clause eight (8), Examination of Records, is deleted and the following clause substituted in lieu thereof:

EXAMINATION OF RECORDS BY COMPTROLLER GENERAL

(a) This clause is applicable if the amount of this contract exceeds $2,500 and was entered into by means of negotiation, including small business restricted advertising, but is not applicable if this contract was entered into by means of formal advertising.

(b) The Architect-Engineer agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three (3) years after final payment under this contract or such lesser time specified in either appendix M of the Armed Services Procurement Regulations or the Federal Procurement Regulations Part 1–20, as appropriate, have access to and the right to examine any directly pertinent books, documents, papers, and records of the Architect-Engineer involving transactions related to this contract.

(c) The Architect-Engineer further agrees to include in all his subcontracts hereunder a provision to the effect that the subcontractor agrees that the Comptroller General of the United States or any of his duly authorized representatives shall, until the expiration of three (3) years after final payment under the subcontract or such lesser time specified in either appendix M of the Armed Services Procurement Regulation or the Federal Procurement Regulations Part 1–20, as appropriate, have access to and the right to examine any directly pertinent books, documents, papers, and records of such subcontractor, involving transactions related to the subcontract. The term "subcontract" as used in this clause excludes (1) purchase orders not exceeding $2,500.00 and (2) subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public.

(d) The periods of access and examination described in (b) and (c) above, for records which relate to (1) appeals under the "Disputes" clause of this contract, (2) litigation or the settlement of claims arising out of the performance of this contract, or (3) costs and expenses of this contract as to which exception has been taken by the Comptroller General, or any of his duly authorized representatives, shall continue until such appeals, litigations, claims, or exceptions have been disposed of.

The following alterations are made in Standard Form 19–B, Representations and Certifications (Construction Contract) October 1969 Edition:

1. Change the title of the form to read: Representations and Certifications (Construction and Architect-Engineer Contracts) (for use with Standard Forms 19, 21, and 252).

2. Change the Reference block to read: Reference (Enter same No.(s) as on SF 19, 21, and 252).

3. Change (c) of paragraph 1, Small Business, to read:

(c) Had average annual receipts for the preceding three (3) fiscal years not exceeding $7,500,000.00 for construction contracts, $1,000,000.00 for Architect-Engineer contracts primarily architectural, and $5,000,000.00 for Architect-Engineer contracts primarily engineering.

SUBCHAPTER C—MINERALS MANAGEMENT (3000)

[Circular No. 2346]

PART 3540—USE PERMITS

Subpart 3541—Mineral Collection Permits

On page 1591 of the FEDERAL REGISTER dated January 16, 1973, there was published a notice and text of a proposed amendment to Subpart 3541 of Title 43, Code of Federal Regulations. The purpose of the amendment is to incorporate into the regulations provisions for authorizing mineral collectors to enter upon acquired National Forest System lands, within areas herein designated, to collect mineral specimens under terms and conditions necessary for the conservation of natural resources, multiple use of National Forest System lands, equitable distribution of recreation privileges, and public safety. Presently there are no regulations providing such authority, and rock-hounding on the acquired lands is not permitted.

Interested persons were given until February 19, 1973, to submit comments, suggestions, or objections to the proposed amendment. One hundred and sixty-seven comments were received. One hundred and sixty-five commenters favored adoption of the regulations and offered suggestions for the permit form. The two comments received in opposition to the proposal objected to collection of fees for rock collecting on the designated areas. One of those indicated a preference for awaiting action by Congress. The desirability of opening the lands to rockhounders and the need to manage this use militates against further delay.

Two changes in the proposed regulations have been made for the purpose of clarity. The description of the Emerald Creek Garnet Area and the Moat Mountain Smoky Quartz Area in § 3541.1 has been changed to reflect their proximity to the U.S. Forest Service Ranger Districts where permits may be obtained.

In § 3541.2, the last sentence has been changed to indicate that permits must be secured from the appropriate District Ranger. Permits will not be available from the Forest Supervisor as indicated in the proposed rulemaking.

The areas involved are relatively small. Rockhounding in the areas will be closely controlled to minimize environmental impacts. Heavy equipment, explosives, and other destructive agents will be forbidden. It is hereby determined that the publication of this rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

The proposed amendment is hereby adopted with the above indicated changes, and is set forth below. This

V 38 I 135 JUL 16 73 XUM

amendment shall become effective August 13, 1973.

A new subpart is added to Part 3540 to read as follows:

Subpart 3541—Mineral Collection Permits

Sec.

3541.0–1 Purpose.
3541.0–2 Objectives.
3541.0–5 Definitions.
3541.1 Lands to which applicable.
3541.2 Permit requirements.
3541.3 Fees for issuance of permits.
3541.4 Terms and conditions of permits.
3541.5 Penalty for violations.
3541.6 Trespass.

AUTHORITY: Act of March 4, 1917 (16 U.S.C. 520).

Subpart 3541—Mineral Collection Permits

§ 3541.0–1 Purpose.

The purpose of the regulations in this Subpart 3541 is to authorize mineral collectors to enter upon lands pursuant to § 3501.2–6(d) of this chapter for the purpose of searching for and removing mineral specimens.

§ 3541.0–2 Objectives.

The objective is to make certain acquired lands within the National Forest System available to mineral collectors at a reasonable fee and under terms and conditions necessary for the conservation of natural resources, multiple use of National Forest System lands, equitable distribution of recreation privileges, and public safety.

§ 3541.0–5 Definitions.

For purposes of the regulations in this Subpart 3541,

(a) "Chief" is the Chief of the Forest Service or his delegate.

(b) "Fee" is a user charge for searching for and removing mineral specimens. It includes a reasonable amount to defray the cost of rehabilitation and revegetation of the lands.

(c) "Permit" is the authorization issued upon payment of a fee to a permittee to search for or remove mineral specimens.

(d) "Permittee" is the holder of a permit.

§ 3541.1 Lands to which applicable.

The acquired lands for which a permit may be obtained are clearly identifiable by boundary markings and corner monuments at each site and by a boundary map available for public inspection in the offices of the Forest Supervisor and District Ranger in charge of the lands. Areas designated for mineral collecting are described as follows:

EMERALD CREEK GARNET AREA

On the East Fork of Emerald Creek, St. Maries Ranger District, St. Joe National Forest, Idaho, about 8 airline miles south of Fernwood and 4 miles west of Clarkia.

MOAT MOUNTAIN SMOKY QUARTZ AREA

About 1,000 feet south of Thompson Falls on Elm Brook, Town of Hales location, on the Saco Ranger District, White Mountain National Forest, N.H., and about 5 miles northwest of Ranger District headquarters in Conway.

§ 3541.2 Permit requirements.

Any individual who desires to search for or remove mineral specimens on acquired National Forest System lands must first have a permit to do so on the lands involved, signed by the authorized representative of the Bureau of Land Management. Permits can be secured in person from the District Ranger in charge of the area.

§ 3541.3 Fees for issuance of permits.

Fees will be determined by the Director and will be based on charges for comparable privileges on private and State lands, including recognition of the costs of supervising the activities of permittees, maintaining and providing improvements, and rehabilitating and revegetating the lands disturbed by mineral collecting.

§ 3541.4 Terms and conditions of permits.

The permit will contain terms and conditions which are deemed necessary by the Director and by the Chief to achieve the objectives of the regulations in this subpart, including, but not limited to, the following:

(a) Limits on the amount of material that may be taken by a permittee per day, calendar year, or other period of time, and the total number of days per calendar year any permittee shall be permitted to collect on any site.

(b) Prohibition or restriction of the use of explosives.

(c) Specifications as to the type of tools and equipment which may be used.

(d) Measures to be taken to prevent destruction of other natural resources or antiquities, to rehabilitate the land after removal of mineral specimens, and to protect the environment in any other respect deemed desirable.

(e) Use of fire.

(f) Cleanup.

(g) Avoidance of hazards.

§ 3541.5 Penalty for violations.

Permits are subject to immediate cancellation if any of the terms and conditions are violated. In such case no portion of the fee will be refunded. The Director may refuse to issue a permit to any individual who violated the terms and conditions of any prior permit.

§ 3541.6 Trespass.

Removal of mineral specimens from any National Forest System lands described in § 3541.1 without, or in violation of, a permit issued under the regulations in this subpart is a trespass against the United States. Trespassers will be liable in damages to the United States and may be subject to criminal prosecution.

JACK O. HORTON,
Assistant Secretary of the Interior.

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER N—DANGEROUS CARGO

[CGD 72–229R]

PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OR SUBSTANCES AND COMBUSTIBLE LIQUIDS ON BOARD VESSELS

Metal Borings, Shavings, Turnings, Cuttings

The purpose of this amendment to the Dangerous Cargo Regulations is to improve the requirements applicable to bulk shipments by barge or vessel of the hazardous article currently listed as metal borings, shavings, turnings, cuttings.

In the December 6, 1972 issue of the FEDERAL REGISTER (37 FR 25957) a notice of proposed rulemaking was published concerning this amendment. Interested persons were given 40 days in which to submit written comments and a public hearing was held on January 11, 1973. Eleven written and five oral comments were received. Several commenters indicated the need for additional time in which to prepare more comprehensive comments. In the January 19, 1973 issue of the FEDERAL REGISTER (38 FR 1937) the deadline for written comments was extended from January 15, 1973 to March 1, 1973. An additional seven written comments were received.

Several commenters strongly urged that barge shipments of the material in bulk, especially those made entirely on the navigable waters of the United States, should be completely exempted from the proposed conditions for bulk shipments. It was argued that barge shipments made entirely on the navigable waters are either of such short duration or of such close proximity to a port of refuge that the requirements would be unnecessary. Therefore, the requirements are not applicable to bulk shipments of the material by barges in cases when the entire voyage involved in such a shipment is conducted or is to be conducted on the waters of the United States.

Several commenters requested that coastwise or Great Lakes' shipments of the bulk material by cargo vessel be exempted from the proposed conditions for bulk shipments. Again, it was argued that these shipments are either of such short duration or of such close proximity to a port of refuge that many of the requirements, if not all, would be unnecessary. It was especially desired by most of the commenters that the specific temperature requirements to meet prior to the sailing of the vessel be relaxed in the case of a short-duration voyage of the vessel to another port for the purposes of loading more of the material in bulk. It was suggested that a short-duration voyage be considered one of 12 hours underway-time or less and that the vessel be permitted to sail when the temperature of the bulk material was less than 190°F and showing a downward trend. In view of the fact that cargo vessel shipments are manned shipments the blanket exemption for Great Lakes' or coastwise shipments is not considered appropriate. On the other hand, the suggestions pertaining to short-duration shipments are considered practical and acceptable. Therefore, the amendment contains somewhat relaxed requirements regarding the conditions for sailing for certain short-duration voyages.

Several commenters objected to the proposed restrictions concerning when a vessel may sail upon the completion of loading of the bulk material. The proposed conditions reflect the conditions under which approximately 100 shipments of the bulk material were conducted over a five-year period without any known incident, casualty or damage attributed to the heating of the material. Only one comprehensive suggestion was received regarding alternative sailing conditions. However, since April 1, 1973, two vessels transporting the bulk material reported severe heating in the material (emergency action and delay of the vessel were required); and since the vessels each left a United States port under conditions consistent with those suggested as an alternative to the proposed sailing conditions, the suggested alternative sailing conditions are considered unacceptable. Therefore, the amendment contains conditions for sailing as originally proposed except as previously indicated for certain short-duration voyages.

One commenter pointed out that combustible material should not be permitted in holds containing the bulk material. It was indicated that combustible material could contribute to the spontaneous heating properties of the bulk material even if the proposed conditions for the loading of other cargo were met. Therefore, the amendment prohibits the stowage of combustible material in holds containing the bulk material.

Several commenters indicated the conditions for the loading of other cargo in holds containing the bulk material were unnecessarily restrictive. One commenter desired conditions analogous to the sailing conditions. Since the loading of other cargo in a hold containing the bulk material could seriously hinder any emergency operations and may even camouflage increases in temperature, the specified temperature of the proposed conditions is considered the most acceptable. It is agreed, however, that the conditions should reflect only the temperature of the bulk material upon the completion of loading. Therefore, the amendment requires all temperatures in the hold containing the bulk material to be less than 130°F at the time the loading of the other cargo takes place and must not have shown any increase for at least eight hours prior to such loading.

Several commenters indicated the commonly used temperature-measuring devices are only eight inches in length. Therefore, the depth that temperatures must be taken in the bulk material has been revised to include depths of eight inches.

All other comments received consisted of suggestions for editorial changes for clarity. These comments have been incorporated into the amendment as determined appropriate.

In consideration of the foregoing, Part 146 of Title 46 of the Code of Federal Regulations is amended as follows:

1. By amending Subpart 146.27 by adding a new § 146.27–28 to read as follows:

§ 146.27–28 Metal borings, shavings, turnings and cuttings.

(a) *Applicability.* This section applies to the stowage and transportation in bulk of the hazardous article described as metal borings, shavings, turnings and cuttings on board cargo vessels and barges, except any barge on which the article is stowed for or transported on a voyage entirely on the navigable waters of the United States.

(b) *Conditions for stowage and transportation.* Metal borings, shavings, turnings and cuttings may be stowed and transported in bulk on board cargo vessels or barges to which this part applies if the following conditions are met:

(1) Each hold in which the article is stowed must have a fire extinguishment system that uses carbon dioxide or an equivalent to carbon dioxide with respect to fire extinguishing capability. Temporary systems are acceptable.

(2) All wooden sweat battens and dunnage and debris must be removed from the hold before the article is loaded.

(3) During loading and transporting, the bilge of each hold in which the article is stowed or is to be stowed must be as dry as practicable.

(4) During loading, the article must be compacted in the hold as frequently as practicable with a bulldozer or means that provides equivalent surface compaction. Upon completion of loading, the article must be trimmed to eliminate peaks or mounds and compacted.

(5) Other cargo may be loaded in a hold containing the article if—

(i) The cargo to be loaded in the same hold with the article is not another hazardous material as defined in this Part or combustible material;

(ii) The loading of the article is completed first; and

(iii) The temperature of the article in the hold is 130°F or less and has not increased within at least eight hours prior to the loading of the other cargo.

(6) During loading, the temperature of the article in the pile being loaded must be less than 130°F.

(7) Upon completion of loading, the cargo vessel or barge may not leave the port unless—

(i) The temperature of the article in each hold is less than 150°F and, if the temperature of the article in a hold has been more than 150°F during loading, the temperature of the article has shown a downward trend below 150°F for at least eight hours after completion of loading of the hold; or

(ii) The cargo vessel or barge intends to sail directly to another port that is no further than twelve hours sailing time for the vessel concerned for the purpose of loading more of the article in bulk or to completely off-load the article, and the temperature of the article is less than 190°F and has shown a downward trend for at least eight hours after completion of loading.

(c) *Temperature of article.* For the purposes of each temperature requirement of this section, the temperature of the article is the highest temperature taken between eight and fourteen inches below the surface at ten-foot intervals over its length and width.

(d) *Duties of master and person in charge.* The following rules apply to the master or person in charge of each cargo vessel or barge that is loading and transporting the article:

(1) The master or person in charge of a cargo vessel or barge that is loading or transporting the article shall ensure that the temperature of the article is taken—

(i) Before loading;

(ii) During loading, in each hold and in the pile being loaded at least every twenty-four hours and, if the temperature is rising, as often as necessary to ensure the conditions in this section are met; and

(iii) After loading in each hold at least every twenty-four hours.

(2) During loading, if the temperature of the article in a hold is 200°F or higher, the master or person in charge of the cargo vessel or barge shall notify the Coast Guard Captain of the Port and suspend loading until the temperature of the article is less than 190°F.

(3) After loading—

(i) If the temperature of the article is 150°F or above, the master or person in charge shall notify the Captain of the Port and ensure that the cargo vessel or barge remains in the port area until the conditions of paragraph (b)(7)(i) of this section are met; or

(ii) In the case of a short-duration voyage to which paragraph (b)(7)(ii) of this section applies, if the temperature of the article in a hold is 190°F or above, the master or person in charge shall notify the Captain of the Port and ensure that the cargo vessel or barge remains in the port area until the conditions of paragraph (b)(7)(ii) of this section are met.

(4) Except for shipments of the article in bulk which leave the port of loading under the conditions specified in paragraph (b)(7)(ii) of this section, after the cargo vessel or barge leaves the port, if the temperature of the article hold rises above 149°F, the master shall notify the nearest Coast Guard Captain of the Port as soon as possible of—

(i) The name, nationality, and position of the vessel or barge;

(ii) The most recent temperature taken;

(iii) The length of time that the temperature has been above 149° F and the rate of rise, if any;

V 38 I 135 JUL 16 73 XUM

(iv) The port where the article was loaded and the destination of the article;
(v) The last port of call of the vessel or barge and its next port of call;
(vi) What action has been taken; and
(vii) Whether any other cargo is endangered.

(5) The master of a cargo vessel or barge that is transporting the article shall ensure that each temperature taken to meet the conditions of this section is recorded.

2. By amending Subpart 146.27 by completely revising the second column of § 146.27–100 for the article metal borings, shavings, turnings, cuttings as follows:

• • • Characteristic properties, cautions	
• • • markings required	
Small pieces of metal scrap which may be mixed with cutting oils and combustible waste. The scrap when shipped is subject to spontaneous heating and ignition. Excessive amounts of cast iron borings or organic materials may encourage such heating. The scrap should be protected from moisture prior to and after loading. During loading, vessels' or barges' compartments should be closed or otherwise protected during inclement weather to keep the material dry; water, particularly sea water, should not be applied to the material except in the case of extreme emergency. Holds containing the scrap may have a reduced oxygen content; personnel should take precautions against possible asphyxiation prior to entering such holds.	Do not stow explosives in a hold above, below or adjacent to holds used for the stowage of metal scrap. Do not stow metal scrap in the same hold or compartment with any other hazardous materials cargo. Bulk shipments on board cargo vessels and certain barges must be made under the conditions prescribed in § 146.27–28.

• • • • • •

Effective date. This amendment is effective on October 19, 1973.

(R.S. 4472, as amended, sec. 1, 19 Stat. 252; sec. 6(b)(1), 80 Stat. 937; 46 U.S.C. 170, 49 U.S.C. 1655(b)(1); 49 CFR 1.46(b))

Dated: July 9, 1973.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19530; FCC 73–735]

PART 1—PRACTICE AND PROCEDURE
PART 73—RADIO BROADCAST SERVICES
International Broadcasting Stations

Report and order. In the matter of amendment of § 1.574 and Part 73, Subpart F, of the Commission's rules and regulations relating to international broadcasting stations, Docket No. 19530.

1. On June 27, 1972, the Commission released a notice of proposed rulemaking in the above-entitled proceeding (FCC 72–540, 37 FR 12969 and 37 FR 18632) in which it proposed broad revisions of its rules which govern international broadcasting. Comments and reply comments having been duly filed, the matter is ready for decision.[1]

INTRODUCTION

2. In addition to licensing and regulating domestic broadcasting stations (AM, FM, TV), the Commission also licenses and regulates international broadcasting stations located in the United States. Whereas the signals of the former are intended to be received by the public in this country, those of the latter are intended to be received directly by the general public in foreign countries. The Voice of America (VOA) also operates international broadcasting stations in this country but, as is the case with other governmental radio operations, they are neither licensed nor regulated by the Commission.[2]

3. International broadcasting stations, both those of Commission licensees and those of the VOA, operate in seven bands between 5,950 kHz and 26,100 kHz. These bands, which are allocated to the broadcasting service by the Radio Regulations annexed to the International Telecommunications Convention (Montreux 1965), are also used by other countries throughout the world for international broadcasting. The propagation characteristics of frequencies in these bands vary greatly with the time of day, season of the year, and the sunspot number. Because of this, unlike licenses of domestic broadcasting stations which always specify the frequency or channel of operation of the station, licenses of international broadcasting stations specify no frequency. Instead, four times each year, as the seasons change, the Commission assigns each licensee specified frequencies to be used by it (using directional arrays) for transmission of signals to specified areas of the world during specified times of the day. These assignments of frequencies are called seasonal schedules. When a seasonal schedule is issued, it becomes an attachment to the license, replacing the preceding schedule.[3]

4. The rule revisions proposed in the notice covered a variety of matters: (1) Placing a ceiling on frequency usage by private international broadcasters; (2) conforming seasonal schedule application procedures to those required by international agreement; (3) amending the technical requirements concerning station operation; and (4) other topics, e.g., proposing that fees be charged in connection with the processing of applications for seasonal schedules, changing the length of license period, and inquiring whether common ownership of more than one international broadcast station should be permitted.

FREQUENCY USAGE

5. The notice pointed out that between the years of 1950 and 1970 the number of short-wave transmitters in the international broadcasting service throughout the world more than tripled and the number of frequency-hours used daily by international broadcasters in the entire world increased from 4,000 to 10,000. This increase has made it more and more difficult for international broadcasters to obtain frequencies that will provide satisfactory service. The Notice also mentioned that VOA frequency-hour usage had increased over the years and that it had averaged 440 frequency-hours per day for the previous five years for its transmitters located in the continental United States. On the other hand, it stated, private international broadcasters licensed by the Commission had been using about 75 frequency-hours per day in recent years and only 45 in the previous two years. It noted that while increased budgets of VOA demonstrate Congressional support of the proliferating VOA broadcast activities, the Smith-Mundt Act[4] (which expresses the policy that the government shall not have a monopoly of international broadcasting) shows Congressional approval of private international broadcasting as well.

THE FREQUENCY USAGE PROPOSAL

6. Taking into account existing and anticipated frequency congestion throughout the world, existing and anticipated VOA usage, and the policy contained in the Smith-Mundt Act, we proposed to amend our rules to provide that private international broadcasters as a group could use not more than 100 frequency-hours per day. This, we believed, represented a reasonable balance of the pertinent factors bearing on the matter of frequency usage. It was a ceiling that appeared both to allow for some growth of private international broadcasting and to be reasonably related to existing and expected frequency usage.

7. Although we do not here repeat all the details of the proposal, essentially it provided the following: (1) The Commission would not license more than a total of 10 operating main transmitters for all international broadcasting stations; (2) each licensee would be entitled to 10 frequency-hours per day for each such transmitter it was licensed to operate; (3) if the total number of frequency-hours requested by all licensees was less than 100 per day, the request of each licensee would be granted (even if more than 10 frequency-hours per transmitter were requested), but if the total exceeded 100, the frequency-hours would be divided in proportion to the number of transmitters each licensee had. Under the proposed rule, each licensee had the responsibility of making all technical studies to show that frequency-hours requested by it were available and suitable for use as proposed.

8. Comments on the proposal vary from those of VOA which feels that the 100-frequency-hour proposal is not stringent enough, to those of parties who believe that there should be no limitations whatsoever on frequency-hour usage by private international broadcasters so long as licensees can demonstrate that the frequencies they request each season are available and suitable. Between these extremes are comments which suggest that there be no ceiling on frequency-hour usage by Commission licensees for a specified period, e.g., 3 years or 5 years, and that the Commission then review the matter in the light of experience as to actual demand for frequency-hours by private international broadcasters. Also lying between the extremes are comments which concede implicitly or explicitly that there may be a need for a ceiling but that the one proposed by the Commission is too low.

ARGUMENTS AGAINST THE PROPOSAL

9. A composite of some of the principal points made by opponents of the proposal follows. Article 10 of the Radio regulations annexed to the International Telecommunications Convention (Montreux, 1965), which has been ratified by the United States, contemplates coordination between countries as to their frequency-hour usage, and an amicable working out of their difference on the basis of past usage, need, and availability of frequencies. The radio regulations set no limit on frequency-hour usage by international broadcasters. Establishing a ceiling will not help to relieve frequency congestion because the frequencies that Commission licensees are not allowed to use will be allocated to other users at coordinating conferences. Availability of frequencies (which depends on many variables such as time of operation, target area, sunspot number) should be the governing standard rather than an artificial limitation which has little or no relation to the frequencies available to a U.S. international broadcaster. Such an approach would be self-policing because licensees would not wish to spend money to broadcast over frequencies unless they believed that they had selected frequencies over which the programming would get through to the target area. If the United States unilaterally restricts its frequency usage, it will be the only nation that does so, and for no compelling reason. Moreover, having a fixed ceiling deprives private international broadcasters of the use of additional frequencies that become available during periods of increased sunspot activity.

10. Present private international broadcasting from the United States is done mostly from the east coast. Many important areas of the world, such as Australia, China, New Zealand, Indonesia, Japan, Micronesia, Russia, and Southeast Asia do not presently receive service from Commission licensees. If the proposed ceiling of 100 frequency-hours is adopted, provision should be made to "stretch" it if a showing is made that a presently unserved area is proposed to be served. Or, the ceiling provisions should not apply to proposals for international broadcasting stations in states or territories outside the continental forty-eight states which intend to provide service to target areas not served by private international broadcasters. In other words, the usage of frequency-hours should be based not only on availability of frequencies, as mentioned above, but also on need for service.

11. The Smith-Mundt Act, as modified by Reorganization Plan No. 8 of 1953,[5] provides that the Director of the USIA shall reduce government information activities whenever corresponding private information dissemination is found to be adequate, and that nothing in the Act shall be construed to give the USIA (of which the VOA is a branch) a monopoly in the production or sponsorship on the air of short-wave broadcasting programs. To set a ceiling on private international broadcasters that would give them less than one-fifth of the frequency-hours used by the U.S.-based stations of VOA borders on being contrary to this mandate.

12. A credibility gap attaches to governmental broadcasting. Broadcasting by private stations is often more effective because it has a greater credibility. Having no ceiling on frequency-hours usage will promote more private international broadcasting and thus give a greater quantity of credible programming to target areas abroad. Moreover, the increase in number of private international broadcasting stations will make for competition among them and result in their providing a better service.

13. If a ceiling is adopted, it should be higher than that proposed so that it can accommodate anticipated private international broadcasting. Thus, it should, for example, be 120 to 150 frequency-hours and 12 to 15 transmitters; or, it should be half the number of frequency-hours used by VOA and half the number of their transmitters; or, perhaps 15 frequency-hours for 1 transmitter, 20 for 2, 25 for 3 or more; or, a maximum number of frequency-hours without regard to number of transmitters; on 100 frequency-hours with a 10 percent increase each year and no limit on the number of transmitters.

DECISION AS TO FREQUENCY USAGE

14. In its comments VOA states that while it would have preferred having a rule that restricted Commission licensees to having not more than three frequencies assigned simultaneously in any single band, it views our proposal for 100 frequency-hours as sufficiently limiting the impact of additional stations in broadcast bands that were already saturated. We believe that limiting private international broadcasters as a group to only three frequencies in a band would be far too severe a restraint. Not only would this generally lessen the ability of licensees to find adequate frequencies, but during periods of low sunspot number when usable frequencies are concentrated more and more in the lower regions of the spectrum it would mean that it might at times be almost impossible for them to satisfy their frequency needs.

15. On the other hand, we continue in the view that establishing some sort of ceiling represents a reasonable balance of present and anticipated frequency congestion in the entire world, existing and anticipated VOA usage, and the policy enunciated in the Smith-Mundt Act. Accordingly, we adopt a ceiling in this proceeding, but the rule imposing that ceiling differs from that which we proposed in the notice.

16. The rule adopted today provides a limit of 100 frequency-hours per day for all private international broadcasters as a group. However, whereas the proposal provided that each licensee would be entitled to 10 frequency-hours per day for each operating main transmitter that it had, the rule adopted is in no way tied to the number of transmitters. Moreover, although under the proposal the Commission would not have licensed more than a total of ten operating main transmitters for all private international broadcasting stations, the rule adopted has no limit whatsoever on the total number of transmitters that will be licensed, and issuance of authorizations for them will be dealt with on a case-by-case basis. The number of frequency-hours allocated to any licensee will depend on past usage, availability, and need. In other words, at the Commission

[1] Comments were filed by the three stations presently authorized by the Commission to engage in international broadcasting, by potential licensees for such operations, by the Voice of America, and by others, as follows: Paul R. Bartlett; Family Stations, Inc., and Radio New York Worldwide, Inc. (jointly); Far East Broadcasting Company, Inc.; Billy Graham Evangelistic Association; Clarence C. Moore; E. H. Munn, Jr.; Lowell Perry; Robert W. Seaburg; Trans World Radio and Trans World Radio Pacific; World International Broadcasters, Inc.; and World Radio Missionary Fellowship, Inc. Reply comments were filed by Family Stations, Inc., and Radio New York Worldwide, Inc. (jointly), and Far East Broadcasting Company, Inc.

[2] Since international broadcasting stations licensed by the Commission are operated by private parties, their service is sometimes referred to as private international broadcasting to distinguish it from international broadcasting of the VOA. The service of either is often called short-wave or high-frequency broadcasting.

[3] A seasonal schedule is the same for each day of the season. For example, it may authorize a station to broadcast each day of the coming season on frequency A to area X between 1 and 3 p.m.; on frequency B to area X between 3 and 5 p.m.; on frequency C to area Y between 5 and 7 p.m.; and on frequency D to area Z between 7 and 8:30 p.m. A frequency used for one hour is called a frequency-hour. In the foregoing example, the station would be using 7½ frequency-hours per day.

[4] United States Information and Educational Exchange Act of 1948, 62 Stat. 6, codified in scattered sections of 22 U.S.C. (1964).

[5] 67 Stat. 642, 22 U.S.C. 1461 (1964).

V 38 I 135 JUL 16 73 XUM

level we shall have, in a sense, a microcosm of the Article 10 approach;[6] yet the existence of a ceiling will serve as a warning that authorizations for frequency-hours are not available without limit. Under the rule adopted (as was the case under the rule proposed in the notice), each licensee will have the responsibility of making all technical studies to show that the frequency-hours requested by it are available and suitable for the use proposed.

17. The rule, although providing a ceiling of 100 frequency-hours per day for all licensees as a group, also contains a provision that permits exceeding the ceiling under certain circumstances. It does this by providing that if for a forthcoming season the total of the requests for daily frequency-hours of all licensees exceeds 100, each licensee upon making an adequate showing that good cause exists for not having its request reduced may be authorized the frequency-hours requested. This type of rule is like others which have been established in different contexts and which have proved helpful in dealing with special types of problems.[7]

18. This rule will allow for a reasonable amount of growth and expansion of the private international broadcast service before frequency-hour usage by all licensees as a group (presently 45 frequency-hours per day) reaches the 100 frequency-hour ceiling, and conceivably for some thereafter. Nor does it seem unduly restrictive, for as one commenting party puts it, realistically there are only about a half dozen existing and potential licensees. As another party states, we may not expect a great rush into international broadcasting since it is not a financially remunerative activity.

19. We believe this rule to be a compromise between the rule that was proposed in the notice and the various proposals made in the comments. The decision here has not been easy. On the one hand, we cannot shut our eyes to the policy of Smith-Mundt. But on the other hand it appears the Congress does support an active VOA program and may be expected to continue doing so. We believe it fruitless to debate whether VOA's having four-fifths of the frequency-hours constitutes a monopoly, or whether private broadcasting is more credible than governmental. The accommodation which we have arrived at appears to us a reasonable one.

Seasonal Schedule Application Procedures

20. The proposed rule amendments to bring seasonal schedule processing procedures into line with Article 10 requirements (paras. 7–8, 21–22 of the notice) met with no opposition; nor was any expected. Accordingly, no discussion of these amendments is deemed necessary here. Several helpful suggestions were submitted and are incorporated in the rules adopted today. One, for example, points out that the proposed processing procedures contain no provision for making frequency changes after the start of a season, and suggests that although the present rules contain no such provision, it might be helpful to insert in the new rules language to govern situations of this kind. In support of the suggestion it is stated that often it is necessary to make frequency changes in mid-season because propagation conditions do not always turn out to be as expected. Moreover, on occasion unanticipated interference problems arise and a move to another frequency becomes necessary in order to increase effectiveness. The suggested language to cover this problem, made by the commenting party, is as follows and will be adopted:

> If after the start of a season the licensee submits a request for changes in the manner of operation as authorized, the request will be considered only if accompanied by statements showing good cause therefor, and will be honored only if conditions permit.

Technical Standards

21. The proposed technical revisions in the notice cover a variety of matters. Since some of the proposals met with no opposition, no discussion of them is deemed necessary and they are adopted as proposed. Others, however, require discussion and are treated below.

Spurious Emission

22. One party opposes the adoption of proposed § 73.756(b)(1) which reads as follows:

> Any emission appearing on a frequency removed from the carrier frequency by between 5 kHz and 10 kHz, inclusive, shall be attenuated at least 25 decibels below the level of the unmodulated carrier.

Its contention is that for the audio to be down 25 decibels at 5 kHz from the carrier frequency, the process would have to begin at below 4kHz and would eliminate valuable presence of voice frequencies, thereby hindering the effectiveness and intelligibility of signals to listening areas. Therefore, this party recommends, in the interest of fidelity of transmitted signals, the reference to "between 5 kHz and 10 kHz" should be changed to read "between 6.5 kHz and 10 kHz."

23. As reflected in our proposed rule, normally our approach is to consider that the highest significant frequency in the modulating signal would be 5 kHz. However, as indicated in the comments to the notice and by Report 297–2 of the International Radio Consultative Committee (CCIR), it is frequently the practice in international broadcasting to process the modulation signal by some form of predistortion which emphasizes the higher audio components to add "presence" to that signal and to increase its ability to overcome interference. Accordingly, we are being guided by this factor and are modifying our proposed rule to provide that sideband emissions extending between 6.4 kHz and 10 kHz each side of the carrier frequency must be at least 25 db below the output power of the transmitter. This is in line with the practice reported by the CCIR and responds essentially to the recommendation submitted. It should be noted that this limitation refers to the power at spurious side frequencies under conditions of operation. It is not a specification of transmitter response.

Modulation and Bandwidth

24. Proposed § 73.766 specifies that percentage of modulation shall in no case exceed 100 percent on positive or negative peaks of frequency recurrence. One party suggests that this be changed to provide that in no case shall the percentage of modulation exceed 125 percent on positive peaks of frequent recurrence, or 100 percent on negative peaks of frequent recurrence. It urges that "this change would simply bring the rules into conformance with the standard broadcast rules."

25. It should be noted that in stipulating both positive and negative peaks be held within a 100 percent ceiling, the proposed rule only particularizes the intent of the existing rule, which, in effect, requires that peaks of frequent recurrence (regardless of polarity) not exceed 100 percent. Hence, no change in the existing mode of station operation in this respect is contemplated.

26. The situation existing in the standard broadcast band before the recent amendment of § 73.55 was quite different. Prior to its amendment, § 73.55 placed no limit on the positive degree of modulation, and advantage was being taken of this omission by many stations in employing asymmetrical techniques to produce extremely high levels of positive modulation, with attendant distortion and the potentiality for increased cochannel and adjacent channel interference to other stations. The principal reason for amending § 73.55 was to limit these abuses by placing a ceiling on positive modulation peaks. The ceiling was set at 125 percent (this is an absolute ceiling, not for "peaks of frequent recurrence" as the commenting party would interpret it) rather than at 100 percent as a compromise measure in the light of evidence that very many standard broadcast stations presently utilize moderate degrees of asymmetrical modulation with some benefit, and a finding that the adverse effects resulting from modulation not exceeding a 125 percent positive ceiling were not so severe as to warrant a disruption of widely employed and accepted operating practices.

27. International broadcast stations have operated subject to the 100 percent positive modulation limit for many years, and the kind of accommodation adopted in view of the existing situation in the standard broadcast service is neither necessary nor desirable for international broadcasting. Accordingly, we shall not adopt the change in § 73.766 suggested above.

Field Strength in Zone or Area of Reception

28. The Notice (para. 24) invited comments on whether the present requirement of a minimum permissible median field strength to be delivered to desired target areas by private international broadcasting stations (43.5 decibels above one uv/m (dBu), either measured or calculated) should be deleted or modified, and reasons therefor. One party, the VOA, contends that the signal strength of 43.5 dBu was never viewed as a standard for satisfactory service, since at the Mexico City Conference (1949) it was considered as the minimum signal which would be afforded protection.[8] Therefore, the VOA strongly recommends that this provision be changed to require a delivered median strength of at least 54 dBu in designated reception areas which is the same level of signal intensity required for rural secondary skywave coverage of a standard broadcasting (medium wave) station licensed by this agency.

29. Two parties, filing jointly, express the view that the 54 dBu requirement recommended by the VOA is excessive and unrealistic since it implies that the same standards should be set for both medium and short-wave propagation predictions. These parties contend that the two media are significantly different—propagation characteristics are different, receiver capabilities are different, and distances to reception areas are different. They state that during daytime hours, medium-wave propagation is limited to the ground wave, and usable signals are generally limited to less than 100 miles for transmitter powers of 50 kilowatts and below. They also say that during the nighttime hours, the secondary skywave coverage on medium wave for the same power is of the order of several hundred miles, and propagation is via the lower regions of the ionosphere, whereas short-wave propagation is via the ionosphere both day and night, and is generally intended for areas thousands of miles away. It is further contended that perhaps the major propagation difference between medium and short wave involves atmospheric noise levels, which are considerably higher on medium wave than on short wave. Since a satisfactory signal is one that is high enough above the noise to be heard, it is their contention that it follows that higher signal levels are required on medium wave to produce a signal that is the same level above the noise as on short wave. We are in essential agreement with the argument of these parties and do not adopt the VOA proposal.

30. In contrast to the VOA proposal, all other parties commenting on the question of whether the 43.5 dBu standard should be deleted or modified favor deletion. Most of these parties state that experience shows that even though there are periods of time when the calculated value of median field strength falls somewhat below the value now specified in our rule, such operations are capable of rendering satisfactory service to substantial portions of desired areas of reception. They point out that the private international broadcaster is motivated to have its programming received because the possibility of non-reception wastes operational costs. If the programming is not received at the intended zone or area of reception, they say, the loss is borne by the broadcaster; moreover, if the signal does not arrive, it does not create interference. Two commenting parties state that over the past ten years participants in the co-ordinating procedures have learned that assignments which appear impossible on paper often work out in practice. They also state that at the present time there is no completely satisfactory method of predicting delivered field strength.

31. It appears that the technical standards adopted by the IFRB for short-wave service have been overlooked by the commenting parties. The IFRB has adopted specific minimum field strengths to be protected for this service as specified in IFRB Technical Standards, Series A (and amendments thereto) for application in their technical examinations of notified assignments. These values are stated to have been derived from pertinent recommendations of various reports of the CCIR. Therefore, consistent with our announced intention in the notice to bring the international broadcasting rules into conformance with the Radio regulations, we are persuaded that our rules should, as nearly as practicable, be consistent with the technical standards on which the IFRB bases its technical examination of notified frequency assignments in this service.

32. On the other hand, we find merit in the above-mentioned arguments for deleting the present 43.5 dBu requirement for field strength to be delivered to desired areas of reception. We have therefore decided to adopt rules which encourage compliance with the technical standards adopted by the IFRB but with provisions permitting lesser values of median field strengths in which it will be emphasized that no protection from interference will be provided by the IFRB if their technical examination of notifications with lesser values reveals incompatabilities with other notified assignments fully complying with IFRB technical standards.[9] Therefore, licensees proposing frequency-hour assignments in this category are forewarned of the risk factor involved in such proposals. In any event, we are requiring that licensees submit, with their seasonal frequency-hour requests, all pertinent technical data with reference to the frequencies and hours of operation which should be so chosen that a given frequency will provide the largest period of reliable transmission to selected areas of reception as practicable. The data should also include the predicted median field strength at the desired zone or area of reception even though we are deleting the 43.5 dBu field strength requirement.

Power Requirement

33. Proposed § 73.751 would require licensees to have transmitter equipment with a rated carrier power of not less than 50 kW. One party suggests that this proposal be modified to provide for the use of 10 kW transmitters under some circumstances rather than have an arbitrary 50 kW minimum permissible power requirement. It urges that no amount of power is effective when a high frequency band is "not open," and that conversely, little is required when conditions are favorable. This party points to its experience with 10 kW transmitters on the 21 meter band which indicated that under certain conditions such stations could provide good service. It should be noted that this suggestion does not request an across-the-board minimum permissible standard of 10 kW. However, one party, in response to the suggestion that 10 kW be permitted under some circumstances, stated that it opposed an across-the-board standard of 10 kW, and gave supporting reasons.

34. Having considered the matter, we are of the view that with a minimum permissible transmitter power of 50 kW, usable signals are more likely to be delivered to the zones and areas of reception which licensees serve. It was this fact that partly entered into our decision to delete the requirement of a 43.5 dBu minimum permissible delivered field strength. Accordingly, we do not adopt the suggestion mentioned above.

---

[6] As proposed in the notice, we are deleting present § 73.702 which provides for resolution of conflicting requests for frequency-hours by designating them for hearing because the normal delays in the hearing process prevent it from dovetailing with the coordination process contemplated by Article 10. Hearings are also similarly inappropriate for the Commission level activities in microcosm.

[7] An example of such a rule is § 73.613 which provides that the main studio location of a television broadcasting station shall be located in the principal community to be served. However, the rule also provides that if an adequate showing is made that good cause exists for locating a main studio outside the principal community to be served and that to do so would be consistent with the operation of the station in the public interests, the Commission will permit the studio to be located elsewhere.

[8] This recommendation was adopted at the Mexico City Conference (1949). However, the United States did not sign the Mexico City Agreement, primarily because of a decision that the plan therein did not satisfactorily meet the frequency-hour requirements of this country as compared with other countries. This recommendation of the Mexico City Conference has since been superseded by International Frequency Registration Board (IFRB) Technical Standards, Series A (and amendments thereto). These standards specify minimum field strengths to be protected for various radio services (including HF broadcasting) and the values vary considerably depending upon the type of transmission, frequency, season, time of day, and noise figures according to the location of receiving points.

[9] In accordance with the procedures of the International Telecommunication Union (ITU) under Article 10, about 4 months before the start of a new season each administration is required to notify the International Frequency Registration Board in Geneva of the schedules of operation each proposes to use during that season. The IFRB examines these notifications and, using its Technical Standards, Series A, determines conflicting proposals. These conflicts are reported to the administrations involved for resolution before the season commences.

V 38-135 JUL 16 73 XUM

OPTIMUM WORKING FREQUENCY (FOT)

35. Proposed § 73.702(g) provides that frequencies requested for assignment must be as near as possible to the FOT for the zone or area of reception for the period and path of transmission, and should be so chosen that a given frequency will provide the largest period of reliable transmission to the selected zone or area of reception. One party opposes any unwavering requirement that the requested frequency be as near as possible to the FOT. It states that there are times when the frequency nearest to the FOT is actually in the 17, 21 or 26 megahertz bands where there are so few short-wave receivers and thus listeners, that adequacy of coverage is sacrificed for a theoretical improvement in signal already known to be satisfactory.

36. Although it is the contention of other parties filing comments regarding this matter that, in general, the FOT will provide the strongest signal and the highest reliability at any given time, we are of the opinion that the point raised has sufficient merit to warrant consideration in special cases. Therefore, the rule which we adopt will permit some flexibility to licensees, upon sufficient justification, to select frequencies that are not as near as possible to the FOT.

TABLE OF REFERENCE POINTS

37. The notice proposed to delete present § 73.703 which contains latitude and longitude reference points of target areas used in field strength calculations. Comments were invited on whether such a table is needed in the rules (whether or not the 43.5 dBu delivered field strength requirement was modified or deleted) and on what the reference points should be if such points are to be retained in the rules. Only one party commented on this subject stating that the reference points are not needed since it appears that almost any point could be selected within the zone or area of reception. It is further stated that although the reference points in the present rules, being on whole degrees of latitude and longitude, were convenient, using computer programs to calculate the propagation predictions as is normally done today makes the handling of decimal parts of latitude and longitude no problem at all. In addition it is said that the antennas used in this service are of such beam width that from any distance that one would use a short-wave transmitter, the entire area of reception normally is covered; hence any reference point taken within the zone would be satisfactory.

38. Our decision in this matter is not to have a table of latitude and longitude reference points. It is noted that specific reference points are not listed in the ITU Radio regulations. However, calculations of propagation predictions to zones or areas of reception shown on the map in new § 73.703 adopted today should be based on transmission paths from transmitter location to a convenient point in the desired zones or areas of reception.

FIELD STRENGTH PROTECTION RATIOS

39. In the notice (para. 25), we proposed to delete the present provisions of § 73.702(g) and (h) which provide that international broadcasting stations must provide minimum co-channel and adjacent channel delivered median field strength protection ratios of 40 db and 11 db, respectively, to the transmissions of other international broadcasting stations at the target area which, in the opinion of the Commission, have priority of assignment. In lieu thereof, we proposed a broad general requirement—without specific standards—that licensees shall provide protection to the transmissions of other stations (at the target areas of those other stations) which the Commission considers to have priority of assignment. Parties commenting on this matter favor our proposal.

40. Specific signal/interference protection ratios have been adopted by the IFRB for application in their technical examinations of notified assignments. IFRB Technical Standards, Series A, section A–1, page 8, (Note 2) reads as follows:

> In the application of the procedure prescribed in Article 10 of the Radio regulations, a calculated protection ratio of less than 23 db is taken by the Board to indicate an apparent incompatibility.

Since licensees will not normally have the necessary information to make such determinations until after notifications from all high-frequency broadcasters have been received by the IFRB from season to season and tentative seasonal schedules have been published, we are of the opinion that the broad general requirement that we proposed should be adopted. However, the technical standards of IFRB will be applied upon notification by the IFRB of apparent incompatibilities, which may require adjustments of operating schedules.

OTHER MATTERS

MULTIPLE OWNERSHIP

41. The notice (paras. 39–40) invited comments on whether the rules should restrict the number of private international broadcasting stations that a party may own, operate, or control. It also noted that a licensee having more than one transmitter, under a single license, each of which beams to a different target area has, in effect, more than one station when compared to a licensee having only a single transmitter (and directional array). Comments were therefore requested on the topic of whether a limit should be imposed on the number of transmitters a party might have under a single license. We also inquired whether if licensees are permitted to have more than one transmitter under a single license, the transmitters should be required to be located at the same place or be permitted to be situated at different locations.

42. In response to the foregoing, parties variously state the following. A multiple ownership rule is unnecessary, at least at the present time. However, if the Commission believes otherwise, it would be no burden if a rule provided for common ownership of not more than two stations with eight main transmitters. This, it is suggested, would permit present licensees to expand their operations if they could afford it, but they could not dominate the field. Limiting ownership to but a single station appears to be too stringent and actually self-defeating to the objectives of this country if one considers the paucity of organizations that might engage in international broadcasting.

43. Multiple ownership rules may be desirable for domestic broadcasting stations in order to promote, for example, diversity of viewpoints within a single market and to prevent undue concentration of control in those markets. However, such rules are unnecessary for international broadcasting because the air is filled with short-wave transmissions carrying programming and newsworthy information from nearly every country in nearly every language and representing nearly every ideology; and there is thus no danger that a single licensee in the United States might acquire undue control of this great communications medium.

44. As to transmitters, neither the Commission nor any other party has shown that owning and operating more than one transmitter under a single license has caused injury either in this country or abroad. As private international broadcasting develops there may be reason to limit the number of transmitters but there appears to be no present reason to do so. Additionally, rules should not be adopted which prevent a licensee from having one or more antenna or transmitter sites. The important consideration is that a station be able to provide the best and most efficient short-wave service to its authorized zones or areas of reception, and it might best do this by having multiple transmitter locations. From the point of view of the listener overseas who is tuning in to a short-wave station located in the United States, the important thing is that the station is in the United States and not that the transmitter is located at one site or another.

45. Of the foregoing arguments, we believe that the view that there are presently so many short-wave stations broadcasting from so many countries that no one party in the United States could acquire control of the medium misses the point. The objective of multiple ownership rules for international broadcasting would be to assure a diversity of programming and views emanating from the United States, not to assure that a single licensee would not control the medium internationally. However, aside from that, we find merit in the views set forth above, and do not now adopt any rules limiting the number of stations that a single party may own, operate, or control, the number of transmitters that a single licensee may have, or the number of sites at which transmitters of a single station may be located. All of these matters will be handled on a case-by-case basis.

LICENSE PERIOD

46. Presently the rules provide for a license period of one year for private international broadcasting stations. The notice (para. 27) stated that the Commission saw no reason why the term should not be three years as is the case for other broadcast services. Generally the comments are silent on this matter. However, at least one party endorses the proposal. Another, stating that the present term of one year is unrealistic and that a three-year term would not encourage new stations, suggests a license term of ten years. Such a term, however, cannot be considered in view of Section 307 (d) of the Communications Act which limits broadcast license terms to three years. We adopt the proposed three-year term.

FEES

47. In a Notice of Proposed Rule Making in Docket No. 19658, 37 F.R. 28574 (Dec. 27, 1972), the Commission began a proceeding to make broad revisions of its present fee schedule. Paragraph 28 of that notice referred to the fact that the present rule making proceeding was pending and that the matter of fees for the international broadcasting service would be treated herein. Although comments concerning such fees have been duly filed in this docket, we believe, on further consideration, that it is best to defer final decisions on this subject until such time as decisions are reached in Docket No. 19658.

MISCELLANEOUS TOPICS

48. *Multiple frequency operation.* Present § 73.702(f) reads as follows:

> Not more than one frequency will be authorized for use at any one time for any one program transmission except in instances where a program is intended for reception in more than one target area and the intended target areas cannot be served by a single frequency.

The notice proposed to amend that section to read:

> Not more than one frequency will be assigned for use at any one time for any one program transmission to any single zone or area of reception in a specific band.

49. There seems to be confusion as to the meaning of the present rule. Many parties state that the rule recognizes the fact that certain target areas require simultaneous operation on more than one frequency to assure adequate coverage of the area. They also state that it has been common practice for VOA, Armed Forces Radio Service, and other international broadcasters to engage in such simultaneous multiple transmissions. However, the rule means what its clear language says, namely, that at any particular time only one frequency may be used to transmit any one program to one target area. Only if a station is beaming the same program to more than one target area at the same time may it use more than one frequency. The purpose of the rule is to avoid frequency congestion. It is true that many international broadcasters do broadcast in tandem on multiple frequencies to the same target area at the same time, but our rule does not permit licensees to do this.

50. The rule which we proposed has also been misinterpreted in the comments. For some reason, the same parties who misconstrue our present rule have also misconstrued our proposal as prohibiting broadcasting the same program to the same zone or area of reception on multiple frequencies at the same time. Such was not the purpose. It was the intent of the proposal to permit such operations, but only if the frequencies used were in different bands. In other words, we were willing to recognize tandem operation as a fact of life, even though it causes frequency congestion, but were restricting it to usage of a single frequency in any one band.

51. Parties who made this double misconstruction urge that we not adopt the proposal and that we retain the present rule. On further considering the matter, we believe it best to retain the old rule but to add to it a proviso that on a showing of good cause a licensee may be authorized such multiple frequency operation.

52. *Rebroadcast consent.* The Notice proposed deletion of paragraph (c) of § 73.790 governing rebroadcasting. That paragraph reads:

> A licensee of an international broadcast station may authorize the rebroadcast of its programs by any station outside the limits of the North American continent without permission from the Commission: *Provided*, That the station rebroadcasting the programs cannot be received consistently in the United States.

Of the two parties commenting on this proposal, one supported it. The other opposed it if deletion meant that a private international broadcasting station might not under any circumstances authorize the rebroadcast of its programs by stations outside North America. It based its position of the fact that much of its programming was directed to Latin America and that stations there rebroadcast its programs because of their quality, a practice of which the commenting party approved because it viewed this as a worthwhile way to cement good relations between countries. We assure that party that the intent of the deletion is such that it need have no concern on this score, and paragraph (c) of § 73.790 is accordingly deleted. Paragraphs (a) and (b) of this section have been redrafted to clarify them and to relax some of the present provisions.

53. *Contract operation.* Present rules permit a licensee to enter into contracts with an agency of the United States Government to broadcast programming subject to Governmental control as to content, target areas to be covered, and time of broadcast. In view of the fact that the VOA no longer enters into such agreements, we proposed to delete provisions pertaining to contract operation. It has been suggested in the comments that the provisions be retained since at some time in the future, VOA, Radio Free Europe, Radio Liberty, AFRTS or some other governmental agency might have reason to desire to use the facilities of Commission licensees, and no purpose is served by deletion. As stated previously (para. 12), some parties urge that one of the reasons private international broadcasting is important is that overseas listeners find it to be more credible than that of governmental agencies. Without making a judgment on this question, we observe that to permit governmental agencies to broadcast over private facilities could be confusing to the foreign listener who might not know whether the programs heard were private or governmental. In any event, as stated, government agencies are not now making use of contract operation. Should they desire to do so in the future, we believe it best to handle such requests on a case-by-case basis rather than under a general rule. Accordingly the contract provisions of the present rules will be deleted as proposed.

54. *Commercial or sponsored programs.* Present § 73.788(b) contains rules governing commercial continuities. Among other things, they provide that such continuities may give no more than the name of the sponsor of the program and the name and general character of the commodity. Although we did not propose to modify this section, one party suggested its deletion, stating that it is unnecessary and a harmful restriction of private international broadcasters because advertisers are not interested in buying time on a purely institutional basis. The rule was originally adopted because it appeared that institutional advertising would create a better impression of the United States. Only a single party has suggested deletion, and we do not believe that the arguments mentioned above constitute a showing sufficient to overcome the original reasons for adoption.

55. *Change in transmitter location.* The proposed amendment to § 1.574 concerning processing of international broadcasting applications stated that a change in transmitter location, other than local, would be viewed as a major change. Similar language appears in the present rule. One party suggested that "local" be defined either in the rule or in this Report and Order in terms of mileage, community, county or state boundaries or in some other fashion. Our intent is that a local change in transmitter location means a change of transmitter location in the immediate vicinity of the existing antennas of the station, and the language of the rule is being amended accordingly.

56. In addition to all of the amendments discussed above, we note that a variety of other amendments were suggested in the Notice. They are not discussed here because they were unopposed in the comments, and are adopted

V 38-135 JUL 16 73 XUM

as proposed or with minor modifications.

Orders. 57. In view of the foregoing: *It is ordered*, That, effective August 20, 1973, Parts 1 and 73 of the Commission rules and regulations are amended as set forth below. Authority for this action is contained in sections 4 (i) and (j) and 303 of the Communications Act of 1934, as amended.

58. *It is further ordered*, That this proceeding is terminated except for the matter of fees to be charged in the international broadcasting service, and as to that matter the proceeding is not terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: July 3, 1973.

Released: July 11, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

Part 1, Subpart D—Broadcast Applications and Proceedings, of the Commission's rules and regulations, is amended as follows:

1. Paragraph (a) of § 1.574 is amended to read as follows:

§ 1.574 Processing of international broadcasting applications.

(a) Applications for international broadcasting facilities are divided into two groups.

(1) In the first group are applications for new stations, or for major changes in the facilities of authorized stations. A major change is (i) any change in or addition to authorized zones or areas of reception, (ii) any change in transmitter location other than one in the immediate vicinity of existing antennas of the station, or (iii) any change in power, or antenna directivity: *Provided, however*, That the Commission may, within 15 days after the acceptance for filing of any other application for modification, advise the applicant that such application is considered to be one for a major change and therefore is subject to the provisions of §§ 1.580 and 1.1111 pertaining to major changes.

(2) The second group consists of applications for licenses and all other changes in the facilities of authorized stations.

* * * * *

Part 73, Subpart F—International Broadcasting Stations, of the Commission's rules and regulations, is amended as follows:

1. Section 73.701 is amended to read as follows:

DEFINITIONS AND ALLOCATION OF FACILITIES

§ 73.701 Definitions.

The following definitions apply to terminology employed in this subpart:

(a) *International broadcasting stations.* A broadcasting station employing frequencies allocated to the broadcasting service between 5,950 and 26,100 kHz, the transmissions of which are intended to be received directly by the general public in foreign countries. (A station may be authorized more than one transmitter.) There are both government and non-government international broadcasting stations; only the latter are licensed by the Commission and are subject to the rules of this subpart.

(b) *Transmitter-hour.* One frequency used on one transmitter for one hour.

(c) *Frequency-hour.* One frequency used for one hour regardless of the number of transmitters over which it is simultaneously broadcast by a station during that hour.

(d) *Multiple operation.* Broadcasting by a station on one frequency over two or more transmitters simultaneously. If a station uses the same frequency simultaneously on each of two (three, etc.) transmitters for an hour, it uses one frequency-hour and two (three, etc.) transmitter-hours.

(e) *Day.* Any twenty-four hour period beginning 0100 G.m.t. and ending 0100 G.m.t.

(f) *Sunspot number.* The 12-month running average of the number of sunspots for any month as indicated in the U.S. Department of Commerce Telecommunications Research and Engineering Report No. 13—available from the Superintendent of Documents, Washington, D. C. 20402. The sunspot number varies in an approximate 11-year cycle.

(g) *March season.* That portion of any year commencing 0100 G.m.t. on the first Sunday in March and ending at 0100 G.m.t. on the first Sunday in May.

(h) *May season.* That portion of any year commencing at 0100 G.m.t. on the first Sunday in May and ending at 0100 G.m.t. on the first Sunday in September.

(i) *September season.* That portion of any year commencing at 0100 G.m.t. on the first Sunday in September and ending at 101 G.m.t. on the first Sunday in November.

(j) *November season.* That portion of any year commencing at 0100 G.m.t. on the first Sunday in November and ending at 0100 G.m.t. on the first Sunday in March.

(k) *Seasonal schedule.* An assignment, for a season, of a frequency or frequencies, and other technical parameters, to be used by a station for transmission to particular zones or areas of reception during specified hours.

(l) *Reference month.* That month of a season which is used for determining predicted propagation characteristics for the season. The reference month is January, April, July, or October, as related to the season in which it occurs.

(m) *Maximum usable frequency (MUF).* The highest frequency which is returned by ionospheric radio propagation to the surface of the earth for a particular path and time of day for 50 percent of the days of the reference month.

(n) *Optimum working frequency (FOT).* The highest frequency which is returned by ionospheric radio propagation to the surface of the earth for a particular path and time of day for 90 percent of the days of the reference month.

NOTE: The international abbreviation for optimum working frequency, FOT, is formed with the initial letters of the French words for "optimum working frequency" which are "frequence optimum de travail."

(o) *Zone of reception.* Any geographic zone indicated in § 73.703 in which the reception of particular programs is specifically intended and in which broadcast coverage is contemplated.

(p) *Area of reception.* Any geographic area smaller than a zone of reception in which the reception of particular programs is specifically intended and in which broadcast coverage is contemplated, such areas being indicated by countries or parts of countries.

(q) *Delivered median field strength, or field strength.* The field strength incident upon the zone or area of reception expressed in microvolts per meter, or decibels above one microvolt per meter, which is exceeded by the hourly median value for 50 percent of the days of the reference month.

(r) *Carrier power.* The average power supplied to the antenna transmission line by a transmitter during one radio frenquency cycle under conditions of no modulation.

2. Section 73.702 is amended to read as follows:

§ 73.702 Assignment and use of frequencies.

(a) Frequencies will be assigned by the Commission prior to the start of each season to authorized international broadcasting stations for use during the season at specified hours and for transmission to specified zones or areas of reception, with specified power and antenna bearing. Six months prior to the start of each season, licensees and permittees shall by informal written request, submitted to the Commission in triplicate, indicate for the season the frequency or frequencies desired for transmission to each zone or area of reception specified in the license or permit, the specific hours during which it desires to transmit to such zones or areas on each frequency, and the power, antenna gain, and antenna bearing it desires to use. Requests will be honored to the extent that interference and propagation conditions permit and that they are otherwise in accordance with the provisions of this section.

(b) After necessary processing of the requests required by paragraph (a) of this section, the Commission will notify each licensee and permittee of the frequencies, hours of use thereof to specified zones or areas of reception, power, and antenna bearing which it intends to authorize for the season in question. After receipt of such notification, the licensee or permittee shall, in writing, not later than two months before the start of the season in question, inform the Commission either that it plans to operate in accordance with the authorization which

the Commission intends to issue, or that it plans to operate in another manner. If the licensee or permittee indicates that it plans to operate in another manner, it shall furnish explanatory details.

(c) If after submitting the request required under the provisions of paragraph (a) of this section, but before receipt of the Commission's notification referred to in paragraph (b) of this section, the licensee or permittee submits a request for changes of its original request, such requests will be accepted for consideration only if accompanied by statements showing good cause therefor and will be honored only if conditions permit. If the information required to be submitted by the licensee or permittee under the provisions of paragraph (b) of this section indicates that operation in another manner is contemplated, and the explanatory details contain a request for change in the originally proposed manner of operation, and requests will be accepted for consideration only if accompanied by statements showing good cause therefor and will be honored only if conditions permit. If after the licensee or permittee submits the information required under the provisions of paragraph (b) of this section, but before the start of the season in question, the licensee or permittee submits a request for changes in its manner of operation for the season in question, the request will be accepted for consideration only if accompanied by statements showing good cause therefor and will be honored only if conditions permit. If after the start of a season the licensee or permittee submits a request for changes in the manner of operation as authorized, the request will be considered only if accompanied by statements showing good cause therefor, and will be honored only if conditions permit.

(d) The provisions of paragraphs (a), (b), and (c) of the section shall apply to licensees, to permittees operating under program test authority, and to permittees who anticipate applying for and receiving program test authority for operation during the specified season.

NOTE: Permittees who during the process of construction wish to engage in equipment tests shall by informal written request, submitted to the Commission in triplicate not less than 30 days before they desire to begin such testing, indicate the frequencies they desire to use for testing and the hours they desire to use those frequencies. No equipment testing shall occur until the Commission has authorized frequencies and hours for such testing. Such authorizations shall be only for one season, and if it is desired to continue equipment testing in a following season, new requests for frequencies and hours must be submitted at least 30 days before it is desired to begin testing in the following season.

(e) Within 14 days after the end of each season, a report shall be filed with the Commission by each licensee or permittee operating under program test authority who has been issued a seasonal schedule for that season. The report shall state whether the licensee or permittee has operated the number of frequency-hours authorized by the seasonal schedule to each of the zones or areas of reception specified in the schedule. If such operation has not occurred, a detailed explanation of that fact shall also be submitted which includes specific dates, frequency-hours not used, and reasons for the failure to operate as authorized. The report shall also contain information that has been received by the licensee or permittee as to reception or interference, and conclusions with regard to propagation characteristics of frequencies that were assigned for the season in question.

(f) Frequencies assigned by the Commission shall be within the following bands which are allocated exclusively to the international broadcasting service:

5,950–6,200 kHz
9,500–9,775 kHz
11,700–11,975 kHz
15,100–15,450 kHz
17,700–17,900 kHz
21,450–21,750 kHz
25,600–26,100 kHz

The carrier frequencies assignable shall begin 5 kHz above the frequency specified above for the beginning of each band and shall be in successive steps of 5 kHz to and including 5 kHz below the frequency specified as the end of each band.

(g) Frequencies requested for assignment must be as near as practicable to the optimum working frequency (unless otherwise justified) for the zone or area of reception for the period and path of transmission, and should be chosen so that a given frequency will provide the largest period of reliable transmission to the selected zone or area of reception. Moreover, at the zone or area of reception frequencies shall provide protection to the transmissions of other broadcasting stations which, in the opinion of the Commission, have priority of assignment.

NOTE 1: Requests for frequency-hours shall be accompanied by all pertinent technical data with reference to the frequencies and hours of operation, including calculated field strengths delivered to the zones or areas of reception.

NOTE 2: It is preferable that calculated field strengths delivered to zones or areas of reception be equal to or greater than those required by I.F.R.B. Technical Standards, Series A (and supplements thereto), in order for the I.F.R.B. to afford the notified assignment protection from interference. Nevertheless, calculated field strengths less than those required by the I.F.R.B. standards for protection will be acceptable to the Commission. However, licensees should note that if such lesser field strengths are submitted no protection from interference will be provided by the I.F.R.B. if their technical examination of such notifications show incompatibilities with other notified assignments fully complying with I.F.R.B. technical standards.

NOTE 3: Licensees are permitted to engage in multiple operation as defined in § 73.701 (d).

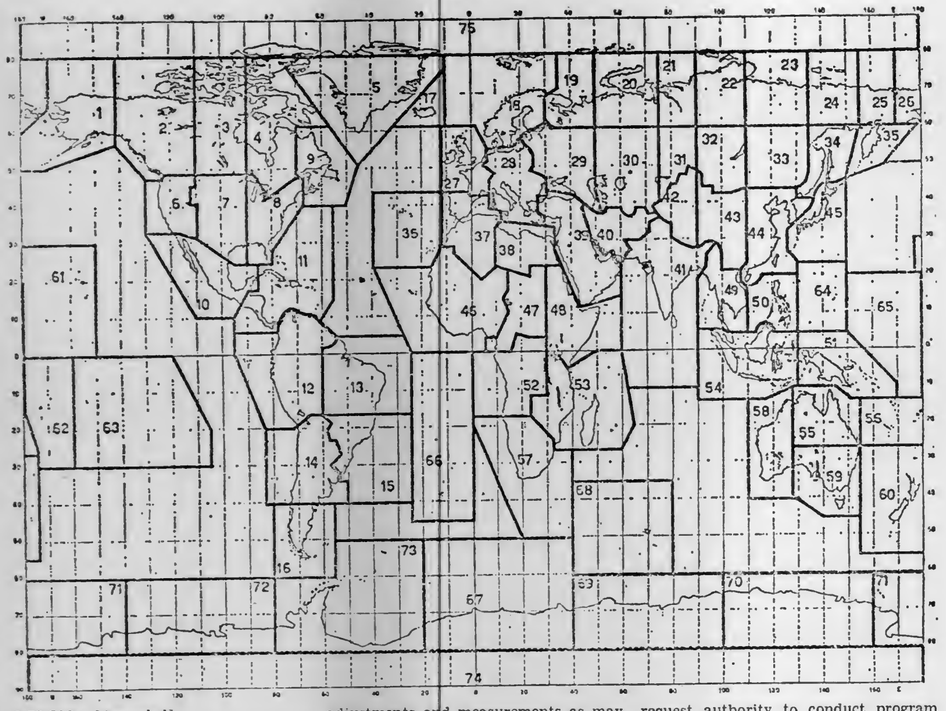
NOTE 4: Seasonal requests for frequency-hours will be only for transmissions to zones or areas of reception specified in the basic instrument of authorization. Changes in such zones or areas will be made only on separate application for modification of such instruments.

(h) Not more than one frequency will be assigned for use at any one time for any one program transmission except in instances where a program is intended for reception in more than one zone or area of reception and the intended zones or areas cannot be served by a single frequency: *Provided, however*, That on a showing of good cause a licensee may be authorized to operate on more than one frequency at any one time to transmit any one program to a single zone or area of reception.

(i) Any frequency assigned to a licensee or permittee shall also be available for assignment to other licensees or permittees.

(j) All assignments of frequencies and the hours during which they will be used will be made with the express understanding that they are subject to immediate cancellation or change without hearing whenever the Commission determines that interference or propagation conditions so require and that each frequency-hour assignment for a given seasonal schedule is unique unto itself and not necessarily available for use during a subsequent season.

(k) The total maximum number of frequency-hours which will be authorized to all licensees of international broadcasting stations during any one day for any season is 100. The number of frequency-hours allocated to any licensee will depend on past usage, availability, and need. If for a forthcoming season the total of the requests for daily frequency-hours of all licensees exceeds 100, all licensees will be notified and each licensee that makes an adequate showing that good cause exists for not having its requested number of frequency-hours reduced and that operation of its station without such reduction would be consistent with the public interest may be authorized the frequency-hours requested.



NOTE: The provisions of this paragraph are not to be construed to mean that a total of 100 (or more) frequency-hours per day is assured licensees. Frequency-hours will only be assigned to the extent that they are available. It is the responsibility of each licensee to make all technical studies to show that frequency-hours requested by it are available and suitable for use as proposed.

3. Sections 73.703 and 73.704 are deleted, and § 73.792 is redesignated § 73.703 and amended by adding introductory language thereto and substituting a new map for the old map therein as follows:

§ 73.703 Geographical zones and areas of reception.

The zones or areas of reception to be served by international broadcasting stations shall be based on the following map, and directive antennas shall be employed to direct transmissions thereto:

V 38 135
JUL 16 73
XUM

§ 73.710 [Amended]

4. Section 73.710 is amended by adding the following note at the end thereof:

NOTE: Information required by these rules but not required by the application forms specified in Subpart D of Part 1 of this chapter shall be submitted as a supplement to the application and will be considered as a part thereof. Applications for renewal of license shall be accompanied by copies of program logs for the composite week designated by the Commission.

§ 73.711 [Deleted]

5. Section 73.711 is deleted.

§ 73.712 [Redesignated]

6. Section 73.712 is redesignated § 73.711.

7. Section 73.716 is redesignated § 73.712, and paragraphs (a) and (c) thereof are amended to read as follows:

§ 73.712 Equipment tests.

(a) During the process of construction of an international broadcasting station, the permittee, having obtained authorization for frequencies and hours as set forth in the Note to § 73.702(d), and having thereafter notified the Engineer in Charge of the radio district in which the station is located may, without further authority of the Commission, conduct equipment tests for the purpose of such adjustments and measurements as may be necessary to assure compliance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations. Such tests shall use voice identification and test tones only. No programming shall be conducted during equipment tests.

* * * * *

(c) Equipment tests may be continued so long as the construction permit shall remain valid: *Provided, however,* That the procedure set forth in paragraph (a) of this section must be repeated prior to the conducting of such tests in each season after the season in which the testing began.

* * * * *

8. New § 73.713 is added as follows:

§ 73.713 Program tests.

(a) Upon completion of construction of an international broadcasting station in accordance with the terms of the construction permit, the technical provisions of the application therefor, and the rules and regulations and the applicable engineering standards, and when an application for station license has been filed showing the station to be in satisfactory operating condition, the permittee may request authority to conduct program tests: *Provided,* That such request shall be filed with the Commission at least ten (10) days prior to the date on which it is desired to begin such operation and that the Engineer in Charge of the radio district in which the transmitter(s) is located is notified. (All data necessary to show compliance with the terms and conditions of the construction permit must be filed with the license application.)

(b) Program tests shall not commence until specific Commission authority is received. The Commission reserves the right to change the date of the beginning of such tests or to suspend or revoke the authority for program tests as and when such action may appear to be in the public interest, convenience, and necessity.

(c) Unless sooner suspended or revoked, program test authority continues valid during Commission consideration of the application for license and during this period further extension of the construction permit is not required. Program test authority shall be automatically terminated by final determination upon the application for station license.

(d) All operation under program test authority shall be in strict compliance with the rules governing international broadcasting stations and in strict accordance with representations made in the application for license pursuant to which the tests were authorized.

(e) The granting of program test authority shall not be construed as approval by the Commission of the application for station license.

§ 73.718 [Redesignated]

9. Section 73.718 is redesignated § 73.733 and amended to read as follows:

§ 73.733 Normal license period.

All international broadcasting station licenses will be issued so as to expire at the hour of 3 a.m. local time and will be issued for a normal license period of 3 years expiring November 1.

10. Section 73.731 and headnote are amended to read as follows:

§ 73.731 Licensing requirements.

(a) A license for an international broadcasting station will be issued only after a satisfactory showing has been made in regard to the following, among others:

(1) That there is a need for the international broadcasting service proposed to be rendered.

(2) That the necessary program sources are available to the applicant to render the international service proposed.

(3) That the production of the program service and the technical operation of the proposed station will be conducted by qualified persons.

(4) That the applicant is legally, technically and financially qualified and possesses adequate technical facilities to carry forward the service proposed.

(5) That the public interest, convenience and necessity will be served through the operation of the proposed station.

11. New § 73.732 is added to read as follows:

§ 73.732 Authorizations.

Authorizations issued to international broadcasting stations by the Commission will be authorizations to permit the construction or use of a particular transmitting equipment combination and related antenna systems for international broadcasting, and to permit broadcasting to zones or areas of reception specified on the instrument of authorization. The authorizations will not specify the frequencies to be used or the hours of use. Requests for frequencies and hours of use will be made as provided in § 73.702. Seasonal schedules, when issued pursuant to the provisions of § 73.702, will become attachments to and part of the instrument of authorization, replacing any such prior attachments.

12. Section 73.751 is amended to read as follows:

§ 73.751 Power requirement.

No international broadcasting station will be authorized to install, or be licensed for operation of, transmitter equipment with a rated carrier power of less than 50 kilowatts.

§ 73.752 [Deleted]

13. Section 73.752 is deleted.

14. Section 73.753 is amended to read as follows:

§ 73.753 Antenna.

All international broadcasting stations shall operate with directional antennas. Such antennas shall be designed and operated so that the radiated power in the maximum lobe toward the specific zone or area of reception intended to be served shall be at least 10 times the average power from the antenna in the horizontal plane. Radiation in all other directions shall be suppressed to the maximum extent technically feasible. In order to eliminate or mitigate harmful interference, the direction of the maximum lobe may be adjusted upon approval of the Commission.

15. Section 73.756 is amended to read as follows:

§ 73.756 Required transmitter performance.

(a) *Design.* The construction, installation, operation, and performance of the international broadcasting transmitter system shall be in accordance with good engineering practice.

(b) *Spurious emission.* (1) Any emission appearing on a frequency removed from the carrier frequency by between 6.4 kHz and 10 kHz, inclusive, shall be attenuated at least 25 decibels below the level of the unmodulated carrier. Compliance with the specification will be deemed to show the occupied bandwidth to be 10 kHz or less.

(2) Any emission appearing on a frequency removed from the carrier frequency by more than 10 kHz and up to and including 25 kHz shall be attenuated at least 35 decibels below the level of the unmodulated carrier.

(3) Any emission appearing on a frequency removed from the carrier frequency by more than 25 kHz shall be attenuated at least 80 db below the level of the unmodulated carrier.

(4) In the event spurious emissions cause harmful interference to other stations or services, such additional steps as may be necessary to eliminate the interference must be taken immediately by the licensee.

(c) *Frequency control.* The transmitter shall be equipped with automatic frequency control apparatus so designed and constructed that it is capable of maintaining the operating frequency within 0.0015 percent of the assigned frequency.

16. Section 73.759 is amended to read as follows:

§ 73.759 Changes in equipment and antenna systems.

Specific authority, upon filing formal application (FCC Form 309) therefor, is required for any of the following changes:

(a) Change involving an increase or decrease in the power rating of the transmitters.

(b) A replacement of the transmitters as a whole.

(c) Change in the location of the transmitting antenna.

(d) Change in location of main studio, if it is proposed to move the main studio to a different city from that specified in the license.

(e) Change in the power delivered to the antenna.

(f) Change in frequency control and/or modulation system.

(g) Change in direction or gain of antenna system.

Other changes, not specified above in this section, may be made at any time without the authority of the Commission: *Provided,* That the Commission shall be immediately notified thereof and such changes shall be shown in the next application for renewal of license.

17. Section 73.761 is amended to read as follows:

§ 73.761 Time of operation.

(a) All international broadcasting stations shall operate in accordance with the times indicated on their seasonal schedules.

(b) In the event that causes beyond a licensee's control make it impossible to adhere to the seasonal schedule or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority from the Commission. However, in such cases, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing of such limitation or discontinuance of operation and shall subsequently be notified when the station resumes regular operation.

(c) In the event that causes beyond a licensee's control make it impossible to adhere to the seasonal schedule or to continue operating for a temporary period of more than ten days, the station may not limit or discontinue operation until it requests and receives specific authority to do so from the Commission. When the station subsequently resumes regular operation after such limited operation or discontinuance of operation, it shall notify the Commission and the Engineer in Charge of the radio district in which the station is located.

18. Section 73.763 and headnote are amended to read as follows:

§ 73.763 Station license and seasonal schedules, posting of.

The original of each station license and of the current seasonal schedule shall be posted in the transmitter room.

19. Section 73.765 and headnote are amended to read as follows:

§ 73.765 Operating power; how determined and maintained.

The operating power specified in § 73.751 shall be determined by use of a calibrated dummy load or by any other method specified by the licensee and accepted by the Commission. Such method

V 38 I 135 JUL 16 73 XUM

may subsequently be used by the licensee to maintain the authorized operating power.

20. Section 73.766 and headnote are amended to read as follows:

§ 73.766 Modulation and bandwidth.

The percentage of modulation shall be maintained as high as possible consistent with good quality of transmission and good broadcast practice. In no case shall it exceed 100 percent on positive or negative peaks of frequent recurrence. It should not be less than 85 percent on peaks of frequent recurrence. The range of modulation frequencies shall be so controlled that the authorized bandwidth of the emission shall not be exceeded under all conditions of modulation. The highest modulating frequency shall not exceed 5 kHz.

21. Section 73.769 is amended to read as follows:

§ 73.769 Discontinuance of operation.

The licensee of each station shall notify the Commission in Washington, D.C., and the Engineer in Charge of the radio district where such station is located of permanent discontinuance of operation at least two days before operation is discontinued. The licensee shall, in addition, immediately forward the station license and other instruments of authorization to the Washington, D.C. office of the Commission for cancellation.

§ 73.787 [Amended]

22. Section 73.787 is amended by deleting paragraph (c) thereof.

23. Section 73.788(c) is amended to read as follows:

§ 73.788 Service; commercial or sponsored programs.

* * * * *

(c) The geographic areas to be served by international broadcasting stations are the zones and areas of reception shown in § 73.703.

* * * * *

24. Section 73.790 is amended to read as follows:

§ 73.790 Rebroadcast.

(a) No international broadcasting station shall rebroadcast the program, or any part thereof, of another United States broadcasting station without the express authority of the originating station. A copy of the written consent of the licensee originating the program shall be kept by the licensee of the station rebroadcasting such program and shall be made available to the Commission upon request. The broadcasting of a program relayed by a remote pick-up broadcast station (§ 74.401 of this chapter) is not considered a rebroadcast.

(b) The retransmission of point-to-point messages originated by government or privately owned non-broadcast stations must be authorized by the Commission prior to retransmission; requests for such authority may be submitted informally (by letter) accompanied by the written consent of the originating station.

§ 73.791 [Deleted]

25. Section 73.791 is deleted.

§ 73.792 [Deleted]

26. Section 73.792 is deleted.

[FR Doc.73-14448 Filed 7-13-73;8:45 am]

[FCC 73-731]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Stations, Woodstock and Rutland, Vermont

Memorandum opinion and order. In the matter of amendments of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Woodstock and Rutland, Vermont) RM-1913.

1. The Commission has before it a proposal to reassign Channel 246 from Rutland, Vermont to Woodstock, Vermont. The petition, filed by White Mountain Broadcasting Company ("White Mountain"), has been opposed by Vermont Radio, Incorporated.

2. At present, Rutland, Vermont, has two Class B FM channel assignments. One, Channel 251, is already in use, and Vermont Radio's opposition is based on its desire to operate on Channel 246 in Rutland, not Woodstock. On behalf of its proposal to reassign the channel, White Mountain points to Woodstock's lack of a broadcast facility and asserts that this situation is compounded by the lack of dependable signals from stations located in other area communities. In particular, White Mountain contends that Woodstock receives only "spotty" FM service from the White River Junction FM station 10 miles away. White Mountain asserts that by making the proposed assignment service could be brought to extensive areas now receiving either no FM signal or just one FM signal. Petitioner urges us to proceed to give this community of 2,608 (said to reach 3,500 in the tourist season) its first local facility. No showing has been provided on the preclusionary impact, if any, the proposal would have, but as to the proposal itself, petitioner has shown that the channel could be used in Woodstock and meet all applicable technical requirements.

3. Vermont Radio urges us to leave the assignment in Rutland, a community of 20,900, so that it might use the channel there. According to Vermont Radio, the assignment of a Class B channel to a community as small as Woodstock is inappropriate and in conflict with Commission policy. Rather, it sees a need for the channel in Rutland.

4. The question before us is easy to state, albeit harder to resolve: is there sufficient information on hand to indicate that the channel might be better used at Woodstock than Rutland, so as to warrant the commencement of a rulemaking proceeding? No substitute channel has been mentioned for Rutland and our study does not reveal that one is available. The same holds true for Woodstock. Thus we must choose, for there appears to be no way to respond to the urgings of both parties.

5. The desire for a local facility in Woodstock, while understandable, is not in itself compelling, considering the small size of the community. This is all the more true when recognition is given to the fact that it is a Class B channel under consideration. To grant the proposal would be to provide equal treatment to communities having an eightfold difference in population. White Mountain's argument about being able to provide service to unserved or underserved areas raises a significant point, but utilizing its own engineering data, it appears that if the station were located in Rutland instead, using the same facilities as White Mountain proposes, it would provide a strong signal to Woodstock and to most of the very areas that all now lack FM service. The only exception would be a small area south of Wentworth, New Hampshire. Depending on site and facilities, the unused Plymouth, New Hampshire, assignment could bring a second service to some or even all of this area.

6. Under these circumstances, we believe the public interest would be better served by leaving the channel assigned to Rutland. However, our conclusion is premised on the use of the channel in Rutland at maximum facilities. Otherwise service in the unserved or underserved areas would be significantly reduced. Any such reduction would require us to reexamine our determinations and draw the balance anew. Accordingly, we are amending the FM Table to include a footnote requiring use of this channel with maximum facilities or equivalent. The application now pending does not propose such facilities, but Vermont Radio (or any other applicant) will be afforded an opportunity to specify maximum facilities or their equivalent. If no applicant is prepared to proceed on this basis, White Mountain may resubmit its proposal based on the situation then obtaining.

7. *Accordingly, it is ordered,* That the White Mountain proposal is denied. And in view of the foregoing and pursuant to authority found in sections 4(i), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and because the prior notice of section 4 of the Administrative Procedures Act (5 U.S.C. 553) does not apply: *It is further ordered,* That effective August 24, 1973, FM Assignments, § 73.202(b), is amended by the addition of the following footnote to the channel 246 assignment at Rutland, Vermont: Any application for this channel must specify an effective radiated power of 50 kW and antenna height of 500 feet above average terrain or their equivalent.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: July 3, 1973.

Released: July 10, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

[FR Doc.73-14466 Filed 7-13-73;8:45 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Fiscal Service

[31 CFR Part 223]

SURETY COMPANIES DOING BUSINESS WITH THE UNITED STATES

Notice of Proposed Rule Making

The Department of the Treasury is considering amending its regulations governing surety companies doing business with the United States, at 31 CFR Part 223 (also appearing as Department Circular No. 297, Revised). These amendments will provide a surety company with an opportunity for a hearing to explain and justify its reasons for not settling claims made against it by Federal agencies, prior to a determination by the Secretary of the Treasury to revoke its certificate of authority to do business with the United States for failure to perform its obligations to such agencies. The provisions concerning the revocation of a company's certificate of authority for not complying with other requirements of 6 U.S.C. 6–13 and these regulations are not affected by this amendment.

Accordingly, notice is hereby given pursuant to 5 U.S.C. 553 that the Secretary of the Treasury is considering amending Part 223, Subchapter A, Chapter II of Title 31 of the Code of Federal Regulations by: (1) Amending the table of contents; (2) amending § 223.6; (3) retitling and renumbering § 223.17 as § 223.18; (4) renumbering § 223.18 as § 223.17 and § 223.19 as § 223.22, and (5) adding new §§ 223.19, 223.20 and 223.21.

More specifically: (1) As amended, the table of contents for §§ 223.17 through 223.22, would read:

Sec.
223.17 Revocation.
223.18 Performance of agency obligations.
223.19 Informal hearing on agency complaints.
223.20 Final decisions.
223.21 Reinstatement.
223.22 Schedule of fees.

(2) As amended, § 223.6 would read:

§ 223.6 Requirements applicable to surety companies.

Every company now or hereafter authorized to do business under the act of Congress referred to in § 223.1 shall be subject to the regulations contained in this part.

§§ 223.17, 223.18 [Redesignated]

(3) Section 223.18 would be redesignated as § 223.17; § 223.17 would be redesignated as § 223.18 and the heading changed to read as follows: § 223.18 *Performance of agency obligations.*

(4) As newly added, §§ 223.19 through 223.21 would read:

§ 223.19 Informal hearing on agency complaints.

(a) *Request for informal hearing.* If a company determines that the opportunity to make known its views, as provided for under § 223.18(b), is inadequate, it may, within 20 business days of the date of the notice required by § 223.18(b), request, in writing, that the Secretary of the Treasury convene an informal hearing.

(b) *Purpose.* As soon as possible after a written request for an informal hearing is received, the Secretary of the Treasury shall convene an informal hearing, at such time and place as he deems appropriate, for the purpose of determining whether revocation of the company's certificate of authority is justified.

(c) *Notice.* The Company shall be advised, in writing, of the time and place of the informal hearing and shall be directed to bring all documents, records and other information as it may find necessary and relevant to substantiate its refusal to settle the claims made against it by the Federal agency making the report under § 223.18(a).

(d) *Conduct of hearings.* The hearing shall be conducted by a hearing officer appointed by the Secretary. The company may be represented by counsel and shall have a fair opportunity to present any relevant material and to examine the agency's evidence. Formal rules of evidence will not apply at the informal hearing.

(e) *Report.* Within 30 days after the informal hearing, the hearing officer shall make a written report to the Secretary setting forth his findings, the basis for his findings, and his recommendations. A copy of the report shall be sent to the company.

§ 223.20 Final decisions.

If, after review of the case file, it is the judgment of the Secretary that the complaint was unfounded, the Secretary shall dismiss the complaint by the Federal agency concerned and shall so notify the company. If, however, it is the judgment of the Secretary that the company has not fulfilled its obligations to the complainant agency, he shall notify the company of the facts or conduct which indicate such failure and allow the company 20 business days from the date of such notification to demonstrate or achieve compliance. If no showing of compliance is made within the period allowed, the Secretary shall either preclude renewal of a company's certificate of authority or revoke it.

§ 223.21 Reinstatement.

If, after one year from the date of the expiration or the revocation of the certificate of authority, as the case may be, a company can show that the basis for the non-renewal or revocation has been eliminated and that it can comply with the requirements of 6 U.S.C. 6–13 and the regulations in this part, a new certificate of authority shall be issued without prejudice.

(5 U.S.C. 301; 6 U.S.C. 8.)

Prior to the adoption of the proposed amendments, consideration will be given to written views or arguments submitted to the Commissioner of Accounts, U.S. Department of the Treasury, Washington, D.C. 20226, and received not later than August 15, 1973. Pursuant to 31 CFR 1.4(b), 36 FR 13835, comments submitted in response to this notice of proposed rule making are available to the public upon request therefor unless confidential status for the submission has been requested and approved.

Dated: July 10, 1973.

[SEAL] JOHN K. CARLOCK,
Fiscal Assistant Secretary.

Internal Revenue Service

[26 CFR 301]

TIME FOR PERFORMANCE OF ACTS WHERE LAST DAY FALLS ON A LEGAL HOLIDAY

Notice of Proposed Rule Making

Notice is hereby given that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing (preferably six copies) to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by August 15, 1973. Written comments or suggestions which are not exempt from disclosure by the Internal Revenue Service may be inspected by any person upon compliance with 26 CFR 601.702(d)(9). The provisions of 26 CFR 601.601(b) shall apply with respect to the designation of portions of comments or suggestions as exempt from disclosure. Any person submitting written comments or suggestions

V 38-135 JUL 16 73 XUM

who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner by August 15, 1973. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the Federal Register, unless the person or persons who have requested a hearing withdraw their requests for a hearing before notice of the hearing has been filed with the Office of the Federal Register. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

This document contains proposed amendments to the Regulations on Procedure and Administration (26 CFR Part 301) in order to conform such regulations to the changes made by P.L. 90–363, 82 Stat. 250, which amended 5 U.S.C. 6103 (a) (1964), regarding the observance of certain legal holidays on Monday. Such amendment was effective on January 1, 1971.

The proposed amendment to the regulations is designed to conform § 301.7503–1(b)(1) to the present District of Columbia law regarding the date of observance of legal holidays. The District of Columbia now observes Washington's Birthday on the third Monday in February, Memorial Day on the last Monday in May, Veterans' Day on the fourth Monday in October, and Thanksgiving on the fourth Thursday in November. Columbus Day is also considered a legal holiday in the District of Columbia for all calendar years after 1970, and is observed on the second Monday in October. Under the proposed amendment of the regulations, the dates of observance of these holidays for purposes of the Internal Revenue Code of 1954 will correspond to the dates of observance of these holidays in the District of Columbia. So that the proposed amendments to the regulations will not adversely affect certain taxpayers who relied on the current regulations, for the calendar years 1971, 1972, and 1973, taxpayers may, at their option (except with respect to the performance of any act relating to the jurisdiction of a court), treat Washington's Birthday as falling on either February 22 or the third Monday in February and Memorial Day as falling on either May 30 or the last Monday in May. For the calendar years 1971 and 1972, taxpayers may, at their option (except with respect to the performance of any act relating to the jurisdiction of a court), treat Veterans' Day as falling on either November 11 or the fourth Monday in October. The option is denied to taxpayers in those cases where the performance of an act relates to the jurisdiction of a court in order to be consistent with "William M. Winkler," 56 T.C. 844 (1971), where the United States Tax Court held that in computing the 150-day filing requirement of section 6213(a), Monday, February 15, 1971, was a legal holiday (Washington's Birthday) in the District of Columbia. The Tax Court made no mention of the availability of an option in cases where the performance of an act relates to the jurisdiction of a court.

Amendment to regulations. Section 7503 of the Internal Revenue Code of 1954 provides rules for the time for performance of acts where the last day for performance falls on a legal holiday. In order to conform the Regulations on Procedure and Administration (26 CFR Part 301) under section 7503 to the changes made by P.L. 90–363, 82 Stat. 250, which amended 5 U.S.C. 6103 (a) (1964), regarding the observance of certain legal holidays on Monday, paragraph (b) (1) of § 301.7503–1 of such regulations is amended to read as follows:

§ 301.7503–1 Time for performance of acts where last day falls on Saturday, Sunday, or legal holiday.

* * * * *

(b) *Legal holidays.* (1) For the purpose of section 7503, the term "legal holiday" includes the legal holidays in the District of Columbia. Such legal holidays found in D.C. Code Ann. § 28–2701 (1967) and 5 U.S.C. 6103 (a), as enacted and made effective by the Act of June 28, 1968 (82 Stat. 250), are—

(i) January 1, New Year's Day,

(ii) January 20, when such day is Inauguration Day,

(iii) Third Monday in February, Washington's Birthday,

(iv) Last Monday in May, Memorial Day,

(v) July 4, Independence Day,

(vi) First Monday in September, Labor Day,

(vii) Second Monday in October, Columbus Day,

(viii) Fourth Monday in October, Veterans' Day,

(ix) Fourth Thursday in November, Thanksgiving Day,

(x) December 25, Christmas Day.

When a legal holiday in the District of Columbia falls on a Sunday, the next day is a legal holiday in the District of Columbia (see D.C. Code Ann. § 28–2701 (1967)). For the purpose of section 7503, when a legal holiday in the District of Columbia (other than Inauguration Day) falls on a Saturday it shall be treated as falling on the preceding Friday. For calendar years prior to 1971, Washington's Birthday will be treated as falling on February 22, Memorial Day on May 30, and Veterans' Day on November 11. For calendar years 1971, 1972, and 1973, the taxpayer may, at his option (except with respect to the performance of any act relating to the jurisdiction of a court), treat Washington's Birthday as falling on either February 22 or the third Monday in February, and Memorial Day as falling on either May 30 or the last Monday in May. For calendar years 1971 and 1972, the taxpayer may, at his option (except with respect to the performance of any act relating to the jurisdiction of a court), treat Veterans' Day as falling on either November 11 or the fourth Monday in October. Columbus Day is not a legal holiday in the District of Columbia in any calendar year prior to 1971.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 948]

IRISH POTATOES GROWN IN COLORADO

Proposed Handling Limitations

This proposal, designed to promote orderly marketing of Colorado Area No. 3 potatoes, would impose minimum quality standards and would require inspection of fresh shipments to keep low quality potatoes from being shipped to consumers.

Consideration is being given to the issuance of a handling regulation, hereinafter set forth, which was recommended by the Area Committee for Area No. 3, Colorado, established pursuant to Marketing Agreement No. 97 and Order No. 948, both as amended (7 CFR Part 948). This marketing order program regulates the handling of Irish potatoes grown in the State of Colorado and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

The recommendations of the committee reflect its appraisal of the composition of the 1973 crop in Area No. 3 and of the marketing prospects for this season. Harvesting is expected to begin on or about August 1 so the regulation should become effective on that date. The grade, size, and maturity requirements provided herein are necessary to prevent potatoes of lesser maturities, undesirable sizes, or low quality from being distributed in fresh market channels. They will also provide consumers with good quality potatoes consistent with the overall quality of the crop.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

Potatoes for prepeeling may be handled without regard to maturity requirements since skinning of such potatoes is of no consequence.

Shipments may be made to certain special purpose outlets without regard to the grade, size, maturity and inspection requirements, provided that safeguards are met to prevent such potatoes from reaching unauthorized outlets. Certified seed is so exempted because requirements for this outlet differ greatly from those for fresh market. Shipments for use as livestock feed are likewise exempt. Since no purpose would be served by regulating potatoes used for charity purposes, such shipments are exempt. Exemption of potatoes for most processing uses is mandatory under the legislative authority for this part and therefore shipments to processing outlets are unregulated.

All persons who desire to submit written data, views, or arguments in connection with this proposal may file the same, in four copies, with the Hearing Clerk, Room 112–A, United States Department of Agriculture, Washington, D.C. 20250, not later than July 23, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). The proposed regulation is as follows:

§ 948.369 Handling regulation.

During the period August 1, 1973, through June 30, 1974, no person shall handle any lot of potatoes grown in Area No. 3 unless such potatoes meet the requirements of paragraphs (a), (b) and (e) of this section, or unless such potatoes are handled in accordance with paragraphs (c), (d), (f) and (g) of this section.

(a) *Grade and size requirements.—All varieties.* U.S. No. 1, or better grade, 2 inches minimum diameter; or U.S. No. 2, or better grade up to but not including U.S. No. 1 grade and not less than 1⅞ inches minimum diameter: *Provided,* That Size B may be handled if U.S. No. 1, or better grade: *Further Provided,* That long varieties may, in lieu of such minimum diameters, be 4 ounces minimum weight.

(b) *Maturity (skinning) requirements—All varieties.* For U.S. No. 2 grade, not more than "moderately skinned," and for all other grades, not more than "slightly skinned."

(c) *Special purpose shipments.* (1) The grade, size, maturity and inspection requirements of paragraphs (a), (b) and (e) of this section shall not be applicable to shipments of potatoes for:

(i) Livestock feed;

(ii) Charity;

(iii) Canning, freezing; and "other processing" as hereinafter defined; and

(iv) Certified seed potatoes (§ 948.6)

(2) The maturity requirements set forth in paragraph (b) of this section shall not be applicable to shipments of potatoes for prepeeling.

(d) *Safeguards.* Each handler making shipments of potatoes pursuant to paragraph (c) of this section shall,

(1) Prior to shipment, apply for and obtain a Certificate of Privilege from the committee.

(2) Furnish the committee such reports and documents as requested, including certification by the buyer or receiver on the use of such potatoes, and

(3) Bill each shipment directly to the applicable buyer or receiver.

(e) *Inspection.* (1) No handler shall handle any potatoes for which inspection is required unless an appropriate inspection certificate has been issued with respect thereto and the certificate is valid at the time of shipment. For purpose of operation under this part it is hereby determined pursuant to paragraph (d) of § 948.40, that each inspection certificate shall be valid for a period not to exceed 5 days following the date of inspection as shown on the inspection certificate.

(2) No handler may transport or cause the transportation by motor vehicle of any shipment of potatoes for which an inspection certificate is required unless each shipment is accompanied by a copy of the inspection certificate applicable thereto and the copy is made available for examination at any time upon request.

(f) *Minimum quantity.* For purposes of regulation under this part, each person may handle up to but not exceed 1,000 pounds of potatoes without regard to the requirements of paragraphs (a) and (b) of this section, but this exception shall not apply to any shipment of over 1,000 pounds of potatoes.

(g) *Definitions.* The terms "U.S. No. 1," "U.S. No. 2," "Size B," "moderately skinned" and "slightly skinned," shall have the same meaning as when used in the United States Standards for Grades of Potatoes §§ 51.1540–51.1566 of this title, as amended, effective September 1, 1971) including the tolerances set forth therein. The term "prepeeling" means potatoes which are clean, sound, fresh tubers prepared commercially in a prepeeling plant by washing, removal of the outer skin or peel, trimming, and sorting preparatory to sale in one or more of the styles of peeled potatoes described in § 52.2422 (United States Standards for Grades of Peeled Potatoes, §§ 52.2421–52.2433 of this title). The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, or dicing, or the application of material to prevent oxidation does not constitute "other processing."

(h) *Applicability to imports.* Pursuant to section 8e of the act and § 980.1, "Import regulations" (§ 980.1 of this chapter), round white varieties of Irish potatoes, except certified seed potatoes, imported into the United States during the period August 1, 1973, through June 4, 1974, shall meet the minimum grade, size, quality, and maturity requirements specified in paragraphs (a) and (b) of this section.

Dated: July 11, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Part 185]

EMERGENCY SCHOOL AID

Proposed Amendments Concerning Waivers of Ineligibility

In the administration of the Emergency School Aid Act it was determined that in some cases major metropolitan school districts, because of their size, were unable to satisfy the requirements for eligibility or waiver contained in 45 CFR 185.43(b)(2) and 185.44(d)(3) which deal with discrimination in faculty assignment. These districts were able to demonstrate serious need for the assistance provided by ESAA; had submitted proposals which were rated at a level which would have permitted funding but for their ineligibility; and had demonstrated a commitment to the elimination of discrimination in faculty assignment.

In order to meet the critical needs for assistance demonstrated by these districts and to allow such districts to qualify for assistance under the Act, it is proposed to amend the regulations to permit districts which are unable to alter the faculty assignment patterns within the existing time constraints a longer period in which to complete corrective action.

The proposed revision of the regulations is to amend the provision for waiver of ineligibility resulting from discrimination in faculty assignment to permit districts to show that policies of teacher assignment which resulted in ineligibility have been changed and that corrective action to eliminate the results of past discrimination in assignment is being taken through implementation of a plan which will accomplish the complete elimination of such discrimination within a prescribed time frame.

In addition a change is proposed in § 185.95(b) (1) and (3) *Reservation of funds* to make the maximum amount authorized by the Act available to the Assistant Secretary for special projects under subpart J of this part. The amount of funds available for educational television projects under subpart H of this part is reduced to the level authorized by the Act.

Part 185 of Title 45 of the Code of Federal Regulations is hereby amended by revising §§ 185.44(d)(3) and 185.95(b)(1) and (3) to read as follows:

§ 185.44 Waiver of ineligibility.

* * * * *

(d) Demotion or dismissal of minority group personnel:

* * * * *

(3) In the case of ineligibility resulting from discriminatory assignment of teachers as prohibited by § 185.43(b)(2), such applications for waiver shall contain evidence that such agency has adopted and implemented a nondiscriminatory

V 38 I 135 JUL 16 73 XUM

assignment policy. In the case of a local educational agency implementing a plan described in § 185.11(a), such evidence shall indicate that such agency is complying with the requirements of such plan with respect to the assignment of faculty. In the case of local educational agencies not implementing such a plan, or implementing such a plan which contains no provision as to assignment of faculty, such evidence shall include at a minimum:

(i) Adoption by such agency of a policy of nondiscriminatory assignment of faculty and staff members;

(ii) Determination of all faculty and staff assignments made after the date of application for waiver in a manner which does not contribute to or reinforce the racial or ethnic identifiability of any school operated by such agency;

(iii) Adoption of a plan to eliminate all full-time teaching faculties composed exclusively of members of a single racial or ethnic group no later than the end of the period for which assistance is to be awarded; and

(iv) Adoption of a plan for assignment of faculty and staff members which will eliminate all racially or ethnically identifiable faculties at schools operated by such agency within a reasonable period of time but in no event later than the commencement of the 1975–76 academic year. In the case of school districts in which the percentage of minority group members on the full-time teaching faculty is less than the percentage of minority group members in the student body, such plans shall include a plan of affirmative action to increase the percentage of minority group members on the full-time teaching faculty of such agency.

. . . . .

§ 185.93 Reservation of funds.

. . . . .

(b) The Assistant Secretary hereby reserves:

(1) An amount equal to 5 percent of the sums appropriated under the Act for any fiscal year for the purpose of special projects under subpart J of this part;

. . . . .

(3) An amount equal to 3 percent of the sums so appropriated for the purposes of educational television projects under subpart H of this part; and

. . . . .

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposed amendments to the regulation to Dr. Herman R. Goldberg, Associate Commissioner, Equal Educational Opportunity, Room 2029, 400 Maryland Avenue, S.W., Washington, D.C. 20202, on or before August 6, 1973. Comments received in response to this notice will be available for public inspection at Room 2029, 400 Maryland Avenue, S.W., Washington, D.C. between 8 a.m. and 4:30 p.m. Monday through Friday.

Dated: July 12, 1973.

S. P. MARLAND, Jr.,
Assistant Secretary for Education.

Approved: July 12, 1973.

FRANK CARLUCCI,
Acting Secretary of Health, Education, and Welfare.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Parts 1910, 1927]

EMERGENCY TEMPORARY STANDARD FOR CERTAIN CARCINOGENS

Commencement of Rulemaking Proceeding

On May 3, 1973, an emergency temporary standard on certain carcinogens was published in the FEDERAL REGISTER at 38 FR 10929. Section 6(c) of the Williams-Steiger Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) provides that upon the publication of an emergency temporary standard, a rulemaking proceeding in accordance with section 6(b) of the Act shall be commenced, and that the emergency temporary standard as published shall also serve as a proposed rule for the proceeding. Accordingly, pursuant to sections 6(b) and 6(c) of the Act, it is hereby proposed to amend Part 1910 of Title 29, Code of Federal Regulations, by adopting as a "permanent" standard § 1910.93c (38 FR 10929).

In addition to the proposal with respect to § 1910.93c, it is also proposed to adopt additional rules dealing with the subjects and issues contemplated by section 6(b)(7) and by section 8(c)(3) of the Act. These are described below. Further, Chapter XVII of Title 29, Code of Federal Regulations, would be amended by adding thereto a new Part 1927 setting forth a permit procedure to be used after December 31, 1975, in order to afford more particularized protection for employees than would be practicable under general standards when there is potential exposure to any of the substances listed in § 1910.93c.

Interested persons are invited to submit written data, views, or arguments with four copies thereof concerning the proposals not later than September 5, 1973, to the Office of Standards, U.S. Department of Labor, 400 First Street, N.W., Room 504, Washington, D.C. 20210. The written submissions will be available for public inspection and copying, except as to matters the disclosure of which is prohibited by law, at the Office of Standards, U.S. Department of Labor, 400 First Street, N.W., Room 507, Washington, D.C. 20210.

Oral data, views, and arguments will be heard before an administrative law judge to be designated later, at an informal hearing beginning at 10:00 a.m. on September 11, 1973.

Persons desiring to appear at the hearing must file with the Office of Standards, U.S. Department of Labor, 400 First Street, N.W., Room 504, Washington, D.C. 20210 a written notice of intention to appear, together with two copies, postmarked no later than August 31, 1973. The notice must state the name and address of the person wishing to appear, the capacity in which he will appear, and the approximate amount of time required for his presentation. The notice must also include, or be accompanied by, a statement of the position to be taken with regard to the proposed rules. A notice of intention to appear not complying with the above rules will be unacceptable and may be returned with indication of deficiencies thereof and reasons for nonacceptance and return.

Beginning at 9:30 a.m. on September 11, 1973, the presiding administrative law judge will hold a prehearing conference in order to establish the order and time for the presentations, and in order to settle any other matter relating to the proceeding.

The oral proceedings shall be reported verbatim. The use of prepared statements by witnesses is encouraged. All documents that are intended to be submitted for the record at the hearing should be submitted in triplicate (original and two copies).

The administrative law judge shall have all the powers necessary or appropriate to conduct a fair and full informal hearing, including the powers:

(a) To regulate the course of the proceeding;

(b) To dispose of procedural requests, objections, and comparable matters;

(c) To confine the presentations to matters pertinent to the proposed standard;

(d) To regulate the conduct of those present at the hearing by appropriate means;

(e) In his discretion, to permit cross-examination of any witness; and

(f) In his descretion, to keep the record open for a reasonable stated time to receive written recommendations, and supporting reasons, and additional data, views, and argument: from any person who has participated in the oral proceeding.

Following the close of the hearing, the presiding officer shall certify the record thereof to the Assistant Secretary of Labor for Occupational Safety and Health. Upon consideration of the record of the hearing, together with any other written data, views, or arguments received in response to this notice, the Assistant Secretary may adopt the proposal with or without changes, or determine to revoke the existing emergency temporary standard in whole or in part.

A draft environmental impact statement on the proposed standard for certain carcinogens has been filed with the Council on Environmental Quality (38 FR 15650, June 14, 1973) and distributed to the appropriate Federal and State agencies. An environmental consideration will be an issue in this proceeding. When the final environmental impact statement is prepared, it will be filed as part of the record in this proceeding.

A standards advisory committee on carcinogens has been formed and is scheduled to have its first meetings on June 25, 26, 27, 1973 (38 FR 16002), and on subsequent dates as will be noticed in the FEDERAL REGISTER. The recommendations of the standards advisory committee on carcinogens will be part of the record in this rulemaking proceeding. When made, the recommendations will be available for public inspection, and notice of such availability will be made in the FEDERAL REGISTER.

1. It is hereby proposed to adopt as a "permanent" standard § 1910.93c of Title 29, Code of Federal Regulations (38 FR 10929) reading as follows:

§ 1910.93c Carcinogens.

(a) *Scope and application.*—This section applies to any activity in which a carcinogen is manufactured, processed, used, repackaged, released, handled, or otherwise present in any manner.

(b) *Definitions.*—(1) "Carcinogen" means any of the substances listed below, or compositions containing such substances, but does not include compositions containing less than 1 percent by weight of the listed carcinogens:

Compound No.	Chemicals	Chemical abstracts registry No.
1	2-Acetylaminofluorene	53963
2	4-Aminodiphenyl	92671
3	Benzidine (and its salts)	92875
4	3,3'-Dichlorobenzidine (and its salts).	91941
5	4-Dimethylaminoazobenzene	60117
6	alpha-Naphthylamine	134327
7	beta-Naphthylamine	91598
8	4-Nitrobiphenyl	92933
9	N-Nitrosodimethylamine	62759
10	beta-Propiolactone	57578
11	bis-Chloromethyl ether	542881
12	Methyl Chloromethyl ether	107302
13	4,4'-Methylene(bis)-2-chloroaniline.	101144
14	Ethyleneimine	151564

(2) "Controlled area" means an area to which access is restricted and controlled by the employer.

(3) "Decontamination" means the removal or chemical neutralization of a carcinogen to a form that is either nontoxic or not capable of easy absorption into the body.

(4) "Present" includes manufactured, processed, used, repackaged, released, handled, or otherwise present.

(c) (1) *Controlled areas.*—(i) Any area in which any carcinogen is present shall be deemed a controlled area.

(ii) An area shall not be deemed a controlled area if the presence of a carcinogen results only from a transshipment in sealed packages.

(2) *Open-process vessels and open containers.*—Open-process vessels and open containers of a carcinogen shall be permitted only at container filling points and at points where contents of containers are charged into process vessels, and only to the extent necessary to permit transfer of contents. Such transfers shall be under continuous local exhaust ventilation which shall prevent the dispersion of the carcinogen into any work area. The transfer facilities shall have provision to confine any spills to the area served by the ventilation system.

(3) *Toilet facilities and drinking fountains.*—No toilet facilities and no drinking fountains shall be used inside a controlled area.

(4) *Food and beverage.*—No food or beverage shall be permitted within a controlled area.

(5) *Smoking.*—No smoking or smoking materials shall be allowed within a controlled area.

(d) (1) *Access to controlled areas.*—Except as provided in subparagraph (2) of this paragraph, any controlled area may be connected with an uncontrolled area only by means of change rooms and shower rooms to arranged that an employee, in order to enter or leave the controlled area, must go through the following procedures:

(i) In order to enter, an employee must undress completely in a clean change room outside the controlled area, and put on clean protective clothing and equipment; he may enter the controlled area through an entrance designed to prevent the escape of carcinogens from the controlled area to the change room;

(ii) In order to leave a controlled area, an employee must enter a separate dirty change room where he must undress completely and leave every item of clothing and equipment, then he must shower in an adjacent room which he may enter through an entrance designed to prevent the escape of carcinogens from the dirty change room to the shower room. Thereafter, he must enter the clean change room where his street clothes are in his locker.

(iii) A physical layout which would conform to this subparagraph is illustrated below:

(2) A controlled area may also be connected with an uncontrolled area by means of emergency exits which may only be used in case of emergency, such as fire.

(3) Appropriate instructions and signs shall be posted to inform employees of the procedures that must be followed in entering and leaving a controlled area.

(4) The clean change room shall have individual storage facilities for storage of street clothes and clean protective clothing and equipment.

(5) (i) Shower rooms shall be provided in accordance with § 1910.141.

(ii) Shower supplies may be introduced into a shower room only through a noncontaminated area such as a clean change room.

(6) The employer shall provide all protective clothing, equipment and shower supplies including towels.

(e) (1) *Operations of known exposure.*—(i) This subparagraph applies to any operation where there is a direct exposure of an employee to a carcinogen, including, but not limited to: (A) An opening for any purpose of equipment which contains, or has contained, a cacinogen; (B) any cleanup of leaks or spills of a carcinogen; (C) any decontaminating of equipment, surfaces, or clothing which are known, or which should be reasonably expected to be known, to be contaminated with a carcinogen; (D) the performing of any work which results in the release of a carcinogen; (E) any work in any area containing open equipment which contains a carcinogen, or which has contained a carcinogen and has not been decontaminated; or (F) any work on any area known, or reasonably expected to be known, to be contaminated with a carcinogen.

(ii) Every employee engaged in any operation described in subdivision (i) of this subparagraph shall: (A) Be provided with a clean full impervious pressurized air-supplied suit; (B) be required to put on the suit before entering an affected area and engaging in an affected operation; (C) be required to wear the suit in such an area and during the operation; and (D) be decontaminated before leaving the areas and before removing the suit.

(iii) Every area which is known, or which should be reasonably expected to be known, to be contaminated with a carcinogen, including every area where work described in subdivision (i) of this subparagraph is to be done, shall be posted with legible danger signs bearing the legend:

CANCER-PRODUCING AGENT
EXPOSED IN THIS AREA

FULL IMPERVIOUS PRESSURIZED AIR-SUPPLIED SUIT REQUIRED AT ALL TIMES

AUTHORIZED PERSONNEL ONLY

(iv) Contaminated equipment, material, and clothing shall not be removed from a controlled area, unless it is either decontaminated or sealed in impervious containers bearing the legend:

DANGER
Contaminated with
CANCER—PRODUCING AGENT

(2) *Decontamination.*—Decontamination processes shall be established and implemented to remove carcinogens on surfaces of equipment, materials, and the decontamination facility.

(3) *Waste disposal.*—Waste disposal methods and processes shall be established and implemented which do not permit carcinogens to be introduced into noncontrolled areas.

(4) *Posting.*—Controlled areas shall be posted at all entrances with legible danger signs bearing the legend:

V 38 I 135 JUL 16 73 XUM

CANCER-PRODUCING AGENT
in this area
AUTHORIZED PERSONNEL ONLY

(5) *Medical surveillance programs.*—Each employer subject to this section shall report in writing to the Occupational Safety and Health Administration, Office of Standards, room 504, 400 First Street NW., Washington, D.C. 20210, information as to any kind of medical surveillance program that has been voluntarily instituted, or will be voluntarily instituted by the employer.

(6) *Monitoring.*—All employers subject to this section shall report in writing to the same office information as to the type of monitoring system that has been instituted.

(7) *Ventilation.*—Every controlled area shall be under constant mechanical ventilation and negative air pressure with respect to the surrounding areas, including change rooms. Air withdrawn from a controlled area shall be decontaminated before being released into any area where employees may enter.

(8) *Cleanup.*—(i) Controlled areas shall be cleaned thoroughly not less than once each working day.

(ii) Employees shall be provided, and shall be required to wear, impervious protective equipment, including trousers, jacket, headgear, boots, and gloves. Employees shall be required to wash down carefully before removing protective equipment.

(9) *Employee identification.*—Each employer shall establish and maintain a list of employees entering a controlled area. The list shall be made available on request to authorized representatives of the Secretary of Labor.

(10) *Reporting.*—Every employer subject to this section shall report in writing to the Occupational Safety and Health Administration, Office of Standards, the following information:

(i) The address of each of his controlled areas;

(ii) The name and other identifying information as to the particular carcinogens present in each of his controlled areas;

(iii) The approximate number of employees entering each of his controlled areas during a representative week of normal operations in the controlled area; and

(iv) The manner in which the carcinogens are present in each of his controlled areas, e.g., whether a carcinogen is manufactured, processed, used, repackaged, released, or otherwise handled.

(Sec. 6, Public Law 91-596, 84 Stat. 1593 (29 U.S.C. 655), Secretary's Order No. 12-71 (36 FR 8754).))

2. Section 6(b)(7) of the Occupational Safety and Health Act requires that any standard thereunder be addressed to specified subjects that are in addition to or supplement those included in the emergency temporary standard forming the main part of this proposal. The requirement under section 6(c)(3) for prompt publication of a notice commencing this proceeding obviously does not contemplate necessarily fashioning the terms of proposed rules dealing with the subjects and issues specified in section 6(b)(7). A description of the substance of the proposed rules or of the subjects and issues involved meeting the notice requirements of 5 U.S.C. 553 would seem to be adequate for the purpose of prompt commencement of the rulemaking proceeding. In addition, section 8(c)(3) provides for related rulemaking concerning the monitoring of toxic substances.

The substance of the proposals under section 6(b)(7) and section 8(c)(3) or of the subjects and issues involved are as follows:

(a) It is proposed to require employers to provide at no cost to employees an opportunity for medical examinations to determine any adverse effects of exposure of employees to the listed carcinogens. The medical examinations would be required not less often than annually.

(b) Reports of the medical examinations would be submitted to the employee and the employer, and made available for inspection by representatives of the Occupational Safety and Health Administration and the National Institute of Occupational Safety and Health. The employer would be required to maintain reports of medical examinations throughout the employment of the employees involved. The reports would be treated as confidential.

(c) The employer would be required to report orally or in writing to the Occupational Safety and Health Administration any conditions or incidents resulting in direct exposure of employees to any of the listed carcinogens. The report would be made within 24 hours of the first occurrence of the exposure. The employer would be then required to notify promptly each employee of his exposure, and of any corrective action being taken to prevent further exposure. Further, the employer would be required to keep accurate records of any exposures of employees to any of the listed carcinogens. Each employee, and former employee, would have reasonable access to the records.

(d) Appropriate testing of carcinogen containers for susceptibility to rupture or leaking of any of the listed carcinogens resulting from normal handling would be required.

(e) The labelling of containers containing carcinogens would be in a form suitable for informing employees of the contents, the precautions to be taken in handling, the symptoms resulting from any exposure to the substances, and any appropriate emergency treatment for exposure.

(f) Controlled areas would be carefully monitored by appropriate means for the presence of any of the listed substances in areas where employees are present.

3. It is hereby proposed to amend Title 29 of the Code of Federal Regulations by adding a new Part 1927. The proposed new part concerns permits for use of carcinogens and would prohibit the use by employers of the listed carcinogens in § 1910.93c, except under the permit system after December 31, 1975.

The new part is proposed to read as follows:

PART 1927—PERMITS FOR USE OF CARCINOGENS

Subpart A—Granting and Denying Permits

Sec.
1927.1 Purpose and scope.
1927.2 Who must apply.
1927.3 When to apply.
1927.4 To whom to apply.
1927.5 Contents of application.
1927.6 Effect of application.
1927.7 Factors considered in issuance of permits.
1927.8 Issuance of permits.
1927.9 Terms and conditions.
1927.10 Investigation; informal hearing.
1927.11 Denial of application.

Subpart B—Suspension and Revocation of Permits

1927.15 Suspension; revocation.
1927.16 Opportunity to demonstrate or achieve compliance.
1927.17 Publication of final decisions.

AUTHORITY: Secs. 6(b), 8(c)(3), 8(g), Pub. L. 91-596, 84 Stat. 1593, 1599, 1600 (29 U.S.C. 655, 657).

Subpart A—Granting and Denying Permits

§ 1927.1 Purpose and scope.

(a) This part prescribes the rules of practice for processing permits for employers using any of the substances listed in § 1910.93c of this chapter to which employees may be potentially exposed. It is the purpose of the permit process to provide for effective regulation of conditions and practices concerning potential exposure to the listed substances in a manner that is more effective than the application of more general standards may permit.

(b) The terms and conditions of any permit shall comprise an occupational safety and health standard within the meaning of section 3(8) of the Act.

§ 1927.2 Who must apply.

Any employer wishing to use after December 31, 1975, any of the substances listed in § 1910.93c of this chapter and having any employee potentially exposed to any of such substances must apply for a permit from the Occupational Safety and Health Administration.

§ 1927.3 When to apply.

Any application for an existing use must be submitted no sooner than July 1, 1975, and no later than September 1, 1975.

§ 1927.4 To whom to apply.

Each application shall be sent to the Director, Office of Standards, Occupational Safety and Health Administration, U.S. Department of Labor, Washington, D.C. 20210.

§ 1927.5 Contents of application.

Any application for a permit shall contain the following information.

(a) The name and address of the applicant.

(b) The name and address of each place of employment for which application is made.

(c) A full description of how the substance would be used under the permit. The description shall include the conditions, practices, means, methods, operations, and processes that would be used for protecting employees from potential exposure to the substance involved. The application shall include information in each of the factors listed in § 1927.7.

(d) A certification that the employer has informed his employees of the application by giving a copy to their authorized representative, if any; and posting a statement giving a summary of the application at a place where employee notices are usually found, and specifying where a copy may be examined.

(e) Such additional information as the Director, Office of Standards, may direct. A failure to provide any requested information within a specified time may constitute grounds for rejection of the application. This paragraph may include any information relating to the question of whether an environmental impact statement is required under the National Environmental Policy Act (42 U.S.C. 4332), and any information that may be sought when an environmental impact statement is required.

§ 1927.6 Effect of application.

An application filed in good faith within the time prescribed in § 1927.3 shall be considered temporarily approved pending its processing, so long as the requirements of § 1910.93c are met.

§ 1927.7 Factors considered in issuance of permits.

(a) To the extent feasible, on the basis of the best available evidence, the Director shall determine that no employee will suffer material impairment of health or functional capacity as a result of exposure to any of the carcinogens listed in § 1910.93c of this chapter.

(b) For the purpose of making the determination required by paragraph (a) of this section, the Director shall determine that:

(1) Appropriate engineering and administrative controls will be used to assure that no employee is subjected to harmful exposure;

(2) Industrial hygiene surveillance will be implemented whenever appropriate;

(3) Medical surveillance will be implemented whenever appropriate, and include provisions for annual examinations of employees who are subject to confirmed or suspected harmful exposure;

(4) Special measures are to be taken in the event of confirmed, suspected, and potential harmful exposures;

(5) Labels and other appropriate forms of warning are provided to inform employees of actual and potential hazards of the substances involved, relevant symptoms, and appropriate emergency treatment, and proper conditions and precautions of safe use;

(6) Appropriate personal protective equipment is provided to protect employees from the hazards involved;

(7) There is appropriate monitoring or measuring of the exposure of employees to the hazards involved, and adequate records of such monitoring and measuring are made and maintained;

(8) The employees or their representatives have an opportunity to observe the monitoring or measuring, and to have access to the records thereof;

(9) Procedures are established whereby the employer shall promptly notify any employee who has been, or is being exposed, to the substances involved, of such exposure. The procedures shall further provide that the employer shall notify such employees of any action taken to eliminate his exposure; and

(10) Each employee and former employee shall have access to such records as will indicate his own exposure to the substances involved.

§ 1927.8 Issuance of permits.

If the information examined indicates that the requirements of § 1927.7 are met, the Director shall grant the permit. Otherwise, the Director shall propose to deny the permit.

§ 1927.9 Terms and conditions.

Each permit shall be subject to the special terms and conditions prescribed therein.

§ 1927.10 Investigation; informal hearing.

(a) The Director shall provide an opportunity to the employer and the affected employees for an informal hearing, before issuing a permit.

(b) The Director may conduct a physical inspection of the workplace. If a physical inspection of the workplace is made, representatives of the employer and his employee shall be given an opportunity to accompany the investigator during the inspection for the purpose of aiding in the fact-gathering process. The investigator shall have authority to resolve all disputes as to who is the representative authorized by the employer and the employees for the purpose of this section.

(c) If an informal hearing is held, in his discretion, the Director may provide an opportunity to interested persons in addition to the employer and affected employees to present data and views on the permit application.

(d) If no investigation is made of the workplace or no hearing is held, the Director shall otherwise afford the affected employees an opportunity to comment on the application.

§ 1927.11 Denial of application.

Upon the basis of the information before him, if the Director finds that the granting of a permit will not provide safe and healthful employment in light of the factors listed in § 1927.7, the Director shall so notify the applicant in writing. The notice shall be given by registered mail.

Subpart B—Suspension and Revocation of Permits

§ 1927.15 Suspension; revocation.

The Assistant Secretary may suspend or revoke any permit of an employer when the employer fails to comply with the terms and conditions thereof or otherwise violates the Occupational Safety and Health Act when the violation is relevant to compliance with the terms and conditions of the permit.

§ 1927.16 Opportunity to demonstrate or achieve compliance.

(a) Except when the safety or health of employees requires differently, before instituting proceedings for suspension or revocation of a permit, the Assistant Secretary or his delegate shall notify by mail the employer holding the permit of the alleged facts that may warrant suspension or revocation. The notice shall fix a time and place for a conference at which the employer shall be afforded an opportunity to show that no cause for suspension or revocation exists, or that the employer has achieved compliance with the terms and conditions of the permit.

(b) The employer shall cause a copy of the notice to be served personally or by mail upon the authorized representative of the employees, if any, and to post a copy of the notice at the place or places where employee notices are normally posted.

(c) The notice described in paragraph (a) of this section shall indicate that employees shall be entitled to representation at the conference described therein. When there is no authorized representative of employees, an appropriate spokesman may be designated to represent employees seeking participation in the conference.

(d) If, as a result of the conference, the Assistant Secretary is satisfied that the employer has either demonstrated or achieved compliance, no proceedings for suspension or revocation shall be instituted.

§ 1927.17 Proceedings for suspension or revocation. [Reserved.]

§ 1927.18 Publication of final decision.

The Assistant Secretary shall publish, or cause to be published, in the FEDERAL REGISTER each final decision rendered under this part. The decision shall be accompanied by a statement of the reasons therefor.

Signed at Washington, D.C. this 9th day of July 1973.

JOHN STENDER,
Assistant Secretary of Labor.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 73-WA-12]

TERMINAL CONTROL AREA

Proposed Adoption

Correction

In FR Doc. 73-13088 appearing at page 17250 in the issue for Friday, June 29, 1973, in the description of Area G on page 17251, the 12th and 13th lines should be reversed.

[14 CFR Part 71]

[Airspace Docket No. 73-WA-5]

TERMINAL CONTROL AREA

Proposed Adoption

The Federal Aviation Administration (FAA) is considering the adoption of a Group II Terminal Control Area (TCA) for Denver, Colo. Rules for the control and segregation of all aircraft operated within terminal control areas are contained in Part 91, §§ 91.70 and 91.90 of the Federal Aviation regulations. Further information concerning flight within TCAs is contained in FAA Advisory Circular 91-30, Terminal Control Areas (TCAs), dated 6/11/70.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Rocky Mountain Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station, P.O. Box 7213, Denver, Colo. 80207. All communications received on or before September 14, 1973 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue, S.W., Washington, D.C. 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The establishment of terminal control areas at 22 large hub airports was proposed in Notice 69-41 and supplemental notices thereto, and adopted on May 20, 1970 (35 F.R. 7782), to create a safer environment in those congested terminal areas. The need for TCAs has been well established, and a priority implementation schedule has been developed which is based on the air traffic congestion at each location, the capability of the terminal air traffic control facility to provide separation service to VFR aircraft, the experience gained from earlier established TCAs, and the publication dates of associated aeronautical charts.

The issue of whether or not to establish a TCA at each of the specified locations was decided as a result of Notice 69-41 and is not within the scope of this notice. This notice is intended to produce the input necessary to design an appropriate airspace configuration that can provide the safest environment with the least impact on the airspace users. TCAs have now been designated at all Group I locations, and this Notice proposes a configuration for a Group II TCA at Denver.

On April 25, 1973, the FAA held an FAA/industry meeting in Denver, Colo., to consider user operational requirements in designing the Denver Terminal Control Area.

A proposed configuration was presented at the meeting. Generally comments were favorable. The U.S. Air Force representative contended that Buckley ANG Base should be included in the TCA as a primary Airport.

A working group was established to conduct a feasibility study regarding future inclusion of the Buckley ANG Base within the TCA. The military agreed to the configuration proposed in this docket with the understanding that possible future action would be taken to make Buckley a part of the TCA, if the study indicates such action is feasible.

The TCA floors proposed herein have been established at altitudes which will offer the least inconvenience to satellite airports and yet provide the necessary vectoring airspace and maneuvering area for traffic landing and departing Stapleton Airport.

In consideration of the foregoing and for reasons stated in Docket No. 9880 (35 FR 7782), it is proposed to amend Part 71 of the Federal Aviation Regulations by adding the following to § 71.401(b) Group II Terminal Control Areas.

DENVER, COLORADO, TERMINAL CONTROL AREA

Primary Airport. Denver-Stapleton International (Lat. 39°45'55" N., Long. 104°52'46" W.)

Boundaries. 1. *Area A.* That airspace extending upward from the surface to and including 11,000 feet MSL within an area bounded by a line beginning at the Denver VORTAC (Lat. 39°51'39"N., Long. 104°45'-08"W.) thence south via the Denver VORTAC 180°T (167°M) radial to and counterclockwise along the western boundary of Area B to and west along Colfax Avenue to and south along a line 2.5 miles east of and parallel to the extended centerline of Stapleton International Airport Runway 17R/35L to and clockwise along a 9-mile radius arc of the Stapleton International Airport to and south along the 360°T (347°M) radial of the Denver VORTAC to the point of beginning and that airspace north of Denver between the 9 and 11-mile radius arcs of Stapleton International Airport bounded on the east by the Denver VORTAC 360°T (347°M) radial and on the west by a line 6 miles west of and parallel to the extended centerline of Stapleton International Airport Runway 17R/35L, excluding Prohibited Area P-28.

2. *Area B.* That airspace extending upward from 6400 feet MSL to and including 11,000 feet MSL within a 2-mile radius circle centered at latitude 39°46'30"N., longitude 104°-44'40"W., excluding that area south of Colfax Avenue.

3. *Area C.* That airspace extending upward from 8,000 feet MSL to and including 11,000 feet MSL within a 15-mile radius of Stapleton International Airport excluding Areas A, B, and D.

4. *Area D.* That airspace extending upward from 7,000 feet MSL to and including 11,000 feet MSL bounded on the north by the Denver VORTAC 093°T (070°M) radial, on the west by Denver VORTAC 180°T (167°M) radial, on the south by Colfax Avenue, on the east by a 15-mile radius arc of Stapleton International Airport, excluding that airspace within Area B.

5. *Area E.* That airspace extending upward from 10,000 feet MSL to and including 11,000 feet MSL between the 15-mile and 20-mile radius circles centered on Stapleton International Airport, excluding Area F.

6. *Area F.* That airspace extending upward from 9,000 feet MSL to and including 11,000 feet MSL between the 15-mile and 20-mile radius circles centered on Stapleton International Airport bounded on the north by the Denver VORTAC 093°T (070°M) radial and on the south by Interstate Highway 70.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348 (a)) and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on July 9, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[49 CFR Part 391]

[Docket No. MC-49; Notice No. 73-18]

MEDICAL EXAMINATIONS OF COMMERCIAL VEHICLE DRIVERS BY CHIROPRACTIC PHYSICIANS

Advance Notice of Proposed Rule Making

The purpose of this notice is to invite comments from interested persons on a petition for rulemaking filed by the Idaho Association of Chiropractic Physicians. In its petition, the Association asks the Director of the Bureau of Motor Carrier Safety to amend § 391.43(a) of the Motor Carrier Safety Regulations, 49 CFR 391.43(a), to permit the periodic medical examination of commercial vehicle drivers to be performed by chiropractic physicians. Under § 391.45 of the regulations (49 CFR 391.45), drivers of commercial motor vehicles used for the transportation of passengers or property in interstate commerce must have a complete physical examination at least once every 24 months. The purpose of the examination is to ascertain whether the driver is afflicted with any medical condition that would disqualify him to drive a commercial truck or bus under criteria set out in § 391.41 of the regulations, 49 CFR 391.41. Section 391.43(a) provides that, with the exception of tests for visual acuity (which may be performed by optometrists), "the medical examination shall be performed by a licensed doctor of medicine or osteopathy." The quoted language excludes chiropractic physicians, and the Bureau will not now accept as valid a driver's medical certificate signed by a chiropractic physician.

As noted above, the pending petition by the Idaho Association of Chiropractic Physicians seeks to change this situation so that a chiropractic physician may give the required physical examination and, based upon his findings, may certify a driver as being physically qualified to drive under the cited provisions of the Regulations. The petitioner claims that persons who hold licenses to practice chiropractic in the State of Idaho are qualified to give the examination and to issue the required certificate. It says that (1) doctors of chiropractic are now approved for coverage under the United States Medicare Program; (2) in the State of Idaho, doctors of chiropractic are now qualified to administer blood tests; (3) the Idaho Attorney General has ruled that State law permits doctors of chiropractic to reduce bone fractures; (4) doctors of chiropractic in Idaho bear the same responsibility for reporting infectious and contagious diseases as doctors of medicine; (5) Idaho chiropractors are authorized to call themselves physicians; and (6) under the Idaho workmen's compensation laws, chiropractic physicians are in a position equivalent to that of the other practitioners of the healing arts, both in terms of the number of visits authorized for an injured person and the compensation to be paid for the services they render. Finally, the petition asserts that the existing rule invidiously discriminates against doctors of chiropractic by restricting the performance of drivers' medical examinations to doctors of medicine and doctors of osteopathy.

The Motor Carrier Safety Regulations do not require the examining physician to treat any disease or disorder he discovers when he performs a medical examination of a driver. The objective of the Regulations is to have drivers examined by medical examiners who are capable of diagnosing diseases, injuries, abnormalities, or other conditions which may affect the ability to drive a heavy commercial motor vehicle safely. Hence, the Director is primarily concerned with the diagnostic training and capabilities of chiropractic physicians. In disposing of the pending petition, the Bureau must, in the final analysis, determine whether chiropractic physicians as a group are trained and skilled to diagnose those conditions which would disqualify a person from serving as a commercial vehicle driver under the criteria and procedures in §§ 391.41 and 391.43 of the Motor Carrier Safety Regulations.

Interested persons are invited to submit written data, views, or arguments pertaining to the proposed amendment sought by the petitioner. All comments submitted should refer to the docket number and notice number that appear at the top of this document. Comments should be submitted in three copies to the Director, Bureau of Motor Carrier Safety, Washington, D.C. 20590. All comments received before the close of business on December 31, 1973 will be considered. Comments will be available for examination by any interested person in the public docket of the Bureau of Motor Carrier Safety, Room 4136, 400 Seventh Street, SW, Washington, D.C. both before and after the closing date for comments.

This advance notice of proposed rule making is issued under the authority of section 204 of the Interstate Commerce Act, 49 U.S.C. 304, section 6 of the Department of Transportation Act, 49 U.S.C. 1655, and the delegations of authority by the Secretary of Transportation and the Federal Highway Administrator at 49 CFR 1.48 and 389.4, respectively.

Issued on July 9, 1973.

ROBERT A. KAYE,
Director, Bureau of Motor Carrier Safety.

[FR Doc.73-14411 Filed 7-13-73;8:45 am]

Federal Railroad Administration

[49 CFR Part 213]

[Docket No. RST-1B; Notice 1]

TRACK SAFETY STANDARDS

Maximum Operating Speeds; Notice of Public Hearing

The Federal Railroad Administration (FRA) is considering an amendment to Part 213, Track Safety Standards, to permit maximum operating speeds of more than 110 m.p.h.

On June 7, 1972, the National Railroad Passenger Corporation (Amtrak) filed a petition (Docket No. RST-1; Pet No. 2) requesting that § 213.9 be amended to provide higher speed limits for passenger trains operating over classes 1 through 6 track. On the basis of this petition, FRA initiated a rule-making proceeding (Docket No. RST-1A) which resulted in issuance of an amendment establishing higher speeds for passenger trains operating over classes 1 through 5 track (38 FR 873, 1508). However, the portion of the petition requesting trains on class 6 be increased to 120 m.p.h. was denied by FRA for failure to show a relationship between high speed specialized equipment and class 6 track which would support a safe increase in the maximum allowable speed.

The proposed amendment would permit maximum operating speeds of more than 110 m.p.h. only after prior approval by the FRA. To obtain FRA approval, a petition must be filed in accordance with § 211.11 of the FRA rulemaking procedures (49 CFR 211.11). In addition to providing the information required by § 211.11, each petition for FRA approval of maximum operating speeds of more than 110 m.p.h. must provide sufficient information to establish that the track and equipment involved can safely sustain the proposed speed.

Interested persons are invited to participate in making these proposed amendments by submitting written data, views, or comments. Communications should identify the docket number and notice number, and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Communications received before August 16, 1973, will be considered by the Federal Railroad Administrator before final action is taken on the proposed amendments. Comments received after that date will be considered so far as practicable. The proposals contained in this notice may be changed in light of the comments received. All comments received will be available, both before and after the closing date for communications, for examination by interested persons during regular business hours in Room 5101, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

In addition to insure that all interested persons have an opportunity for oral presentation, the FRA will conduct a public hearing at 10:00 a.m. on August 16, 1973, in Room 5332, 400 Seventh Street, SW., Washington, D.C. The hearing will be an informal one, not a judicial or evidentiary type of hearing. There will be no cross-examination of persons making statements. A staff member of the FRA will make an opening statement outlining the matter set for hearing. Interested persons will then have an opportunity to present their initial oral statements. At the completion of all initial oral statements, those persons who wish to make rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures for conducting the hearing oral presentation, the FRA will conduct a public hearing at 10:00 a.m. on written statements at the hearing. All statements will be made a part of record of the hearing and be a matter of public record. Persons who wish to make oral statements at the hearing should notify the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590, before August 16, 1973, stating the amount of time required for his initial statement.

This notice is issued under the authority of section 202, 84 Stat. 971, 45 U.S.C. 431; and § 1.49(n) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(n).

In consideration of the foregoing it is proposed to amend Part 213 of Title 49 of the Code of Federal Regulations as set forth below

Issued in Washington, D.C. on July 9, 1973.

JOHN W. INGRAM,
Administrator.

1. In § 213.9, it is proposed to amend paragraph (a) and add a new paragraph (c) as follows:

V 38 135 JUL 16 73 XUM

§ 213.9 Classes of track: operating speed limits.

(a) Except as provided in paragraphs (b) and (c) of this section and §§ 213.57(b), 213.59(a), 213.105, 213.113 (a) and (b), and 213.137 (b) and (c), the following maximum allowable operating speeds apply:

Over track that meets all of the requirements prescribed in this part for—	*The maximum allowable operating speed for freight trains is—*	*The maximum allowable operating speed for passenger trains is—*
Class 1 track	10 m.p.h.	15 m.p.h.
Class 2 track	25 m.p.h.	30 m.p.h.
Class 3 track	40 m.p.h.	60 m.p.h.
Class 4 track	60 m.p.h.	80 m.p.h.
Class 5 track	80 m.p.h.	90 m.p.h.
Class 6 track	110 m.p.h.	110 m.p.h.

* * * * *

(c) Maximum operating speed may not exceed 110 m.p.h. without prior approval of the Federal Railroad Administrator. Petitions for approval must be filed in the manner and contain the information required by § 211.11 of this chapter. Each petition must provide sufficient information concerning the performance characteristics of the track, signaling, grade crossing protection, trespasser control where appropriate, and equipment involved and also concerning maintenance and inspection practices and procedures to be followed, to establish that the proposed speed can be sustained in safety.

[FR Doc.73-14274 Filed 7-13-73;8:45 am]

[49 CFR Part 221]

[Docket No. PC-1; Notice 1]

PASSENGER TRAIN VISIBILITY

Proposed Rulemaking and Notice of Hearing

The Federal Railroad Administration (FRA) is considering an amendment to Title 49 of the Code of Federal Regulations to require markings on the rear end of passenger trains to enhance their visibility and protect against rear end collisions. The proposed rules would apply to trains operated in intercity rail passenger service and to trains operated in rapid transit, commuter, or other short-haul passenger service in an urban, suburban, or metropolitan area.

Because of its role in the area of railroad safety, it is the duty of the Federal Railroad Administration to seek more effective means of preventing the loss of life and property damage which results from rear-end train collisions. One means of contributing to this goal is enhancement of the visibility of the rear end of passenger trains. The train marking system being proposed is not intended as a substitute for existing signal systems and operating rules. Rather, the markings would serve as a back-up or secondary aid to warn the crew of an approaching train of the presence of a stopped or slow moving passenger train ahead on the same track.

At present the many types of passenger cars are generally unpainted or painted in dark colors which tend to blend with the typical range of railroad surroundings. Such a car is difficult to distinguish when viewed from the operating compartment of an approaching train on the same track. If the marking patterns proposed by this notice are adopted, the rear end of passenger trains will be rendered attention-getting and distinguishable against typical railroad backgrounds. Uniformity of size and configuration of markings will also aid the crew of an approaching train in judging distance and closing rate between that train and a passenger train ahead on the same track.

The proposed new part contains several sections covering fluorescent panels, retroflectors, and flashing lamps, including technical specifications and procedures for measuring color, luminance, and reflectivity. A railroad that operates a passenger train would have the duty of marking and maintaining the last car on the train in compliance with the proposed requirements. For example, under the proposed § 221.13, a panel painted with fluorescent material would have to be repainted whenever the peak reflectance of the material deteriorates to 100 percent of that of pure white. The rate of deterioration and frequency of repainting would depend in each case on the type and amount of fluorescent material that is used and the operating environment of the car on which it is applied.

In accordance with the Federal Railroad Safety Act of 1970, each violation of the proposed regulations would result in assessment of a civil penalty of not less than $250 nor more than $2500, subject to compromise by the Federal Railroad Administrator.

Compliance with the proposed requirements could be achieved by a variety of methods. It would not be necessary for each car operated in passenger service to be marked as proposed, since only the last car of a train carrying passengers would have to meet the requirements. A railroad that operates passenger trains could designate a certain percentage of its passenger equipment as "rear end cars". These cars could be permanently marked and maintained in compliance with the proposed rules, and operated at the rear end of every passenger train.

It would also be possible for an operator of passenger equipment to fit each car with mountings for a system of removable panels, retroflectors, and battery operated lamps. The car at the rear end of a passenger train would be fitted with the equipment necessary to comply with the requirements.

A railroad would not be limited to either of the above systems of implementation, but would be free to develop and employ any approach to implementation which is consistent with the rules being proposed.

The proposed rules are as follows:

PART 221—PASSENGER TRAIN VISIBILITY

Sec.
221.1 Scope of part.
221.3 Application.
221.5 Civil penalty.
221.7 Waivers.
221.9 Rear end panels; general.
221.11 Rear end panels; plan for spacing.
221.13 Rear end panels; deterioration.
221.15 Specifications for fluorescent substance.
221.17 Location of retroflectors.
221.19 Specifications for retroflectors.
221.21 Number and location of lamps.
221.23 Specifications for lamps.
221.25 Operation of lamps.

§ 221.1 Scope of part.

This part prescribes standards for the marking of the rear end of trains transporting passengers.

§ 221.3 Application.

(e) Except as provided in paragraph (b) of this section, this part applies to trains engaged in—

(1) Intercity rail passenger service; and

(2) Rapid transit, commuter, or other short haul rail passenger service in an urban, suburban or metropolitan area, including passenger service provided by an intrumentality of a State or political subdivision thereof.

(b) This part does not apply to trains consisting of historic or antiquated equipment which are operated for excursion, educational, or recreational purposes.

§ 221.5 Civil penalty.

Any railroad that operates a passenger train to which this part applies in violation of any requirement prescribed in this part is liable to a civil penalty of at least $250 but not more than $2500.

§ 221.7 Waivers.

(a) Any railroad may petition the Federal Railroad Administrator for a permanent or temporary waiver of compliance with any requirement prescribed in this part.

(b) Each petition for a waiver under this section must be filed in the manner and contain the information required by § 211.11 of this chapter.

(c) Each petition received is processed in the manner prescribed in Part 211 of this chapter.

(d) If the Administrator finds that a waiver of compliance is in the public interest and is consistent with railroad safety, he may grant the waiver. Notice of each waiver granted is published in the FEDERAL REGISTER together with a statement of the reasons therefor.

§ 221.9 Rear end panels; general.

(a) Except as provided in § 221.11, the rear end of the last car of each train to which this part applies must display three clean panels coated with the yellow-orange fluorescent substance described in § 221.15 and affixed in conformity with the following dimensions and spacing:

(1) One square panel measuring 36 inches on each side must be positioned at each lower corner of the rear end so that the inside edges of the two panels are parallel at least 42 inches but not more than 54 inches apart, and the bottom edges of the two panels are in a horizontal plane at least 36 inches but not more than 48 inches above the level of the tops of the rail heads on tangent track.

(2) One rectangular panel 12 inches high extending across the entire width of the car must be positioned near the top of the car so that the bottom edge of the panel is parallel with and at least 48 inches but not more than 72 inches above the top edges of the panels positioned under paragraph (a)(1) of this section.

(b) A panel must consist of—

(1) Any durable material which will not warp; or

(2) An area on the surface of the rear end of the car which meets the dimensions and spacing requirements prescribed in paragraph (a) of this section.

(c) Holes may be made in panels to accommodate fixed lamps, train identification indicators, receptacles for electrical connections, and other fixtures.

§ 221.11 Rear end panels; plan for spacing.

If the configuration of the rear end of a passenger car makes compliance with the requirements of § 221.9(a) (1) or (2) impractical, that car may display panels in accordance with a plan of dimensions and spacing proposed by the railroad concerned and approved by the Federal Railroad Administrator. Each plan submitted for approval must be accompanied by a statement of the reasons why compliance with the applicable requirements would be impractical, including a diagram where appropriate. Each panel displayed in accordance with a plan must be permanently and legibly marked with a statement that the panel complies with a plan approved by the Federal Railroad Administrator in accordance with this section.

§ 221.13 Rear end panels; deterioration.

When the peak reflectance of the fluorescent substance applied to a panel under § 221.9 deteriorates to 100 percent of that of a flat magnesium oxide surface (pure white) as determined by comparing the apparent brightness of the panel under indirect daylight with the various color squares on a color tolerance chart, a new coat of the yellow-orange fluorescent substance described in § 221.15 must be applied to the panel. The color chart used to determine peak reflectance must consist of three rows of yellow-orange hues within the range specified in § 221.15(c), with each row containing four color squares measuring 2 inches on a side, and the squares in each row respectively characterized by a peak reflectance of 200 percent, 125 percent, 100 percent, and 75 percent of that of a flat magnesium oxide surface. The color chart must be enclosed in an opaque protective reuseable container when not in use to guard against deterioration over time.

§ 221.15 Specifications for fluorescent substance.

The coat of yellow-orange fluorescent substance applied to panels under §§ 221.9 and 221.13 must have the following characteristics when subjected to a 150-watt high pressure xenon compact arc lamp with an unmodified spectrum at an angle of incidence of 45°, and when viewed from an observation angle of 90°:

(a) A peak reflectance which is at least 200 percent of that of a flat magnesium oxide surface (pure white);

(b) A relative luminance factor not less than 50 percent of that of a flat magnesium oxide surface; and

(c) When expressed in terms of the International Commission on Illumination 1931 colormetric system, chromaticity coordinates which lie within the region bounded by the spectrum locus and the lines defined by the following equations:

Boundary	*Equation*
Yellow	$y=0.17+0.47$
White	$x+y=0.92$
Red	$y=0.37$

§ 221.17 Location of retroflectors.

Four yellow-range retroflectors, each circular in shape and at least six inches but not more than 12 inches in diameter, must be affixed to the rear end of the last car of each train to which this part applies as follows:

(a) One retroflector must be affixed in the lower outside corner of each panel positioned under § 221.9(a)(1) so that the edge of the retroflector is six inches from the outside and bottom edges of the panel measured perpendicularly to the respective edge.

(b) One retroflector must be affixed in the left side and one in the right side on the lateral axis of the panel positioned under § 221.9(a)(2) so that the outside edge of each retroflector is six inches from the respective left edge or right edge of the pannl, measured perpendicularly to that edge.

§ 221.19 Specifications for retroflectors.

(a) When tested in accordance with paragraph (b) of this section, the yellow-orange reflective material used for each retroflector applied under § 221.17 must have, at a minimum, for an observation angle of 0.1 degree, a specific intensity of 100 candlepower per foot-candle of incident illumination at an entrance angle of zero degrees, and a specific intensity of 40 candlepower per foot-candle of incident illumination for an entrance angle of 10 degrees.

(b) Test the yellow-orange reflective material as follows:

(1) Use a lamp with a tungsten filament operating at 2,854° Kelvin color temperature as the source of illumination.

(2) Place the source of illumination 100 feet from the reflective material.

(3) Measure the incident illumination at the retroflector and the reflected intensity from the retroflector, then determine the total candlepower per incident foot candle of the yellow-orange reflective material at the entrance and observation angles specified in paragraph (a) of this section.

§ 221.21 Number and location of lamps.

Two flashing incandescent lamps or two strobe lamps must be affixed to the rear end of the last car of each train to which this part applies on the lateral axis of the panel positioned under § 221.9(a)(2). One lamp must be placed in the left side and the other in the right side of the panel, so that the outside edge of each lamp is six inches from the inside edge of the retroflector affixed to the respective side under § 221.17(b), measured along the lateral axis of the panel.

§ 221.23 Specifications for lamps.

(a) Each lamp affixed under § 221.21 must have—

(1) A clear lens;

(2) With respect to the longitudinal axis of the car, a minimum plus or minus 15 degree horizontal beam, and a minimum plus of minus 5 degree vertical beam; and

(3) An effective minimum intensity of 4000 candela at the centre of its beam.

(b) When actuated, each lamp must flash in unison at least 45 but not more than 75 times per minute.

§ 221.25 Operation of lamps.

The lamps affixed to the rear end of the last car of a train as required by § 221.21 must be actuated whenever the train is engaged in passenger service.

Interested persons are invited to participate in the making of these standards by submitting written data, views, or comments. Communications should identify the regulatory docket number and notice number, and should be submitted in triplicate to the Docket Clerk, Office of the Chief Council, Federal Railroad Administration, Attention: Docket No. P.C. 1, 400 Seventh Street, SW., Washington, D.C. 20590. Communications received before August 30, 1973 will be considered by the Federal Railroad Administrator before taking final action on the proposed rules. All comments received will be available for examination by interested persons at any time during the regular working hours in Room 5428, Nassif Building, 400 Seventh Street, SW., Washington, D.C. The proposals contained in this notice may be changed in light of comments received.

In addition, to ensure that all interested persons have an opportunity for oral presentation, the FRA will conduct a public hearing at 10 a.m. on August 30, 1973, in Room 5332, 400 7th Street, S.W., Washington, D.C.

The hearing will be an informal one, not a judicial or evidentiary type of hearing. There will be no cross-examination of persons making statements. A staff member of the FRA will make an opening statement outlining the matter set for hearing. Interested persons will then have an opportunity to present their oral

V 38-135 JUL 16 73 XUM

statements. At the completion of all initial oral statements, those persons who wish to make rebuttal statements will be given the opportunity to do so in the same order in which they made their initial statements. Additional procedures for conducting the hearing will be announced at the hearing.

Interested persons may present oral or written statements at the hearing. All statements will be made a part of the record of the hearing and be a matter of public record. Persons who wish to make oral statements at the hearing should notify the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 7th Street, SW., Washington, D.C. 20590, before August 30, 1973, stating the amount of time required for his initial statement.

This notice is issued under the authority of the Federal Railroad Safety Act of 1970 (84 Stat. 971 et seq.; 45 U.S.C. 421 et seq.) and § 1.49(n) of the regulations of the Office of the Secretary of Transportation (49 CFR 1.49(n)).

Issued in Washington, D.C. on July 6, 1973.

JOHN W. INGRAM,
Administrator.

ATOMIC ENERGY COMMISSION

[10 CFR Part 20]

STANDARDS FOR PROTECTION AGAINST RADIATION

Procedures for Receiving and Opening Packages; Extension of Time for Comments

On May 18, 1973, the Atomic Energy Commission published in the FEDERAL REGISTER (38 FR 13033) proposed amendments to 10 CFR part 20 which would include a requirement that licensees who pick up packages of radioactive material at the carrier's facility do so expeditiously and that all labelled packages of radioactive material in other than "special form" be monitored on receipt for significant, removable, external contamination. The period for public comment on these proposed amendments was specified as ending on July 2, 1973. In response to a request from the Society for Nuclear Medicine, the Commission has extended the comment period on the proposed amendments to August 2, 1973. Copies of comments received may be examined in the Commission's public document room at 1717 H Street NW, Washington, D.C.

(Sec. 161, 68 Stat. 948; 42 U.S.C. 2201)

Dated at Germantown, Maryland this 10th day of July 1973.

For the Atomic Energy Commission.

GORDON M. GRANT,
Acting Secretary of the Commission.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 64]

[Docket No. 19777; FCC 73-718]

DOMESTIC TELEGRAPH SPEED OF SERVICE STUDIES

Notice of Proposed Rule Making

In the matter of amendment of Subpart B of Part 64 of the Commission's rules and regulations governing domestic telegraph speed of service studies, docket No. 19777.

1. Notice is hereby given of proposed rulemaking looking to revision of the sections of Subpart B of Part 64 of the Commission's rules and regulations governing the conduct and reporting of domestic telegraph speed of service studies. The proposed amended rules as set forth in Appendix A below will replace the present text of §§ 64.201 through 64.295.

2. The revisions appear desirable because of changes in operating methods and service objectives of The Western Union Telegraph Company. The company has recently replaced its multiple reperforator switching centers with a single computer switching complex, many company-operated offices have been converted to agency operation, telephone recording of messages has been consolidated into three centralized telephone bureaus, and former service performance goals have been superseded by delivery standards set forth in its tariffs.

3. The proposed new rules provide essentially that Western Union shall make service measurements on every 200th full rate message or money order transiting its switching computer from time of filing to time switched to the destination office or direct to Telex or TWX subscribers over the 24-hour period daily. A monthly summary report will be produced to show the volumes handled, by time interval in 15 minute segments. Terminal handling speed of service (telephone, tieline and messenger deliveries) at local offices will be sampled one day each week using procedures now prescribed in the rules, at the 25 largest telegraph centers. Service performance studies at agency offices are also prescribed, and the new rules provide for telephone speed of answer studies over the 24-hour period at the three centralized telephone bureaus.

4. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules and regulations, interested persons may file comments on or before August 20, 1973 and reply comments on or before August 30, 1973. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. All relevant and timely comments and replies will be considered by the Commission before final action is taken in the proceeding. In reaching its decision on the proposed rules, the Commission may, in addition to the specific comments invited by this notice and any replies thereto, take into account other relevant information before it.

5. In accordance with the provisions of § 1.419 of the Commission's rules and regulations, an original and 14 copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C. (1919 M Street NW.).

7. Authority for the amendments herein proposed is contained in section 4(i) of the Communications Act of 1934.

Adopted: July 3, 1973.

Released: July 9, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

APPENDIX A

Part 64, Subpart B, of Chapter I of Title 47 of the Code of Federal Regulations is revised to read as follows:

Subpart B—Domestic Telegraph Speed of Service Studies

DEFINITIONS

Sec.

64.202 Filing time.
64.203 Time delivered.
64.204 First attempt.
64.205 Tieline.
64.210 Identifying wire numbers.
64.212 Messenger route.
64.214 Time routed out.
64.215 Time returned.
64.216 Terminal handling speed of service.
64.218 Filing time to computer output speed of service.
64.220 Speed of answer—Central Telephone Bureaus (CTB).
64.221 Agency speed of service.

INSTRUCTIONS FOR THE CONDUCT OF TERMINAL HANDLING SPEED OF SERVICE STUDIES

AUTHORITY: Sec. 4(i), Communications Act of 1934.

Subpart B—Domestic Telegraph Speed of Service Studies

DEFINITIONS

§ 64.202 Filing time.

The time a message is first accepted at an office for transmission, except as otherwise provided in this section.

(a) In the case of messages filed or corrected over the telephone, the time the transaction with the sender is completed shall be the time filed.

(b) In the case of messages filed over manually terminated teleprinter, TWX or Telex tielines, the filing time shall be the acknowledgment or stamped received time, whichever is earlier. Where messages are filed over a telefax tieline, the filing time shall be the stamped received time placed on the message upon removal from the recorder. Where messages are filed over TWX, Telex or Info-Com directly with the ISCS computer, the filing time shall be the acceptance time placed on the message by the computer. In the case of manually terminated tieline, if the sender is called back to verify a questionable part of the message, the original filing time shall be used unless a correction is made by the sender, in which case a new filing time consisting of the time the correction is received shall be placed on the message.

(c) In the case of messages received in an office by messenger, the time the messenger returns to the office from the pickup run shall be the time filed.

(d) In the case of messages filed at the counter, the time the transaction with the sender is completed shall be the time filed.

§ 64.203 Time delivered.

The time delivery of a telegram is completed to the addressee (or to a person authorized to receive the telegram for the addressee), except as otherwise provided in this section.

(a) For speed of service purposes the first attempt to deliver a telegram shall be considered to be the time of delivery.

(b) When delivery is made by telephone, the time delivered is the time reading of a telegram is completed, or the time the first attempt to deliver is made.

(c) When delivery is made by manual teleprinter tieline (or manually by Telex/TWX) or by tieline switching equipment, the time delivered is the time transmission of a telegram is completed, or the time of the first attempt to deliver.

(d) When delivery is made by telefax tieline, the time delivered or time of first attempt is two minutes later than the time a facsimile transmitter is connected to the customer's line for transmission of the message.

(e) When delivery is made by messenger, the time delivered or the time of the first attempt to deliver for each message on the route shall be the time routed out plus one-half of the interval from the time routed out to the time returned.

(f) In the case of Domestic Full Rate Money Orders, the time delivered shall be the time the money order is paid or the payee is notified.

§ 64.204 First attempt.

(a) In the case of telephone delivery, the time the addressee's telephone is reported to be busy or not answered, or reported out of order, or the addressee or someone authorized to accept the message is not available to receive the message.

(b) In the case of tieline delivery, the time of first attempt is the time transmission is attempted but could not be made because the addressee did not answer or, having answered, requested later transmission. Two minutes later than such time is the time of first attempt for facsimile tieline messages.

(c) In the case of messenger delivery, messages returned to the office undelivered for any reason when first routed out are "first attempts." The time of the first attempt to deliver shall be the time routed out plus one-half of the interval from the time routed out to the time returned.

(d) In all such cases there shall be noted on the message and delivery sheet the "first attempt" time and the reason for non-delivery.

(e) If unsuccessful attempts to deliver by one method result in transfer to another method for delivery, the messages shall not be tallied in the second method, but shall be tallied as a first attempt in the original method in those cases when it is practicable to do so.

(f) Messages delayed in delivery due to special instructions of the sender or addressee shall be excluded from tally as provided in § 64.232.

§ 64.205 Tieline.

A direct circuit connecting a telegraph company's office with a customer's office by teleprinter, telefax, TWX, Telex or Info-Com for the purpose of accepting and/or delivering telegrams.

§ 64.210 Identifying wire numbers.

A number assigned to messages sent over each channel each day at office of origin.

§ 64.212 Messenger route.

A continuous trip of a messenger for the physical delivery or pickup of telegrams entered on a Route Call Record.

§ 64.214 Time routed out.

The time a messenger is dispatched on route.

§ 64.215 Time returned.

The time a messenger returns to the office after completing a route.

§ 64.216 Terminal handling speed of service.

The elapsed time from the time transmission is started from the computer to the destination Western Union office until time delivered or first attempt. For purposes of this measurement, messages sent to agents shall be measured to the time transmission to the agent is completed.

§ 64.218 Filing time to computer output speed of service.

The elapsed time from filing time to the time transmission is started to the destination terminal (Western Union office, TWX station or Telex station).

§ 64.220 Speed of answer—Central Telephone Bureaus (CTB).

The elapsed time on an incoming telephone call from the start of ringing at the CTB until the call is answered by a recording operator.

§ 64.221 Agency speed of service.

The elapsed time in agency handling on:

(a) Originating messages—from filing time to time transmitted to control office.

(b) Terminating messages—from time transmission to the agent is completed to time routed out for messenger delivery or time telephoned or first attempt.

INSTRUCTIONS FOR THE CONDUCT OF TERMINAL HANDLING SPEED OF SERVICE STUDIES

GENERAL PROVISIONS

§ 64.230 Offices and locations to be studied.

The Western Union Telegraph Company shall conduct weekly terminal handling studies, in accordance with the instructions contained herein, in the following cities and locations:

Atlanta, Ga.
Baltimore, Md.
Boston, Mass.
Chicago, Ill.
Cincinnati, Ohio
Cleveland, Ohio
Dallas, Tex.
Denver, Colo.
Detroit, Mich.
Houston, Tex.
Indianapolis, Ind.
Kansas City, Mo.
Los Angeles, Calif.
Miami, Fla.
Minneapolis, Minn.
New Orleans, La.
New York, N.Y. (All Public Message Centers)
Philadelphia, Pa.
Portland, Ore.
San Francisco, Calif.
St. Louis, Mo.
Washington, D.C.
Central Tel. Bureaus
Moorestown, N.J.
Bridgeton, Mo.
Reno, Nev.
(Telephone diys only)

§ 64.231 Types of messages to be tallied.

Of the messages selected as hereinafter provided, the following shall be tallied by time intervals on speed of service tally sheets: Domestic Full Rate including Government and CAK, Domestic Full Rate Money Order, CND and Full Rate International (INTL). (For purposes of this instruction, "Domestic" shall include messages originating in Canada and Mexico as well as other "domestic" points outside the United States.

V38-135 JUL 16 73 XUM

§ 64.232 Exclusion of messages from tally.

Messages other than those specified in § 64.231 shall not be tallied. These messages include among others: Service, Wire, Press, Personal Opinion Messages (POM), Overnight Telegrams, Deadhead, confirmation copies of messages previously delivered, messages delayed in delivery due to special instructions of the sender or adressee, and messages delayed due to closed hours of the addressee.

§ 64.233 Hours to be included and selection of study date.

Speed of service studies shall be made on messages received at delivery office between the hours of 9 a.m. and 6 p.m. local time, on one designated day each week, except as provided in §§ 64.235 and 64.282. The day to be designated each week, for each of the listed offices in § 64.230, shall be selected at a central point, from a random number table, and the date so determined shall not be communicated to the office involved prior to 4 p.m. local time at that office on the designated date.

§ 64.234 Tallies; when made.

Speed of service tallies shall be made after 7:00 p.m. of the day of transmission but not later than the day following transmission, except any tally thus scheduled to be made on a holiday or a Saturday may be postponed until the following business day.

§ 64.235 Suspension of tallying.

(a) Speed of service tallies shall not be taken with respect to messages handled on the following holidays: New Year's, Washington's Birthday, Valentine's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas; and on the last business day preceding each of these holidays.

(b) In the event of a serious and unusual communication emergency such as that caused by flood, earthquake, strike by respondent's employees, or fire, tallying may be suspended at the offices affected by such emergency. In the event of suspension of tallies during an emergency, messages handled during the emergency need not be tallied.

§ 64.236 Volume of messages to be tallied.

At each city studied (in New York City, each PMC), there shall be sampled for each method of delivery (telephone, tieline and messenger) not less than 50 messages in each delivery method (or all available messages).

§ 64.237 Selection of offices for tallying.

(a) Sampling for terminal handling speed of service in each method shall be limited to those offices in each city which deliver an average of 50 or more messages daily by telephone, tieline or messenger: *Provided, however*, That if none of the offices in a city deliver 50 or more messages daily in a particular method of delivery, then each such office shall be considered as delivering an average of 50 messages per day in that method and as qualifying under this section for tallying.

(b) The volume to be sampled at each office shall be determined as follows:

(1) Where there are no branch offices in a city, the entire sample of 50 messages (or all available messages) in each delivery method shall be taken at the main office.

(2) Where there are one or more delivery branches in a city, the sample of 50 messages in each delivery method shall be divided between the main office and any branches delivering by that method in the proportion that each office load bears to the total delivered load in that method.

(3) The sample of 50 messages in the tieline method shall be divided between teleprinter (including TWX and Telex) and telefax in the ratio of the respective total city loads in these methods.

§ 64.238 Selection of messages for tallying.

(a) The selection of individual messages to be tallied from the delivered message file of any method at any office shall be determined from the identifying wire number, as follows:

(1) A set of ten cards shall be prepared, each card bearing one of the digits 0 to 9;

(2) The ten cards shall be thoroughly shuffled face down followed by a cut of the deck. The digit appearing on the top card after completion of the cut shall determine selection of the messages to be tallied. Messages in the files of the types named in § 64.231, received at delivery office between 9 a.m. and 6 p.m., local time, on which the identifying wire number ends in the digit selected shall be withdrawn from tallying until the quota for the day has been obtained.

(b) Offices shall select individual messages from the files for each method in the following manner:

(1) Where delivered messages are filed alphabetically, a card for each letter of the alphabet shall be prepared. The set of cards shall be shuffled face down and the deck cut. The top card shall be drawn after completion of the cut. The file shall be searched beginning with the letter of the alphabet drawn for individual messages of the types named in § 64.231 whose identifying wire number ends in the digit drawn. If, after complete search of the file for messages received at delivery office between 9 a.m. and 6 p.m., local time, the quota for tallying is not obtained, the succeeding alphabet card or cards shall be drawn and used in the order of their appearance in the pack from the top down.

(2) Where delivered messages are filed in sent number sequence or in delivered time order or route records are filed in route out or return time order, a set of 9 cards shall be prepared, each card bearing one of the hours 9 a.m. to 10 a.m. through 5 p.m. to 6 p.m. The set of cards shall be shuffled face down and the deck cut. The top card shall be drawn after completion of the cut. The file shall be searched beginning with the hour drawn for individual messages whose identifying wire number ends in the digit drawn. If after complete search of the file for messages of the types named in § 64.231 received at delivery office between 9 a.m. and 6 p.m., local time, the quota for tallying is not obtained, another digit shall be selected in accordance with § 64.238 (a)(2).

MESSAGES DELIVERED BY TELEPHONE

§ 64.261 Selection and tally.

(a) Offices and messages selected for tallying in any city shall be determined in accordance with §§ 64.236 to 64.238.

(b) Each selected message of the type described in § 64.231 which was received at delivery office between the hours of 9 a.m. and 6 p.m., local time, shall be tallied.

(c) The interval of time to be tallied for each message selected shall be from the computer output time to the time delivered or time of the first attempt.

MESSAGES DELIVERED BY TIELINE

§ 64.271 Selection and tally.

(a) For messages delivered by telefax and manual teleprinter, TWX or Telex, offices and messages for tallying in any city shall be determined in accordance with §§ 64.236 to 64.238.

(b) For messages delivered by tieline switching equipment, the following method for selection of messages to be tallied shall be used:

(1) Each roll of monitor tape, on which are recorded copies of messages delivered by tieline switching equipment shall be designated with a separate number;

(2) A number card shall be prepared for each numbered roll of monitor tape. The entire set of cards, representing an equal number of monitor rolls, shall be thoroughly shuffled face down daily and the deck cut. The required number of cards shall be withdrawn from the top of the deck after completion of the cut to determine the monitor roll or rolls from which tallies will be made. These cards shall be withdrawn and used in the order of their appearance in the pack from the top down;

(3) A digit shall be selected, as outlined in § 64.238(a).

(4) Each message of the types named in § 64.231 in the selected monitor tape rolls received at delivery office between 9 a.m. and 6 p.m., local time, on which the identifying wire number ends in the digit selected shall be tallied, until the quota is obtained.

(c) The interval of time to be tallied for each message selected shall be from the computer output time to the time delivered or time of the first attempt.

MESSAGES DELIVERED BY MESSENGER

§ 64.281 Route record data.

At all offices in the cities enumerated in § 64.230 where tallies are required to be made, the following shall be entered on route records: (a) The identifying wire number of each message; (b) the computer output time for each message of the types named in § 64.231 except for confirmation copies of messages previously delivered; (c) the time a messenger is dispatched on each route carrying messages; and (d) the time of return from the route.

§ 64.282 Selection and tally.

(a) Offices and messages selected for tallying in any city shall be determined in accordance with §§ 64.236 through 64.238.

(b) Each message of the type described in § 64.231 which was received at delivery office between the hours of 9 a.m. and 6 p.m., local time, shall be tallied, except that messages delivered by telephone and subsequently dispatched for physical delivery by messenger need not be tallied.

(c) The interval of time to be tallied for each message selected shall be from the computer output time to the time delivered or to the time of the first attempt (see §§ 64.203 and 64.204).

INSTRUCTIONS FOR THE CONDUCT OF FILING TIME TO COMPUTER OUTPUT SPEED OF SERVICE STUDIES

§ 64.285 Procedures.

Continuous studies shall be made of the elapsed time from filing time to computer output time on full-rate and money order traffic transiting the computer. The monthly report of sampled traffic will be based upon every 200th full rate message or money order transiting the computer and will include messages which originate as Teleprinter Computer Service (TCS) inputs by Telex, TWX and Info-Com customers as well as those originating at Western Union offices.

INSTRUCTIONS FOR THE CONDUCT OF CENTRAL TELEPHONE BUREAU SPEED OF ANSWER STUDIES

§ 64.288 Procedures.

Continuous studies will be made of the speed of answer at the three Central Telephone Bureaus, Moorestown, New Jersey, Bridgeton, Missouri and Reno, Nevada. Monthly reports shall be made for each of the bureaus showing the percentage of calls answered within 20 seconds and also the percentage of calls answered within 50 seconds.

INSTRUCTIONS FOR THE CONDUCT OF AGENCY SPEED OF SERVICE STUDIES

§ 64.290 Source of data.

Agency speed of service studies shall be prepared from summary data contained in Western Union's Agency Inspection Guide List, Form WU 16, for Class 9–C and Class 11–B agencies, which forms shall be collected and maintained at the Company's Washington, D.C. headquarters.

§ 64.291 Method of tallying.

(a) As inspection forms are received during the month to be studied, such forms shall be sorted and filed in:

(1) chronological order, and

(2) administrative area order.

(b) At the close of the study month the forms shall be held in a separate file from those received in the ensuing month for speed of service sampling.

(c) The forms for each administrative area shall be studied on a random sampling basis as follows:

(1) The number of forms for each area under study shall be determined;

(2) Based upon the number of forms received for each area, the number of forms to be sampled shall be determined from the following incremental sampling table:

Number of forms in given area (population)	Sample size	Sample selection
20 or less	all items	all items
21–25	17	random number table
26–30	19	random number table
31–35	23	random number table
36–40	25	random number table
41–45	27	random number table
46–50	30	random number table
51–60	33	random number table
61–75	37	approximately 1 of 2, random start
76–100	42	approximately 1 of 2, random start
101–150	49	approx. every 3rd item, random start
151–200	54	approx. every 4th item, random start
201–250	57	approx. every 5th item, random start
251–300	59	approx. every 6th item, random start
301–500	64	approx. every 9th item, random start
501–750	67	approx. every 10th item, random start
751–1000	69	approx. every 15th item, random start

(3) The sampling process will begin and proceed based upon selection from a random number table.

(4) The speed of service data from each inspection form selected shall be tallied on the prescribed form, using a separate form or series of forms for each administrative area.

(d) Each form shall be summarized in the lower portion of the prescribed form, utilizing the last page of a series for the purpose.

(e) The study and summary forms shall be submitted to the Commission in "work paper" form upon completion of the studies for all administrative areas.

GENERAL PROVISIONS

§ 64.297 Company instructions to offices making studies.

Two copies of all general instructions (and of any amendments thereto) issued to field offices for the purpose of complying with § 1.804 of this chapter and §§ 64.201 to 64.298 shall be filed with the commission upon issuance.

§ 64.298 Summary reports.

The following reports shall be submitted monthly in quadruplicate, on designated forms, no later than the 25th of the month following the month under report:

(a) The results of the studies of terminal handling speed of service at the cities and installations indicated in § 64.230.

(b) The results of the computer analysis of filing time to computer output speed of service as described in § 64.285.

(c) The results of speed of answer studies at the three Central Telephone Bureaus, as described in § 64.288.

(d) The results of agency speed of service studies as described in § 64.291.

Office of the Secretary

INDUSTRY ADVISORY COMMITTEE ON MARITIME POLICY

Notice of Meeting

Pursuant to the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that the Industry Advisory Committee on Maritime Policy will meet in open session at 9:30 a.m. on July 25, 1973, in Room 1E 801, Pentagon, Washington, D.C. 20301.

The meeting will be devoted to a discussion of the quantitative justification for and structure of an ocean cargo allocation system.

With respect to public participation the following requirements shall apply:

(a) Individuals desiring to submit written statements may do so by mailing ten copies thereof no later than July 20, 1973, if possible, to the Recorder, Industry Advisory Committee on Maritime Policy, Office of the Assistant Secretary of Defense (Installations and Logistics), Washington, D.C. 20301. The minutes will be kept open for ten days for the receipt of written statements for the record.

(b) Those individuals submitting a written statement in accordance with (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statement.

(c) Requests for the purpose of making an oral statement shall be ruled on by the Chairman of the Committee who is empowered to apportion the time available during a period of not more than 30 minutes between 11:00 AM and 12:00 Noon. Information concerning the Chairman's ruling on requests for the opportunity to make an oral statement can be obtained by a prepaid telephone call to the Recorder of the Committee (202-697-1903) between 9:00 a.m. and 5:00 p.m. Eastern Time, on July 23, 1973.

(d) Questions may be asked only by members of the Committee and staff.

(e) Seating for the public is limited and will be available on a first-come-first-served basis. Because of building security requirements, anyone wishing to attend the meeting must advise the Recorder of the Committee in advance of the meeting at telephone 202-697-1903.

Dated: July 11, 1973.

MAURICE W. ROCHE,
Director, Correspondence and Directives Division OASD (Comptroller).

CHALLIS NATIONAL FOREST LIVESTOCK ADVISORY BOARD

Notice of Meeting

The Challis National Forest Livestock Advisory Board will meet at 1:00 p.m. July 27, 1973, at the Challis National Forest Supervisor's Office, Challis, Idaho.

This will be the annual meeting of the Advisory Board. The duties of the board are solely advisory and pertain generally to the regulations and/or instructions relating to the use of National Forest lands affecting the administration of grazing in the area represented by the Board. There are no specific topics identified as yet. We will generally be discussing the past year's range management activities and the planned activities for Fiscal Year 1974.

The meeting will be open to the public. Persons who wish to attend should notify Bill Paddock, secretary, at the Challis National Forest Superisor's Office (208-879-2285).

Any member of the public who wishes to do so shall be permitted to file a written statement with the committee, before or after the meeting.

To the extent that time permits, interested persons may be permitted by the committee chairman to present oral statements at the meeting.

Dated: July 5, 1973.

RICHARD O. BENJAMIN,
Forest Supervisor.

Soil Conservation Service

TWELVE MILE CREEK WATERSHED PROJECT, IOWA

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Soil Conservation Service, U. S. Department of Agriculture, has prepared a draft environmental statement for the Twelve Mile Creek Watershed Project, Union, Adair and Ringgold Counties, Iowa, USDA-SCS-ES-WS(ADM)-74-6 (D).

The environmental statement concerns a plan for watershed protection, flood prevention and municipal and industrial water supply. The planned works of improvement provide for land treatment, 11 grade stabilization structures, 22 floodwater retarding structures, and one multi-purpose reservoir with capacity for floodwater retarding and municipal and industrial water.

Copies are available during regular working hours at the following locations:

Soil Conservation Service, USDA, South Agriculture Building, Room 5227, 14th and Indepednence Avenue, S.W., Washington, D.C. 20250.
Soil Conservation Service, USDA, Room 823 Federal Building, 210 Walnut Street, Des Moines, Iowa 50309

Copies are also available from the National Technical Information Service, U. S. Department of Commerce, Springfield, Virginia 22151. Please use name and number of statement above when ordering. The estimated cost is $3.25.

Copies of the draft environmental statement have been sent for comment to various federal, state, and local agencies as outlined in the Council on Environmental Quality Guidelines. Comments are also invited from others having knowledge of or special expertise on environmental impacts.

Comments concerning the proposed action or requests for additional information should be addressed to Wilson T. Moon, State Conservationist, Soil Conservation Service, 823 Federal Building 210 Walnut Street, Des Moines, Iowa 50309.

Comments must be received on or before September 20, 1973, to be considered in the preparation of the final environmental statement.

(Catalog of Federal Domestic Assistance Program No. 10.904, National Archives Reference Services)

Dated: July 9, 1973.

YELLOWFIN TUNA FISHING IN EASTERN PACIFIC OCEAN BY PURSE SEINE VESSELS

Reversion of Incidental Catch Rate

Notice of reversion is hereby given pursuant to § 280.7(b)(2), Title 50, Code of Federal Regulations, as follows:

At 0001 hours, local time, on July 16, 1973, the incidental catch rate of yellowfin tuna for purse seine vessels of 400 short tons carrying capacity or less will revert to fifteen percent (15%). On the basis of the catch and present catch rate, as of that date, the amount of yellowfin tuna caught during the closed season by purse seine vessels of 400 short tons carrying capacity or less will have reached 4,400 short tons as provided in § 280.7(b)(2), Title 50, Code of Federal Regulations.

Issued at Washington, D.C., and dated July 13, 1973.

ROBERT W. SCHONING,
Director, National Marine Fisheries Service.

PANEL ON REVIEW OF CONTRACEPTIVES AND OTHER VAGINAL DRUG PRODUCTS

Notice of Establishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770-776), the Food and Drug Administration announces the establishment by the Secretary, DHEW, on June 27, 1973, of the following Public Advisory Committee:

Designation. Panel on Review of Contraceptives and Other Vaginal Drug Products.

Purpose. The Panel will (1) advise the Commissioner of Food and Drugs on the safety and effectiveness of currently marketed non-prescription drug products for human use containing contraceptives or other vaginal drug products; (2) review and evaluate available data on these products, the adequacy of their labeling; (3) advise on the promulgation of monographs establishing conditions under which these over-the-counter-drug products are generally recognized as safe and effective and not misbranded; and (4) serve as a forum for the exchange of views regarding the prescription and non-prescription status of these various active ingredients and combinations thereof.

Authority for this committee will expire June 27, 1975, unless the Secretary, DHEW, formally determines that continuance is in the public interest.

Dated: July 9, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

FOOD AND DRUG ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part 6, (Food and Drug Administration) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare (35 FR 3685-92, dated February 25, 1970, as amended) is amended to reflect the reorganization of contracts and grants management activities: Section 6B is amended as follows:

SEC. 6B *Organization.* * * *

* * * * *

(c) *Office of the Associate Commissioner for Science.* Functions as the principal advisor to the Commissioner on scientific matters which impact on FDA policy and direction and long-range program goals.

Provides leadership and direction on scientific and environmental matters and stimulates scientific and technological achievement in FDA. Participates with the Division of Contracts and Grants Management in the development of FDA policy concerning the use of grants and contracts; develops scientific policy for the acquisition of scientific data and/or innovative scientific equipment and instrumentation under the grants and contracts mechanism.

Serves as the focal point for pre-award coordination and scientific review of FDA's extramural research, training, and fellowship activities; for the development of Agency scientific research

V 38 I 135 JUL 16 73 XUM

and environmental impact policies and procedural guidelines; and for technical liaison activities concerning scientific matters, environmental impact, research grants, and science oriented contracts.

Chairs an internal science advisory council, composed of scientists representing the Bureaus, which advises the Agency on scientific policy and environmental impact of Agency actions.

Appraises the technical aspects and relative contributions of FDA's intramural and extramural science programs. Evaluates the adequacy of scientific resources available to the Agency. Initiates action as appropriate to enhance the FDA scientific posture by promoting optimum utilization of the grants and contracts mechanism, inter-agency agreements, and international scientific collaboration under Public Law 480 and related statutes. Provides a focal point for committee management activities within FDA.

. . . . . .

(f) *Office of the Associate Commissioner for Administration.* Serves as principal advisor to the Commissioner on all phases of management inherent in the operations of FDA.

Responsible for the effective utilization of all management resources and the implementation of operating programs by coordinating the funding, manpower, facilities, and equipment needs of the Agency.

Provides leadership and direction to administrative management including budget, finance, personnel, organization, methods, grants and contracts, procurement and property, records, and similar supporting activities. Assures that conduct of these efforts effectively supports program operations.

Develops and coordinates the Agency's Operational Planning System. Develops policy and procedures necessary to maintain the integrity of trade secrets and other privileged information submitted by industry to FDA; formulates Agency-wide security policy and investigates and recommends action concerning security problems.

Develops data systems policy and procedures necessary to coordinate all FDA information and data retrieval systems and ADP equipment; operates FDA's central computer facility; and provides systems analysis and programming services.

. . . . . .

(f-2) *Division of General Services.* Provides leadership and guidance to headquarters staff offices, headquarters operating activities, and field activities for all general services programs, including: procurement, personal property management and accountability, real property management, space management and utilization, construction and engineering services, communications, printing and reproduction, microform management, and mail and files.

Responsible for maintaining effective liaison with the Government Printing Office, and for the centralized clearance and coordination of all printing and publication services.

Coordinates the development of Agency-wide policies and procedures for such services; and plans, executes, evaluates, and adjusts efforts in these activities.

. . . . . .

(f-6) *Division of Contracts and Grants Management.* Provides leadership, direction, and staff advisory services for the FDA negotiated contracting and grants management programs. Coordinates activities of FDA Bureaus and Offices to insure proper development of grants and contracts program requirements.

Plans, develops, and coordinates the issuance of FDA-wide negotiated contracting policies and procedures.

Participates with the Associate Commissioner for Science in the development of FDA policy concerning the use of research grants and grants funds. Serves as the Agency focal point for developing, coordinating, and implementing FDA policies and procedures pertaining to grants management; serves as the primary point of liaison with the management staff of grantee institutions for the general interpretation of grants management policies.

Directs and coordinates all administrative functions associated with grants management after technical review and approval are complete. Directs and conducts negotiations with grantee institutions.

Executes all negotiated contracts and grant awards.

Analyzes, evaluates, and reports selected statistical and financial data pertaining to the grants and contracts program.

Maintains liaison with the Office of the Assistant Secretary for Administration and Management on contracts and grants management policy procedural and operating matters. Serves as FDA focal point for the processing of audit reports and for liaison with DHEW Audit Agency.

Provides price/cost analysis and related services for contracts and grants.

. . . . . .

Date: July 9, 1973.

ROBERT H. MARIK,
Assistant Secretary for Administration and Management.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Disaster Assistance Administration

[Docket No. NFD-106]

COLORADO

Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11725 of June 27, 1973; and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744), as amended by Public Law 92-209 (85 Stat. 742); notice is hereby given that on July 6, 1973, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Colorado resulting from severe flooding and landslides caused by heavy rains and snowmelt runoff beginning on or about March 28, 1973, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91-606. I therefore declare that such a major disaster exists in the State of Colorado. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11725, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238, to administer the Disaster Relief Act of 1970 (Public Law 91-606, as amended), I hereby appoint Mr. Donald G. Eddy, HUD Region 8, to act as the Federal Coordinating Officer to perform the duties specified by Section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of Colorado to have been adversely affected by this declared major disaster:

The Counties of:

Archuleta	Mineral
Conejos	Montezuma
Costilla	Montrose
Delta	Ouray
Dolores	Rio Grande
Gunnison	San Juan
Hinsdale	San Miguel
La Plata	

(Catalog of Federal Domestic Assistance Program No. 50.002, Disaster Assistance)

Dated: July 9, 1973.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

[Docket No. NFD-107]

TEXAS

Notice of Major Disaster and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11725 of June 27, 1973; and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238; and by virtue of the Act of December 31, 1970, entitled "Disaster Relief Act of 1970" (84 Stat. 1744), as amended by Public Law 92-209 (85 Stat. 742); notice is hereby given that on July 11, 1973, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Texas resulting from severe storms and flooding beginning on or about June 11, 1973, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 91-606. I therefore declare that such a major disaster exists in the State of Texas. You are to determine the specific areas within the State eligible for Federal assistance under this declaration.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11725, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-73-238, to administer the Disaster Relief Act of 1970 (Public Law 91-606, as amended), I hereby appoint Mr. Joe D. Winkle, HUD Region 6, to act as the Federal Coordinating Officer to perform the duties specified by section 201 of that Act for this disaster.

I do hereby determine the following areas in the State of Texas to have been adversely affected by this declared major disaster:

The Counties of:

Brazoria	Liberty
Galveston	Montgomery
Hardin	Polk
Harris	San Jacinto
Jasper	Tyler

Dated: July 11, 1973.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. RSI-1]

SAFETY OF PENN CENTRAL RAIL COMMUTER OPERATIONS IN THE STATES OF NEW YORK AND CONNECTICUT

Notice of Public Hearing

Notice is hereby given that the Federal Railroad Administration (FRA) will hold a public hearing concerning safety of Penn Central rail commuter operations on its Harlem, Hudson and New Haven lines in the States of New York and Connecticut. The hearing will commence at 9:30 a.m. Saturday, July 28, 1973, in the Little Theater of the Westchester County Center, Central Avenue at Bronx River Parkway, White Plains, New York.

Interested persons are invited to attend and participate in this hearing. The hearing will be an informal one, not a judicial or evidentiary type of hearing. There will be no cross-examination of persons making statements. A staff member of the FRA will make an opening statement outlining the matter set for a hearing. Interested persons will then have an opportunity to present their initial oral statements. At the completion of all initial oral statements, those persons who wish to make rebuttal statements will be given an opportunity to do so in the same order in which they made their initial statements. Additional procedures for conducting hearings will be announced at the hearing.

Interested persons may present oral or written statements at the hearing. All statements will be made a part of the record of the hearing and be a matter of public record. Persons who wish to make oral statements at the hearing should notify the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590, before July 27, 1973, stating the amount of time required for the initial statement.

This notice is issued under the authority of section 208, 84 Stat. 974, 45 U.S.C. 437; and § 1.49(n) of the regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(n).

Issued in Washington, D.C., on July 12, 1973.

JOHN W. INGRAM,
Administrator.

[FR Doc.73-14516 Filed 7-13-73;8:45 am]

ATOMIC ENERGY COMMISSION

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS—GENERAL ELECTRIC SUBCOMMITTEE

Notice of Meeting

JULY 12, 1973.

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards' Subcommittee on the General Electric Company will hold a meeting on August 1 and 2, 1973, at the Holiday Inn, 1355 N. 4th Street in San Jose, California. The purpose of this meeting will be to review various topics applicable to General Electric Company designed boiling water reactors.

The following constitutes that portion of the Subcommittee's agenda for the above meeting which will be open to the public:

Wednesday, August 1, 1973, 9:30 a.m.-5:00 p.m.—Review of various topics generic to boiling water reactors (presentations by the AEC Regulatory Staff and GE will be made and discussions with these groups will be held.) If it becomes necessary to carry over the public session to August 2, an announcement will be made at the close of the public session on August 1, 1973.

In connection with the above agenda item, the Subcommittee will hold an executive session at 8:30 a.m. on August 1, 1973, which will involve a discussion of its preliminary views, and an executive session at the end of the day on August 2, 1973, consisting of an exchange of opinions of the Subcommittee members and internal deliberations and formulation of recommendations to the ACRS.

In addition, on August 2, the Subcommittee will hold a closed session with the Regulatory Staff and GE to discuss privileged information relating to plant design and corporate research.

I have determined, in accordance with subsection 10(d) of Public Law 92-463, that the executive sessions at the beginning and end of the meeting will consist of an exchange of opinions and formulation of recommendations, the discussion of which, if written, would fall within exemption (5) of 5 U.S.C. 552(b); and that a closed session will be held to discuss certain privileged information under exemption (4) of 5 U.S.C. 552(b). It is essential to close such portions of the meeting to protect such privileged information and protect the free interchange of internal views and to avoid undue interference with agency or Committee operation.

Practical considerations may dictate alterations in the above agenda or schedule. If it is necessary to continue the public session on August 2, an announcement to that effect will be made at the close of the public session on August 1.

The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda item may do so by mailing 25 copies thereof, postmarked no later than July 24, 1973, to the Executive Secretary, Advisory Committee on Reactor Safeguards, U.S. Atomic Energy Commission, Washington, D.C. 20545. Such comments shall be based upon GE topical reports and various other documents on file and available for public inspection at the Atomic Energy Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545.

(b) Those persons submitting a written statement in accordance with paragraph (a) above may request an opportunity to make oral statements concerning the written statement. Such requests shall accompany the written statement and shall set forth reasons justifying the need for such oral statement and its usefulness to the Subcommittee. To the extent that the time available for the meeting permits, the Subcommittee will receive oral statements during a period of no more than 30 minutes at an appropriate time, chosen by the Chairman of the Subcommittee, between the hours of 1:30 p.m. and 3 p.m. on August 1, 1973.

(c) Requests for the opportunity to make oral statements shall be ruled on by the Chairman of the Subcommittee who is empowered to apportion the time available among those selected by him to make oral statements.

(d) Information as to whether the meeting has been canceled or rescheduled and in regard to the Chairman's ruling on requests for the opportunity to present oral statements, and the time allotted, can be obtained by a prepaid telephone call on July 30, 1973, to the office of the executive secretary of the

FEDERAL REGISTER, VOL. 38, NO. 135—MONDAY, JULY 16, 1973

V 38 I 135 JUL 16 73 XUM

Committee (telephone 301-973-5651) between 8:30 a.m. and 5:15 p.m., e.d.t.

(e) Questions may be propounded only by members of the Subcommittee and its consultants.

(f) Seating for the public will be available on a first-come, first-served basis.

(g) A copy of the transcript of the open portions of the meeting will be available within approximately 24 hours at the Atomic Energy Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20545. Copies of the minutes of the meeting will be made available, on request, at the Atomic Energy Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20545, on or after October 1, 1973. Copies may be obtained upon payment of appropriate charges.

JOHN C. RYAN,
Acting Advisory Committee Management Officer.

[Docket No. RM-50-1]

ACCEPTANCE CRITERIA FOR EMERGENCY CORE COOLING SYSTEMS

Resumption of Hearing (Environmental Phase)

In the matter of rulemaking hearing, acceptance criteria for emergency core cooling systems for light-water-cooled nuclear power reactors.

According to Board telegraphic order, dated July 9, 1973,[1] hearing sessions in the above captioned proceeding will reconvene on Monday, July 23, 1973, in the hearing room at 8120 Woodmont Avenue, Bethesda, Maryland. The session on July 23 will begin at 10:00 a.m.; on subsequent days the hearings will convene at 9:00 a.m. The hearings will run five (5) days a week until completed, Monday through Friday, inclusive.

Issued at Washington, D.C., this 11th day of July, 1973.

NATHANIEL H. GOODRICH,
Chairman,
ECCS Hearing Board.

[Docket No. 50-363]

JERSEY CENTRAL POWER & LIGHT CO.

Issuance of Construction Permit

Notice is hereby given that, pursuant to the Initial Decision of the Atomic Safety and Licensing Board, dated July 9, 1973, the Atomic Energy Commission (the Commission) has issued Construction Permit No. CPPR-96 to Jersey Central Power & Light Company for the construction of the Forked River Nuclear Generating Station, Unit 1, a pressurized water reactor, on the applicant's site in Ocean County, New Jersey. The reactor is being designed for initial operation at 3390 megawatts thermal.

The Initial Decision and Construction Permit No. CPPR-96 are available for public inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and in the Ocean County Library, 15 Hooper Avenue, Toms River, New Jersey 08753. Copies of the construction permit may be obtained upon request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Dated at Bethesda, Maryland, this 10th day of July 1973.

For the Atomic Energy Commission.

KARL R. GOLLER,
Chief, Pressurized Water Reactors, Branch No. 3, Directorate of Licensing.

[Docket Nos. 50-324; 50-325]

CAROLINA POWER AND LIGHT CO.

Reconstitution of Board

In the matter of Carolina Power and Light Company (Brunswick Steam Electric Plant, Units 1 and 2) Docket Nos. 50-324, 50-325.

Dr. J. V. Leeds, Jr., was a member and Dr. Forrest J. Remick was an alternate member of the Atomic Safety and Licensing Board established to consider the above application. Neither Dr. Leeds nor Dr. Remick is able, because of schedule conflicts, to serve on this Board.

Accordingly, Dr. Frank F. Hooper, whose address is School of Natural Resources, University of Michigan, Ann Arbor, Michigan 48104, is appointed a member of the Board. Reconstitution of the Board in this manner is in accordance with § 2.721 of the Rules of Practice, as amended.

Dated at Washington, D.C. this 10th day of July 1973.

NATHANIEL H. GOODRICH,
Chairman, Atomic Safety and Licensing Board Panel.

[Docket Nos. 50-440, 50-441]

DUQUESNE LIGHT CO. ET AL.

Notice of Receipt of Application for Construction Permits and Facility Licenses and Applicants' Environmental Report; Time for Submission of Views on Antitrust Matter

Duquesne Light Company, 435 Sixth Avenue, Pittsburgh, Pennsylvania 15219, Ohio Edison Company, 47 North Main Street, Akron, Ohio 44308, Pennsylvania Power Company, One East Washington Street, New Castle, Pennsylvania 16103, The Cleveland Electric Illuminating Company, P.O. Box 5000, Cleveland, Ohio 44101, and Toledo Edison Company, 300 Madison Avenue, Toledo, Ohio 43652 (the applicants), pursuant to section 103 of the Atomic Energy Act of 1954, as amended, have filed an application which was docketed on June 25, 1973, for authorization to construct and operate two single-cycle, forced circulation, boiling water nuclear reactors. The application was tendered on March 28, 1973. Following a preliminary review for completeness, it was rejected on May 2, 1973, for lack of sufficient information. The applicants submitted additional information on June 6, 1973 and the application was accepted for docketing.

The proposed nuclear facility, designated by the applicants as the Perry Nuclear Power Plant, Units 1 & 2 is located near Lake Erie in Lake County, Ohio, approximately 35 miles northeast of Cleveland, Ohio and is designated for initial operation at approximately 3579 megawatts (thermal) with a net electrical output of approximately 1205 megawatts.

A Notice of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before September 7, 1973. The request should be filed in connection with Docket 50-440A & 50-441A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545, and at the Perry Public Library, 3753 Main Street, Perry Township, Ohio 44081.

The applicant has also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, an environmental report dated March 28, 1973. The report has been made available for public inspection at the aforementioned locations. The report, which discusses environmental considerations related to the proposed construction of the Perry Nuclear Power Plant, Units 1 & 2 is also being made available at the Office of the Governor, State Clearinghouse, 62 East Broad Street—2nd Floor, Columbus, Ohio 43215 and at the Northeast Ohio Areawide Coordinating Agency, 439 The Arcade, Cleveland, Ohio 44114.

After the report has been analyzed by the Commission's Director of Regulation or his designee, a draft environmental statement will be prepared by the Commission. Upon preparation of the draft environmental statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of availability of the draft statement, requesting comments from interested persons on the draft statement. The summary notice will also contain a statement to the effect that comments of Federal agencies and State and local officials thereon will be made available when received.

Dated at Bethesda, Md., this 28th day of June 1973.

For the Atomic Energy Commission.

WALTER R. BUTLER,
Chief, Boiling Water Reactors, Branch 1, Directorate of Licensing.

[FR Doc.73-13656 Filed 7-5-73;8:45 am]

KERR-McGEE CORP.

Notice of Hearing

The Kerr-McGee Corporation, Kerr-McGee Building, Oklahoma City, Oklahoma ("the licensee") is the holder of Source Material License No. SUB-1010 issued by the Atomic Energy Commission ("the Commission"). The license, issued on February 20, 1970, authorizes the use of source material in the production of uranium hexafluoride under certain conditions specified therein, and expires on February 28, 1975. On April 10, 1970, the licensee requested a license amendment which would permit, among other things, subsurface disposal of certain liquid radioactive wastes. By letter dated October 15, 1970, the Deputy Director for Fuels and Materials ("Deputy Director") advised the licensee that the requested amendment had been denied and specified the reasons therefor. During the thirty day period provided for in the letter within which the licensee could request a hearing, the licensee requested to be permitted to withdraw its application without prejudice. By letter dated March 18, 1971, the Deputy Director approved the licensee's request.

On May 10, 1972, the licensee again requested a license amendment which would authorize subsurface disposal of certain liquid radioactive wastes. The amendment requested would permit the licensee to utilize deep well disposal of raffinate wastes generated from its solvent extraction uranium purification process at its Sequoyah facility. By letter dated September 29, 1972, the Deputy Director advised the licensee that its amendment request had been denied and specified the reasons therefor. After consideration of additional information submitted by the licensee, the Deputy Director, by letter dated March 14, 1973, affirmed the denial of September 29, 1972. On April 5, 1973, the licensee requested a hearing on the matter of the denial, pursuant to the provisions of 10 CFR 2.103.

The Deputy Director, pursuant to the Atomic Energy Act of 1954, as amended, and 10 CFR Part 40, denied the application of May 10, 1972 after determining that issuance of the license amendment would not conform with the requirements set forth in 10 CFR 40.32(c) and (d) because:

1. Existing information is not adequate to demonstrate the presence, location, or nature of the faults that are purported to provide barriers to movement of fluid from the disposal formation, nor is there adequate information to demonstrate that known faults will act as barriers to such movement during continued operation of the proposed well.

2. The complexity of the geologic formation is such that there is no assurance as to the migration paths of the radioactive wastes and the brines which would be displaced.

3. The complexity of the geologic and hydrologic system effectively precludes emergency recovery of the injected radioactive waste.

In view of the above determination with respect to matters of radiological health and safety, no findings were made by the Deputy Director with respect to whether, pursuant to 10 CFR 40.32(e), any applicable requirements in regard to environmental matters as set out in Appendix D of 10 CFR Part 50 had been satisfied.

Pursuant to the Atomic Energy Act of 1954, as amended, and the regulations in Title 10, Code of Federal Regulations, Part 2, rules of practice, notice is hereby given that a hearing will be held, at a time and place to be set in the future by an Atomic Safety and Licensing Board ("the Board") to consider the May 10, 1972 application for amendment of Source Material License No. SUB-1010 held by the licensee. The Board will be designated by the Chairman of the Atomic Safety and Licensing Board Panel. Notice as to its membership will be published in the FEDERAL REGISTER.

The Board will consider and initially decide, as the issues in this proceeding, whether, pursuant to the Atomic Energy Act of 1954, as amended, and in accordance with 10 CFR 40.32(c) and (d):

1. The licensee's equipment, facilities, and procedures proposed for use pursuant to the requested amendment are adequate to protect health and minimize danger to life or property; and

2. The issuance of the amendment will be inimical to the health and safety of the public.

If, upon consideration of the record developed in this proceeding, the Board makes an affirmative finding with respect to Item 1 and a negative finding with respect to Item 2, the application shall be remanded to the Deputy Director for such further action on environmental matters as may be required by 10 CFR 40.32(e).

A prehearing conference or conferences will be held by the Board, at a date and place to be set by it, to consider pertinent matters in accordance with the Commission's rules of practice. The date and place of the hearing will be set by the Board at or after the prehearing conference. Notices as to the dates and places of the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

An answer to this notice, pursuant to the provisions of 10 CFR 2.705, must be filed by the licensee not later than August 6, 1973.

Papers required to be filed in this proceeding may be filed by mail or telegram addressed to the Secretary of the Commission, U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C.

Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR 2.708, an original and twenty (20) conformed copies of each such paper with the Commission.

Pursuant to 10 CFR 2.785, the Commission authorizes an Atomic Safety and Licensing Appeal Board to exercise the authority and perform the review functions which would otherwise be exercised and performed by the Commission. The Appeal Board will be designated pursuant to 10 CFR 2.787, and notice as to its membership will be published in the FEDERAL REGISTER.

Dated at Germantown, Maryland this 10th day of July 1973.

For the Atomic Energy Commission.

GORDON M. GRANT,
Acting Secretary of the Commission.

[FR Doc.73-14451 Filed 7-13-73;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

EFFLUENT STANDARDS AND WATER QUALITY INFORMATION ADVISORY COMMITTEE

Notice and Agenda of Meeting

1. *Notice of meeting.* Notice is hereby given that meetings of the Effluent Standards and Water Quality Information Advisory Committee ("the Committee") established under section 515 of the Federal Water Pollution Control Act ("the Act": 33 U.S.C. 1373; Public Law 92-500), will be held beginning at 9 a.m. on each day, July 23, 1973 through July 27, 1973, in Room 1112, Crystal City, Building 2, Arlington, Virginia. These are regularly scheduled meetings of the Committee.

During the week of July 23, 1973 through July 27, 1973, the Committee intends to consider scientific and technical information pertinent to the determination required to be made by the Administrator of the Environmental Protection Agency when proposing regulations providing effluent limitations guidelines and standards of performance for new sources under the Act, including guidelines and standards for the following categories of sources: pulp and paper mills; paperboard, builders paper and board mills; meat product and rendering processing; dairy product processing; grain mills; canned and preserved fruits and vegetables processing; canned and preserved seafood processing; sugar processing; textile mills; inorganic chemicals manufacturing; soap and detergent manufacturing; fertilizer manufacturing; petroleum refining; nonferrous metals manufacturing; phosphate manufacturing; steam electric powerplants; ferroalloy manufacturing; leather tanning and finishing; glass and asbestos manufacturing; and rubber processing.

The meetings will be open to the public. The Committee does not intend to receive oral statements or hold informal workshops. However, written statements may be submitted to the Committee in

[1] See also "Order for resumption of hearing sessions and related matters including questioning of additional direct testimony" filed July 10, 1973.

V 38 I 135 JUL 16 73 XUM

accordance with the procedures outlined below. Any member of the public planning to attend or wishing to obtain additional information should contact Dr. Martha Sager, Chairman, ES&WQIAC at 703/557-7390. Any changes in the above planned schedule will be announced at the Committee meetings.

2. *Written statements.* Section 515(b)(3) of the Act provides that scientific and technical information in the Committee's possession, including that which is presented at public hearings, is to be transmitted by the Committee to the Administrator and "shall constitute a part of the administrative record and comments on my proposed regulations or standards as information to be considered with other comments and information in making any final determinations." When public hearings are held by the Committee, transcripts of these hearings will be prepared and included within the administrative record. Minutes of Committee meetings will also be prepared and included in the record; however, verbatim transcripts of the discussions at such meetings will not be prepared.

A public hearing will not be held during the July 23 through July 27, 1973 meetings. Parties desiring to submit scientific and technical information to the Committee should submit such information in writing to the Committee, rather than rely upon minutes of the Committee meetings for the transmission of such information. (The Committee, of course, does not view this as the sole means of inclusion of public comments in the administrative record. See, e.g., Administrative Procedure Act, 5 U.S.C. 553 and 706.) Written statements or comments may be transmitted to the Committee at any meeting of the Committee or by mail to Dr. Martha Sager, Chairman, Effluent Standards and Water Quality Information Advisory Committee, Environmental Protection Agency, Room 821, Crystal Mall, Building 2, Washington, D.C. 20460.

ROBERT L. SANSOM,
Assistant Administrator for Air and Water Programs.

JULY 9, 1973.

FEDERAL COMMUNICATIONS COMMISSION

EQUIPMENT STANDARDS FOR NON-BARRIER PBX TASK GROUP

Notice of Meeting

JULY 10, 1973.

In accordance with Public Law 92-463, announcement is made of a public meeting of the Equipment Standards for Non-Barrier PBX Task Group of the PBX Standards Advisory Committee. The meeting is to be held on July 23, and 24, 1973, at the Franklin D. Roosevelt Post Office Building, G.T.E. office, 23rd Floor at 909 Third Avenue, New York, New York. The meeting will start on July 23 at 1:00 p.m.

1. *Purpose.* The purpose of the PBX Standards Advisory Committee is to prepare recommended standards to permit the interconnection of customer provided and maintained PBX equipment to the public switched network. The purpose of this Task Group is to prepare recommendations to the PBX Standards Advisory Committee regarding Equipment Standards for the Non-Barrier repeat coil PBX. The results of this meeting will supply material to be included in the Advisory Committee's August status report.

2. *Activities.* As at prior meetings, Task Group members and observers present their suggestions and recommendations regarding the various technical criteria and standards that should be considered as part of the Equipment Standards.

3. *Agenda.* The agenda for the July 23, 24, 1973 meeting will be as follows:

a. Update of the Equipment Standards based upon the recent changes in Interface Criteria

b. Review of Hazardous voltages

4. *Public participation.* The public is invited to attend this meeting. Any member of the public wishing to file a written statement with the Committee, may do so before or after the meeting.

It is suggested that those desiring more specific information, contact the Domestic Rates Division on (202) 632-6457.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

[FR Doc.73-14467 Filed 7-13-73;8:45 am]

FEDERAL MARITIME COMMISSION

AMERICAN GREAT LAKES-MEDITERRANEAN EASTBOUND FREIGHT CONFERENCE

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street, N.W., Room 1015; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before August 6, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Eric G. Brown, Secretary American Great Lakes-Mediterranean Eastbound Freight Conference 10, Place de la Joliette (2me) Marseilles, France

Agreement No. 9000-6 among member lines of the above-named conference adds a provision to the basic agreement providing that member lines may charter tramp vessels within the scope of the conference to Black Sea ports, for full homogeneous cargo, excluding relief cargo. In addition it adds Black Sea Canada Line as a conference member and deletes from membership Zim Israel Navigation Co., Ltd.

By order of the Federal Maritime Commission.

Dated: July 10, 1973.

FRANCIS C. HURNEY,
Secretary.

JAPAN-ATLANTIC AND GULF FREIGHT CONFERENCE

Notice of a Petition Filed

Notice is hereby given that the following petition has been filed with the Commission for approval pursuant to section 14b of the Shipping Act, 1916, as amended (75 Stat. 762, 46 U.S.C. 814).

Interested parties may inspect a copy of the proposed contract form and of the petition at the Washington office of the Federal Maritime Commission, 1405 I Street, N.W., room 1015 or at the field offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments with reference to the proposed contract form and the petition including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, 1405 I Street, N.W., Washington, D.C. 20573, on or before August 6, 1973. Any person desiring a hearing on the proposed contract system shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the proposed contract form and the petition (as indicated hereinafter), and the statement should indicate that this has been done.

Notice of agreement filed by:

Charles F. Warren, Esq.
1100 Connecticut Avenue, N.W.
Washington, D.C. 20036

The member lines of the Japan-Atlantic & Gulf Freight Conference (Agreement No. 3103, as amended) have filed with the Commission under Section 146 an application to modify its approved Dual Rate Contract, which has been assigned Federal Maritime Commission Number 3103 DR-3. The application adds currency devaluation to those governmental activities contained in Article 15(a) of the contract which, if occur, permits the conference to suspend, or in lieu of suspension, to increase rates under the contract on not less than 15 days written notice to the merchant who retains the right to notify the conference in writing of his intent to suspend the contract insofar as such increase is concerned.

By order of the Federal Maritime Commission.

Dated: July 9, 1973.

FEDERAL POWER COMMISSION

[Docket No. CP72-292]

PENNZOIL OFFSHORE TRANSMISSION CO.

Amendment to Application

JULY 11, 1973.

Take notice that on July 3, 1973, Pennzoil Offshore Transmission Company

V38-135 JUL 16 73 XUM

(Applicant), 1500 Southwest Tower, Houston, Texas 77002, filed in Docket No. CP72-292 an amendment to its application filed June 20, 1972, in said docket pursuant to section 7(c) of the Natural Gas Act providing for the construction and operation of facilities offshore and onshore Louisiana and to take into the proposed facilities volumes of gas in interstate commerce to be purchased from this area for resale and delivery to others, all as more fully set forth in the application as amended, which is on file with the Commission and open to public inspection.

The original application in this docket requested authorization to construct and operate approximately 10.6 miles of 30-inch pipeline extending from Block 587 in the West Cameron Area south addition, offshore Louisiana, to Block 548 in the same area; approximately 121.1 miles of 36-inch pipeline extending from a platform in Block 548 to a point onshore near Sweet Lake, Cameron Parish, Louisiana; and approximately 139 miles of 30-inch pipeline extending from Sweet Lake to a point near Clarence, Nachitoches Parish, Louisiana, all at a cost of $126,000,000. Applicant also requested authorization to transport through the proposed facilities and sell up to 40,000 Mcf of gas per day to United Gas Pipe Line Company (United) of which Applicant is a wholly owned subsidiary, at a monthly contract demand rate of $6.18 per Mcf and a commodity charge based on Applicant's average cost of purchased gas, subject to a 100 percent load factor and adjusted to reflect the effect of changes in the interest payable on its outstanding debt.

Applicant now proposes to construct and operate approximately 22.8 miles of 24-inch lateral pipeline extending from Blocks 532 and 533 in the West Cameron Area, South Addition, to a platform at Block 548 in the same area; approximately 11.2 miles of 30-inch pipeline from Block 590 in the West Cameron Area, South Addition, to a platform in Block 548 in the same area; approximately 10.6 miles of 30-inch pipeline from Block 587 in West Cameron Area, South Addition, to the platform in Block 548 in the same area; aproximately 120.8 miles of 36-inch pipeline from Block 548 to a point near Sweet Lake, Louisiana; and approximately 369 miles of 30-inch pipeline extending from Sweet Lake to a point in Allen Parish, Louisiana. Applicant also proposes to construct and operate a dehydration facility near Sweet Lake and certain measurement and regulation facilities.

Applicant also now proposes to sell for 20 years to United for delivery to others aproximately 400,000 Mcf of gas per day produced from Blocks 548, 572, 532, 533, and 590 all in the West Cameron Area, South Addition, upon completion of the proposed facilities pursuant to the June 15, 1972, agreement with United, as supplemented June 29, 1973. Applicant further proposes to deliver the sale gas through the proposed facilities, for United's account, in volumes of up to 150,000 Mcf per day to Transcontinental Gas Pipe Line Corporation and up to 250,000 Mcf of gas per day to Texas Eastern Transmission Corporation both delivered at points in Allen Parish, Louisiana. Applicant proposes to charge United a monthly contract demand rate of $5.51 per Mcf and a commodity charge based on Applicant's average cost of purchased gas. It is stated that Applicant has not yet been able to execute contracts for the purchase of gas from the West Cameron Area; therefore, throughout its application Applicant has assumed a price of 50.0 cents per Mcf for illustrative purposes. Based on that assumption Applicant estimates that the effect of adding 400,000 Mcf per day of sale gas on United's cost of gas will be 4.4 cents per Mcf.

Applicant states that the total cost of the proposed construction and operation is $113,000,000 which will be financed by United's purchase of approximately $20,000,000 of Applicant's common stock, the private or public sale of approximately $20,000,000 of non-voting, preferred stock bearing a probable 9 percent dividend rate, and the private or public sale of approximately $75,000,000 of long-term debt at an estimated 8.5 percent interest rate with a ten or twelve-year maturity date. Interim financing would be through short-term construction loans. Applicant proposes to establish a 10 percent depreciation rate.

Applicant states that the facilities for which authorization is sought will be designed and operated by or under the supervision of United pursuant to a service agreement between the parties. United will participate in the negotiation of any construction contracts and will supervise the construction on behalf of Applicant.

Any person desiring to be heard or, as amended, to make any protest with reference to said application should on or before July 27, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. Persons who have heretofore filed protests and petitions to intervene need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-14399 Filed 7-13-73;8:45 am]

FEDERAL RESERVE SYSTEM

FIRST BANCSHARES OF FLORIDA, INC.

Order Approving Acquisition of Bank

First Bancshares of Florida, Inc., Boca Raton, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90 percent or more of the voting shares of First National Bank of Fort Pierce, Fort Pierce, Florida ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and none has been timely received. The Board has considered the application in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the sixteenth largest banking organization in Florida, controls six subsidiary banks with aggregate deposits of $224.7 million, representing 1.1 per cent of the commercial bank deposits in the State. (Banking data are as of December 31, 1972, and reflect holding company formations and acquisitions approved by the Board through May 31, 1973.) Approval of the acquisition would increase Applicant's percentage share of State deposits by less than two-tenths of a percentage point.

Bank (deposits of $31.1 million) is the second largest of four banks located in St. Lucie County, the relevant market. The largest bank in the market holds approximately 54 percent of market deposits, while Bank and the third and fourth largest banks hold approximately 30, 14 and 2 per cent, respectively. The three competing banks are controlled by bank holding companies, including the third largest in the State. Applicant's closest banking office is located 15 miles south of Bank, and there is no significant competition between any of Applicant's subsidiary banks and Bank. Furthermore, in view of the distances separating the banks and the prohibition against branch banking in Florida, it appears unlikely that any meaningful competition would develop between these offices in the future. The Board concludes that consummation of the proposal would not eliminate existing or potential competition, nor would it have adverse effects on any competing bank.

Considerations relating to the financial and managerial resources and future propsects of Applicant, its subsidiary banks and Bank are generally satisfactory and consistent with approval of the application, particularly in view of Applicant's commitment to inject additional equity capital into certain of its subsidiary banks. While it appears that major banking needs in the area are being met, considerations relating to the convenience and needs of the communities to be served are consistent with approval of the application. It is the Board's judgment that the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before August 6, 1973 or (b) later than October 6, 1973, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Board of Governors,[3] effective July 6, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-14415 Filed 7-13-73;8:45 am]

FIRST NATIONAL CHARTER CORP.

Order Approving Acquisition of Bank

First National Charter Corporation, Kansas City, Missouri, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1841(a)(3)) to acquire 90 percent or more of the voting shares of Commercial Bank of Lexington, Lexington, Missouri ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant controls 10 banks with aggregate deposits of $693.9 million, representing 5 percent of the total commercial deposits in Missouri, and is the fourth largest bank holding company in the State.[1] Acquisition of Bank (deposits of $16.6 million) would increase Applicant's share of deposits in Missouri insignificantly and its ranking among banking organizations in the State would be unchanged.

Bank is the larger of two banks[2] in the city of Lexington, Missouri (population of 5,400) and holds 63 percent of total commercial deposits therein. It is the second largest of 11 banks in its relevant banking market (approximated by the southeastern portion of Ray County and the northwestern portion of Lafayette County) controlling 18.5 percent of deposits in that area. Applicant's nearest subsidiary and lead bank is located in Kansas City, Missouri, 55 miles west of Lexington. The record indicates that there is no significant existing competition between Bank and any of Applicant's subsidiaries. Furthermore, it is not likely that significant future competition would develop in view of the distances involved, the numerous banking alternatives, and Missouri's restrictive branching laws. Competitive considerations are, therefore, consistent with approval of the application.

The financial and managerial resources of Applicant, its subsidiary banks, and Bank are regarded as satisfactory; future prospects for all are favorable. The banking needs in the Lexington area are, for the most part, being met; however, inasmuch as Applicant will offer expanded services, such as improvement of Bank's loan operations and management training programs, considerations relating to the convenience and needs of the community to be served are consistent with approval of this acquisition. It is the Board's judgment that consummation of the proposed transaction would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before August 6, 1973 or (b) later than October 6, 1973, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,[3] effective July 6, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-14419 Filed 7-13-73;8:45 am]

FIRST UNION, INC.

Order Approving Acquisition of Bank

First Union, Incorporated, St. Louis, Missouri, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 90.45 per cent or more of the voting shares of Bank of Kennett, Kennett, Missouri ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the second largest bank holding company in Missouri, controls 14 banks with aggregate deposits of $1,059 million, representing 8.4 per cent of total deposits of commercial banks in the State. (Unless otherwise indicated, banking data are as of June 30, 1972, and reflect holding company formations and acquisitions approved through March 30, 1973.)[1] Consummation of the proposed acquisition of Bank ($28.9 million of deposits as of December 31, 1972) would increase Applicant's share of deposits in commercial banks in the State by .2 percentage points and would not significantly increase concentration of banking resources in Missouri.

Bank is the largest of three banks in Kennett, Missouri, and is the largest of 17 banks in the Dunklin County banking market, which includes also portions of Pemiscot County and Clay County (Arkansas), controlling 18 per cent of deposits of commercial banks in this market area. Applicant's closest subsidiary bank is located approximately 100 miles north of Bank. No competition exists between Bank and any of Applicant's subsidiary banks. In view of the distances between Applicant's subsidiary banks and Bank and the restrictive Missouri branching laws, it is unlikely that significant competition would develop in the future.

The population of Dunklin County has declined in recent years. The population per banking office ratio of the county is approximately one-third less than the average for Missouri counties of comparable size. Although the city of Kennett is experiencing some increased economic growth in non-agricultural fields, it appears unlikely, in view of the declining population of the area in general, that Applicant would enter this area *de novo*. In addition, acquisition of Bank by Applicant would not have an adverse effect on present or future competition among banks in the Dunklin County banking market. Bank has consistently had a low percentage of loans to total assets.[2] Consummation of the proposal could result in greater aggressiveness on the part of Bank in seeking loan customers, thereby stimulating competition among financial institutions and economic growth in its market. The Board concludes that consummation of Applicant's proposal would not have an adverse effect on competition in any relevant area.

The financial condition, managerial resources and future prospects of Applicant, its subsidiaries and Bank appear generally satisfactory. Although there is no evidence in the record to indicate that the banking needs of the residents of the Dunklin County market are not currently being met, affiliation with Applicant would enable Bank to compete over a wider range of banking services, including trust and automatic teller services. In addition, acquisition by Applicant should provide Bank with a pool of experienced managerial resources necessary to provide additional and expanded banking services. These factors, as they

---

[1] All banking data are as of December 31, 1972 and reflect bank holding company formations and acquisitions approved by the Board through May 31, 1973.

[2] The smaller bank is a recently acquired subsidiary of the third largest multi-bank holding company in the State.

[3] Voting for this action: Vice Chairman Mitchell and Governors Brimmer, Sheehan and Holland. Absent and not voting: Chairman Burns and Governors Daane and Bucher.

[1] On June 8, 1973, the Board announced its approval of Applicant's application to acquire Chesterfield Bank, Chesterfield, Missouri ($14.7 million of deposits).

[2] For example, as of June 30, 1972, Bank's percentage of loans to total deposits equalled 35.7 per cent compared with percentages of 56.7 and 58.6 per cent for the two other banks in Kennett.

[3] Voting for this action: Vice Chairman Mitchell and Governors Brimmer, Sheehan and Holland. Absent and not voting: Chairman Burns and Governors Daane and Bucher.

V 38-135 JUL 16 73 XUM

relate to the convenience and needs of the communities to be served, lend some weight for approval of the application. It is the Board's judgment that the proposed acquisition is in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before August 6, 1973, (b) later than October 6, 1973, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of St. Louis pursuant to delegated authority.

By order of the Board of Governors,[3] effective July 6, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-14418 Filed 7-13-73;8:45 am]

IRON CITY EAGLE COAL, INC.

Order Approving Formation of Bank Holding Company

Iron City Eagle Coal, Inc., Lockwood, West Virginia, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through acquisition of 87.49 per cent or more of the voting shares of The Gauley National Bank of Gauley Bridge, Gauley Bridge, West Virginia ("Bank").[1]

Notice of the application, affording opportunities for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant (wholly owned by its organizers) was incorporated in 1962 and has engaged in the business of mining coal and selling mining machinery and equipment. Such activities were discontinued in 1972 and its assets now consist entirely of cash.

Bank (deposits of approximately $11 million) is the only bank in Gauley Bridge and the third largest of five banks in the northern half of Fayette County, the relevant market, where it controls 15.6 per cent of market deposits.[2] As Applicant has no present operations or subsidiaries, the proposal essentially involves only a change from individual to corporate ownership. Therefore, consummation of the proposal herein would eliminate neither existing nor potential competition.

The management, financial condition, and prospects of Bank are all considered satisfactory. The management of Applicant is essentially the same as that of Bank; the financial condition of Applicant and its prospects, which will depend largely upon Bank, appear to be satisfactory. The ability of Bank to extend or improve the range of financial services for this area may be enhanced as a result of the flexibility afforded by the holding company structure. Hence, considerations relating to the convenience and needs of the communities to be served are consistent with approval. It is the Board's judgment that the proposed transaction would be in the public interest, and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be consummated (a) before August 6, 1973 or (b) later than October 6, 1973, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Richmond pursuant to delegated authority.

By order of the Board of Governors,[3] effective July 6, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

UNION BANCSHARES COMPANY

Acquisition of Bank

JULY 6, 1973.

Union Bancshares Company, Steubenville, Ohio, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 per cent (less directors' qualifying shares) of the voting shares of the successor by merger to The Peoples-Merchants Trust Company, Canton, Ohio. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the office of the Board of Governors or at the Federal Reserve Bank of Cleveland. Any person wishing to comment on the application should submit his views in writing to the Reserve Bank to be received not later than July 25, 1973.

Board of Governors of the Federal Reserve System, July 6, 1973.

[SEAL] THEODORE E. ALLISON,

INTERIM COMPLIANCE PANEL (COAL MINE HEALTH AND SAFETY)

PETER CAVE COAL CO.

Application for Renewal Permit; Opportunity for Public Hearing

Application for Renewal Permit for Noncompliance with the Interim Mandatory Dust Standard (2.0 mg/m³) has been received as follows:

ICP Docket No. 20404, PETER CAVE COAL COMPANY No. 1 Mine, USBM ID No. 15 02060 0, Lovely, Kentucky.

In accordance with the provisions of section 202(b)(4) (30 U.S.C. 842(b)(4)) of the Federal Coal Mine Health and Safety Act of 1969 (83 Stat. 742, et seq., Public Law 91-173), notice is hereby given that requests for public hearing as to an application for renewal may be filed within 15 days after publication of this notice. Requests for public hearing must be filed in accordance with 30 CFR Part 505 (35 Fed. Reg. 11296, July 15, 1970), as amended, copies of which may be obtained from the Panel on request.

A copy of the application is available for inspection and requests for public hearing may be filed in the office of the Correspondence Control Officer, Interim Compliance Panel, Room 800, 1730 K Street, N.W., Washington, D.C. 20006.

GEORGE A. HORNBECK,
Chairman,
Interim Compliance Panel.

JULY 10, 1973.

[1] Voting for this action: Vice Chairman Mitchell and Governors Brimmer, Sheehan and Holland. Absent and not voting: Chairman Burns and Governors Daane and Bucher.

[1] The issue of whether State law permits the formation of a bank holding company in West Virginia has not been raised with respect to this application. However, in its consideration of the instant application, the Board has noted, and relied upon, an opinion by the Attorney General of West Virginia issued September 25, 1972, to the effect that section 31A-8-12(b) of the West Virginia Code does not prohibit the formation of bank holding companies within the State.

[2] All banking data are as of December 31, 1972.

[3] Voting for this action: Vice Chairman Mitchell and Governors Brimmer, Sheehan, and Holland. Absent and not voting: Chairman Burns and Governors Daane and Bucher.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 73-54]

MEDICAL ISOTOPES ADVISORY SUBCOMMITTEE OF THE JOHNSON SPACE CENTER RADIATION SAFETY COMMITTEE

Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given that a meeting of the Medical Isotopes Advisory Subcommittee will be held on July 20, 1973, from 2:00 p.m. to 3:30 p.m., in Room 120, Building 1, Johnson Space Center, Houston, Texas 77058.

This is the second meeting of the Subcommittee for calendar year 1973. The meeting agenda includes a review of changes to experiment protocols of the First Skylab Mission and a review of protocols for the Second Skylab Mission. The Subcommittee will formulate recommendations to the JSC Radiation Safety Committee.

The meeting will be open to the public; however, a limited number of seats will be available. Any member of the public wishing to attend the meeting should contact Mr. J. Vernon Bailey, Executive Secretary, 713/483-3419.

GEORGE M. LOW,
Deputy Administrator, National Aeronautics and Space Administration.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-10274]

CONSOLIDATED TAPE PLAN

Extension of Deadline for Response to Comments

The Securities and Exchange Commission has extended from July 10, 1973 until August 10, 1973 the deadline by which sponsors may respond to and interested parties may comment on the Commission's letter of comments, dated June 13, 1973 and published at 38 FR 15999, June 19, 1973, to the sponsors of the consolidated tape plan filed pursuant to Rule 17a-15 under the Securities Exchange Act of 1934.[1] Rule 17a-15 provides for the reporting of prices and volume of completed transactions in listed securities.

The Commission has received several requests for such an extension and has determined to extend the deadline in view of the complexity and importance of some of the relevant issues and its desire to afford sufficient time for all interested persons to respond thereto or comment thereon.

(Secs. 10(b), 15(c), 17(a), 23(a), 48 Stat. 891, 895, 897, 901, 49 Stat. 1377, 1379, 52 Stat. 1075, 1076, 78 Stat. 570, 84 Stat. 1653, 15 U.S.C. 78j(b), 78o(c), 78q, 78w)

By the Commission.

[70-5363]

AMERICAN NATURAL GAS CO. AND MICHIGAN WISCONSIN PIPELINE CO.

Proposed Issue and Sale of First Mortgage Bonds

JULY 10, 1973.

Notice is hereby given that American Natural Gas Company (American Natural), 50 Rockefeller Plaza, Suite 4545, New York, N.Y. 10020, a registered holding company, and Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), One Woodward Avenue, Detroit, MI 48226, a wholly-owned subsidiary company of American Natural, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating sections 6, 7, 9, 10 and 12(f) of the Act and Rules 43 and 50 thereunder as applicable to the proposed transactions. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the proposed transactions.

Michigan Wisconsin proposes to issue and sell, subject to the competitive bidding requirements of Rule 50 under the Act, $50,000,000 principal amount of its First Mortgage Pipe Line Bonds ("New Bonds"), -- percent Series, due 1993. The interest rate on the New Bonds (which shall be a multiple of ⅛th of 1 percent) and the price to be received by Michigan Wisconsin for the New Bonds (which price, exclusive of accrued interest, shall be not less than 98½ percent of the principal amount and not more than 101½ percent of the principal amount) are to be determined by competitive bidding. The New Bonds will be issued under a Mortgage and Deed of Trust, dated as of September 1, 1948, as heretofore supplemented and as to be further supplemented by a Twenty-sixth Supplemental Indenture, to be dated as of August 15, 1973, between Michigan Wisconsin and First National City Bank and Peter A. Armenia, as Trustees ("Indenture"), which includes a prohibition until August 15, 1978 against refunding the New Bonds with the proceeds of funds borrowed at a lower effective interest cost. A sinking fund will be commenced on August 15, 1978 to retire the issue by maturity. The Indenture provides that sinking fund payments shall be accelerated under certain circumstances relating to annual reports which are required to be submitted to the Indenture Trustees regarding estimated dates of exhaustion of firm gas supply.

Michigan Wisconsin also proposes to sell, and American Natural proposes to acquire, an additional 400,000 shares of Michigan Wisconsin's common stock ("Common Stock"), par value $100 per share, for a cash consideration of $40,000,000. Accordingly, Michigan Wisconsin proposes to amend its Certificate of Incorporation to increase its authorized capital stock from 2,045,000 to 2,445,000 shares. Prior to or concurrently with the sale of the Common Stock, Michigan Wisconsin will pay to American Natural a special cash dividend in the amount of $15,000,000, the effect of the two transactions being to convert $15,000,000 of Michigan Wisconsin's existing retained earnings into common stock.

To provide the funds necessary for making the additional $25,000,000 investment in the Common Stock of Michigan

V 38 135 JUL 16 73 XUM

Wisconsin, American Natural proposes to borrow from banks under lines of credit an aggregate of $22,000,000 on its promissory notes ("Notes") maturing July 1, 1974 and to utilize cash on hand. American Natural has obtained lines of credit from banks (herein collectively referred to as "Banks") providing for this borrowing. The Banks and their respective commitments are as follows:

First National City Bank, New York, N.Y.	$13,000,000
Manufacturers Hanover Trust Company, New York, N.Y.	9,000,000
	22,000,000

The Notes will be unsecured and will be issued on or about August 22, 1973. There is no commitment fee, closing or other related charges payable to the Banks in connection with the borrowing. The Notes may be prepaid at any time without penalty. The Notes will bear interest at the prime rate in effect at the lending bank on the date of borrowing and will be adjusted to the prime rate effective with any change in said rate. Interest shall be payable at the end of each 90-day period subsequent to the date of the first borrowing and at maturity. As a condition of these lines of credit, American Natural is required to maintain compensating balances with the Banks. The effective interest cost is thereby increased by approximately one and one-half percent above the stated prime rate.

Michigan Wisconsin will apply the net proceeds from the proposed sale of the New Bonds and Common Stock to retire outstanding notes payable to banks under its $75,000,000 line of credit at the date of sale (See Holding Company Act Release No. 17679), and to pay, in part, 1973 construction costs (estimated at $100,400,000), and advance payments for gas.

It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transactions. An estimate of the fees and expenses expected to be incurred in connection with the proposed transactions will be filed by amendment.

Notice is further given that any interested person may, not later than August 2, 1973, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulations, pursuant to delegated authority.

[SEAL] SHIRLEY E. HOLLIS,
Recording Secretary.

[811-1693]

DREXEL HEDGE FUND, INC.

Notice of Application

JULY 10, 1973.

Notice is hereby given that Drexel Hedge Fund, Inc. 1500 Walnut Street Philadelphia PA 19101 ("Applicant"), a diversified, open-end management investment company registered under the Investment Company Act of 1940 (the "Act"), has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

On February 6, 1973, the Board of Directors of Applicant approved an Agreement and Plan of Reorganization between Applicant and Standard & Poor's Intercapital Dynamics Fund, Inc. ("S&P"), a registered non-diversified, openend management investment company, and on May 3, 1973, the plan was approved by a majority of Applicant's shareholders. Pursuant to the plan, Applicant's portfolio securities and cash (except $18,000 in cash retained by Applicant to satisfy its liabilities and the expenses of dissolution) have been transferred to S&P in exchange for a number of shares of S&P having an aggregate adjusted net asset value equal to the adjusted value of the assets of Applicant so transferred, and the shares of S&P transferred to Applicant have been assigned to Applicant's shareholders on a pro rata basis. The shareholders of Applicant have thus become shareholders of S&P. The First Jersey National Bank, acting as transfer agent for S&P, is in the process of distributing these shares of S&P to Applicant's shareholders upon their surrender for cancellation of their shares of Applicant. Applicant is required to complete its dissolution within one year and to remit to S&P any portion of the retained cash not used by Applicant in winding up its affairs and settling its remaining liabilities.

Applicant states that, as a result of the execution and implementation of the plan, it presently has assets of less than $18,000 and is in the process of liquidating all shareholder interests in Applicant. For these reasons, it submits that it is no longer engaged in any activities which would bring it within any of the definitions of an investment company contained in section 3(a) of the Act.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 6, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for a hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

INDUSTRIES EXCHANGE FUND, INC.

Filing of Application

JULY 10, 1973.

Notice Is Hereby Given that Industries Exchange Fund, Inc. ("Applicant"), 711 Polk St., Houston TX 77002, a Texas corporation registered as an open-end diversified management investment company under the Investment Company Act of 1940 ("Act"), has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations set forth therein, which are summarized below.

Pursuant to an Agreement and Plan of Reorganization ("Plan"), dated July 10, 1972, between Applicant and Commerce Fund, Inc. ("Commerce"), which Plan was approved by the shareholders of Applicant on February 23, 1973, Applicant transferred substantially all of its assets to Commerce on April 2, 1973 in exchange for shares of Commerce's common stock, which shares were thereupon distributed to Applicant's shareholders.

Applicant represents that it has retained assets of $375.43 for payment of expenses incurred by Applicant in connection with the Plan and Applicant's subsequent dissolution. Applicant further represents that subsequent to the payment of such expenses, it will distribute any remaining assets to its shareholders and will file Articles of Dissolution pursuant to the Texas Business Corporation Act.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 3, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. At any time after that date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the matter herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for a hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation, pursuant to delegated authority.

[SEAL] SHIRLEY E. HOLLIS, *Recording Secretary.*

WISCONSIN LIFE FUND, INC.

Filing of Application

JULY 10, 1973.

Notice is hereby given that Wisconsin Life Fund, Inc. ("Applicant"), 709 N. Segoe Rd., Madison WI 43705, a Maryland corporation registered as a diversified, open-end management investment company under the Investment Company Act of 1940 ("Act"), has filed an application pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant has requested withdrawal of its registration statement on Form S-5 under the Securities Act of 1933 which it filed in 1969 and which has never become effective. Applicant represents that no securities have ever been offered or sold to the public, and that current business conditions do not warrant offering its securities at this time. Applicant further represents that it is a dormant corporation engaging in no business activities.

Section 3(c)(1) of the Act excepts from the definition of investment company any issuer whose outstanding securities are beneficially owned by not more than 100 persons, and which is not making and does not presently propose to make a public offering of its securities.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 6, 1973, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted or he may request he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon Applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date as provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered will receive notice of further developments in this matter including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management Regulation pursuant to delegated authority.

[SEAL] SHIRLEY E. HOLLIS, *Recording Secretary.*

TARIFF COMMISSION

[AA1921-125]

GERMANIUM POINT CONTACT DIODES FROM JAPAN

Notice of Investigation and Hearing

Having received advice from the Treasury Department on June 26, 1973, that germanium point contact diodes from Japan are being, or are likely to be, sold at less than fair value, the United States Tariff Commission on July 10, 1973, instituted investigation No. AA1921-125 under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigation will be held in the Tariff Commission's Hearing Room, Tariff Commission Building, 8th and E Streets, N.W., Washington, D.C. 20436, beginning at 10 a.m., E.D.S.T., on Tuesday, August 14, 1973. All parties will be given an opportunity to be present, to produce evidence, and to be heard at such hearing. Requests to appear at the public hearing should be received by the Secretary of the Tariff Commission, in writing, at its office in Washington, D.C., not later than noon, Thursday, August 9, 1973.

Issued: July 11, 1973.

By order of the Commission.

[SEAL] KENNETH R. MASON, *Secretary.*

INTERSTATE COMMERCE COMMISSION

[Notice 296]

Assignment of Hearings

JULY 11, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 97310 Sub 11, Bell Transfer Company, Inc., MC 97310 Sub 12, Bell Transfer Company, Inc., now being assigned continued hearing August 13, 1973, at Department of Labor Conference Room, 2nd Floor, 908 South 20th Street, Birmingham, Ala.

MC 138185, F. Robert McDonald, Dba Auto Delivery Service, now assigned September 13, 1973, at San Francisco, Calif., is postponed indefinitely.

MC-1263 Sub 17, McCarty Truck Line, Inc., now assigned September 10, 1973, at Jefferson City, Mo., is cancelled and transferred to Modified Procedure.

MC 108411 Sub 5, Stearly's Motor Freight, Inc., Extension-Cranes, now assigned July 18, 1973, at Washington, D.C., is postponed indefinitely.

MC-113855 Sub 269, International Transport, Inc., now assigned August 13, 1973, at Washington, D.C., is postponed to October 29, 1973, at the Office of the Interstate Commerce Commission, Washington, D.C.

MC 128273 Sub 135, Midwestern Express, Inc., now assigned July 24, 1973, at Washington, D.C., is postponed indefinitely.

MC 74321 sub 73, B. F. Walker, Inc., now assigned July 13, 1973, at Denver, Colorado, hearing is cancelled and application dismissed.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73-14471 Filed 7-13-73;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

JULY 11, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with rule 1100.40 of the general rules of practice (49 CFR 1100.40) and filed on or before July 31, 1973.

FSA No. 42712—*Sulphuric and Spent Sulphuric Acid from and to Chicago, Illinois.* Filed by Louisville and Nashville Railroad Company (No. 1), for interested rail carriers. Rates on sulphuric acid and spent sulphuric acid, in tank-car loads, as described in the application, from Chicago, Illinois, to Lafayette, Indiana; also from Lafayette, Indiana, to Chicago, Illinois.

Grounds for relief—Motor-truck competition.

Tariff—Supplement 77 to Louisville and Nashville Railroad Company tariff 203-A, I.C.C. No. 63 (Monon Series). Rates are published to become effective on August 10, 1973.

By the Commission.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73-14472 Filed 7-13-73;8:45 am]

COST OF LIVING COUNCIL

FOOD INDUSTRY ADVISORY COMMITTEE

Notice of Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given that meetings of the Food Industry Advisory Committee, created by section 7(b) of Executive Order 11695, will be held on July 23 and July 24, 1973, at 9 a.m., at 2000 M Street, NW., Washington, D.C.

The morning portion of the July 23 meeting, which will be open to the public, will be held in Room 2105 (Auditorium). The agenda will consist of a discussion of the new farm legislation and the feasibility of standardizing cuts of meat. This is subject to change depending on new developments in the future.

The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Only members of the Committee, and its staff, may question the witnesses. Due to space limitations, it is possible that there will not be enough seating. In that event, only those persons will be admitted who have reserved a seat by phoning Mr. Michael Caughlin (202) 254-3008 prior to 5:30 P.M., Friday, July 20th. The seats will be reserved on a first-come, first-served basis.

While no unscheduled oral presentations will be entertained, anyone may submit a written statement by mailing it to Michael Caughlin, Room 8014, 2000 M Street, NW., Washington, DC 20508.

Any statements received by Monday, July 23, will be made available to the Committee before it adjourns on July 24. Any statement over three pages in length should be submitted in twenty copies.

Since the afternoon portion of the July 23 meeting and the meeting on July 24 will be used to discuss sensitive policy issues and possible governmental actions in connection therewith, I have determined that the meeting will fall within exemption (5) of 5 U.S.C. 552(b) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with the operation of the Committee.

Issued in Washington, D.C. on July 13, 1973.

WILLIAM N. WALKER,
General Counsel,
Cost of Living Council.

AIR QUALITY IMPLEMENTATION PLANS

Proposed Rulemaking for Certain States

V 38 - 135 JUL 16 73 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

ALASKA

Approval and Promulgation of Implementation Plans

Background. On July 27, 1972 (37 FR 15080), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved with specific exceptions the State of Alaska implementation plan for attainment and maintenance of national ambient air quality standards. Specifically, the Administrator disapproved Alaska's plan for the attainment and maintenance of the national ambient air quality standards for carbon monoxide in the Northern Alaska Intrastate Air Quality Control Region. The State of Alaska was required to submit a transportation control plan to assure attainment and maintenance of the standards for the Northern Alaska Region to EPA by February 15, 1973.

On January 31, the U.S. Circuit Court of Appeals for the District of Columbia found that the Administrator did not strictly conform to the requirements of the Clean Air Act in his July 27, 1972, decision. The Court ordered that the required transportation control plans be submitted to EPA by April 15, 1973.

On February 20, 1973, William A. Egan, Governor of Alaska, requested assistance from the Administrator in developing the necessary transportation control measures for the Fairbanks area to achieve the national ambient air quality standards. The Governor felt that State and local resources were not adequate to accomplish this task by April 15, 1973.

SUMMARY

The State of Alaska has not held public hearings to consider alternative transportation and land use control strategies as part of their implementation plan for the Region, nor has the State indicated that it will submit a plan in compliance with EPA requirements. As a result, this notice of proposed rule making sets forth proposed regulations that in the Administrator's judgment can be implemented to attain the carbon monoxide standards in the Northern Alaska Intrastate Region.

If, prior to Federal promulgation, the State of Alaska submits a transportation control plan which will assure attainment of national standards by May 31, 1977, and which the Administrator determines is acceptable, these proposed Federal regulations will be withdrawn. If the State plan is submitted and determined to be approvable after promulgation of Federal regulations, then these regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain national standards in the Region be a State plan carried out by the State or by authorized local governments.

To the greatest extent feasible, the proposed Federal regulations are designed to implement transportation control measures that are acceptable to the State and/or that have received public support.

POLLUTION IN THE NORTHERN ALASKA REGION

The Northern Alaska Intrastate Region comprises the entire northern half of the State of Alaska from the Arctic Ocean to approximately the crest of the Alaska Range and along an irregular boundary extending westward to the delta of the Yukon River. The geographic and meteorologic characteristics of the Fairbanks portion of the Region in which the carbon monoxide problem exists contribute to the build-up of pollution. The encircling hills and frequent thermal inversions inhibit dispersion of pollutants; the rigorous winter climate complicates the use of ordinary modes of transportation.

Between October 1, 1972, and March 31, 1973, the 8-hour national ambient air quality standard for carbon monoxide of 9 parts per million (10 milligrams per cubic meter), not to be exceeded more than once per year, was exceeded on at least 112 days. The maximum 8-hour average concentration recorded in Fairbanks during the winter of 1972–73 was 28 parts per million. The highest 1-hour concentration of carbon monoxide, recorded at two locations, was 48 parts per million compared to the 1-hour ambient air quality standard of 35 parts per million.

The reductions in motor vehicle carbon monoxide emissions necessary to attain the carbon monoxide standards by 1975 were determined by forecasting the emission densities for that year using a proportional mathematical model and subtracting the allowable emission densities. The estimates of 1975 emissions were forecasted using data for traffic analysis districts in the Fairbanks North Star Borough. An estimated 65 percent reduction in motor vehicle carbon monoxide emissions, in addition to the reduction achieved by implementation of the Federal emission standards for new motor vehicles, is required to attain the 8-hour national ambient air quality standard for carbon monoxide in Fairbanks by 1975. The 8-hour carbon monoxide standard is the more restrictive of the two standards for that pollutant; attainment of the 8-hour standard will assure attainment of the 1-hour standard.

PROPOSED FEDERAL REGULATIONS

To attain national standards for carbon monoxide in the Northern Alaska Intrastate Region, Federal regulations are proposed to implement the following transportation control measures:

1. An annual inspection and maintenance program, using an idle emission test, to determine emissions from light-duty vehicles.

2. A retrofit program requiring installation of air bleed to intake manifold retrofit devices on vehicles of model years prior to 1968 and of oxidizing catalytic converters on vehicles of model years 1968 through 1974.

3. A parking management program that (a) requires a permit from the Administrator to construct, modify, or enlarge off-street parking facilities, (b) requires owners and operators of parking facilities to make provisions for heating vehicle engines and interiors, and (c) requires the prohibition of on-street parking on public streets in the Fairbanks central business district.

4. An idling limitation that restricts to 5 minutes the time vehicles are permited to idle following start-up.

These Federally proposed measures are necessary, in the absence of a State-adopted transportation control plan, to attain and maintain national standards for carbon monoxide in the Northern Alaska Intrastate Region. The proposed regulations take into account testimony and comments presented at EPA-sponsored public meetings held in Fairbanks on May 3 and June 13, 1973. Other measures are available to EPA and to the State that will, if implemented, assist in achieving a reduction in vehicle emissions equivalent to that resulting from the four proposed measures. The final selection of measures to be implemented will be based to the greatest extent possible on testimony presented at the public hearing held prior to Federal promulgation.

If the proposed inspection and maintenance program is implemented, exhaust emissions from all light-duty gasoline-powered vehicles will be analyzed yearly using an idle-mode emission test. The results of the test will be compared with a set of in-use vehicle emission standards. Those vehicles having emissions in excess of the standards will be required to have maintenance performed. Based on a cooperative study by the Fairbanks North Star Borough, the EPA Arctic Environmental Research Laboratory, and the Atlantic Richfield Company, an inspection and maintenance program can provide an effective means of reducing emissions at low (sub-freezing) ambient temperatures and will reduce vehicle carbon monoxide emissions in the Fairbanks area by at least 17 percent. The proposed regulation specifies that beginning in 1975 emissions from all vehicles will be inspected by an agency designated by the State and that any necessary maintenance will be performed. The State will not be permitted to register, nor will anyone be permitted to operate, any vehicle that has not undergone emission testing and met the established emission standards. The Administrator is continuing to assess the earliest practicable date on which the inspection and maintenance program can be fully implemented. He may revise this date based on results of this assessment.

The proposed retrofit program requires that two types of emission reduction devices be installed on motor vehicles registered in the Fairbanks North Star Borough. Installation of an air bleed to intake manifold retrofit device will be required on all vehicles of model years prior to 1968; oxidizing catalytic converters will be required on vehicles of model years 1968 through 1974. Although both the air bleed to intake manifold device and the oxidizing catalytic converter are believed to be technologically feasible by 1975, the Administrator recognizes that it will not be possible to implement a retrofit program in the Northern Alaska Intrastate Region by that date. Consequently, the Administrator proposes to grant an extension of approximately 1 year beyond the May 31, 1975, attainment date for requiring installation of the air bleed to intake manifold retrofit and an extension of 2 years beyond the attainment date for requiring the installation of oxidizing catalytic converters. By June 30, 1976, all vehicles of model years prior to 1968 will be required to be equipped with the air bleed to intake manifold devices. By May 31, 1977, all 1968 through 1974 model year vehicles must be equipped with oxidizing catalytic converters. A retrofit program employed in 1975 would reduce vehicle carbon monoxide emissions by about 23 percent. In 1977 the emission reduction attributable to retrofit is reduced to 16.6 percent because of the lesser number of vehicles of model years 1974 and earlier.

The proposed regulation requiring that a permit be obtained from the Administrator prior to the construction, modification, or enlargement of a parking facility is intended to stabilize the supply of parking in areas of the Northern Alaska Intrastate Region where transportation control measures are necessary for attainment of national standards. Existing or proposed parking facilities to which the regulation is applicable will be reviewed to ascertain whether modification/enlargement or construction of the respective facilities will prevent the attainment and/or maintenance of national standards.

A regulation is also proposed to require owners and operators of parking facilities to make provisions for heating vehicle engines and interiors. Implementation of this requirement will reduce the necessity for vehicle idling and the pollutant emissions resulting from the idling. The proposed regulation restricting on-street parking will encourage the use of heated off-street parking facilities. Removal of on-street parking will also assist in improving traffic flow. If the parking regulations are implemented, the cumulative reduction in carbon monoxide emissions will be approximately 11 percent.

The proposed idling limitation prohibits the idling of any vehicle for more than 5 minutes after start-up. Estimates of emission reductions range from 5 percent to 25 percent and perhaps higher. Data acquired from the idle test inspection control measure will help refine the estimated degree of emission reductions which occur as a result of the idle limitation.

Three transportation control measures in addition to those contained in the Federal proposal will, when implemented, provide significant carbon monoxide emissions reductions. These measures include traffic flow improvements, a system of public transportation, and the opening of a north-south bypass highway, referred to as the Steese cut-off. Emission reductions were attributed to these measures although they are not included among proposed Federal regulations. Implementation of these measures will assist in reducing emissions of carbon monoxide within the central business district of Fairbanks.

Traffic flow improvements will result from actions such as better traffic signal timing and institution of additional one-way couplets. These measures, when implemented, will provide an increase in average vehicular speed and, as a result, a decrease in carbon monoxide emissions. These improvements will also provide a significant reduction in traffic congestion. These measures can be implemented as early as mid-1975.

The development of a system of public transportation in Fairbanks is essential to mitigate the disruptions and inconveniences which may result from inhibiting automobile use. Any system of public transportation that is implemented must be tailored to the individual characteristics of Fairbanks. The design of the system must consider the extreme cold of the winter months, and the low and dispersed residential population densities must be considered.

The construction and opening of the proposed Steese cut-off will provide a bypass highway that will eliminate a portion of the traffic that now enters and leaves the central business district with no interim stops. If provision is made for no exits from the highway between Gaffney Road and the north side of the bridge across the Chena River, the highway will be used primarily for moderate speed traffic with destinations other than downtown Fairbanks. Switching this traffic from the downtown area should have a significant impact on air quality in the central business district. The long-term air quality impact of a bypass with and without exits to the central business district should be evaluated prior to construction. In either case, it may be difficult to complete construction of this facility by the end of 1976.

COMPILATION OF CONTROL STRATEGY EFFECTS (% REDUCTION)

	1975	1976	1977
Traffic flow + parking	6.8		
Idling	3.9		
Inspection/Maintenance	12.7		
Air Bleed Retrofit		6.2	
New Highway		8.2	
Oxidizing Catalyst Retrofit			16.6
Federal Motor Vehicle Control Program			17.1
Percent Reduction Attained	23.4	37.8	71.5
Percent Reduction Required	61.6	64.6	64.6

SOCIAL AND ECONOMIC IMPACTS

A quantitative assessment of the economic and social impacts of the proposed Federal transportation control measures on the Northern Alaska Intrastate Region has not been possible due to the short time available for development of the measures and the innate complexities of the issues involved. However, an attempt has been made to identify some of the more important impacts that will result if the proposed Federal measures are promulgated and implemented.

First, if the proposed inspection/maintenance and retrofit programs are implemented, vehicle owners will probably have to assume directly some of the costs of vehicle inspection, all of the costs of any vehicle maintenance required to meet the emission-inspection standards, and all of the costs of the purchase and installation of retrofit devices. If a failure rate of 50 percent is set for the inspection/maintenance program, the annual cost for each vehicle inspected is estimated to average $15. Owners of light-duty vehicles of model years earlier than 1968 will have to pay approximately $35 to $60 for purchase and installation of an air bleed to intake manifold retrofit device. Owners of light-duty vehicles of model years 1968 through 1974 will have to pay approximately $160 to $200 for the installation of oxidizing catalytic converters. The costs for inspection of vehicles for emissions, for performing the vehicle maintenance required to meet emission inspection standards, and for purchase and installation of retrofit devices will fall most heavily on low-income families because they will have to spend a larger percentage of their disposable incomes for inspection and any resultant maintenance.

The portion of the parking management program limiting development of additional off-street parking spaces will cause inconveniences to those traveling to downtown Fairbanks. The extent of the inconvenience will depend on the adequacy of the public transportation system developed. The portion of the program dealing with provision of electrical outlets and heating units will cause some increase in parking fees; however, this cost may be mitigated by the savings resulting from short idling periods. The removal of on-street parking will result in some loss of revenue to the City from short-term metered parking, but will result in increased utilization of off-street parking facilities and increased revenues for owners of both public and private parking facilities. The idling limitation will provide savings to the vehicle operator in reduced fuel consumption and engine maintenance.

EPA EFFORTS TO MITIGATE THE EFFECTS OF PROPOSED REGULATIONS

The proposed Federal regulations will eliminate the danger to human health and welfare that exists in the Northern Alaska Intrastate Region as a result of air pollution from motor vehicles. The regulations may, however, have adverse economic and social impacts. The Administrator will make every effort to mitigate the adverse effects of his final promulgation. He will be in contact with the Department of Transportation and other departments as necessary. The Administrator will request that these departments give special attention to the need for funding of programs necessary to offset any adverse effects resulting from the implementation of transportation control measures.

PUBLIC COMMENTS SOLICITED

The Administrator intends that any Federal regulations which must be pro-

V 38 135 JUL 16 73 XUM

mulgated be as responsive as possible to the needs of the Northern Alaska Intrastate Region; he therefore desires to obtain the comments and suggestions of the public on the proposed regulations and on any other measures that may be taken by Federal, State, or local governments to strengthen, supplement, or replace the proposed measures. Public hearings will be held on this and any alternative proposals in Fairbanks at 7:30 p.m. on August 6, 1973. In any promulgation of regulations necessary, the Administrator will consider all comments and testimony he receives, as well as any additional strategies submitted by the State.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rulemaking by submitting written comments, preferably in triplicate, to the Administrator, EPA, Region X, 1200 Sixth Avenue, Seattle, Washington 98101, Attention: Ms. Betty Weise. All relevant comments received within 30 days of this date will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the library of EPA Region X. The changes proposed by this notice, with appropriate modification, will be effective as noted. This notice of proposed rulemaking is issued under the authority of sections 110(c) and 301(a) of the Clean Air Act.

(42 U.S.C. 1857c et seq)

Dated: July 6, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart O—Alaska

1. Subpart O is amended by adding §§ 52.77, 52.78, 52.79, 52.80, 52.81, and 52.82 as follows:

§ 52.77 Idling limitations.

(a) Definition:

(1) "Idling" means the operation of a motor vehicle engine while the motor vehicle is attended or unattended, while not in the process of moving from one place to another.

(b) This regulation is applicable in the City of Fairbanks in the State of Alaska.

(c) Commencing May 31, 1975, the State of Alaska, Fairbanks North Star Borough, and the City of Fairbanks shall each prohibit for more than 5 minutes the idling of all motor vehicles while parked or operated on streets or highways within the City of Fairbanks over which each has ownership or control.

(d) After May 31, 1975, no person shall cause, permit, or allow for more than 5 minutes the idling of any motor vehicle where prohibited pursuant to paragraph (c) of this section.

(e) On or before October 1, 1973, the State of Alaska, Fairbanks North Star Borough, and the City of Fairbanks shall each submit a detailed compliance schedule showing the steps necessary to carry out the restrictions contained in paragraph (c) of this section. Such statement shall include:

(1) Identification of elements necessary to assure enforceability which may be a statement of present authority and implementing regulations, or, if needed, drafts of proposed legislation, ordinances, or regulations.

(2) Designation of agencies responsible for enforcing the prohibition.

(3) A program for State and local enforcement of the idling restrictions including but not limited to towing away those vehicles idling over 5 minutes in violation of a prohibition or subjecting the owner to a fine of up to $100, or both.

(f) Failure to comply with any provisions of this paragraph shall render such person or governmental entity in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.78 Regulation for an inspection and maintenance program.

(a) Definitions:

(1) "Inspection and maintenance program" means a program for reducing emissions from in-use gasoline-powered vehicles through identifying vehicles which need emission-control-related maintenance and requiring that maintenance be performed.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This regulation is applicable in the City of Fairbanks and the Fairbanks North Star Borough within the Northern Alaska Intrastate Air Quality Control Region in the State of Alaska.

(c) The State of Alaska shall establish an inspection and maintenance program applicable to all light-duty gasoline-powered motor vehicles which operate on public streets or highways within the area defined in paragraph (b) of this section. No later than March 1, 1974, the State shall submit to EPA legally adopted regulations to establish such a program. The regulations shall include:

(1) Provisions for inspection of all light-duty gasoline-powered motor vehicles at periodic intervals no more than 1 year apart by means of an idle emission test.

(2) Provisions for inspection failure criteria consistent with the emission reductions claimed in the plan for the strategy. These criteria shall include failure of 50 percent of the vehicles in the first inspection cycle.

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. These shall include sanctions against individual owners and repair facilities; retest of failed vehicles following maintenance; use of a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts, and knowledge to perform the tasks satisfactorily; and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This enforcement program might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Provisions for beginning the first inspection cycle by June 1, 1975, and completing it by December 31, 1975.

(6) Designation of an agency or agencies responsible for conducting, overseeing, and enforcing the inspection and maintenance program.

(d) After December 31, 1975, the State shall not register or allow to operate on public streets or highways any light-duty gasoline-powered vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section. This shall not apply to the initial registration of a new motor vehicle.

(e) After December 31, 1975, no owner of a light-duty gasoline powered vehicle shall operate or allow the operation of such vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(f) The State of Alaska shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce an inspection and maintenance program pursuant to paragraph (c) of this section, including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) The date by which the State will recommend needed legislation to the State legislature.

(3) The date by which necessary equipment will be ordered.

(4) A signed statement from the Governor or his designee identifying the sources and amounts of funds for the program. If funds cannot legally be obligated under existing statutory authority, the text of needed legislation shall be submitted.

(g) Failure to comply with any provisions of this paragraph shall render such person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. With regard to compliance schedules, the State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule

when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.79 Off-street parking management.

(a) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a parking facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Off-street parking facility" (also called "facility") means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(6) "Major off-street parking facility" means an off-street parking facility for 5 or more motor vehicles.

(b) This regulation is applicable in the City of Fairbanks.

(c) No person or governmental entity, after August 15, 1973, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating the construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a requirement that before a permit may be issued the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include, but shall not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of vehicle miles of travel within any area the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a parking facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of Part 51.4(b) of this chapter; and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

(e) After October 1, 1974, no major off-street parking facilities shall be operated between October and April unless the following measures are taken by the owner or operator of the off-street parking facility:

(1) Electrical outlets are installed for each parking place for head bolt heaters or equivalent heating device.

(2) Heating units are provided for each parking place to heat vehicle interiors.

(3) No metering charges for heater or outlet are made above the standard parking charge for use of the off-street parking facility. These measures need not be taken if the interior of the building or structure is heated to at least 40°F, to remove the necessity for extended idling to warm either the vehicle or engine or passenger interior. One thermometer in working condition shall be prominently displayed for each 1200 square feet of parking space.

§ 52.80 On-street parking management.

(a) Definitions:

(1) "On-street parking" means stopping a motor vehicle on a street or sidewalk, whether or not a person remains in the vehicle.

(2) "Off-street parking facility" means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(3) "Central business district" means that area of downtown Fairbanks which is bounded by the Chena River on the north; Dunkle Street on the east; Fifth Avenue, Cushman Street, and Seventh Avenue on the south; and Barnette Street, Third Avenue, and Wickersham Street on the west.

(b) This section is applicable in the Fairbanks central business district.

(c) Beginning January 1, 1974, the City of Fairbanks, the Fairbanks North Star Borough, and the State of Alaska shall prohibit on-street parking on the streets or highways over which it has ownership or control within the Fairbanks central business district, with the exception that persons residing within the central business district shall be issued one permit per vehicle by the City of Fairbanks before January 1, 1974, to be prominently affixed to the vehicle if it can be demonstrated that there is no alternative off-street parking available. The prohibition shall state that vehicles parked in violation shall either be towed away, or the owner shall be subject to a fine of up to $100, or both.

(d) On or before October 31, 1973, the Governor shall submit legally adopted regulations to EPA as provided for in paragraph (c) of this section and shall submit a detailed schedule showing the steps that will be taken and the respective implementation dates to effect the prohibition, exceptions, and penalties provided for in paragraph (c) of this section and to assure compliance by January 1, 1974. Such schedule shall include:

(1) Designation of the agency responsible for the administration and enforcement of the program.

(2) The procedures by which the designated agency will rule on exceptions for residents of the Fairbanks central business district and enforce the prohibition provided for in paragraph (c) of this section.

(e) Failure to comply with any provision of this section shall render each person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.81 Air bleed to intake manifold retrofit.

(a) Definitions:

(1) The term "air bleed to intake manifold retrofit" as used in this section means a device in the intake system of the vehicle which enables the air/fuel ratio to be increased by metering additional air to the intake manifold in accordance with intake manifold vacuum advance to reduce emissions of hydrocarbons and carbon monoxide to the atmosphere.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the City of Fairbanks and the Fairbanks North Star Borough within the Northern Alaska Intrastate Air Quality Control Region in the State of Alaska.

(c) The State of Alaska shall establish a retrofit program to ensure that on or before June 30, 1976, all gasoline-powered light-duty vehicles of model years prior

V 38 135 JUL 16 73 XUM

to 1968, subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate air bleed to intake manifold device. No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of subparagraph (3) of this paragraph are enforced.

(3) Provisions for beginning the installation of the air bleed devices by July 1, 1975, and completing the installation of the devices on all vehicles subject to this section no later than June 30, 1976.

(4) A provision that starting no later than June 30, 1976, no vehicle of which retrofit is required under this section passes the annual emission tests provided for by § 52.78 unless it has been first equipped with an approved air bleed to intake manifold device which the test has shown to be installed and operating correctly. The regulations shall include test procedures and failure criteria for implementing this provision.

(5) Methods and proposed procedures for ensuring that those installing the retrofit devices have the training and ability to perform the needed tasks satisfactorily and will have an adequate supply of retrofit components.

(d) After June 30, 1976, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After June 30, 1976, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards and procedures implementing this section.

(f) The State of Alaska shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, including the text of statutory proposals and regulations which the State proposes for adoption. The compliance schedules shall also include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1974.

(g) Failure to comply with any provision of this section shall render each person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.82 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbons and carbon monoxide from that vehicle.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the City of Fairbanks and the Fairbanks North Star Borough within the Northern Alaska Intrastate Air Quality Control Region in the State of Alaska.

(c) The State of Alaska shall establish a retrofit program to ensure that on or before May 31, 1977, gasoline-powered light-duty vehicles of model years 1968 through 1974, subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate oxidizing catalyst retrofit device. No later than October 30, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that provisions of paragraph (c) (3) of this section are enforced.

(3) A provision that starting no later than May 31, 1976, the State of Alaska shall require those light-duty vehicles of 1974 model year and earlier which are able to operate on 91 RON (research octane number) gasoline to be retrofitted with an oxidizing catalytic converter. The installation shall be completed by May 31, 1977.

(4) Methods and proposed procedures for ensuring that those installing the retrofits have the training and ability to perform the needed tasks satisfactorily and will have an adequate supply of retrofit components.

(d) After June 1, 1977, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which does not comply with applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) The State of Alaska shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, including the text of needed statutory proposals and needed regulations which it will propose for adoption. The compliance schedule shall also include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(f) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

[FR Doc.73-14265 Filed 7-13-73;8:45 am]

[40 CFR Part 52]

ARIZONA

Approval and Promulgation of Implementation Plans

Background. In accordance with an order of the U.S. Court of Appeals for the District of Columbia Circuit, several States were required to submit transportation control plans on April 15, 1973. Most State plans submitted on April 15 relied on extensive use of common control measures such as inspection/maintenance and installation of retrofit emission control devices. As a result of EPA evaluation of the State plans, applicability, effectiveness, and minimum time required for complete implementation of the control strategies on a nationwide basis were established. After reviewing the Arizona plan in light of the data consolidated from the evaluation of all State plans, the Administrator concluded that the plan was partially approvable. Namely, the strategy for attainment of the national standard for photochemical oxidants was approved while the attainment of the carbon monoxide standards was not approved. The evaluation of the Arizona plan is available for inspection at U.S. Environmental Protection Agency, Region IX, 100 California Street, San Francisco, California 94111, and the U.S. Environmental Protection Agency, Freedom of Information Center, Room 329, 401 M Street SW., Washington, D.C. 20460.

Since the Administrator disapproved a portion of the Arizona transportation plan, the Administrator is required, under section 110(c) of the Act, to propose and subsequently promulgate regulations setting forth a substitute portion of such plan. Proposed regulations for the attainment and maintenance of the national standards for carbon monoxide are herewith proposed.

PUBLIC HEARINGS

The Administrator will hold public hearings on the proposed regulations in order to provide the general public ample opportunity to comment. Two hearings will be held in Arizona as follows: in Phoenix on August 6, 1973, at 9:30 a.m. in the Phoenix Civic Plaza Flagstaff Room, 225 East Adams Street, and in Tucson on August 8, 1973, at 9:30 a.m. in the Tucson Community Center Theater, 260 Church Street. Persons wishing to participate in the hearing are requested (but not required) to submit three copies of their statements at least

five days prior to the date of the hearing to: Cassandra Dunn, Regional Counsel, U.S. Environmental Protection Agency, Region IX, 100 California Street, San Francisco, California 94111.

SUMMARY

Studies by the Agency indicate that a reduction on the order of 54 percent would be necessary in projected 1975 emissions of carbon monoxide in order to attain the national primary ambient air quality standards in the Phoenix-Tucson Intrastate Region. It should be noted that a reduction of 68 percent would have been necessary to attain the standards in 1971. The difference in the needed reductions is due to control measures on stationary sources submitted by the State and already approved, and reductions achieved through reduced automobile emissions resulting from the Federal Motor Vehicle Control Program. The Administrator will herewith propose control measures to show attainment, but the Administrator has concluded that an extension of the deadline for achieving the standards to 1977, under section 110(e) of the Act, is justified because the necessary technology or other alternatives are not available and will not be available soon enough to permit full compliance. In reaching this conclusion, the Administrator has considered and applied as part of the plan reasonably available alternative means for attaining the primary standards. The control measures proposed herein reflect what EPA considers to be the most feasible approach for meeting the national standards in the Region. However, these measures are subject to change prior to promulgation as a result of written comments, testimony presented at the public hearings or further study by EPA.

The Administrator recognizes the commitment the State of Arizona has made to periodic vehicle inspection and retrofit of emission control devices for light-duty vehicles and commends the State's efforts and progress in their development. Even though the Administrator finds that the plan submitted by the State of Arizona does not provide sufficient emission reduction, these individual control measures are acceptable means for reducing vehicle emissions. Therefore, the Administrator is proposing these measures, in accordance with the schedule set forth in the State's plan, supplemented by additional controls. The additional controls include reasonable and apparently available means of reducing carbon monoxide. These means include bus/carpool lanes on freeways and major streets, reduction in off-street public parking, and limitations on the construction of additional parking facilities, supplemented by the required availability of computer-aided carpool and bus matching system. The intent of these measures is to reduce VMT (vehicle miles traveled) by discouraging individual use of private vehicles and encouraging use of carpools and existing transit systems, and to stimulate new and/or expanded transit systems. These control measures will be implemented prior to 1975. Less attractive and more severe measures are ultimately required to show attainment by 1977. These are also proposed and would be instituted in 1974 and fully implemented by May 31, 1977. These measures include a ceiling on further increases in gasoline consumption beyond 1973 levels accompanied by a limit on motorcycle registration to the projected 1975 level. The primary guideline the Agency has used in proposing these control measures for VMT reduction is that sufficient alternative transportation capacity is presently or potentially available in the metropolitan area of the Phoenix-Tucson Region to achieve a 10–15 percent VMT reduction by 1975 with an additional similar reduction by 1977.

The Agency also encourages close examination of such measures as replacement of on-street parking with bicycle lanes on major streets, fare reduction, provision of a jitney service and use of mini-buses, fringe parking lots for transfer to buses and carpools, special parking privileges for carpools, on-street parking prohibition for nonresidents, State taxes to encourage VMT reduction or to raise revenue to benefit mass transit, and provision of bus tokens in place of free parking privileges.

The Administrator encourages the State to adopt and resubmit transportation control strategies identical or equivalent to the strategies proposed below together with an adequately documented justification for an extension of the attainment date for the carbon monoxide standards.

STATE AND LOCAL IMPLEMENTATION OF CONTROL MEASURES

In order to preserve the intent of the Clean Air Act whereby local pollution problems will be dealt with primarily at the local level, the Agency will require State and local governments to take action wherever possible, and will not involve the Federal government in the administration of local programs and in direct enforcement against individual citizens. Requirements of this sort are applicable to bus/carpool lanes, motorcycle control, public parking facilties, inspection/maintenance, retrofit, and gas limitations. Appropriate governments will also be required to submit compliance schedules for these programs, with complete details for their implementation.

If the State submits adequate control measures or substitute control measures which will achieve comparable reductions in pollution, then the Administrator can approve the State's measures rather than promulgate his own. However, the requirement to submit adequate compliance schedules and take other actions will be enforced on a timely basis if the Agency's measures are promulgated. Therefore, it is suggested that plans to comply with these measures not be delayed.

REVISED CONTROL STRATEGIES

The State of Arizona is proceeding with a mandatory periodic vehicle inspection for light-duty vehicles which, if implemented as planned, will serve as an outstanding example of a loaded emission test for other States. In addition, the State has proposed to investigate mandatory inspections of motorcycles and heavy-duty vehicles. The proposal herein will require mandatory periodic vehicle inspection for light-duty vehicles only. EPA does not currently have information on the effectiveness or time required for implementation of an inspection program for heavy-duty vehicles and, therefore, cannot propose this control measure. Catalytic converters would be required in 1976–77 for many vehicles in the 1968 through 1974 model years. It is estimated that catalytic converters can only be retrofitted on 20 percent of the 1968–1970 vehicles and 75 percent of the 1971–1974 vehicles because of potential lubricity and octane problems associated with the use of 91 octane lead-free fuel. It cannot be concluded at present that the technology for retrofit converters has developed to the point that they could be installed effectively as retrofit devices in 1975. However, the Agency will monitor the status of development of this technology and accelerate the dates if feasible. This strategy was an acceptable control measure in the plan submitted by Arizona. Another retrofit control measure will be the requirement for retrofit of air bleed devices on many pre-1968 light-duty vehicles. This retrofit measure was also an acceptable control measure in the proposed Arizona plan.

The remainder of the strategies proposed are directed toward a 32 percent reduction in VMT by light-duty vehicles which would be accomplished by 1977. A 10–15 percent VMT reduction can be achieved by 1975 by increasing the occupancy factor for work-oriented trips by 50–75 percent. The present estimated occupancy factor is 1.2 persons per vehicle. The goal would be to raise this factor to between 1.8 and 2.1 persons per vehicle for work-oriented trips. (These estimates are based on the estimate that 40 percent of urban travel is work-oriented, as stated in the Maricopa Association of Government report, "Transit and the Phoenix Metropolitan Area.") This is proposed to be accomplished by bus/carpool lanes on freeways and major streets, reductions in off-street public parking, and limitations on the construction of additional parking facilities, supplemented by the required availability of computer-aided bus and carpool matching system. The measures proposed herein will require conversion of some motor vehicle lanes on all major streets and highways, and it is expected that a widespread network of bus/carpool lanes will provide substantial incentive to the use of buses and carpools while making private vehicle travel by single drivers relatively less attractive. Planning for specific motor vehicle lanes is expected to take place at the local level, under the overall requirements herein. Exceptions to or modifications of the broad requirements will be approved when specifically justified. Because sufficient numbers of buses are not presently available to carry

V 38 - 135 JUL 16 73 XUM

the passengers currently using these lanes in private cars, these proposed regulations would reserve the use of these lanes for carpools with three or more persons in each vehicle.

To assist commuters who desire to form carpools, it is proposed to require the availability of a computer-aided bus/carpool matching system. Participation in this program would be voluntary. The system would provide each participant with a listing of names, home locations, and work phone numbers of all other participants whose working hours most nearly match theirs.

Publicly owned off-street parking facilities will be required to reduce their number of parking spaces in an effort to reduce the high number of low-occupancy private vehicles entering the central business districts and other congested areas, and to promote voluntary carpooling and the use of bus transit. Comment is invited on the possibility of extending this control to privately owned parking facilities, either by outright reductions in spaces or by imposing regulatory fees. Another provision would limit further construction of new parking facilities in the metropolitan area.

It is estimated that the above control measures can achieve a 10–15 percent VMT reduction by 1975. To assure that this VMT is achieved and to achieve an additional 15 percent reduction between 1975 and 1977, it is proposed to limit further increases in gasoline consumption beyond 1972–1973 levels accompanied by a limit on motorcycle registration to the projected 1975 level. Initiation of the gasoline limitation in mid-1974 is expected to have relatively light impact until 1975 due to the reduced demand for gasoline consumption resulting from the aforementioned VMT reduction measures. Subsequent to 1975, the continuing growth in VMT within the Region will be retarded by limiting the continued growth in gasoline consumption. Gasoline consumption has been increasing approximately 6.6 percent per year. It is proposed that distributors not be permitted to deliver to retail outlets any more gasoline than is distributed during the base year of July 1, 1972-June 30, 1975. No requirements will be placed on the individual motorist. The gasoline limitation and motorcycle registration limitation would be eliminated when they are no longer required to maintain the carbon monoxide standards. It is expected that this will occur during the 1977–1980 time period.

In addition, an overall ceiling on the increase in numbers of motorcycles and scooters is proposed to prevent counterproductive shifts from auomobiles to motorcycles as a result of gasoline limitation or parking bans. It should be noted that at the time the ceiling on motorcycle registrations would be implemented, motorcycle carbon monoxide emissions would be 14 to 20 times greater than the new 1976 automobile emissions on a grams-per-mile basis. Thus, any shift in usage from automobiles to motorcycles to counter gas limitations would result in a large increase in emissions.

In an attempt to remove the ceiling on motorcycle registration, the Agency will evaluate the feasibility of establishing emission standards for new motorcycles and will evaluate the availability of motorcycle emission control technology for meeting emission standards and for retrofit.

Compilation of Control Strategy Effects

Table I shows the relative importance of each control measure in 1977. Table II shows a compilation of control strategy effects. As can be seen, the national standards for carbon monoxide are attained by 1977.

Table I

	Percent
Percentage reduction needed for attainment in 1977	44.5
Amount attributed to control measures:	
Inspection/maintenance	8.0
Retrofit devices:	
Oxidizing catalytic converter	11.9
Air bleed	9.9
VMT reduction	9.7
Gasoline/motorcycle limitation	9.0
Percentage reduction attained	48.5

Table II

Source and Control Measures	Emissions and Reductions, tons/day		
	1975	1977	1980
Mobile Source Emissions without Proposed Control Measures	612.7	488.0	338.3
Expected Reductions: Inspection/Maintenance		−48.0	−33.8
Retrofit Devices			
Oxidizing Catalytic Converter		−72.5	−45.8
Air Bleed		−60.8	−39.0
VMT Reduction Measures	−73.6	−59.6	−40.6
Gasoline Limitation*		−54.7	
Motorcycles	14.0	14.0	18.6
Heavy-duty Vehicles	69.6	80.3	98.6
Other (Stationary, Aircraft, etc)	25.7	28.7	31.5
Total Emissions Remaining	648.4	314.6	327.8
Allowable Emissions for Attainment of CO Standards	333.1	333.1	333.1

*Gasoline limitation and motorcycle registration limitation are only required between 1974–1975 and 1977 to attain and maintain the CO standard.

Submittal of Written Comments

Interested persons may participate in this rule making by submitting written comments, preferably in tripicate, to the Regional Administrator, EPA, 100 California Street, San Francisco, California 94111. All relevant comments received within 30 days of this date will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection at the Regional Office. Copies of the proposal will also be available for inspection at the following locations: Arizona Division of Air Pollution Control, 1740 W. Adams Street, Phoenix, Arizona, 85007, and the Pima County Air Pollution Control Division, 151 West Congress Street, Tucson, Arizona 85701. The final promulgation of regulations for the Phoenix-Tucson Intrastate Region will take place on August 15, 1973. This notice of proposed rule making is issued under the authority of section 110(c) and section 301(a) of the Clean Air Act.

(42 U.S.C. 1857c-5)

Dated: July 6, 1973.

Robert W. Fri,
Acting Administrator.

It is proposed to amend Part 52 of Chapter 1, Title 40, of the Code of Federal Regulations as follows:

Subpart D—Arizona

1. Subpart D is amended by adding §§ 52.136, 52.137, 52.138, 52.139, 52.140, 52.141, 52.142, 52.143, and 52.144 as follows:

§ 52.136 Gasoline limitations.

(a) Definitions:

(1) The term "base year" means the consecutive 12-month period commencing on July 1, 1972, and ending June 30, 1973.

(2) The term "distributor" means any corporation, partnership, or sole proprietorship which transports or stores or causes the transportation or storage of gasoline between any refinery and any retail outlet.

(3) The term "retail outlet" means any establishment at which gasoline is sold or offered for sale to the public, or introduced into any vehicle.

(b) This section is applicable in the Phoenix-Tucson Intrastate Air Quality Control Region (hereafter referred to as the Region), to all distributors of gasoline to any retail outlet in this area and to the owners or operators of all retail outlets in this area.

(c) Beginning July 1, 1974, the State of Arizona shall implement regulations limiting the total gallonage delivered to retail outlets in the Region to the amount delivered to such outlets during the base year.

(d) In order for the State to determine the amount of gasoline delivered during the base year and years during which control is in effect, all distributors to which this section applies shall provide the State with a detailed accounting of the amount of gasoline delivered to each retail outlet in the Region during the base year and years during which control is in effect. For each year during which control is in effect, the owner or operator of each retail outlet to which this section applies shall provide the State with a detailed accounting of gasoline received from each distributor, including the total amount of gasoline received from each distributor, the total amount of gasoline sold during the year, and the amount of gasoline on hand at the beginning and end of the year. The State may require any other reports as it may deem necessary for the implementation of this section.

(e) The State of Arizona shall submit no later than October 1, 1973, a detailed compliance schedule showing steps it will take to establish and enforce the limitation program specified in paragraphs (c) and (d) of this section, including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) A date by which the State shall adopt procedures to ensure that no more than the amount of gasoline specified in paragraph (c) of this section is delivered to retail outlets in the Region. Such date shall be no later than March 30, 1974.

(3) A date by which any report necessary for establishing such procedures will be furnished to the State by the distributors. Such date shall be no later than January 1, 1974.

(4) Designation of an agency responsible for implementation and monitoring of this program.

(f) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.137 Inspection and maintenance program.

(a) Definitions:

(1) "Inspection and maintenance program" means a program to reduce emissions from in-use vehicles through identifying vehicles which need emission control related maintenance and requiring that maintenance be performed.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the Phoenix-Tucson Intrastate Air Quality Region (hereafter referred to as the Region).

(c) The State of Arizona shall establish an inspection and maintenance program applicable to all light-duty vehicles which operate on streets or highways over which it has ownership or control. No later than October 30, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Provisions for inspection of all light-duty motor vehicles at periodic intervals no more than one year apart by means of a loaded test.

(2) Provisions for inspection failure criteria consistent with the emission reductions claimed in the plan for the strategy. These criteria shall include failure of 50 percent of the vehicles in the first inspection cycle.

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. This shall include sanctions against individual owners and repair facilities, retest of failed vehicles following maintenance, a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts and knowledge to perform the tasks satisfactorily, and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Provisions for beginning the first inspection cycle by July 1, 1975, and completing it by July 1, 1976.

(6) Designation of any agency or agencies responsible for conducting, overseeing, and enforcing the inspection and maintenance program.

(d) After July 1, 1976, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which has not complied with the applicable standards and procedures adopted pursuant to paragraph (c) of this section. This shall not apply to the initial registration of a new motor vehicle.

(e) After July 1, 1976, no owner of a light-duty vehicle shall operate or allow the operation of such vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(f) The State of Arizona shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce an inspection and maintenance program pursuant to paragraph (c) of this section, including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) The date by which the State will recommend needed legislation to the State legislature.

(3) The date by which necessary equipment will be ordered.

(4) A signed statement from the Governor or his designee identifying the sources and amounts of funds for the program. If funds cannot legally be obligated under existing statutory authority, the text of needed legislation will be submitted.

(g) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, the State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.138 Bus/carpool lanes.

(a) Definitions:

(1) "Carpool" means a vehicle containing three or more persons.

(2) "Bus/carpool lane" means a motor vehicle lane on a street or highway open only to buses (or buses and carpools), whether constructed specially for that purpose or converted from existing lanes.

(3) "Major street or highway" means any street or highway which meets the criteria given in paragraphs (b)(4)(ii) or (iii) of this section.

(b) This regulation is applicable in the Phoenix-Tucson Intrastate Air Quality Control Region (hereafter referred to as the Region).

(1) Each incorporated city within the Region shall establish bus/carpool lanes on the major streets and highways over which it has ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(2) Each county within the Region shall establish bus/carpool lanes on the major streets and highways within the Region over which it has ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(3) The State of Arizona shall establish bus/carpool lanes on the major streets and highways within the Region over which it has ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(4) Each of the governmental entities named in paragraph (b) of this section shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps which it will take to establish these bus/carpool lanes and to enforce the limitations on their use, with each schedule to include the following:

(i) Each major street and highway which will have bus/carpool lanes must be identified with a schedule for the establishment of the lanes.

(ii) If a major street or highway has four or more motor vehicle lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) at all times. If only one lane is open to buses (or buses and carpools) at all times, a second lane must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iii) If a major street or highway has three motor vehicle lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iv) In unusual situations, a major street or highway, or a motor vehicle lane or segment thereof, may be exempt from these requirements if an approval of the exemption is obtained from the Administrator. The application for exemption shall not be submitted and will not be accepted after September 1, 1973. Special circumstances justifying the need for an exemption or modification (such as inappropriateness of use by buses, designation of bicycle lanes instead, or desire to allow bus/carpool lanes to be entered briefly by other vehicles for the

V 38 I 135 JUL 16 73 XUM

purpose of crossing a motor vehicle lane or making a right turn) must be given in detail with the application.

(v) Bus/carpool lanes must be prominently indicated by overhead signs at least once every mile, and at each intersection or entry ramp. Of the bus/carpool lane mileage for each of the governmental entities, 25 percent must be established and needed signs must be installed by March 1, 1974; 50 percent by June 1, 1974; 75 percent by September 1, 1974; and 100 percent by December 1, 1974.

(vi) Bus carpool lanes must be prominently indicated by distinctive painted lines, pylons, or physical barriers.

(vii) A signed statement by the chief executive officer of each governmental entity or his designee shall identify the sources and amounts of funds for all projects.

(5) Buses shall have the right-of-way whenever changing lanes on major streets and highways with bus lanes. This shall take effect as each bus/carpool lane is established and identified.

(6) Buses shall be permitted to make left turns whether or not the intersection is posted for "No Left Turn" (except when a one-way street would be entered from the wrong direction). This shall take effect January 1, 1974.

(7) None of the governmental entities named in paragraph (b) of this section shall convert existing on-street parking spaces to use as motor vehicle lanes unless the effect will be to increase the number of bus/carpool lanes on the affected street beyond the number otherwise required by paragraph (b) of this section, or unless the effect will be to create a bicycle lane in place of the parking spaces.

(c) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.139 Management of parking supply.

(a) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a parking facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(b) This regulation is applicable in the Phoenix-Tucson Intrastate Air Quality Control Region (hereafter referred to as the Region).

(c) No person, after August 15, 1973 shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating the construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a requirement that before a permit may be issued, the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include, but shall not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of VMT within any area, the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a parking facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of § Part 51.4 (b) of this chapter; and the Agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. If notice of intent to participate is required, that fact shall be noted prominently in the required notice of hearing.

§ 52.140 Limitation of public parking.

(a) The term "off-street parking facility" means any land or building or portion of a building set aside for the purpose of storing a maximum capacity of 10 or more vehicles on a temporary basis.

(b) Each governmental entity or public agency owning or operating an off-street parking facility located within the Phoenix-Tucson Intrastate Air Quality Control Region shall, by October 1, 1973, report to the Administrator the number of parking spaces in each such facility under its ownership or control. The number used solely for the storage of vehicles of persons who reside within ¼ mile of the facility shall not be counted.

(c) Each such owner or operator of any off-street parking facility located within the area specified in paragraph (b) of this section shall reduce the number of affected parking spaces in each such facility from the number in existence as of October 1, 1973, according to the following schedule:

By January 31, 1974—a reduction of 5 percent
By July 31, 1974—a reduction of 10 percent
By December 31, 1974—a reduction of 15 percent
By April 30, 1975—a reduction of 20 percent

(d) Each such owner or operator of an off-street parking facility subject to the requirements of paragraph (c) of this section shall submit to the Administrator, no later than October 31, 1973, a detailed compliance schedule showing the steps it will take to achieve the required reduction in parking spaces. Such schedule shall provide for the marking in some manner obvious to the public (such as painting over, roping off, or the like) of the eliminated spaces on which parking is not permitted pursuant to this section.

(e) Failure to submit a compliance schedule as required by this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any owner or operator of an off-street parking facility who allows any vehicle to be parked on any parking space which has been eliminated pursuant to this section, or who fails to mark clearly those spaces which have been eliminated, shall likewise be in violation and subject to enforcement.

§ 52.141 Motorcycle limitation program.

(a) Definitions:

(1) "Motorcycle" means any self-propelled two or three-wheeled motor vehicle capable of carrying one or more persons.

(2) "Registration" means the action of a State allowing a vehicle to be operated on the streets and highways in that State during a defined period of time.

(3) "Registration period" means that period of time for which a vehicle is allowed to be used within the State.

(b) This section is applicable in the Phoenix-Tucson Intrastate Air Quality Control Region (hereafter referred to as the Region).

(c) As of January 1, 1975, or during any registration period which commences in the calendar year 1975, the State of Arizona shall not register in the Region more motorcycles than the total number of motorcycles projected for that period based on ordinary growth trends in the period 1971–1974. This requirement shall remain in effect until July 1, 1977.

(d) After July 1, 1974, no person shall operate on the streets and highways of the State within the Region any motorcycle which is not validly registered by the State of Arizona or by another State.

(e) No later than October 1, 1973, the State shall submit a detailed compliance schedule showing the steps it will take to implement and enforce these requirements, and the text of needed statutory proposals and needed regulations which it will propose for adoption. Each schedule shall also include the following:

(1) A date by which the State will adopt procedures necessary to limit the number of motorcycles registered as required by paragraph (c) of this section.

(2) Proposed procedures to ensure that no motorcycle will be registered by the State in a county other than that of the owner's legal residence.

(3) A date by which such procedures will go into effect. Such date shall be no later than July 1, 1974.

(f) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, the State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.142 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbons and carbon monoxide from that vehicle.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable to the Phoenix-Tucson Intrastate Air Quality Control Region.

(c) The State of Arizona shall establish a retrofit program to ensure that on or before May 1, 1977, gasoline-powered light-duty vehicles of model years 1968 through 1974, subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate oxidizing catalyst retrofit device. No later than October 30, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of subparagraph (3) of this paragraph are enforced.

(3) A provision that starting no later than May 31, 1976, the State of Arizona shall require those light-duty vehicles of 1974 model year and earlier which are able to operate on 91 RON (research octane number) gasoline to be retrofitted with an oxidizing catalytic converter. The installation shall be completed by May 31, 1977.

(4) A method and proposed procedures for ensuring that those installing the retrofits have the training and ability to perform the needed tasks satisfactorily and will have an adequate supply of retrofit components.

(d) After June 1, 1977, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After June 1, 1977, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards and procedures implementing this section.

(f) The State of Arizona shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, including the text of needed statutory proposals and needed regulations which it will propose for adoption. The compliance schedule shall also include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(g) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if its fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.143 Air bleed to intake manifold retrofit.

(a) Definitions:

(1) The term "air bleed to intake manifold retrofit" as used in this section means a device in the intake system of the vehicle which enables the air/fuel ratio to be increased by metering additional air to the intake manifold in accordance with intake manifold vacuum advance to reduce emissions of hydrocarbons and carbon monoxide to the atmosphere.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this section, are used herein with the meanings so defined.

(b) This section is applicable in the Phoenix-Tucson Intrastate Air Quality Control Region.

(c) The State of Arizona shall establish a retrofit program to ensure that on or before June 30, 1976, all gasoline-powered light-duty vehicles of model years prior to 1968, subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate air bleed to intake manifold device. No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on vehicles subject to this section.

(2) Designation of any agency responsible for ensuring that the provisions of paragraph (c)(4) of this section are enforced.

(3) Provisions for beginning the installation of the air bleed devices by July 1, 1975, and installation of the devices on all vehicles subject to this section no later than June 30, 1976.

(4) A provision that starting no later than June 30, 1975, no vehicle of which retrofit is required under this section passes the annual emission tests provided for by § 52.137 unless it has been first equipped with an approved air bleed to intake manifold device which the test has shown to be installed and operating correctly. The regulations shall include test procedures and failure criteria for implementing this provision.

(5) Method and proposed procedures for ensuring that those installing the retrofit devices have the training and ability to perform the needed tasks satisfactorily and will have an adequate supply of retrofit components.

(d) After June 30, 1976, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After June 30, 1976, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards and procedures implementing this section.

(f) The State of Arizona shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, including the text of statutory proposals and regulations which the State proposes for adoption.

V38-135
JUL 16 73
XUM

The compliance schedules shall also include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1974.

(g) Failure to comply with any provision of this section shall render each person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.144 Bus/carpool computer matching system.

(a) Definitions:

(1) "Bus/carpool matching" means assembling lists of commuters sharing similar travel needs. The number of commuters on each list identifies potential bus/carpools.

(2) "Time-origin-destination (TOD) information" means information that identifies a commuter's work schedule, home and work location.

(3) All other terms used in this section which are defined in Part 51, Appendix N, of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the Phoenix-Tucson Intrastate Air Quality Control Region (hereafter referred to as the Region).

(c) Beginning March 1, 1974, the State of Arizona shall establish a computer-aided bus/carpool matching system which is conveniently available to all employees in businesses having more than 10 employees within the Region who operate light-duty vehicles on streets or highways over which it has ownership or control. No later than December 1, 1973, the State shall submit legally adopted regulations to EPA establishing such a system. The regulations shall include:

(1) A method of collecting information which will include the following as a minimum:

(i) Provisions for each affected employee receiving an application form with a cover letter describing the matching program.

(ii) Provisions on each application for applicant identification of time, origin, and destination, and the applicant's desire to drive only, ride only, or share driving.

(2) A computer method of matching information that will have provisions for locating each applicant's origin and destination within a grid system in the urban area and semi-rural region surrounding the Phoenix and Tucson metropolitan areas and matching applicants with identical origin and destination grids and compatible work schedules.

(3) A method for providing continuing service such that the master list of all applicants is retained and available for use by new applicants; applications are currently available; and the master list is periodically updated to remove applicants who have moved from the area served.

(4) An agency or agencies responsible for operating, overseeing and maintaining the bus/carpool computer matching system.

(d) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act.

[FR Doc.73-14266 Filed 7-13-73;8:45 am]

[40 CFR Part 52]

CALIFORNIA

Approval and Promulgation of Implementation Plans

This notice of proposed rulemaking sets forth transportation control plans for the following California Intrastate Regions (hereafter referred to also as Regions): San Francisco Bay Area, Sacramento Valley, San Diego, San Joaquin Valley, and Southeast Desert. A Federally proposed plan for the Los Angeles Intrastate Region was announced on January 15, 1973, and a revision of that plan was announced on June 15, 1973.

BACKGROUND

On May 31, 1972, the State of California was granted, pursuant to section 110(e) of the Act, an extension of 2 years for the attainment of the national standards for photochemical oxidants (hydrocarbons) in the San Francisco Bay Area, Sacramento Valley, and Southeast Desert Intrastate regions and for carbon monoxide in the Sacramento Valley Intrastate Region.

In accordance with the court decision on the NRDC v. EPA suit, this extension was rescinded and California was directed to submit a transportation strategy by April 15, 1973, that would provide for the attainment and maintenance of the standards as noted above by May 31, 1975. The court required each of the states that had originally been given an extension of time for submitting transportation control plans to submit such a plan by April 15, 1973, for each region that required it, and required the Administrator to approve or disapprove such plans by June 15, 1973. The court also ordered each of the 2-year extensions that had been granted for achieving the standards for automobile-related pollutants in these regions to be rescinded, with the proviso that they could be granted again if, on reexamination, EPA concluded that each of the statutory tests had been met.

In addition, California was directed to submit a transportation strategy for photochemical oxidants (hydrocarbon) in the San Diego and San Joaquin Valley Intrastate Regions and for carbon monoxide in the San Francisco Bay Area, San Diego, and San Joaquin Valley Intrastate Regions. The Administrator disapproved those portions of the California plan that were required to be submitted. That disapproval was announced on June 15, 1973, and published in the FEDERAL REGISTER on June 22, 1973. The disapproval was based solely upon the lack of timely submittal of California's plan. The Environmental Protection Agency, will, when the plan is received, acknowledge its receipt in the FEDERAL REGISTER and will provide opportunity for the public to comment on the plan. After evaluation of the plan that is to be submitted by the State and consideration of all comments, this notice of proposed rule making will be revised accordingly. A transportation control plan will be promulgated by the Administrator if the State fails to submit its own plan. Upon submission of an acceptable plan by the State, the EPA plan, or portions thereof, will be rescinded.

SUMMARY

Studies available to the Administrator at present indicate that a significant reduction of reactive hydrocarbons will have to occur in all regions covered by this proposal if the ambient air quality standards for photochemical oxidants are to be attained. In all cases, the controls proposed will affect the required reduction in reactive hydrocarbons; attainment of the oxidant standards will ensure attainment of the carbon monoxide and nitrogen oxide standards as well.

The proposed control measures reflect what EPA considers to be the most feasible approach for meeting the national standards in each region. However, these measures are subject to change prior to promulgation as a result of written comments, testimony presented at the public hearings, or further study conducted by EPA.

Much of the reduction in photochemical oxidant levels will result from measures submitted by the State and already approved, but these measures are not enough to meet the standards. The Administrator has concluded that an extension of the deadline for achieving the standards to 1977 under section 110(e) of the Act is justified because the necessary technology or other alternatives are not available and will not be available soon enough to permit full compliance. The extension applies to all Regions covered by this proposal for photochemical oxidants and for carbon monoxide. In reaching this conclusion, the Agency has considered, and applied as part of its plan, reasonably available alternative means of attaining the primary standard.

The plan set forth herein provides for the application of the requirements to all emission sources other than motor vehicles not later than May 31, 1975, as required by section 110(e)(2)(A), and provides for the application of reasonable interim measures for control of motor vehicle emissions prior to 1977.

Most of the plan utilizes reasonable and apparently available means of reducing photochemical oxidants, carbon monoxide, and nitrogen dioxide, including requirements for establishing bus and car-pool lanes on freeways and major streets. Other measures, to be required prior to 1975 in most cases, include: reductions in off-street public parking; limits on the construction of additional parking facilities; limitations on motorcycles; mandatory inspection and maintenance of light-duty vehicles; and the prevention of further increases in gasoline consumption.

Portions of the plan utilize measures which appear reasonable but do not appear to be applicable by 1975 because of technical problems related to devices such as catalytic retrofits. These measures will be required beginning in 1976, with full implementation to be achieved by 1977; they will be required earlier if they become available. Even if all the reasonable measures mentioned above are imposed, it is possible that the national standards for photochemical oxidants will not be met in the Regions by 1977 except in the San Joaquin Valley. Under the Clean Air Act, the Agency has no choice but to include in the plan a measure which can achieve the standards by 1977 even if it appears impractical and unworkable. Consequently gasoline limitations of whatever degree necessary have been included for 1977. If implemented, these limitations would achieve the standards for photochemical oxidants; however, the Agency will utilize every means available to avoid imposing impractical measures in order to meet the standards by 1977. It should be noted that grounds for a 1-year extension of the compliance date for certain sources under section 110(f) of the Clean Air Act may arise so that certain requirements of this plan may not be imposed until May 31, 1978.

NEED FOR MASS TRANSIT

The development of large-scale mass transit facilities in each Region is essential to any effort to reduce automotive pollution. The planning, acquisition, and operation of mass transit systems is and should remain a local responsibility. However, the automobile problem does not follow the boundaries of counties or cities. Current planning and operating agencies for mass transit do not appear to have sufficient authority to provide for adequate public transit with the notable exception of the San Francisco Bay Area's Metropolitan Transportation Commission. Consequently, the Environmental Protection Agency strongly endorses the concept of a region-wide transportation planning and operating authority.

The Agency also actively encourages the immediate large-scale purchase of additional public transportation facilities, specifically, additional buses, and encourages further examination of the feasibility of rail transit. To create conditions conducive to rapid bus transit, several of the measures in this plan give preferential treatment to buses. The Agency also encourages close examination of such measures as fare reductions; provision of jitney service; provision of more minibuses; fringe parking lots for buses and car pools; special parking privileges for car pools; on-street parking prohibition for nonresidents; State taxes to encourage reductions in vehicle miles of travel (VMT) while raising revenue to benefit mass transit; provisions for establishment of additional bicycle lanes throughout the metropolitan areas such as this proposal sets forth; and provisions for free bus tokens in place of free parking privileges.

STATE AND LOCAL IMPLEMENTATION OF CONTROL MEASURES

In order to preserve the intent of the Clean Air Act that pollution problems be dealt with primarily at the local level, the Agency will require State and local governments to take action wherever possible, and will not involve the Federal Government in the administration of local programs or in direct enforcement against individual citizens. Requirements of this sort are proposed with regard to expansion of a State motor vehicle retrofit program and establishment of bicycle lanes, bus/car-pool lanes, motorcycle control, public parking facilities, inspection/maintenance programs and gas limitations. Appropriate governmental entities will be required to submit compliance schedules for these programs with complete details on their implementation.

If the State submits adequate control measures in any of these areas or substitute control measures which will achieve comparable reductions in pollution, then the Administrator can approve the State's measures rather than promulgating his own. However, the requirements to submit adequate compliance schedules and take other actions will be enforced on a timely basis if the Agency's measures are promulgated. Therefore, it is suggested that plans to comply with these measures not be delayed.

PROPOSED MOBILE SOURCE CONTROLS

MODERATE VMT REDUCTIONS

EPA is proposing moderate VMT reduction measures in several regions to facilitate achievement of the standards.

The information available is incomplete. It is as true today as it was a year ago that, "states have had practically no experience with transportation control measures as a means of dealing with air quality problems." Nobody really knows what the public response to significant measures to reduce VMT will be. The studies that have been made on this point are inadequate and necessarily hypothetical until the measures have actually been put into effect. In addition, public attitudes in major urban areas appear to be changing and becoming less favorable to the continued use of automobiles on the present scale. Finally, even the question of the ability of different modes of transportation to accommodate the passengers diverted from automobiles as a result of significant VMT reductions will vary greatly with the individual region. No firm projection of what alternative transportation is available can be made without a detailed traffic study of each individual region, and, for the most part, such studies have not been made.

It is clear, however, that the authors of the Clean Air Act Amendments of 1970 anticipated that substantial VMT reductions might be necessary to achieve the standards. The Senate Report on the Act states that until the vehicle population is largely made up of cars that meet the 1975–76 standards, "as much as seventy-five percent of the traffic may have to be restricted in certain large metropolitan areas if health standards are to be achieved within the time required by this bill." It is also clear from the January 31, 1973, court of appeals opinion that if VMT reduction measures are "reasonably available" by 1975, and if the standards cannot be achieved without them, they must be put into effect. Consequently, it is proposed that the continuing growth in VMT within the air quality control regions covered by this proposal be stopped by limiting the continued growth in gasoline consumption. Gasoline consumption has been increasing by approximately 4.5 percent per year throughout the State of California. It is proposed that distributors not be permitted to deliver to retail outlets any more gasoline than is distributed during the period of July 1972 through June 1973. No rationing requirement will be placed on individual motorists unless the State of California chooses to do so.

Against this background, EPA has reexamined the question of VMT reduction and has arrived at some conclusions which have influenced the actions being taken. Comment on these is invited, both generally and with respect to specific regions. No significant reduction in the use of private automobiles can be expected to result from measures to increase the attractiveness of other means of transportation, such as buying more buses and improving bus service, building bicycle paths, and, in the long run, building new rail rapid transit systems. Reductions in VMT can only be assured through the use of some form of restraint on or disincentives to vehicle use.

A measure cannot be considered "reasonably available," however, if implementing it would cause severe economic and social disruption. Although some reduction in personal travel could certainly be absorbed without this result, to achieve a significant VMT reduction it will be necessary for the bulk of the travel displaced from single-passenger automobiles to be absorbed by such other modes of transportation as car pools, walking, bicycling, or public transit.

The only significant expansion of public transit facilities that can be accomplished by 1975 is the upgrading and physical expansion of bus services. Much,

V 38 135 JUL 16 73 XUM

however, can be done in this regard. Scheduling and service can be improved and optimized. Individual lanes of freeways and other major roads can be set aside for the exclusive use of buses and/or car pools. Significant numbers of new buses can be purchased and put into service by 1975. According to Department of Transportation figures, 2,500 transit buses were sold in this country in 1972, but the transit industry's production capacity is estimated to be more than 6,000 buses a year by 1975. Financial assistance from the Department of Transportation will be available to most communities for improving public transit facilities.

In the California Regions, sufficient alternative transportation capacity is presently or potentially available by 1975 to make reasonable VMT reductions (on the order of 10 to 15 percent) available by 1975. In part, this capacity is contained in present mass transit facilities, or can be created through the expansion of bus service as outlined above. It is also a possibility that many short trips now made by car could be made by bicycle or walking. Car pooling, however, may be the only strategy for reducing VMT which is both implementable by 1975 and capable of substantially reducing emissions without restricting personal mobility. Private automobiles, which are designed to carry four to six persons, carry an average of one and one-half persons per trip in major urban areas, and thus represent the largest unused pool of transportation capacity currently available.

EPA cannot directly require the use of car pools. It can be expected, however, that as measures to make the use of private automobiles less convenient are imposed, increased reliance on car pools will develop naturally as a matter of private initiative. It is proposed herein that the State provide a bus- and car-pool computer matching system to assist employees in establishing bus and car pools.

The measure proposed herein will require conversion of some lanes on major streets and highways for the exclusive use of buses and car pools, and it is expected that such a widespread network of bus/car-pool lanes will provide substantial incentive for use of buses and car pools while making private vehicle travel by single drivers relatively less attractive. Identification of specific lanes is expected to be made at the local level under the overall requirements herein. Exceptions to or modifications of the broad requirements will be approved when specifically justified since it will take some time before sufficient buses are available to carry the passengers currently traveling these lanes in private cars. These proposed regulations would permit the use of the lanes by car pools with three or more persons in the vehicle.

Due to the very high pollution potential of the 2-stroke motorcycles, the regulations herein proposed essentially ban the use of such vehicles during daylight hours in the summer smog season. The average 2-stroke motorcycle emits approximately 31 times as much exhaust hydrocarbons per mile as will a new California 1975 automobile. Consequently, prevention of increases in the number of motorcycles is proposed to prevent counter-productive shifts from automobiles to motorcycles as a result of other elements of the control strategy. The Agency will evaluate the feasibility of establishing emission standards for new motorcycles and will evaluate the availability of motorcycle emission control technology, including retrofits, for meeting emission standards.

Governmental entities will be required to reduce the number of parking spaces in publicly owned off-street parking facilities in an effort to reduce the number of low-occupancy private vehicles entering the central business districts and other congested areas and to promote voluntary car-pooling and the use of bus transit. Comment is invited on the possibility of extending this control to privately owned parking facilities, either by outright reduction in spaces or by imposing regulatory fees.

INSPECTION AND MAINTENANCE PROGRAMS

Considerable reductions in motor vehicle emissions can be achieved by requiring all vehicles in an area to be tested annually for emissions, by failing those emitting pollutants that exceed a certain level, and by requiring maintenance on those which fail in order to bring them into compliance. This process is called "inspection and maintenance" throughout this proposal.

Three different types of tests are possible. The car can be tested while running in gear on a treadmill-like device called a "dynamometer" (a "loaded test"); it can be tested while running in neutral (an "idle test"); or certain emission-related engine components can simply be examined to make sure they are in good working order ("parameter" inspection). A loaded test is the most effective and most expensive; parameter inspection is the least effective and least expensive. Since an inspection and maintenance program cannot be expected to achieve maximum effectiveness in reducing emissions unless a loaded test is adopted, EPA is proposing its adoption.

The State of California is proceeding with a loaded mode inspection system which will result in emission reductions. The proposal herein will require that this inspection system be expanded to require mandatory inspection and maintenance of all light-duty motor vehicles in Regions covered by this proposal. The inspection and maintenance program which the State is currently evaluating and proposing will be applicable to the Los Angeles Intrastate Region only.

RETROFITS

Until recently, much of the discussion of transportation control strategies centered on whether it was feasible to require the installation ("retrofit") of additional pollution control devices on motor vehicles currently in use. The most controversial of these devices has been the catalytic converter.

In his decision of April 11, 1973, to suspend the 1975 automobile emission standards for 1 year, the Administrator concluded that the problems involved in attempting to scale-up production of catalytic converters for new cars from near zero to 10 million units in a single model year, combined with the problem of adapting assembly lines to do this work, would probably result in economic dislocation if catalytic retrofits were required. The problems that would be encountered in any attempt to retrofit large numbers of existing vehicles with catalytic mufflers by mid-1975 are far more formidable than those generated by the attempt to put them on new cars.

Far less developmental work has been done on catalytic retrofits than on catalysts for new cars. The construction of production facilities for new-car catalysts has been largely funded by the major auto companies under requirements contracts; no such support has been available where retrofits are concerned. Finally, and most important of all, new-car catalysts would be installed by a few major companies through addition of another process to their assembly lines. To retrofit large numbers of in-use cars, it would be necessary to get them off the road into many different repair shops and to train a considerable number of mechanics how to install the catalysts once the cars had been made ready to receive them. In light of these difficulties, it is unrealistic to expect that significant progress toward the catalytic retrofit of large numbers of cars can be made by May 31, 1975. Accordingly, EPA is not proposing the retrofit of any vehicles with catalytic mufflers prior to 1975.

Cars with catalysts must be run on lead-free gasoline if the catalyst is to retain its efficiency. Current EPA regulations set forth on January 10, 1973 (38 FR 1254), provide for such gasoline to be made generally available by the beginning of the 1975 model year, but only in a relatively low octane. It is not anticipated that higher octane gasoline with the extremely low lead levels that catalysts require will be generally available by 1977 even if EPA decides that lead in gasoline is a health hazard and should be phased out. Accordingly, it will only be feasible to retrofit catalysts on certain model year cars, since only these models have been designed to run on low-octane gasoline. Catalytic converters would be required in 1976–1977 for many pre-1975 vehicles. It cannot be concluded at present that the technology for retrofit converters has developed to the point that they could be installed effectively by 1975. However, the Agency will monitor the status of development of this technology and will accelerate the date if feasible.

It is proposed that the California nitrogen oxide reduction device program for used cars be expanded. This device consists of a vacuum spark advance disconnect and/or an exhaust gas recirculation system.

This regulation requires application of the State's present program for 1955–1965 model year vehicles to the Sacramento and San Joaquin Regions. The current State program exempts these regions from this retrofit program.

STATIONARY SOURCE CONTROLS

Even though in most of the regions covered by this proposal the automobile is by far the major source of hydrocarbon and carbon monoxide emissions, substantial amounts are also emitted by both major and minor stationary sources. Major sources include oil and gasoline storage facilities and refineries; minor sources, which may be important factors in air pollution because of their numbers, include dry-cleaning shops, gas stations, incinerators, and any place where solvent-based paints are used.

EPA looked first to the reductions that might be achieved by further control of stationary sources for a variety of reasons. The nature of the controls available, their cost, and their effectiveness are relatively well known, and both States and EPA have had significant experience in enforcing similar measures. It can be predicted with confidence that none of these measures will cause any noticeable economic or social disruption. Since almost without exception they will be limited to requiring commercial enterprises to make investments or changes in their modes of operation, the only effect is likely to be some rise in the price of the goods or services produced by the affected enterprises.

Regulations are herein proposed to further limit emissions from stationary sources. They include requiring installation of vapor recovery systems at gasoline stations (the San Francisco Bay Area and San Diego Regions already have such a regulation and therefore no such proposal is made for these areas); additional control of dry-cleaning emissions; elimination of certain industrial solvent compounds; improved control on painting operation solvent loss; and additional restrictions on the loss of organic solvents in general industrial use. The Federal regulations dealing with the development by the State of a "complex source" review procedure were promulgated June 11, 1973, by the Environmental Protection Agency. These regulations provide guidelines on the procedure by which the State must review the construction permits of such indirect emission sources as shopping centers, housing complexes, and sports arenas, which in themselves are not major sources of pollution but tend to increase the amount of vehicle traffic in areas where they are located, and therefore cause an increase in motor vehicle related emissions. The review procedure developed by the State must be submitted to the Environmental Protection Agency by August 15, 1973, for approval. This point source review currently being done by some local districts and the Environmental Protection Agency should further reduce growth-induced emissions.

CONTROL STRATEGY FOR THE SAN FRANCISCO BAY INTRASTATE AIR QUALITY CONTROL REGION

The San Francisco Bay Intrastate Region is comprised of all of seven counties, namely Alameda, Contra Costa, Marin, San Francisco, San Mateo, Santa Clara, and Napa, and portions of two others, southwestern Solano and southern Sonoma. Geographically, the region covers approximately 5,600 square miles and has within its bounds approximately 4.6 million people and 2.7 million motor vehicles. Air pollution control in the region falls under the jurisdiction of the Bay Area Air Pollution Control District created by the California Legislature in 1955. During 1971, the Region experienced numerous violations of both Federal and State air quality standards. Based upon a linear rollback model and a maximum 1-hour oxidant reading at San Leandro of 0.36 ppm, a 78 percent reduction in reactive hydrocarbon emissions is required a achieve the ambient air quality standards for photochemical oxidants. Of the total emissions in the Region, 58 percent of the hydrocarbons, 70 percent of the nitrogen oxides, and 96 percent of the carbon monoxide emissions come from mobile sources. Although mobile sources presently account for the majority of the emissions, their control alone will not be sufficient to allow for attainment of national ambient air quality standards. Table I below shows the impact the proposed measures will have on the total emissions in the Region.

TABLE I—SUMMARY OF IMPACT OF CONTROL STRATEGIES IN SAN FRANCISCO BAY REGION IN 1977

Source of pollutant and control measures	*Emissions and reductions, tons/day of reactive hydrocarbons*
Stationary source emissions without control strategy.	225
Expected reductions	
1. Gasoline marketing vapor recovery.	−138
2. Surface coating improvements	−23
3. Dry-cleaning controls	−4
4. Degreasing controls	−10
Stationary source emissions remaining	50
Mobile source emissions without proposed control strategy.	201
Expected reductions	
1. Light-duty motor vehicle inspection and maintenance and catalytic converter retrofit.	−38
2. Motorcycle controls	−17
3. Reduction in private automobile use (20%).	−17
Mobile emissions remaining	129
Gasoline reduction (additional 64% VMT reduction).	−54
Total emissions remaining	125
Allowable emissions to attain standards.	125

Studies available to EPA indicate that a VMT reduction on the order of 20 percent can be achieved by means other than gas rationing. The remainder of the VMT reduction needed will be achieved through gas rationing.

It is hoped that in the process of developing a regional transportation plan, the Metropolitan Transportation Commission will be able to determine the effect of their plan upon the air quality generally, and specifically, upon the miles traveled by automobiles.

SOUTHEAST DESERT INTRASTATE AIR QUALITY CONTROL REGION CONTROL STRATEGY

The Southeast Desert Intrastate Region, also known as the Southeast Desert Air Basin, is located in the southeast portion of the State of California. It is comprised of all of Imperial County and the eastern portions of San Bernardino, Riverside, Kern, Los Angeles, and San Diego Counties. Geographically, this Region covers 33,600 square miles and is separated from the coastal regions by a series of mountain ranges. Elevations vary from 235 feet below sea level to 11,000 feet above sea level.

Air quality monitoring stations in the Region, in particular, those in the Coachella Valley, record photochemical oxidant levels up to five times the national ambient air quality standards. The overall 1971 maximum readings in the Region are 0.38 part per million oxidants (recorded in Palm Springs) and 17 parts per million carbon monoxide (recorded in Indio). Using simple rollback and assuming a linear relationship between reactive hydrocarbons and oxidant concentrations, the reductions required to achieve the national standards are 70 percent of the reactive hydrocarbons and 47 percent of the carbon monoxide.

There are significant data which support the hypothesis that air pollution from the Metropolitan Los Angeles Intrastate Region is transported to and contributes substantially to high oxidant levels in the desert areas east of Los Angeles. It is expected that the emission controls proposed by the Administrator, in addition to State and local emission controls for the Metropolitan Los Angeles Region will provide for attainment of the carbon monoxide and photochemical oxidant standards in the Southeast Desert Region by July 1977. Any delay experienced in attaining the oxidant and carbon monoxide standards in the Los Angeles Region will cause a corresponding delay in attainment of the standards in the Southeast Desert Region.

A discussion of studies relating the air quality in the Southeast Desert Region to that in the Los Angeles Region can be found in "Development of Emission Control Strategies for Reducing the Air Pollution in Critical California Air Quality Control Regions," prepared under contract for the Environmental Protection Agency and available from the EPA Region IX office at 100 California Street, San Francisco, California 94111.

Because of the dependence of air quality in the Southeast Desert Region upon that in the Los Angeles Region, and because of the very small impact that emissions in the Southeast Desert Region have upon air quality there, no transportation controls are proposed for this Region.

TRANSPORTATION CONTROL STRATEGY FOR SACRAMENTO VALLEY INTRASTATE AIR QUALITY CONTROL REGION

The Sacramento Valley Intrastate Region, also known as the Sacramento Valley Air Basin, lies in the center of Northern California, bounded on the west by the Coast Range, on the north and east by the Cascade Range and the Sierra-Nevada Range, and on the south by the San Joaquin Valley. This Region is comprised of portions of 15 counties. Geographically, the Region consists of 21,300 square miles, 1.2 million people, and

V 38-135 JUL 16 73 XUM

840,000 motor vehicles. Air pollution control in the Region falls under the jurisdiction of the local air pollution control districts.

TABLE II—SUMMARY OF IMPACT OF CONTROL STRATEGIES IN SACRAMENTO "REGIONAL AREA" IN 1977

Source of pollutant and control measures	Emissions and of reactive tons/day reductions, hydrocarbons
control strategy	40.6
Expected reductions	
1. Gasoline marketing vapor recovery	−26.0
2. Surface coating improvements	−1.1
3. Dry-cleaning controls	−0.7
4. Degreasing controls	−1.9
5. State limitations on burning	2.1
Stationary emissions remaining	8.8
Mobile source emissions without proposed control strategy	54.1
Expected reductions	
1. Catalyst retrofit	−5.2
2. Inspection/maintenance program	−4.1
3. Motorcycle controls	−5.9
4. Reduction in private auto use (20%)	−5.2
5. Vacuum spark advance program	−1.0
Mobile emissions remaining	32.7
Gasoline reduction (additional 29% VMT reduction)	−7.5
Total emissions remaining	34.0
Allowable emissions to attain standards for photochemical oxidants	34.5

As in the rest of the State, the local and regional organizations deal primarily with stationary source controls, leaving mobile source controls to the California Air Resources Board.

During the period 1970 to 1972, the Sacramento Valley Region experienced numerous violations of both Federal and State air quality standards. Photochemical oxidants are the predominant problem, and it appears from the limited data evaluated that the problem has increased in recent years, both in number of violations which occur and the maximum oxidant level experienced. Based on a 1-hour maximum oxidant reading during 1971 in Sacramento of 0.24 ppm and using a proportional rollback model, a 67 percent reduction in reactive hydrocarbons would be required to meet the national ambient air quality standards for oxidants. The annual arithmetic means for NO_2 from 1963 to 1971 show that the NO_2 standard has never been exceeded within the given time period. In Sacramento County, mobile sources account for 71 percent of the hydrocarbon, 89 percent of the nitrogen oxides, and 88 percent of the carbon monoxide. Since the air quality levels are most severe for Sacramento County, it appears appropriate to attempt to solve the airshed problem by developing a control strategy specifically for Sacramento County and its immediate vicinity. In the Sacramento Valley and San Joaquin Valley Regions, vast areas are sparsely populated but others are highly urbanized and have high emission densities in comparison with the rural areas.

The Agency has therefore determined that it is appropriate to reduce emissions from the urbanized areas which experience the high pollution levels. The Sacramento Region has been redefined to include only the 6 counties in the immediate vicinity of the City of Sacramento in an area which roughly approximates the Sacramento Regional Area Planning Commission. The following table summarizes the effects of the proposed control strategies. On the basis of very limited current information, no more than 20 percent VMT reduction could be expected to occur under the proposed VMT reduction measures. The remainder of the VMT reduction needed will be achieved through gasoline rationing.

TRANSPORTATION CONTROL STRATEGY FOR SAN JOAQUIN VALLEY INTRASTATE AIR QUALITY CONTROL REGION

The San Joaquin Valley Intrastate Region, also known as the San Joaquin Air Basin, consists of all of the Counties of Amador, Calaveras, Fresno, Kings, Madera, Mariposa, Merced, San Joaquin, Stanislaus, Tulare, and Tuolumne, and the western portion of Kern County. This Region lies in the southern portion of the Great Valley and extends into the neighboring mountain slopes. It is bounded on the west by the Coastal Range, on the east and south by the Sierra-Nevada and Tehachapi Mountains, respectively, and on the north by the Sacramento Valley Intrastate Region. The Region includes 30,200 square miles of land area and had a population of over 1.6 million people in 1970, which is a 16 percent increase since 1960. Although it contains 19 percent of the State's land area, the Region has only 8 percent of the State's population. National ambient air quality standards have been exceeded in seven cities in the San Joaquin Valley Region: Stockton, Fresno, Baketsfield, Modesto, Visalia, Parlier, and Five Point. Each of the areas surrounding the cities have unique characteristics with regard to air quality, meteorology, stationary sources, population distribution, and transportation. The transportation control strategy proposed herein recognizes this fact. A thorough analysis was made of Kern County (Bakersfield), Fresno County (Fresno), and San Joaquin County (Stockton). Insufficient data exist for an adequate analysis of Parlier and Five Point (both in Fresno County), but it is expected that the proposed transportation controls as applied to Fresno will be adequate for attainment of the national ambient air quality standards for photochemical oxidants in these two other cities as well.

The table below presents the maximum photochemical oxidant readings in the five counties of concern:

County	Maximum oxidant concentration, ppm
San Joaquin (Stockton)	0.20
Kern (Bakersfield)	0.22
Fresno (Fresno)	0.21
Tulare (Visalia)	0.19
Stanislaus (Modesto)	0.24

Reductions in emissions of reactive hydrocarbons of up to 65 percent (for Modesto) will be required in these counties by 1977 in order for the air quality standards to be met.

The table below shows the approximate effect that the proposed control strategies will have in Kern County.

TABLE III—SUMMARY OF IMPACT OF CONTROL STRATEGIES IN THE KERN COUNTY PORTION OF THE SAN JOAQUIN VALLEY REGION IN 1977

Source and control measures	Emissions and reductions of reactive hydrocarbons, tons/days
Stationary source emission without proposed control strategy.	11.3
Expected Reductions	
1. Vapor recovery at gasoline stations.	−5.8
2. Surface coating restrictions, dry-cleaning controls, and degreasing controls.	−0.7
Stationary source emissions remaining.	4.8
Mobile source emissions without the proposed control strategy.	21.4
Expected reductions	
1. Catalyst retrofit, expansion of State NO_x program, and mandatory inspection and maintenance.	−4.2
2. Motorcycle limitations	−2.5
3. Reduction in auto usage (23%)	−2.4
Mobile emissions remaining	12.3
Total emissions remaining	17.1
Allowable emissions for attainment of standards for photochemical oxidants.	17.2

As can be seen from the table for Kern County, a 23 percent VMT reduction is necessary by 1977 for attainment of the standards. In Stanislaus County, a similar situation exists, with a corresponding need for VMT reduction. In Fresno County, present studies indicate that a 16 percent VMT reduction by 1975 would provide for attainment of the standards, with a zero VMT reduction necessary for 1977. In San Joaquin County, a 32 percent VMT reduction is necessary in 1975 for attainment of the standards, but only 8 percent in 1977.

TRANSPORTATION CONTROL STRATEGY FOR SAN DIEGO INTRASTATE AIR QUALITY CONTROL REGION

The San Diego Intrastate Region, also known as the San Diego Air Basin, is located in the southwest corner of the State and consists of the western two-thirds of San Diego County. It is bounded on the east by the summit of the Peninsular Range, on the north by Orange County, on the south and west by Mexico and the Pacific Ocean, respectively. The airshed has a land area of approximately 3,040 square miles, and, as of 1970, a population of some 1.24 million people. It is estimated that the motor vehicle population in 1972 was approximately 715,000. The Region's population is concentrated primarily in the City of San Diego and in the incorporated areas along the coast. The mountainous terrain and frequent inversions hold in pollutants, and the southern California climate provides ample sunshine to aid in the formation of photochemical oxidants. The automobile is presently the dominant mode of transportation, and accounts for the majority of the hydrocarbon and carbon monoxide emissions. Air pollution control in the Region is the local responsibility of the San Diego County Air Pollution Control District. Since the airshed is contained within one county, no additional regional coordinating council is required for stationary source controls. As in the rest of the State, mobile source emission controls are the responsibility of the California Air Resources Board.

The national ambient air quality standards for photochemical oxidants and carbon monoxide have been exceeded in the Region. In 1970, the maximum 1-hour oxidant reading recorded in the Region was 0.40 ppm at the Oceanside station. The use of this oxidant reading for air planning purposes was rejected on the basis that the reading was the result of a unique traffic stoppage caused by highway construction, combined with unusually heavy volume that day. In addition, there is some evidence of pollutant transport into the Region from the Los Angeles Region. The next highest 1-hour oxidant reading that occurred in the Region was 0.32 ppm at the Escondido Station in 1972, and this reading is being used for oxidant air planning purposes. A high 8-hour carbon monoxide reading of 18 ppm recorded in 1972 is being used for carbon monoxide air planning purposes. As in many areas of California, the predominant air pollution problem is photochemical oxidants. a review of air quality data for 1970–1972 shows that both oxidant and carbon monoxide standards were frequently exceeded. Both the frequency of violations and the maximum levels of oxidant experienced indicate the need for extensive mobile and stationary source control if the national air quality standards are to be achieved. The oxidant problem is the main obstacle to attainment of the standards.

Recent EPA analysis indicates that emissions must be lowered to the following levels to meet the photochemical oxidant and 8-hour carbon monoxide standards: the reactive hydrocarbon emissions must be lowered to 25 percent of 1972 emission levels in order to meet the oxidant standard, and the carbon monoxide emissions must be lowered to 50 percent of 1972 emission levels in order to meet the carbon monoxide standard, using proportional rollback.

The majority of the carbon monoxide and reactive hydrocarbon emissions in the Region are attributable to motor vehicles. Information available indicates that, in addition to stringent controls for stationary sources and requirements for limiting the emissions of motor vehicles, a reduction in VMT by gasoline-powered motor vehicles of 45 percent will have to be effected in order to meet the oxidant standard in 1977. It should be pointed out that it is estimated by EPA that one of the proposed technical strategies, catalyst retrofit, cannot be implemented before 1977.

Table IV shows the impact the proposed measures will have on total emissions in the San Diego Region.

TABLE IV—SUMMARY OF IMPACT OF CONTROL STRATEGIES IN THE SAN DIEGO REGION IN 1977

Source and control measures	Emissions and reductions of reactive hydrocarbons, tons/day
Stationary source emissions without proposed control strategy.	52.5
Expected reductions	
1. Vapor recovery at gasoline stations.	−31.9
2. Surface coating restrictions, dry-cleaning controls, and degreasing controls.	−15.8
Stationary emissions remaining	4.8
Mobile source emissions without proposed control strategy.	86.4
Expected reductions	
1. Catalyst retrofit, and mandatory inspection and maintenance.	−14.5
2. Motorcycle limitations	−5.8
3. Reduction in VMT (20%)	−8.9
Mobile emissions remaining	57.2
Gasoline reduction (additional 25% reduction).	−11.0
Total emissions remaining	51.0
Allowable emissions for attainment of standards for photochemical oxidants.	51.0

Studies available to EPA indicate that a VMT reduction on the order of 20 percent can be achieved by means other than gas rationing. The remainder of the VMT reduction needed will be achieved through gas rationing.

It is assumed by EPA, and is implicit in the control strategy calculations, that all Federal facilities will comply with State, local Air Pollution Control District, and EPA air pollution emission rules and regulations. Due to the extensive military activities in the San Diego Region and the significant harm to air quality that emissions from these activities could produce, it is particularly important that military vehicles, operations and facilities follow Presidential Executive Order 11507 by conforming to State, local, and EPA rules and regulations.

There is presently underway in the San Diego Region a study of possible strategies for meeting the national ambient air quality standards. This study is being conducted by Rand Corporation of Santa Monica, California, and is part of the San Diego Clean Air Project, "Regional Analysis for Meeting Air Quality Standards," being performed by the Integrated Environmental Development Agency under contract number 6704–0270–E. The Clean Air Project is supported by a grant to San Diego County from the Environmental Protection Agency and by a matching contribution from local sources. It is anticipated that the results of this study will be available in time to assist in promulgation of the final EPA plan for the San Diego Region.

The stationary source emissions of hydrocarbons and carbon monoxide projected for 1977 are EPA estimates based on Rand-IREM projections. The Rand-IREM projections used are those that take into account EPA evaluations of hydrocarbon reactivities where possible and the effects of strategies that are now in effect or will be implemented by 1975–77 under the State and San Diego APCD regulations and proposed EPA regulations. It is anticipated that the final Rand-IREM report analysis may provide a basis for the promulgation of more emission reductions and/or cost effective control strategies in the final EPA plan. EPA and representatives of the solvent and paint industries are currently investigating the adequacy of the local air pollution control district regulations exempting certain organic compounds from control. It is anticipated that these regulations (such as Rule 66 of San Diego County) will be reevaluated prior to 1975 after extensive additional experimental studies.

AIRCRAFT EMISSIONS

Emissions from aircraft engines in 1977 are expected to be approximately 30 percent less than the emissions projected by means of current emission factors. This reduction is due to lower-emission engines that are expected to replace and supplement engines currently in use. Although a reduction is anticipated, the emissions from aircraft are still quite significant. For example, in San Francisco, aircraft emissions are projected to account for 34 tons/day of reactive hydrocarbons in 1977. The total allowable emissions of reactive hydrocarbons from all sources must be less than 125 tons/day if the national standards for oxidants are to be achieved. Aircraft emissions therefore will account for 27 percent of the allowable emissions in 1977.

Studies have indicated that modification of ground and flight procedures can result in reduced emissions but, the Federal Aviation Administration asserts implementation of these procedures may affect safety. This requires further investigation, and EPA is funding on this matter. There are also other means for reducing aircraft emissions, such as limiting the number of takeoffs and landings and/or percentage of seats occupied on individual flights. The Administrator invites public comment on the potential for reducing aircraft emissions.

TECHNICAL SUPPORT DOCUMENT

A discussion of the transportation control strategies proposed for the San Diego, San Joaquin Valley, Sacramento Valley, and San Francisco Bay Area Air Quality Control Regions is contained in "Development of Emission Control Strategies for Reducing Emissions in the Air Quality Control Regions of California," prepared under contract to the Environmental Protection Agency and available from the EPA Region IX office at 100 California Street, San Francisco, California 94111.

PUBLIC HEARINGS AND SUBMITTAL OF WRITTEN COMMENTS

Public hearings will be held on the proposed transportation control strategies contained herein. Dates and places of the public hearings are:

V 38 I 135 JUL 16 73 XUM

AUGUST 6, 1973

Fresno Convention Center,
700 M Street,
Exhibit Hall Wine Room,
Fresno, California.

AUGUST 7, 1973

California State Building,
1350 Front Street,
Room B109, Auditorium,
Basement,
San Diego, California.

AUGUST 8, 1973

Federal Building
450 Golden Gate Avenue
Ceremonial Court Room
19th Floor
San Francisco, California

AUGUST 10, 1973

Resources Building
1416 9th Street
Auditorium
Sacramento, California

Times. 9:30 a.m. to 12:00 a.m.; 1:30 p.m. to 4:30 p.m.; and 7:00 p.m. until all witness have been heard.

NOTE: Evening sessions will be held only if witnesses indicate that they can only attend evening sessions or if adequate time is not available during day sessions to hear all witnesses.

The Administrator's final promulgation of transportation controls for all affected air quality control regions in California will be profoundly influenced by the comments and testimony he receives. Persons wishing to give testimony at any of these hearings may do so by stating such intent at the hearing. Although it is not required, persons giving testimony should submit a copy of the testimony to the Region IX Office of the Environmental Protection Agency prior to the hearing date. Interested persons may also participate in this rule making by submitting written comments, preferably in triplicate, to the Regional Administrator, Environmental Protection Agency, 100 California Street, San Francisco, California 94111. All relevant comments received within 30 days of this date will be considered. Receipt of comments will be acknowledged, but substantial responses to individual comments will not be provided. Comments received and copies of the proposal will be available for public inspection at the Regional Office. Copies of the proposal will also be available for inspection at the following locations:

California Air Resources Board
1025 "P" Street
Sacramento, California 95814
Fresno Air Pollution Control District
515 South Cedar Avenue
Fresno, California 93702
San Diego Air Pollution Control District

Tulare County Air Pollution Control District
County Civic Center
Visalia, California 93277

The final promulgation for the San Joaquin Valley, San Francisco Bay Area, San Diego, and Sacramento Valley Regions (as well as for the Metropolitan Los Angeles Region, which was covered under a separate proposal announcement) will take place on August 15, 1973. This notice of proposed rule making is issued under the authority of sections 110(c) and 301(a) of the Clean Air Act.

(42 U.S.C. 1857c-5)

Dated: July 6, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart F—California

1. Subpart F is amended by adding §§ 52.241 through 52.255 as follows:

§ 52.241 Gasoline limitations.

(a) Definition:

(1) The term "base year" means the consecutive 12-month period commencing July 1, 1972, and ending June 30, 1973.

(2) The term "distributor" means any corporation, partnership, or sole proprietorship which transports or stores or causes the transportation or storage of gasoline or diesel fuel between any refinery and any retail outlet.

(3) The term "retail outlet" means any establishment at which gasoline or diesel fuel is sold or offered for sale to the public, or introduced into any vehicle.

(b) This section is applicable in the San Diego, Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (hereinafter referred to as the Regions), to all distributors of gasoline or diesel fuel to any retail outlet in this area, and to the owners of all retail outlets in this area.

(c) Beginning July 1, 1974, the State of California shall implement regulations limiting the total gallonage of gasoline delivered to retail outlets in the Regions to the amount delivered to such outlets during the base year.

(d) Beginning May 31, 1977, the State of California shall implement regulations limiting the total gallonage of gasoline and diesel fuel delivered to retain outlets in all regions except the San Joaquin Valley to that amount which, when combusted, will not cause the ambient air quality standards for carbon monoxide and photochemical oxidants to be exceeded. The State shall by January 1, 1977, submit to the Administrator regulations for accomplishing this limitation, specifying the amount for limitation necessary.

(e) In order for the State to determine the amount of gasoline delivered during the base year and years during which control of gallonage is in effect, all distributors to which this section applies shall provide the State with a detailed accounting of the amount of gasoline delivered to each retail outlet in the Regions during the base year and years during which control is in effect. For each year during which control is in effect, the owner or operator of each retail outlet to which this section applies shall provide the State with a detailed accounting of gasoline received from each distributor, the total amount of gasoline sold during the year, and the amount of gasoline on hand at the beginning and end of the year. The State may require any other reports it may deem necessary for the implementation of this section.

(f) The State of California shall submit no later than October 1, 1973, a detailed compliance schedule showing steps it will take to establish and enforce the limitation program specified in paragraphs (c) and (e) of this section, including:

(1) The text of needed statutory proposals and needed regulations which the State will propose for adoption.

(2) A date by which the State shall adopt procedures to ensure that no more than the amount of gasoline specified in paragraph (c) of this section is delivered to retail outlets in the Regions. Such date shall be no later than March 30, 1974.

(3) A date by which any report necessary for establishing such procedures will be furnished to the State by the distributors. Such date shall be no later than January 1, 1974.

(4) Designation of an agency responsible for implementing and monitoring this program.

(f) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a State will be considered to have failed to comply with the requirements of this section if it fails to submit on time any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.242 Inspection and maintenance program.

(a) Definitions:

(1) "Inspection and maintenance program" means a program for reducing emissions from in-use vehicles through identifying vehicles which need emission-control-related maintenance and requiring that such maintenance be performed.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the San Diego, Sacramento Valley, San Joaquin Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions (hereinafter referred to as the Regions).

(c) The State of California shall establish an inspection and maintenance program applicable to all light-duty vehicles which operate on streets or highways over which it has ownership or control. No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Provisions for inspection of all light-duty motor vehicles at periodic intervals no more than 1 year apart by means of a loaded (dynamometer) test.

(2) Provisions for inspection failure criteria consistent with the emission reductions claimed in the plan for the strategy. These criteria shall include failure of 50 percent of the vehicles in the first inspection cycle.

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. These shall include sanctions against individual owners and repair facilities; retest of failed vehicles following maintenance; a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts, and knowledge to perform the tasks satisfactorily; and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Provisions for beginning the first inspection cycle by June 1, 1975, and completing it by June 1, 1976.

(6) Designation of an agency or agencies responsible for conducting, overseeing, and enforcing the inspection and maintenance program.

(d) After June 1, 1976, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which has not complied with the applicable standards and procedures adopted pursuant to paragraph (c) of this section. This shall not apply to the initial registration of a new motor vehicle.

(e) After June 1, 1976, no owner of a light-duty vehicle shall operate or allow the operation of such vehicle which has not complied with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(f) The State of California shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce an inspection and maintenance program pursuant to paragraph (c) of this section, including:

(1) The text of needed statutory proposals and needed regulations which the State will propose for adoption.

(2) The date by which the State will recommend needed legislation to the State legislature.

(3) The date by which necessary equipment will be ordered.

(4) A signed statement from the Governor or his designee identifying the sources and amounts of funds for the program. If funds cannot legally be obligated under existing statutory authority, the text of needed legislation will be submitted.

(g) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, the State will be considered to have failed to comply with the requirements of this section if it fails to submit on time any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.243 Bus/car-pool lanes.

(a) Definitions:

(1) "Car pool" means a vehicle containing three or more persons.

(2) "Bus/car-pool lane" means a lane on a street or highway open only to buses (or buses and car pools), whether constructed specially for that purpose or converted from existing lanes.

(3) "Major street or highway" means any street or highway which meets the criteria given in paragraph (b) (4) (ii) and (iii) of this section.

(b) This regulation is applicable in the San Diego, San Francisco Bay Area, and San Joaquin Valley Intrastate Air Quality Control Regions, and in the Sacramento County portion of the Sacramento Valley Intrastate Air Quality Control Region.

(1) Each incorporated city within the Regions or portions thereof specified in paragraph (b) of this section shall establish bus/car-pool lanes on the major streets and highways (as defined herein) over which it has ownership or control, according to the schedule in paragraph (b) (4) (v) of this section.

(2) Each county within the Regions or portions thereof specified in paragraph (b) of this section shall establish bus/car-pool lanes on the major streets and highways (as defined herein) over which it has ownership or control, according to the schedule in paragraph (b) (4) (v) of this section.

(3) The State of California shall establish within the Regions or portions thereof specified in paragraph (b) of this section, bus/car-pool lanes on major streets and highways over which it has ownership or control, according to the schedule in paragraph (b) (4) (v) of this section.

(4) Each of the governmental entities named in the previous three subparagraphs shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps which it will take to establish these bus/car-pool lanes and to enforce the limitations on their use, with each schedule to include the following:

(i) Each major street and highway which will have bus-car-pool lanes must be identified and a schedule given for the establishment of the lanes.

(ii) If a major street or highway has four or more traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and car pools) at all times. If only one lane is open to buses (or buses and car pools) at all times, a second lane must be open only to buses (or buses and car pools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iii) If a major street or highway has three traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and car pools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iv) In unusual situations, a street or highway, or lane segment thereof, may be exempt from these requirements if an approval of the exemption is obtained from the Administrator. The application for exemption shall not be submitted and will not be accepted after September 1, 1973. Special circumstances justifying the need for an exemption or modification (such as inappropriateness of use by buses, designation of bicycle lanes instead, or desire to allow bus/car-pool lanes to be entered briefly by other vehicles for the purpose of crossing a motor vehicle lane or making a right turn) must be given in detail with the application.

(v) Bus/car-pool lanes must be prominently indicated by overhead signs at least once every mile, and at each intersection or entry ramp. Twenty-five percent of the lane mileage for each of the governmental entities must be established and needed signs must be installed by March 1, 1974; fifty percent by June 1, 1974; seventy-five percent by September 1, 1974; and one hundred percent by December 1, 1974.

(vi) Bus/car-pool lanes must be prominently indicated by distinctive painted lines, pylons, or physical barriers.

(vii) A signed statement by the chief executive officer of each governmental entity or his designee which will identify the sources and amounts of funds for all projects.

(5) Buses shall have the right-of-way whenever changing lanes on streets and highways with bus lanes. This shall take effect as each lane is established and identified.

(6) Buses shall be permitted to make left turns whether or not the intersection is posted for "no left turn" (except when a one-way street would be entered from the wrong direction). This shall take effect January 1, 1974.

(7) None of the governmental entities named in paragraph (b) of this section shall convert existing on-street parking spaces to traffic lanes unless the effect will be to increase the number of bus/car-pool lanes on the affected street beyond the number otherwise required by paragraph (b) of this section, or unless

V 38 - 135
JUL 16 73
XUM

the effect will be to create a bicycle lane in place of the parking spaces.

(c) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a governmental entity will be considered to have failed to comply with the requirements of this section if it fails to submit on time any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.244 Management of parking supply.

(a) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land for use as a facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot, or portion thereof used primarily for temporary storage of motor vehicles.

(b) This regulation is applicable in the San Diego, San Francisco Bay Area, and San Joaquin Valley Air Quality Control Regions, and in the Sacramento County portion of the Sacramento Valley Intrastate Air Quality Control Region.

(c) No person, after August 15, 1973, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator, or from an ageny approved by the Administrator, a permit stating that construction, modification, or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a condition that before a permit may be issued the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the proposed facility will serve.

(v) The number of motor vehicles using the proposed facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include but not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of vehicle miles of travel within any area the air quality of which fails to meet applicable Federal air quality standands.

(3) Agency procedures provide that no permit for the construction, enlargement, or modification of a facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of § 51.4(b) of this chapter; and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. If notice of intent to participate is required, that fact shall be noted prominently in the required notice of hearing.

§ 52.245 Limitation of public parking.

(a) The term "off-street parking facility" means any land or building or portion of a building set aside for the purpose of storing a maximum capacity of ten or more vehicles on a temporary basis.

(b) Each governmental entity or public agency owning or operating an off-street parking facility located within the San Diego, San Francisco Bay Area, or San Joaquin Valley Intrastate Air Quality Control Regions, or in the Sacramento County portion of the Sacramento Valley Intrastate Air Quality Control Region shall, by October 1, 1973, report to the Administrator the number of parking spaces in each such facility under its ownership or control. The number used solely for the storage of vehicles of persons whose residence is within ¼ mile of the facility shall not be counted.

(c) Each such owner or operator of any off-street parking facility located within the area specified in paragraph (b) of this chapter shall reduce the number of affected parking spaces in each such facility from the number in existence as of October 1, 1973, according to the following schedule: by January 31, 1974, a reduction of 5 percent; by July 31, 1974, a reduction of 10 percent; by December 31, 1974, a reduction of 15 percent; and by April 30, 1975, a reduction of 20 percent.

(d) Each such owner or operator of an off-street parking facility subject to the requirements of paragraph (c) of this chapter shall submit to the Administrator, no later than October 31, 1973, a detailed compliance schedule showing the steps it will take to achieve the required reduction in parking spaces. Such schedule shall provide for marking in a manner obvious to the public (painting over, roping off, etc.) those spaces which are eliminated pursuant to this section and on which parking is no longer permitted.

(e) Failure to submit a compliance schedule as required by this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any owner or operator of a parking facility who allows any vehicle to be parked on any parking space which has been eliminated pursuant to this section or who fails to mark clearly those spaces which have been eliminated, shall likewise be in violation and subject to enforcement.

§ 52.246 Motorcycle limitation program.

(a) Definitions:

(1) "Motorcycle" means any self-propelled two- or three-wheeled motor vehicle capable of carrying one or more persons.

(2) "Two-stroke engine" means an internal combustion engine which requires two strokes of the engine's piston for a complete cycle of operation.

(3) "Registration" means the action of a State which allows a vehicle to be operated on the streets and highways in that State during a defined period of time.

(4) "Registration period" means that period of time that a vehicle is permitted to be used within the State.

(b) This section is applicable in the San Diego, San Francisco Bay Area, and San Joaquin Valley Intrastate Regions, and in the Sacramento County portion of the Sacramento Valley Intrastate Region.

(c) As of January 1, 1974, or during any registration period which commences in the calendar year 1974, the State of California shall not register in the Regions and portions thereof specified in paragraph (b) of this section more motorcycles than the total number registered in 1973.

(d) As of May 1, 1974, the State of California shall prohibit the operation of two-stroke-engine motorcycles in the Regions and portions thereof specified in paragraph (b) of this section between 6:00 a.m. and 8:00 p.m. during the months of May, June, July, August, September, and October.

(e) After January 1, 1974, no person shall operate any motorcycle on the streets and highways of the State within the Regions and portions thereof specified in paragraph (b) of this section which is not validly registered by the State of California or by another State.

(f) No later than October 1, 1973, the State shall submit a detailed compliance schedule showing the steps it will take to implement and enforce these requirements, including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) A date by which the State will adopt procedures (or submit evidence that they are in existence) necessary to limit the number of motorcycles registered as required above, to restrict the operation of two-stroke motorcycles as required above, and to require the registration of all motorcycles operated as required above.

(3) Proposed procedures (or evidence that they are in existence) to ensure that no motorcycle will be registered by the State in a county other than that of the owner's legal residence.

(g) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, the State will be considered to have failed to comply with the requirements of this section if it fails to submit on time any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.247 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbons and carbon monoxide from that vehicle.

(2) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the San Diego, San Francisco Bay Area, San Joaquin Valley, and Sacramento Valley Instrastate Air Quality Control Regions.

(c) The State of California shall establish a retrofit program to ensure that on or before May 31, 1977, certain gasoline-powered light-duty motor vehicles of model years 1966 through 1974, which are subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate oxidizing catalyst retrofit device. No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on motor vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of subparagraph (3) of this paragraph are enforced.

(3) A provision that starting no later than May 31, 1976, the State of California shall commence retrofitting oxidizing catalysts to those light-duty motor vehicles able to operate properly on unleaded 91 RON gasoline. The installation shall be completed by May 31, 1977.

(4) A method and proposed procedures for ensuring that those installing the retrofits have the training and ability to perform the needed tasks satisfactorily and that they will have an adequate supply of retrofit components.

(d) After May 31, 1977, the State shall not register or allow to operate on public streets or highways any light-duty gasoline-powered vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After May 31, 1977, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards and procedures implementing this section.

(f) The State of California shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, and the text of needed statutory proposals and needed regulations which it will propose for adoption. The compliance schedule shall include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(g) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to submit on time the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.248 Bus/carpool computer matching system.

(a) Definitions:

(1) "Bus/carpool matching" means assembling lists of commuters sharing similar travel needs. The number of commuters on each list identifies potential bus/carpools.

(2) "Time-origin-destination (TOD) information" means information that identifies a commuter's work schedule, home and work location.

(3) All other terms used in this section which are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This section is applicable in the San Diego, San Joaquin Valley, Sacramento Valley and San Francisco Bay Area Air Quality Control Regions (hereafter referred to as the Regions).

(c) Beginning March 1, 1974, the State of California shall establish a computer-aided bus/carpool matching system which is conveniently available to all employees in businesses having more than 10 employees within the Regions who operate light-duty vehicles on streets or highways over which it has ownership or control. No later than December 1, 1973, the State shall submit legally adopted regulations to EPA establishing such a system. The regulations shall include:

(1) A method of collecting information which will include the following as a minimum:

(i) Provisions for each affected employee receiving an application form with a cover letter describing the matching program.

(ii) Provisions on each application for applicant identification of time, origin, and destination, and the applicant's desire to drive only, ride only, or share driving.

(2) A computer method of matching information that will have provisions for locating each applicant's origin and destination within a grid system in the urban area and semi-rural region surrounding incorporated cities with a population greater than 50,000 and matching applicants with identical origin and destination grids and compatible work schedules.

(3) A method for providing continuing service such that the master list of all applicants is retained and available for use by new applicants; applications are currently available; and the master list is periodically updated to remove applicants who have moved from the area served.

(4) An agency or agencies responsible for operating, overseeing and maintaining the bus/carpool computer matching system.

(d) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act.

§ 52.249 Control of oxides of nitrogen, hydrocarbon and carbon monoxide emissions from in-use vehicles.

(a) The State of California retrofit program, authorized under section 39176 of the State of California Health and Safety Code and established by the California Air Resources Board for the purpose of controlling oxides of nitrogen, hydrocarbon, and carbon monoxide emissions from model years 1955 through 1965 light-duty motor vehicles, shall be extended to the San Joaquin Valley and Sacramento Valley Intrastate Air Quality Control Regions.

(b) Beginning January 1, 1974, the State of California sh ll commence the operation of this program in the San Joaquin Valley and Sacramento Valley Intrastate Air Quality Control Regions.

(c) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to

V 38 I 135 JUL 16 73 XUM

comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.250 Control of dry cleaning solvent vapor losses.

(a) For the purpose of this paragraph, "dry cleaning operation" means that process by which an organic solvent is used in the commercial cleaning of garments and other fabric materials.

(b) This section is applicable in the San Diego, Sacramento Valley, San Joaquin Valley and San Francisco Bay Area Intrastate Air Quality Control Regions. The requirements of this section shall be effective commencing on January 1, 1974.

(c) In addition to the present control regulations for organic solvent users, any dry cleaning establishment that uses solvents containing any organic material listed as reactive under paragraph (k) (1), (2), and (3) of § 52.253 shall in addition reduce the emissions of the remaining organics by 95 percent by use of activated carbon adsorption or other appropriate means.

(d) If incineration is used as a control technique, 95 percent or more of the carbon in the organic compounds being incinerated must be oxidized to carbon dioxide.

(e) Dry cleaning operations using solvents considered nonreactive under paragraph (k) of § 52.253 are exempt from this section.

§ 52.251 Control of degreasing operations.

(a) For the purpose of this paragraph, "degreasing" means any operation using an organic solvent as a surface cleaning agent prior to fabricating, surface coating, electroplating or any other process.

(b) This section is applicable in the San Diego, Sacramento Valley, San Joaquin Valley and San Francisco Bay Area Intrastate Air Quality Control Regions. The requirements of this section shall be effective commencing on January 1, 1974.

(c) No person shall use for degreasing any organic solvent other than perchloroethylene or saturated halogenated hydrocarbons.

§ 52.252 Organic solvent usage (Federal regulation adding to and replacing parts of Rule 66 of San Diego County).

(a) This section is applicable in that portion of San Diego County contained within the metropolitan San Diego Intrastate Air Quality Control Region. This section is effective as of January 1, 1975.

(b) Subdivision (1) of Rule 66 of San Diego County as contained in the local air pollution control district regulations for San Diego County is amended by replacing subparagraph (5) and adding in place thereof subparagraphs (5), (6), and (7). Additional subdivisions are added and identified as (m) and (r). The identities of subdivisions (m), (n), (o), and (p) in the present San Diego regulations are changed respectively to (n), (o), (p), and (q). The amendment is as follows:

(5) The use of any material, in any article, machine, equipment or other contrivance described in subdivisions (a), (b), (c), or (e) if:

(i) The volatile content of such material consists only of water and organic solvents, and

(ii) The organic solvents comprise not more than 20 percent by volume of said bulk content, and

(iii) The volatile content is not photochemically reactive as defined in subdivision (n), and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

(6) The use of any material, in any article, machine, equipment or other contrivance described in subdivisions (a), (b), (c), or (e), if:

(i) The organic solvent content of such material does not exceed 20 percent by volume of said material, and

(ii) The volatile content is not photochemically reactive as defined in subdivision (n), and

(iii) More than 50 percent by volume of such volatile material is evaporated before entering a chamber heated above ambient application temperature, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

(7) The use of any material, in any article, machine, equipment or other contrivance described in subdivisions (a), (b), (c), or (e) if:

(i) The organic solvent content of such material does not exceed 5 percent by volume of said material, and

(ii) The volatile content is not photochemically reactive as defined in subdivision (n), and

(iii) The organic solvent or any material containing organic solvent does not come into contact with flame.

(m) All surface coating operations involving the application of surface coatings to metal objects shall, as of January 1, 1975, not be allowed the privilege of discharging into the atmosphere up to 40 pounds of organic material in any one day or 8 pounds in any one hour, as was previously allowed under subdivision (b) of this rule. The surface coating composition and its use must meet all other requirements of this rule.

(r) A person shall not during any one day dispose of a total of more than one and one-half gallons of any photochemically reactive solvent, as defined in subdivision (k) of this rule, or of any such photochemically reactive solvent, by any means which will permit the evaporation of such solvent into the atmosphere.

§ 52.253 Organic solvent usage.

(a) This section is applicable in all portions of all counties contained within the San Joaquin Valley, Sacramento Valley, and San Francisco Bay Area Intrastate Air Quality Control Regions.

(b) A person shall not discharge into the atmosphere more than 15 pounds of organic materials in any one day or more than 3 pounds in any one hour from any article, machine, equipment or other contrivance in which any organic solvent or any material containing organic solvent comes into contact with flame or is baked, heat-cured or heat-polymerized in the presence of oxygen, unless said discharge has been reduced by at least 85 percent. Those portions of any series of articles, machines, equipment or other contrivances designed for processing continuous web, strip or wire which emit organic materials in using operations described in this section shall be collectively subject to compliance with this section.

(c) A person shall not discharge to the atmosphere more than 40 pounds of organic materials in any one day or more than 8 pounds in any one hour from any article, machine, equipment or other contrivance used under conditions other than those described in paragraph (b) of this section for employing or applying any photochemically reactive solvent, as defined in paragraph (k) of this section, or material containing such photochemically reactive solvent, unless said discharge has been reduced by at least 85 percent. Emissions of organic materials into the atmosphere resulting from air or heated drying of products for the first 12 hours after their removal from any article, machine, or other contrivance described in this section shall be included in determining compliance with this paragraph. Emissions resulting from baking, heat-curing or heat-polymerizing as described in paragraph (b) of this section shall be excluded from determination of compliance with this section. Those portions of any series of articles, machines, equipment or other contrivances designed for processing a continuous web, strip or wire which emit organic materials in using operations described in this section shall be collectively subject to compliance with this section.

(d) A person shall not, after August 31, 1974, discharge into the atmosphere more than 3,000 pounds of organic materials in any one day or more than 450 pounds in any one hour from any article, machine, equipment or other contrivance in which any nonphotochemically reactive organic solvent or any material containing such a solvent is employed or applied, unless said discharge has been reduced by at least 85 percent. Emissions of organic materials into the atmosphere resulting from air or heated drying of products for the first 12 hours after their removal from any article, machine, equipment, or other contrivance described in this section shall be included in determining compliance with this section. Emissions resulting from baking, heat-curing, or heat-polymerizing as described in paragraph (b) of this section shall be excluded from determination of compliance with this section. Those portions of any series of articles, machines, equipment or other contrivances designed for processing a continuous web, strip, or wire which emit organic materials in using operations described in this section shall be collectively subject to compliance with this section.

(e) Emissions of organic materials to the atmosphere from the cleanup with

photochemically reactive solvent, as defined in paragraph (k) of this section, of any article, machine, equipment or other contrivance described in paragraphs (b), (c), or (d) of this section, shall be included with the other emissions of organic materials from that article, machine, equipment or other contrivance for determining compliance with this rule.

(f) Emissions of organic materials into the atmosphere required to be controlled by paragraphs (b), (c), or (d) of this section shall be reduced by:

(1) Incineration, provided that 90 percent or more of the carbon in the organic material being incinerated is oxidized to carbon dioxide, or

(2) Absorption, or

(3) Processing in a manner determined by the Administrator to be not less effective than subparagraph (1) or (2) of this paragraph.

(g) A person incinerating, adsorbing, or otherwise processing organic materials pursuant to this section shall provide, properly install and maintain in calibration, in good working order and in operation, devices as specified in the authority to construct or permit to operate, or as specified by the Administrator, for indicating temperatures, pressures, rates of flow or other operating conditions necessary to determine the degree and effectiveness of air pollution control.

(h) Any person using organic solvents or any materials containing organic solvents shall supply the Administrator, upon request and in the manner and form prescribed by him, written evidence of the chemical composition, physical properties and amount consumed for each organic solid used.

(i) The provisions of this section shall not apply to:

(1) The manufacture of organic solids, or the transport or storage of organic solids or materials containing organic solids.

(2) The use of equipment for which other requirements are specified by rules or which are exempt from air pollution control requirements by applicable rules affecting the storage of petroleum products, effluent oil-water separators, and the transfer of gasoline.

(3) The spraying or other employment of insecticides, pesticides or herbicides.

(4) The employment, application, evaporation or drying of saturated halogenated hydrocarbons or perchloroethylene.

(5) The use of any material in any article, machine, equipment or other contrivance described in paragraphs (b), (c), (d), or (e) of this section, if:

(i) The volatile content of such material consists only of water and organic solids, and

(ii) The organic solvents comprise not more than 20 percent by volume of said volatile content, and

(iii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

(6) The use of any material in any article, machine, equipment or other contrivance described in paragraphs (b), (c), (d), or (e) of this section if:

(i) The organic solvent content of such material does not exceed 20 percent by volume of said material, and

(ii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iii) More than 50 percent by volume of such volatile material is evaporated before entering a chamber heated above ambient application temperature, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

(7) The use of any material in any article, machine, equipment or other contrivance described in paragraphs (b), (c), (d), or (e) of this section, if:

(i) The organic solvent content of such material does not exceed 5 percent by volume of said material, and

(ii) The volatile content is not photochemically reactive as defined in paragraph (k) of this section, and

(iii) The organic solvent or any material containing organic solvent does not come into contact with flame.

(j) For the purposes of this section, organic solvents include diluents and thinners and are defined as organic materials which are liquids at standard conditions and which are used as dissolvers, viscosity reducers or cleaning agents, except that such materials which exhibit a boiling point higher than 220°F at 0.5 millimeter mercury absolute pressure or having an equivalent vapor pressure shall not be considered to be solvents unless exposed to temperatures exceeding 220°F.

(k) For the purpose of this section, a photochemically reactive solvent is any solvent with an aggregate of more than 20 percent of its total volume composed of the chemical compounds classified below or which exceeds any of the following individual percentage composition limitations, referred to the total volume of solvent:

(1) A combination of hydrocarbons, alcohols, aldehydes, esters, ethers, or ketones having an olefinic or cycloolefinic type of unsaturation: 5 percent;

(2) A combination of aromatic compounds with 8 or more carbon atoms to the molecule except ethylbenzene: 8 percent;

(3) A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichloroethylene or toluene: 20 percent.

Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the above groups of organic compounds, it shall be considered as a member of the most reactive chemical group, that is, that group having the least allowable percent of the total volume of solvents.

(l) For the purpose of this section, organic materials are defined as chemical compounds of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides, metallic carbonates, and ammonium carbonate.

(m) All surface coating operations involving the application of surface coatings to metal objects shall, as of January 1, 1975, not be allowed the privilege of discharging into the atmosphere up to 40 pounds of organic material in any one day or 8 pounds in any one hour. The surface coating composition and its use must meet all other requirements of this rule.

(n) Architectural coatings and their use shall conform to the following requirements:

(1) A person shall not sell or offer for sale or use in the areas in which this regulation applies, in containers of one-quart capacity or larger, any architectural coating containing photochemically reactive solvent, as defined in paragraph (k) of this section.

(2) A person shall not employ, apply, evaporate or dry in the areas in which this regulation applies, any architectural coating purchased in containers of one-quart capacity or larger containing photochemically reactive solvent, as defined in paragraph (k) of this section.

(3) A person shall not thin or dilute any architectural coating with a photochemically reactive solvent, as defined in paragraph (k) of this section.

(4) For the purpose of this section, an architectural coating is defined as a coating used for residential or commercial buildings and their appurtenances, or for industrial buildings.

(o) A person shall not during any one day dispose of a total of more than one and one-half gallons of any photochemically reactive solvent, as defined in paragraph (k) of this section, or of any material containing more than one and one-half gallons of any such photochemically reactive solvent by any means which will permit the evaporation of such solvent into the atmosphere.

(p) Compliance schedule: Except as provided in paragraph (q) of this section, the owner or operator of any source subject to this section shall comply with this section on or before January 31, 1974.

(1) Any owner or operator in compliance with this section on the effective date of this section shall certify such compliance to the Administrator no later than 120 days following the effective date of this paragraph.

(2) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(q) Any owner or operator of a stationary source subject to paragraph (p) (1) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions in paragraph (p) of this section as expeditiously as practicable but no later than July 31, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: Submittal of final

V 38 I 135 JUL 16 73 XUM

control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification; and final compliance.

(r) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

§ 52.254 Gasoline transfer vapor control.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in those portions of counties contained within Sacramento Valley and San Joaquin Valley Intrastate Air Quality Control Regions in the State of California.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 95 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight vapor return line from the storage container to the delivery vessel and a device that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 95 percent by weight of the organic compounds in the displaced vapor.

(2) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 95 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling.

(d) The provisions of this paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity less than 550 gallons used exclusively for the fueling of implements of husbandry, as such vehicles are defined in Division 16 (section 36000, et seq.) of the California Vehicle Code: *provided, however,* Said containers are equipped with submerged fill pipes.

(2) Any container having a capacity less than 2,000 gallons installed prior to promulgation of this paragraph.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(e) Compliance schedule: Except as provided in paragraph (f) of this section, the owner or operator of any source subject to this section shall comply with this section on or before January 31, 1974.

(1) Any owner or operator in compliance with this section on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(2) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(f) Any owner or operator of a source subject to paragraph (e) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions specified in paragraph (e) of this section as expeditiously as practicable but no later than June 30, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification; and final compliance.

(g) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

§ 52.255 Control of evaporative losses from the filling of vehicular tanks.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in those portions of counties contained within the Sacramento Valley and San Joaquin Valley Intrastate Air Quality Control Regions in the State of California.

(c) A person shall not transfer gasoline to an automotive fuel tank from gasoline dispensing systems unless the transfer is made through a fill nozzle designed to:

(1) Effect a vapor-tight fit between the fill nozzle and filler neck of the automotive fuel tank so as to prevent discharge of hydrocarbon vapors to the atmosphere.

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 95 percent by weight of the organic compounds in displaced vapors are recovered.

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle-filler neck interface to the dispensing tank or to an adsorption, adsorption, incineration, or refrigeration-condensation system or equivalent.

(e) Components of the systems required by § 52.254 paragraph (c) can be used for compliance with paragraph (c) of this section.

(f) If demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as a result of fill neck configuration, location, or other design features, the provisions of this paragraph shall not apply to tanks on vehicles existing at the time of promulgation of this regulation.

(g) The State of California shall divide all facilities subject to this section into two classes each of which taken as a whole emit approximately equal amounts of hydrocarbon materials. The classes shall be known as Class I and Class II.

(h) Except as provided in paragraph (j) of this section, the owner or operator of a source included in Class I shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1974.

(2) Initiation of onsite construction or installation of emission control equipment or process change must begin not later than July 31, 1974.

(3) Onsite construction or installation of emission control equipment or process modification must be completed not later than March 31, 1975.

(4) Final compliance is to be achieved not later than May 31, 1975.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(i) The owner or operator of a source included in Class II shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of onsite construction or installation of emissions control equipment or process change must begin not later than July 31, 1975.

(3) Onsite construction or installation of emission control equipment or process modification must be completed not later than March 31, 1976.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(j) Paragraphs (h) and (i) of this section shall not apply:

(1) To a source which is presently in compliance with paragraph (c) of this section and which has certified such compliance to the Administrator by September 15, 1973. The Administrator may request whatever information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by September 15, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1975, in the case of Class I sources, and May 31, 1976, in the case of Class II sources. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(k) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (b) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

[40 CFR Part 52]

ILLINOIS

Approval and Promulgation of Implementation Plans

Background. The transportation control plan submitted by the State of Illinois for attainment of the primary national ambient air quality standards for carbon monoxide (CO) for the Illinois portion of the Metropolitan Chicago Interstate Region (hereafter referred to as the Region) was disapproved on June 15, 1973 (38 FR 16550) because the proper procedures were not followed and because it would not have provided strategies that have the total capacity for attaining and maintaining the national standards for carbon monoxide. This notice of proposed rule making sets forth a transportation control plan which in the Administrator's judgment could be implemented to attain and maintain the national standard for CO in the Region. This plan is patterned after the submitted State proposal; however, the strategies have been modified to the extent EPA deemed necessary based on calculations showing that the State plan would not provide for attainment of the standards by May 31, 1975, as required.

If a legally adopted State plan is submitted and determined to be approvable prior to Federal promulgation, these proposed regulations will be withdrawn. Similarly, if a legally adopted State plan is submitted and determined to be approvable after Federal promulgation, then the Federal regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain the CO standard in the Region be a State plan carried out by the State or its designated representative.

POLLUTION IN THE REGION

The Region consists of nine counties (Cook, DuPage, Grundy, Kane, Kankakee, Kendall, Lake, McHenry, and Will) in Illinois and two (Lake and Porter) in Indiana. The Indiana portion of the plan was approved on May 31, 1972 (37 FR 10842), and therefore is not considered in this proposal.

The national primary ambient air quality standards for carbon monoxide are 9 parts per million (ppm) maximum 8-hour concentration and 35 ppm maximum 1-hour concentration. Neither standard is to be exceeded more than once per year. It is the Administrator's judgment that attainment of the national standards for carbon monoxide will provide an adequate safety margin for the protection of public health and will guard against known and anticipated adverse effects on public welfare, as required by the Act.

The basis for determining the required carbon monoxide emission reduction in the Region was air quality data obtained during 1971 at the Continuous Air Monitoring Program (CAMP) Station located in the Chicago Central Business District (CBD). On June 4, 1971, an 8-hour concentration of 22.9 ppm was measured. This was the highest measurement in the base year of 1971. The next highest concentration in the base year occurred on June 1 and again on June 4, when 18.1 ppm of CO was measured for an 8-hour period. This concentration was twice the standard of 9 ppm. Assuming air quality concentrations to be directly proportional to emission rates, a reduction of 50 percent

$$\left[\frac{(18.1-9)}{18.1}\times 100\right]$$

in air quality concentration and therefore in emission rates is required between 1971 and 1975 in order to ensure that the standard will not be exceeded.

Based on data on VMT and average speeds from the Chicago Area Transportation Study (which divides the CBD into 12 approximately quarter-mile zones and the rest of the area into zones of 1 square mile or larger), the 1971 CO emission density of 31,800 kilograms/square mile-day for the CBD appears to be the highest of any place in the Region. Since a 50 percent reduction in the emission rate was determined to be necessary based upon the air quality data, a "safe emission density" (maximum emission rate that will allow attainment of the standards) for 1975 was calculated to be 15,900 kg/square mile-day. Again assuming that the CO concentration in a given area is directly proportional to the CO emission rate for that area and applying the same air quality concentration to emission rate ratio calculated for the CBD to all other zones, it appears that the Federal Motor Vehicle Control Program and the Chicago Vehicle Inspection Program will enable all zones except the CBD to achieve the CO standards by May 31, 1975, as these strategies will permit all non-CBD zones to fall below the calculated "safe emission density" by mid-1975.

Accordingly, this proposed plan relates primarily to reductions in CO concentrations in the CBD. Studies available to the Administrator indicate that a 37 percent reduction in 1971 CO emissions can be achieved by 1975 through the impact of the Federal Motor Vehicle Control Program. This estimate takes into account the impact of the 1975 interim emission standards as set forth by the Administrator on April 11, 1973. The additional 13 percent reduction of CO emissions that must occur between 1971 and 1975 must be accomplished by reducing by approximately 21 percent the 1975 CO emissions that would occur if no strategy were implemented. We believe this reduction can be achieved by the strategies described below.

SUMMARY OF PROPOSAL

The first proposal would cause a vehicle emission inspection system to be instituted for all vehicles both owned and operated in Cook, DuPage, and Lake Counties. In this way, more vehicles coming into the CBD will be in compliance with the applicable emission standards. The standards used will be those promulgated in the City of Chicago Ordinance, made effective June 1, 1973.

The second proposal would prohibit on-street parking in the CBD on one side of all one-way streets and on both sides of all two-way streets, except those streets in Grant Park where parking is currently permitted. This strategy will improve traffic flow or average vehicle speed in the CBD and thereby reduce CO emission rates. To counteract any increase in VMT as a result of the improved traffic flow, a regulation requiring a permit for construction of any off-street parking facility is proposed.

PROPOSED CONTROL STRATEGY

The State's proposed plan indicated that 60 percent of all vehicle miles traveled in the Chicago CBD are by Chicago-registered vehicles. As the Technical Support Document shows, a 10 percent reduction of carbon monoxide emissions could be expected from a vehicle inspection program applied to 100 percent of the vehicles. Since the Chicago program, if applied only to Chicago-registered vehicles as anticipated, will affect only 60 percent of the VMT in the CBD, implementation thereof can be

V 38 135 JUL 16 73 XUM

expected to achieve only a 6 percent reduction in CO emissions.

The proposed strategy would extend the inspection system to all vehicles both owned and operated in Cook, DuPage, and Lake Counties. It is estimated that 90 percent of VMT in the Chicago CBD are due to vehicles owned and operated in these counties so that such extension would reduce 1975 CO emissions by approximately 9 percent on an annual basis in the CBD.

The State's proposed plan assumed that opening up an additional lane of traffic on one-way streets by prohibiting parking on one side would increase the average vehicle speed by 10 percent on those streets. The Environmental Protection Agency analysis indicates that this increase in average speed will reduce emissions by 10 percent on those streets. Since one-way streets comprise only about half of the CBD roadways, a 5 percent overall reduction in 1975 emissions can be anticipated. This conclusion, of course, assumes that vehicular traffic will not increase as the capacity of the CBD streets is increased.

To increase the effect of this strategy, it is proposed that parking be restricted on both sides of two-way streets as well. Traffic flow on all streets in the CBD should thus be improved, so that the total 1975 CO emission reduction can be expected to be 10 percent. This strategy will, coincidentally, remove parking spaces available for over 8,000 vehicles if no new off-street parking facilities are made available in the CBD.

To prevent an increase in VMT because of better traffic flow, the third proposal requires that no new parking facilities be allowed in the CBD without first receiving the approval of the Administrator of EPA, or of an authorized agency. The combination of parking restrictions is expected to reduce light-duty vehicle miles traveled by slightly more than 3 percent. Although the cumulative percentage is greater than the 21 percent required, the changing base factor requires a combination of all the above proposals to achieve the 21 percent reduction in 1975 CO emissions necessary to achieve the ambient air quality standards.

The strategies summarized above are similar to the State's proposal, but the scope has been extended. Each can be implemented by the time the standards must be attained. These are the chief reasons for their proposal at this time. However, other strategies that may be considered are special controls on taxi cabs, the designation of bus and carpool lanes on certain streets, reduction of off-street parking spaces, and other methods of reducing vehicle miles traveled.

Following is a compilation of the effects of the proposed strategies in the CBD.

		Calculated total emissions in the CBD	Calculated emission density in the CBD
1971	Uncontrolled emissions	103,000 kg/day	31,800 kg/mi²/day.
1975	Expected emissions with only Federal Motor Vehicle Control Program applied	65,000 kg/day	
	Expected emission reduction from on-street parking restrictions (increase in speed and coincidental reduction in VMT)	−8,400kg/day	
1975	Resulting emissions	56,600 kg/day	17,500 kg/mi²/day.
	Expected emission reduction from inspection/maintenance program	−5,100 kg/day	
1975	Resulting emissions	51,500 kg/day	15,900 kg/mi²/day.

Presently available information indicates that the proposed parking restrictions are needed to attain the standards by mid-1975. As the effects of the Federal Motor Vehicle Control Program assume a greater impact on the vehicle population because of replacement, continued implementation of the proposed parking prohibitions may not be warranted. Therefore, a periodic analysis of the extent of this impact will be made, and certain of such parking regulations may be rescinded as a result. In order to make this analysis, it will be necessary to obtain additional air quality data throughout the CBD as well as data regarding traffic responses to the regulations.

Additional technical information is contained in "Technical Support Document for the Proposed Transportation Control Plan for the Illinois Portion of the Metropolitan Chicago Interstate Air Quality Control Region," available in the Region V Office, U.S. Environmental Protection Agency, 1 North Wacker Drive, Chicago, Illinois 60606, and the Freedom of Information Center, EPA, 401 M Street SW., Washington, D.C. 20460.

Social and Economic Impact of the Plan

The cost of the inspection system for Chicago-registered vehicles has already been passed on to the owners in the form of an increased vehicle registration fee. It is expected that the minimal cost of inspecting non-Chicago-registered vehicles will also be passed to the vehicle owner. Operating costs for the Chicago inspection system have been estimated to be approximately $2.00 per vehicle per year. This does not include the cost of the necessary maintenance.

The parking restrictions may cause some diminution in revenue from short-term parking meters. At the same time, additional resources will be needed to ensure local enforcement of the restrictions. Those who drive into the CBD and park on the streets will be required to locate off-street parking or use another mode of transportation, preferably mass transit. Deliveries and pick-ups will be required to be made off the street or at non-prohibited hours in order to keep the curb lane of the streets open to traffic. Because these social and economic impacts may be of comparatively short-term duration (see paragraph on proposed strategy above), it is concluded that they will not be too onerous.

Basis for Estimation of Strategy Effectiveness

The stringency of the strategies proposed herein are based on two conservative assumptions, which were made in the absence of conclusive substantiating data. If, prior to the scheduled date of implementation, it can be demonstrated that these assumptions are incorrect, the regulations may be modified accordingly.

The first such assumption concerns the overall degree of effectiveness of an inspection/maintenance system. The EPA position on the effectiveness of the Chicago inspection system is based on test data obtained by EPA in evaluating the initial emission reductions achieved when a fleet of pre-control and controlled light-duty vehicles were subjected to emission inspection tests and the vehicles failing the test were serviced in private maintenance garages. It is expected that in an actual inspection/maintenance program the average emission reductions achieved will be substantially less than the initial reductions observed in the study because of the deterioration of emission-related components and adjustments between periodic inspection and maintenance events. While the currently available data on such deterioration are inadequate to accurately predict the consequences of this effect, some allowance for deterioration is necessary. Therefore, considering the current frequency of voluntary maintenance and the emission reductions typically achieved by existing maintenance procedures, it has been assumed that linear deterioration to premaintenance emission levels will occur over the 12-month period following maintenance. Consequently, the average effectiveness for an annual inspection is estimated to be one-half of the initial effectiveness following maintenance. EPA is presently studying that effect to verify this assumption.

The second such assumption concerns the increase in vehicle speed that can be expected in the CBD from implementation of parking restrictions. It is known that CO emissions from gasoline-powered vehicles decrease with increases in average speeds. If a change in average speed is known, then the change in CO emissions can be approximated based on empirical data. However, it is difficult to predict the effect on average speed in the Chicago CBD produced by on-street parking restrictions. Typical speed/volume relationships have been ascertained for urban arterials and rural roads; however, differences in the functions and services of CBD streets cause major difficulties in attempting to effect a correlation to these relationships. It has been assumed that the parking restrictions proposed will result in a 10 percent increase in speed in the network. If a study on the effects of the proposed parking limitations in the Chicago CBD demonstrates that a greater increase in speed will result, the need for such stringent parking restrictions may be obviated. The proposed regulation allows time to evaluate the effects of the prohibition of parking on one-way streets prior to implementation of the total ban. However, in the absence of such information, the Agency is constrained currently to follow the conservative approach.

Public Comments Solicited

A public hearing will be held on this proposal on July 27, 1973, at 9:30 a.m. in the San Juan-Kingston Room, Sheraton Chicago Hotel, 505 North Michigan Avenue, Chicago, Illinois.

Interested persons may participate in this rule-making process by submitting oral or written comments at such hearing or written comments within 30 days of this publication addressed to the Hearing Officer on Transportation Control Plans for the State of Illinois, EPA, 1 North Wacker Drive, Chicago, Illinois 60606. All relevant comments will be considered by the Administrator, together with the remainder of the entire hearing record and the proposed plan. Receipt of written comments will be acknowledged. Substantive responses to individual comments will not be provided. The changes proposed by this notice of proposed rule making are issued under the authority of sections 110(c) and 301(a) of the 1970 Clean Air Act (42 U.S.C. 1857 et seq.).

Dated: July 6, 1973.

Robert W. Fri,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart O—Illinois[1]

1. Subpart O is amended by adding §§ 52.731, 52.732, and 52.733 as follows:

§ 52.731 Regulation for the inspection and maintenance of vehicles.

(a) Definitions:

(1) "Inspection and maintenance program" means a program to reduce emissions from in-use vehicles through identifying vehicles that need emission control related maintenance and requiring that such maintenance be performed.

(2) "Vehicles-for-hire" means any vehicle used solely for the purpose of providing transportation for a fee or charge such as taxicabs, limousine services and the like.

(3) "Spark ignition powered motor vehicle" means every self-propelled over-the-road vehicle that is powered by a spark ignition type of internal combustion engine, including but not limited to engines fueled by gasoline, propane, butane and methane compounds.

(4) All other terms used in this section that are defined in Part 51, Appendix N of this chapter, are used herein with the meanings so defined.

(b) This regulation is applicable in Cook, Du Page and Lake Counties.

(c) The State of Illinois shall establish an inspection and maintenance program applicable to all light- and heavy-duty spark ignition powered motor vehicles both owned and operated on the streets, roads and highways within Lake and Du Page Counties under its ownership or control. The City of Chicago shall establish an inspection and maintenance program applicable to all light- and heavy-duty spark ignition powered motor vehicles both owned and operated on the streets, roads and highways under its ownership and control. The County of Cook shall establish an inspection and maintenance program applicable to all light- and heavy-duty spark ignition powered motor vehicles both owned and operated on the streets, roads and highways outside the city limits of Chicago under the ownership and control of the county. No later than March 1, 1974, each governmental entity shall submit to the Administrator a legally enforceable inspection and maintenance program which shall include:

(1) Provisions for inspection of all motor vehicles at periodic intervals no more than 1 year apart by means of an idle test, except that Chicago-registered vehicles-for-hire shall be inspected at intervals of no more than 4 months. Said provisions shall require that the inspection and maintenance necessary to achieve compliance of all motor vehicles subject to this section be completed on or before May 31, 1975.

(2) Provisions for inspection criteria based on those idle exhaust emission standards set forth in section 17-2A.2 of the Environmental Control Ordinance, Chapter 17 of the Municipal Code of Chicago, effective June 1, 1973, in the City of Chicago.

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. These shall include sanctions against individual owners and repair facilities, retest of failed vehicles following maintenance, a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts and knowledge to perform the tasks satisfactorily, and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Designation of an agency or agencies responsible for conducting, overseeing, and enforcing the inspection and maintenance program. Private parties may be designated to conduct parts of the program to certify compliance.

(d) After May 31, 1975, no governmental entity shall register, nor shall the State register or allow to operate on its streets or highways any motor vehicle subject to this section which does not comply with the applicable exhaust emission standards, as defined in paragraph (c)(2) of this section. This shall not apply to the initial registration of a new motor vehicle.

(e) After May 31, 1975, no person shall cause, permit or allow the resale, rental, use or operation of any spark-ignition powered motor vehicle that does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(f) The State of Illinois, Cook County, and the City of Chicago each shall submit no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce an inspection and maintenance program pursuant to paragraph (c) of this section including:

(1) Identification of elements to assure enforceability which may be a statement of present authority and implementing regulations or, if needed, drafts of proposed rulemaking.

(2) The date by which necessary equipment will be ordered.

(3) An identification of the sources and amounts of funds for the program.

(4) Other necessary provisions to carry out the program.

(g) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.732 Regulation for restriction of on-street parking/standing.

(a) Definitions:

(1) "Chicago Central Business District" means that area within the City of Chicago bounded by and including Chicago Avenue on the North, Lake Shore Drive on the East, Roosevelt Road on the South, and Halsted Street on the West.

(2) "Standing of motor vehicle" means any stopping of a motor vehicle, except when necessary to load or unload passengers or to avoid conflict with other traffic or to comply with the directions of a police officer or traffic control sign or signal.

(3) "Vehicles-for-hire" means any motor vehicle used solely for the purpose of providing transportation for a fee or charge such as taxicabs, limousine services and the like.

(b) This regulation is applicable within the Chicago Central Business District.

(c) The State of Illinois, the County of Cook, and the City of Chicago, shall each prohibit on-street parking and standing on the streets, highways, and roads over which it has ownership or control between the hours of 6:30 a.m. and 6:30 p.m., Mondays through Saturdays, on one side of each one-way street beginning on January 1, 1974, and on each side of two-way streets beginning on January 1, 1975. This shall not apply to streets in Grant Park where parking is permitted as of June 15, 1973.

(d) No person shall cause, permit, or allow the parking or standing of any motor vehicle where prohibited pursuant to paragraph (c) of this section.

V 38 I 135 JUL 16 73 XUM

(e) On or before October 15, 1973, the City of Chicago shall submit a legally enforceable program for implementing the restrictions contained in paragraph (c) of this section. This program shall include:

(1) Designation of the side of one-way streets on which parking and standing shall be prohibited;

(2) Designation of limited areas where vehicles-for-hire and mail trucks may stand;

(3) Schedule for installing no-parking/no-standing signs as appropriate; and

(4) Program for State and local enforcement of the parking and standing prohibited including but not limited to towing away those vehicles parking or standing in violation of a prohibition or subjecting the owner to a fine of up to $100, or both.

(f) Failure to comply with any of the provisions of this paragraph shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.733 Management of parking supply.

(a) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a facility.

(2) "Modification" means any change to a parking facility which increases the motor vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the motor vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(6) "Central Business District" means that area within the City of Chicago bounded by and including Chicago Avenue on the North, Lake Shore Drive on the East, Roosevelt Road on the South, and Halsted Street on the West.

(b) This regulation is applicable in the Chicago Central Business District.

(c) No person, after August 15, 1973 shall commence construction of any new parking facility or the modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating that construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include but not be limited to a requirement that before a permit may be issued the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities that the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include but not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of VMT within any area the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement, or modification of a facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of § 51.4(b) of this chapter, and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

[FR Doc.73-14268 Filed 7-13-73;8:45 am]

[40 CFR Part 52]

UTAH

Approval and Promulgation of Implementation Plans

BACKGROUND. On May 31, 1972 (37 FR 19842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved, with specific exceptions, State plans for implementation of the national ambient air quality standards. On this date, the Governor of Utah was advised that in order to complete the requirements of §§ 51.11(b) and 51.14, a transportation and/or land use control strategy for the Wasatch Front Intrastate Air Quality Control Region (hereinafter, the Wasatch Front Region) was to be submitted to the Administrator by February 15, 1973.

On January 31, 1973, the United States Court of Appeals for the District of Columbia Circuit found that the Administrator did not conform to the strict requirements of the Clean Air Act of 1970 in permitting several States to delay submission of transportation control portions of their implementation plans until February 15, 1973, and in granting extensions until mid-1977 for attainment of the national primary ambient air standards without following the procedures established in section 110, 42 U.S.C. § 1857c-5(e). Accordingly, the court ordered that the Administrator rescind the extension granted the States for implementation of the transportation and/or land use control portion of their implementation plans. The affected States, including Utah, were required to submit a control plan by April 15, 1973. The plan was to show attainment of the national ambient air quality standards for photochemical oxidants (hydrocarbons) and carbon monoxide as expeditiously as possible but not later than May 31, 1975.

This proposal results from the failure of the State of Utah to submit an acceptable control plan for the attainment and maintenance of the national primary ambient air quality standard for carbon monoxide in the Wasatch Front Region by that date. It sets forth an emission control plan designed to reduce the expected 1975 emissions of carbon monoxide in the central business districts of the three principal cities located within the Wasatch Front Region by approximately one-half in order to meet the ambient air quality standards for carbon monoxide by May 31, 1975.

POLLUTION IN THE WASATCH FRONT REGION

The most densely populated area in the State of Utah, and consequently the area with the most extensive vehicular traffic, lies at the eastern edge of the Wasatch Front Region and consists roughly of an 80-mile north-south zone that centers on Salt Lake City and extends from Provo in the south to Ogden in the north. The western half of the Wasatch Front Region is sparsely populated, being dominated by the Great Salt Lake Desert. In 1970, approximately 80 percent of the population of this Region was distributed among the three principal cities as follows: Salt Lake City, 175,885; Ogden, 69,478; and Provo, 53,131.

The cities of Salt Lake, Ogden, and Provo all lie at the eastern edge of the Great Salt Lake Basin and are subject to the same large-scale meteorological systems. In addition, the topographical features of the area form a smaller natural basin extending from Salt Lake City to Provo, within which locally generated pollutants tend to be confined. This basin is bordered on the east by the Wasatch Mountain Range and on the west by the Oquirrh Mountain Range. Within this basin, Salt Lake City and Provo are separated topographically by

a line of low hills. At its northern end, the valley opens toward the northwest to the Great Salt Lake. Pollution problems associated with motor-vehicle-generated carbon monoxide become acute during the fall and winter seasons on occasions when the air becomes very stable so that the vertical transfer of pollutants is severely restricted and winds are generally light and variable. Typically, these conditions develop during periods when anticyclones become stationary over the region.

The primary national ambient air quality standard for photochemical oxidants is 160 $\mu g/m^3$ (0.08 part per million (ppm) average) for a 1-hour period not to be exceeded more than once per year. The standard, promulgated on April 30, 1971 (36 FR 8186), is intended to avoid the adverse effects on the visual and respiratory systems that have been observed on days when estimated hourly average concentrations of photochemical oxidants reached 0.10 ppm. A level of 0.08 ppm was therefore judged necessary by the Administrator to protect public health with an adequate margin of safety, as required by the Act.

The highest recorded 1-hour average concentration of oxidants in the Region was 0.118 ppm. This concentration was reached in Salt Lake City in 1970 and 1972, and in Ogden in 1970. The highest concentration reached in Provo was 0.101 ppm in 1970. The second highest levels were also 0.118 ppm in Salt Lake City (1970 and 1972) and Ogden (1970). The second highest level reached in Provo was 0.077 ppm in 1970.

The primary national ambient air quality standards for carbon monoxide are 35 ppm average for 1-hour and 9 ppm average for 8 hours, each to be exceeded no more than once per year. These standards are intended to prevent adverse effects caused by the absorption of carbon monoxide by blood hemoglobin.

The highest and second highest 1-hour and 8-hour carbon monoxide concentrations recorded in each of the three cities are shown in the following table. The second highest 8-hour concentrations listed in the table are based on non-overlapping 8-hour periods.

HIGHEST AND SECOND HIGHEST CARBON MONOXIDE CONCENTRATIONS

(ppm)

	Salt Lake City	Ogden	Provo
1-hour average:			
1970 highest	39		21
2nd highest	36		20
1971 highest	35	30	37
2nd highest	35	27	36
1972 highest	61	65	30
2nd highest	57	47	28
8-hour average:			
1970 highest	23		13
2nd highest	22		9
1971 highest	24	18	21
2nd highest	20	17	20
1972 highest	41	34	18
2nd highest	21	14	16

SUMMARY OF CONTROL REQUIREMENTS

The best information available to the Administrator indicates that the anticipated decrease in motor vehicle hydrocarbon and carbon monoxide emissions due to the on-going Federal Motor Vehicle Control Program (FMVCP) will be insufficient to permit meeting the national standards by May 31, 1975. This information indicates further that additional control measures adequate to ensure meeting the 8-hour carbon monoxide standard will automatically ensure meeting both the 1-hour carbon monoxide standard and the standard for photochemical oxidants. Accordingly, the additional control measures proposed herein are evaluated in terms of the reductions in carbon monoxide emissions that will be reluired to meet the 8-hour carbon monoxide standard.

Studies have indicated that, with the exception of freeway traffic, the density of emissions from motor vehicles falls off sharply outside the downtown areas of the three cities. On this basis, it was decided that the most critical areas requiring the development of control plans were the central business districts of the cities. These are also the ones being monitored for air quality. In these downtown areas, in addition to the reductions obtained from the FMVCP, it will be necessary to further reduce emissions in order to meet the 8-hour standard by May 31, 1975. The reductions required for the three cities are shown in the following table. In arriving at these estimates the year in which the highest second-highest 8-hour average carbon monoxide concentration occurred was used as the base year.

SUMMARY OF EMISSION PROJECTIONS

CARBON MONOXIDE

(kg/8-hr/mi²)

	Salt Lake City	Ogden	Provo
Base year (Salt Lake City, 1970; Ogden and Provo, 1971)	10,984	7,160	6,152
May 31, 1975, with existing regulations (FMVCP)	9,765	7,036	5,698
Maximum allowable emissions	4,493	3,791	2,768
Required reduction from May 31, 1975, projection, %	54%	46%	51%

Emission density maps indicate that ambient concentrations of carbon monoxide in the Region outside of these areas either now meet the 8-hour standard or will do so by May 31, 1975, as a result of the anticipated decrease in motor vehicle emissions resulting from the FMVCP and from controls proposed herein for the general reduction of emissions from older vehicles.

The requirements for additional emission reductions are not so severe as to preclude the existence of a variety of control strategies for effecting such reductions, so that the Administrator has had some freedom to choose strategies on the basis of their cost-effectiveness and their impact on other aspects of life in the Wasatch Front area. The strategies that follow have been chosen to be, insofar as possible, in consistent conformance with the expressed policies and preferences of the Division of Health of the State of Utah. No control plan will be promulgated in final form, however, until the opportunity for public participation and debate, including public hearings, has taken place. The measures being proposed today are subject to change, although they represent EPA's best judgment of the most reasonable methods currently available to meet air quality standards; however, they may be amended, other measures may be added, or entirely new measures may be chosen in their place if the comments received on this Notice, or EPA's own reexamination of the problem, indicate that such a course would be desirable.

TRANSPORTATION CONTROL ALTERNATIVES

The emissions of carbon monoxide affecting ambient concentrations within the areas of concern come almost entirely from motor vehicle sources, so that reductions required beyond those provided by the FMVCP will need to be effected by transportation controls that reduce total motor vehicle emissions. The two general types of transportation controls available are those that reduce the average emissions per mile of vehicle travel, and those that reduce the number of vehicle miles traveled (VMT).

Vehicle emission reductions include an inspection and maintenance system to ensure the adequate performance of vehicle emission controls and the provision for requiring control devices on pre-1975 light-duty vehicles. These general controls are supplemented by programs for improving traffic flow within selected areas. The VMT-reducing strategy recommended is the continued development of public transportation systems coupled with steps to encourage their public acceptance and use, including parking changes, a limitation on gasoline sales, a conversion of certain lanes of major streets to bus and car pool use, and a ban on parking lot construction. Although the proposed date for full implementation of the high altitude efficiency modification program and air bleed program is July 1, 1976, the possibility of accelerating both programs will be actively explored before final promulgation.

PROPOSED CONTROLS ON MOBILE SOURCE EMISSIONS

The following controls to reduce emissions from a vehicle-mile of travel are proposed.

All light-duty gasoline-powered vehicles registered within the Region will be required to be inspected twice a year by means of an idle-mode emission test, which is a relatively inexpensive testing procedure. Vehicle owners will be required to obtain any maintenance necessary to ensure that all pollution control devices on the vehicle work properly and that the vehicle operates at low pollution levels.

The installation of an intake manifold air bleed device will be required on all pre-1968 model year light-duty gasoline-powered vehicles registered within Weber, Davis, Salt Lake, and Utah Counties. This type of device increases the air fuel ratio by metering additional air to the intake manifold in accordance with intake manifold vacuum.

V 38 135 JUL 16 73 XUM

The installation of an approved high altitude efficiency modification device will be required on all 1968–1974 light-duty gasoline-powered vehicles registered within Weber, Davis, Salt Lake, and Utah Counties.

Further reductions in emissions per VMT will be achieved by traffic flow improvements. The State of Utah is in the process of installing a computer-operated central signal system to improve traffic flow as part of its plan to meet air quality standards within downtown Salt Lake City. It is assumed that this system will be fully operational by May 31, 1975.

To improve traffic flow in Provo, angle parking will be prohibited on Center Street from 500 West Street to 100 East Street. This restriction will allow traffic to move in two lanes in each direction and will also provide left turn lanes, thus increasing average vehicle speed, which, in turn, decreases emissions of carbon monoxide.

Although EPA proposes the installation of emissions control devices on all pre-1975 gasoline powered light-duty vehicles within the Region, a possible alternative control strategy for these vehicles would be to ban their operation from certain defined areas unless they were equipped with the required control devices.

Proposed Reductions in VMT

Some reductions in VMT throughout the three cities are expected to be achieved in part by increased use of public transportation systems. Since the carbon monoxide problem has been identified principally with the downtown areas of Salt Lake City, Ogden, and Provo, the VMT-reducing controls proposed to effect the balance of the reductions required are directed toward limiting traffic in these specific areas.

To accomplish these reductions, the proposed regulations provide for parking restrictions within critical areas during peak traffic hours, conversion of certain motor vehicle lanes of major streets to the exclusive use of buses and car pools, gasoline limitations, and a ban on parking lot construction.

It is anticipated that the completion of a bypass in 1974 will result in a decrease of VMT within the business district of Ogden. The estimated effect of this decrease in VMT on emissions has been incorporated into the control strategies for this area.

Other VMT reduction measures, for which no regulatory language has been included, will also be considered as part of this rule making proceeding. In particular, the advisability of limiting or reducing the number of parking spaces in central business districts will be explored.

The final promulgation may include these or other measures not explicitly proposed today, if at the time of final promulgation they appear to be the most practical ways of achieving air quality standards.

The Administrator recognizes that there must be adequate alternative transporation if the controls on vehicle use are in fact to have a beneficial effect rather than become a burden. The Administrator is not proposing regulations to specifically assure such alternatives because, on the basis of studies presently available, it appears that the best alternatives are among those not appropriately established by Federal regulations, and because plans to improve transit service and to increase free shuttle bus service in downtown Salt Lake City are already underway. It is also anticipated that the restraints will prompt a variety of private decisions relative to work hours, car pooling, and similar matters that will operate to ameliorate their adverse impact.

Summary of the Effect of Transportation Controls

The following table is a summary of the effect of each of the proposed controls on emissions in the downtown areas of Salt Lake City, Ogden, and Provo.

Compilation of control strategy effects on carbon monoxide emissions in 1976

Control Strategy	Reduction in 1970 Carbon Monoxide Emissions Attainable in 1975, in addition to the Federal Motor Vehicle Control Program (Percent)		
	Salt Lake City	Ogden	Provo
1. Inspection/Maintenance	14	14	14
2. Air Bleed (Pre-1968)[1]	17	17	17
3. High Altitude Modification (1968–1974)[1]	13	13	13
4. Traffic Flow Improvements			
a. Computerized signal system	7		
b. Curb parking restrictions	3		
c. By-pass		1	
d. Change from diagonal to parallel parking			7
5. VMT Reductions			
a. Mass transit system	1	1	1
b. Bus/car pool lanes	4	1	1
c. Gasoline limitations	6	6	6
Total Reductions	65	53	59
Reductions Required	54	46	51

[1] Fully implemented by July 1, 1976; therefore, VMT reductions are needed as reasonably available alternatives by 1975.

Thus the regulations proposed herein, as their effects are presently projected, appear adequate on the basis of current knowledge for meeting the national ambient air quality standards for carbon monoxide and oxidants (hydrocarbons) by June 30, 1976. The Agency proposes to grant a 13-month extension for the air bleed and high altitude modification strategies.

Additional technical information is contained in "Technical Support Document for the Proposed Transportation Control Strategy for the Wasatch Front Intrastate Air Quality Control Region," available from the Region VIII Office, Environmental Protection Agency, Suite 900, 1870 Lincoln Street, Denver, Colorado 80203, and the Freedom of Information Center, EPA, 401 M Street, S.W., Washington, D.C. 20460.

Economic and Social Impact of the Transportation Control Plan

Congress recognized that achievement of the goals of the Clean Air Act would have a significant impact on many urban areas. A thorough quantitative assessment of the impact of the plan on the economic and social fabric of the community has not been possible due to the lack of time and the innate complexity of the issues. The following discussion attempts to describe the type of impacts which would occur. First, vehicle owners may have to assume the direct costs of emission abatement equipment required to bring their vehicles into compliance.

Second, reduction in the mobility of workers and consumers could have some impact on the economic fabric of the community. Third, interferences with the ability of citizens to move as freely as before may alter the life style of the Region slightly. Obviously, the severity of the impact depends on the degree of vehicle use restrictions, on the manner in which direct costs of abatement equipment are financed, and the degree to which the effects can be ameliorated by improvement of the transit system.

Since it is not possible to effect sufficient VMT reductions to meet the standards without use of other controls, all the possible combinations of controls that were considered included an inspection and maintenance program and some degree of additional emission control equipment for existing vehicles. The combination proposed requires what is believed to be the least expenditure by the individual light-duty vehicle owner that will accomplish the necessary emission reductions. No increase in gasoline consumption is anticipated as a result of the installation of the proposed control devices. The annual cost of the required inspection will probably be about $5.00, with an additional $15.00 to $25.00 required if maintenance is needed. The maintenance is, of course, desirable on its own merit, and is not viewed as a serious burden.

The installed cost of the intake manifold air bleed device is about $60.00, and the installed cost of possible options for the high altitude efficiency modification is estimated to be $20.00 to $35.00. If these costs fall directly on the individual light-duty vehicle owner, however, the specific burden will weigh more heavily on the low-income families who tend to own the older cars.

Effect on the Economic and Social Fabric of the Community

Any direct or indirect effects of the plan on the economy of the area are primarily dependent on the extent of the necessary reduction in VMT. Since the degree of restriction is relatively small, it is expected that the principal effects will be more a matter of social adjustments than of serious economic consequences.

EPA Efforts To Mitigate the Effects of Proposed Regulations

The combined effect of these proposed regulations, together with the Utah Implementation Plan, will eliminate the air pollution danger to human health and welfare that exists in the Wasatch Front area. They may, however, have adverse economic and social impacts, and the Administrator will make every effort

possible to mitigate the effects of his final promulgation. He will be in contact with the Department of Transportation and with other departments as necessary. The Administrator of EPA will request that the departments and agencies give special attention to the need for funding to provide adequate mass transit to replace the automobile travel eliminated by the proposed controls.

Public Comments Solicited

The Administrator intends that the finally adopted plans be as responsive as possible to the needs of the Wasatch Front area; he therefore desires to obtain the comments and suggestions of the public on the problems of achieving the ambient air quality standards. Comments are particularly invited pertaining to other measures that may be taken by Federal, State, or local authorities to support or supplement these measures, and pertaining to the comparative social and economic effects of alternative pollution control measures.

A public hearing will be held on this proposal on July 27 at 10:00 a.m. in Salt Lake City at the Highway Department Auditorium.

The Administrator's final promulgation of transportation controls for the Wasatch Front Region will be influenced by the comments and testimony he receives, as well as by any further approvable strategies submitted by the State as part of the Utah Implementation Plan. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from this proposal.

Submittal of Written Comments

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Regional Administrator, EPA, Region VIII, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203. All relevant comments received within 30 days of this date will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the EPA Region VIII Office and at the Freedom of Information Center, EPA, 401 M Street SW., Washington, D.C. 20460. The changes proposed by this notice with appropriate modification will be effective as noted.

This notice of proposed rule making is issued under the authority of sections 110(c) and 301(a) of the Clean Air Act.

(42 U.S.C. 1857 et seq.)

Dated: July 6, 1973.

Robert W. Fri,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart TT—Utah

1. Subpart TT is amended by adding §§ 52.2337, 52.2338, 52.2339, 52.2340, 52.2341, 52.2342, 52.2343, and 52.2344 as follows:

§ 52.2337 Inspection and maintenance program.

(a) Definitions:

(1) "Inspection and maintenance program" means a program to reduce emissions from in-use vehicles through identifying vehicles which need emission control-related maintenance and requiring that maintenance be performed.

(2) All other terms used in this Section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b) This regulation is applicable in Davis, Salt Lake, Utah, and Weber Counties, which constitute the urban portion of the Wasatch Front Intrastate Air Quality Control Region.

(c) The State of Utah shall establish an inspection and maintenance program applicable to all light-duty vehicles which operate on streets or highways over which it has ownership or control. No later than March 1, 1974, the State shall submit legally adopted regulations to the Environmental Protection Agency establishing such a program. The regulations shall include:

(1) Provisions for inspection of all motor vehicles at periodic intervals no more than 6 months apart by means of an idle test.

(2) Provisions for inspection failure criteria consistent with the emission reductions claimed in the plan for the failure of 50 percent of the vehicles in strategy. These criteria shall include the first inspection cycle.

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. These shall include sanctions against individual owners and repair facilities, retest of failed vehicles following maintenance, a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts and knowledge to perform the tasks satisfactorily, and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Provisions for beginning of the first inspection cycle by June 1, 1975, and completing it by December 31, 1975.

(6) Designation of an agency or agencies responsible for conducting, overseeing, and enforcing the inspection and maintenance program.

(d) After December 31, 1975, the State shall not register or allow to operate on its streets or highways any light- or heavy-duty vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section. This shall not apply to the initial registration of a new motor vehicle.

(e) After December 31, 1975, no owner of a light-duty vehicle shall operate or allow the operation of such vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c).

(f) The State of Utah shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce an inspection and maintenance program pursuant to paragraph (c) of this section, including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) The date by which the State will recommend needed legislation to the State legislature.

(3) The date by which necessary equipment will be ordered.

(4) A signed statement from the Governor or his designee identifying the sources and amounts of funds for the program. If funds cannot legally be obligated under existing statutory authority, the text of needed legislation will be submitted.

(g) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. With regard to compliance schedules, the State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.2338 Air bleed to intake manifold retrofit.

(a) Definitions:

(1) The term "air bleed to intake manifold retrofit" as used in this section means a device in the intake system of the vehicle which enables the air/fuel ratio to be increased by metering additional air to the intake manifold in accordance with intake manifold vacuum advance to reduce emissions of hydrocarbons and carbon monoxide to the atmosphere.

(2) All other terms used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b) This section is applicable in Davis, Salt Lake, Utah, and Weber Counties, which constitute the urban portion of the Wasatch Front Intrastate Air Quality Control Region.

(c) The State of Utah shall establish a retrofit program to ensure that on or before June 30, 1976, all gasoline-powered light-duty vehicles of model years

V 38 135 JUL 16 73 XUM

prior to 1968, subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate air bleed to intake manifold device. No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of paragraph (c)(3) of this section are enforced.

(3) Provisions for beginning the installation of the air bleed devices by July 1, 1975, with installation of the devices on all vehicles subject to this section no later than June 30, 1976.

(4) Procedures for ensuring that those installing the retrofit devices have the training and ability to perform the needed tasks satisfactorily and will have an adequate supply of retrofit components.

(d) After July 1, 1976, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After July 1, 1976, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards and procedures implementing this section.

(f) The State of Utah shall submit no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, including the text of statutory proposals and regulations which the State proposes for adoption. The compliance schedules shall also include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1974.

(g) Failure to comply with any provision of this section shall render each person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.2339 Regulation for high-altitude efficiency modification.

(a) Definitions:

(1) "High-altitude efficiency modification" means the provision of increased air flow, restricted fuel flow, or other modification having the effect of compensating for the adverse effects on combustion efficiency of decreased air density at high altitudes.

(2) All other terms used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b) This section is applicable in Davis, Salt Lake, Utah, and Weber Counties, which constitute the urban portion of the Wasatch Front Intrastate Air Quality Control Region.

(c) The State of Utah shall establish a program to ensure that on or before July 1, 1976, all gasoline-fueled light-duty vehicles of model years 1968 to 1974, subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate high-altitude efficiency modification. No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on vehicles subject to this section.

(2) Designation of an agency for ensuring that the provisions of paragraph (c)(3) of this section are enforced.

(3) Provisions for beginning the installation of the modifications by July 1, 1975, and installation of the modifications on all vehicles subject to this section no later than June 30, 1976.

(4) Procedures for ensuring that those making modifications have the training and ability to perform the needed tasks satisfactorily and will have an adequate supply of components.

(d) After July 1, 1976, the State shall not register or allow to operate on its streets or highways any light-duty vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After July 1, 1976, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards implementing this section.

(f) The State of Utah shall submit no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a modification program pursuant to paragraph (c) of this section, including the text of needed statutory proposals and regulations which the State proposes for adoption. The compliance schedule shall also include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1974.

(g) Failure to comply with any provision of this section shall render each person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to timely submit the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.2340 Bus/carpool lanes.

(a) Definitions:

(1) "Carpool" means a vehicle containing three or more persons.

(2) "Bus/carpool lane" means a lane on a street or highway open only to buses or buses and carpools, whether constructed specially for that purpose or converted from existing lanes.

(3) "Major street or highway" means any street or highway which meets the criteria given in paragraphs (b)(4)(ii) and (iii) of this section.

(b) This regulation is applicable in Davis, Salt Lake, Utah, and Weber Counties, which constitute the urban portion of the Wasatch Front Intrastate Air Quality Control Region (hereafter referred to as the Region).

(1) Each incorporated city within Davis, Salt Lake, Utah, and Weber Counties shall establish bus/carpool lanes on the major streets and highways (as defined herein) over which it has ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(2) Davis, Salt Lake, Utah, and Weber Counties shall establish within the Region over which they have ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(3) The State of Utah shall establish bus/carpool lanes on the major streets and highways (as defined herein) within Davis, Salt Lake, Utah, and Weber Counties over which it has ownership or control, according to the schedule in paragraph (d)(4)(v) of this section.

(4) Each of the governmental entities named in the previous three subparagraphs shall submit no later than October 1, 1973, a detailed compliance schedule showing the steps which it will take to establish these bus/carpool lanes and to enforce the limitations on their use, with each schedule to include the following:

(i) Each street and highway which will have bus/carpool lanes must be identified with a schedule for the establishment of the lanes.

(ii) If a street or highway has four or more traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) at all times. If only one lane is open to buses (or buses and carpools) at all times, a second lane must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iii) If a street or highway has three traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iv) In unusual situations, a street or highway, or lane or segment thereof, may be exempt from these requirements if an approval of the exemption is obtained from the Administrator. The application for exemption shall not be submitted and will not be accepted after September 1, 1973. Special circumstances justifying the need for an exemption or modification (such as inappropriateness of use by buses, designation of bicycle lanes instead, or desire to allow bus/carpool lanes to be entered briefly by other vehicles for the purpose of crossing a lane or making a right turn) must be given in detail with the application.

(v) Bus/carpool lanes must be prominently indicated by overhead signs at least once every mile, and at each intersection or entry ramp. Of the lane mileage for each of the governmental entities, 25 percent must be established and needed signs must be installed by March 1, 1974; 50 percent by June 1, 1974; 75 percent by September 1, 1974; and 100 percent by December 1, 1974.

(vi) Bus/carpool lanes must be prominently indicated by distinctive painted lines, pylons, or physical barriers.

(vii) A signed statement by the chief executive officer of each governmental entity or his designee will identify the sources and amounts of funds for all projects.

(5) Buses shall have the right of way whenever changing lanes on streets and highways with bus lanes. This shall take effect as each lane is established and identified.

(6) Buses shall be permitted to make left turns whether or not the intersection is posted for "No Left Turn" (except when a one-way street would be entered from the wrong direction). This shall take effect January 1, 1974.

(7) None of the governmental entities named in paragraph (b) of this section shall convert existing on-street parking spaces to use as motor vehicle traffic lanes unless the effect will be to increase the number of bus/carpool lanes on the affected street beyond the number otherwise required by paragraph (b) of this section, or unless the effect will be to create a bicycle lane in place of the parking spaces.

(c) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.2341 Management of parking supply.

(a) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as such facility.

(2) "Modification" means any change to a parking facility which increases the motor vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the motor vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot, or portion thereof, used primarily for temporary storage of motor vehicles.

(b) This regulation is applicable in Davis, Salt Lake, Weber, and Utah Counties, which constitute the urban portion of the Wasatch Front Intrastate Air Quality Control Region.

(c) No person, after August 15, 1973 shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator, or from an agency approved by the Administrator, a permit stating that construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include but not be limited to a requirement that before a permit may be issued the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and facilities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include but not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of VMT within any area the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of 40 CFR 51.4(b); and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

§ 52.2342 Regulations for limitation of on-street parking in Salt Lake City.

(a) Definitions:

(1) The term "on-street parking" means stopping and leaving a vehicle on a street or sidewalk whether a person is in the vehicle or not.

(2) The "Salt Lake City core area" means the area bounded by and including the following streets: South Temple, 2nd East, 500 South, and West Temple.

(b) On-street parking limitations:

(1) Beginning January 1, 1974, the City of Salt Lake shall prohibit on-street parking on the streets or highways within the Salt Lake City core area over which it has ownership or control during the hours of 6:00 to 10:00 a.m. and 4:00 to 6:00 p.m. on any day other than Saturdays, Sundays, and legal holidays. The prohibition shall state that vehicles parked in violation of the prohibition shall either be towed away, or the owner shall be subject to a fine of up to $100, or both.

(2) Beginning January 1, 1974, the County of Salt Lake shall prohibit on-street parking on the streets or highways within the Salt Lake City core area over which it has ownership or control during the hours of 6:00 to 10:00 a.m. and 4:00 to 6:00 p.m. on any day other than Saturdays, Sundays, or legal holidays. The prohibition shall state that vehicles parked in violation of the prohibition shall either be towed away, or the owner shall be subject to a fine of up to $100, or both.

(3) Beginning January 1, 1974, the State of Utah shall prohibit on-street parking on the streets or highways within the Salt Lake City core area over which it has ownership or control during the hours of 6:00 to 10:00 a.m. and 4:00 to 6:00 p.m. on any day other than Saturdays, Sundays, or legal holidays. The prohibition shall state that vehicles parked in violation of the prohibition shall either be towed away, or the owner shall be subject to a fine of up to $100, or both.

(c) Each governmental entity shall by October 1, 1973, submit to the Administrator for his approval a detailed statement of the steps to be taken to post notices and otherwise effect the requirements of paragraph (b), and a schedule for their implementation that provides for full effectiveness no later than January 1, 1974.

(d) Failure to comply with any provision of this section shall render each person or governmental entity so failing to comply in violation of a requirement of

V 38 I 135 J UL 16 73 XUM

an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.2343 Regulation of on-street parking in Provo.

(a) Definitions:

(1) The term "on-street parking" means stopping and leaving a vehicle on a street or sidewalk whether a person is in the vehicle or not.

(2) The "Provo core area" means the area bounded by and including the following streets: 300 North, 100 East, 400 South, and 600 West.

(b) Beginning January 1, 1974, the City of Provo shall prohibit the parking of any motor vehicle on Center Street, Provo, between 500 West Street and 100 East Street, unless such vehicle is parked parallel with the roadway in such a manner that it projects no further than 9 feet from the edge of the roadway.

(c) The City of Provo by October 1, 1973, shall submit to the Administrator for his approval a detailed statement of the steps to be taken to post notices, delineate traffic lanes, and otherwise effect the requirements of paragraph (b) of this section, and a schedule for their implementation that provides for their full effectiveness no later than January 1, 1974.

(d) Failure to comply with any provision of this section shall render each person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.2344 Gasoline limitations.

(a) Definitions:

(1) The term "base year" means the consecutive 12-month period commencing on July 1, 1972, and ending June 30, 1973.

(2) The term "distributor" means any corporation, partnership, or sole proprietorship which transports or stores or causes the transportation or storage of gasoline between any refinery and any retail outlet.

(3) The term "retail outlet" means any establishment at which gasoline is sold or offered for sale to the public, or introduced into any vehicle.

(b) This section is applicable within Davis, Salt Lake, Utah and Weber Counties, which constitute the urban portion of the Wasatch Front Intrastate Air Quality Control Region (hereafter referred to as the Region), to all distributors of gasoline to any retail outlet in this area and to the owners or operators of all retail outlets in this area.

(c) Beginning July 1, 1974, the State of Utah shall implement regulations limiting the total gallonage delivered to retail outlets in the Region to the amount delivered to such outlets during the base year.

(d) In order for the State to determine the amount of gasoline delivered during the base year and years during which control is in effect, all distributors to which this section applies shall provide the State with a detailed accounting of the amount of gasoline delivered to each retail outlet in the Region during the base year and years during which control is in effect. For each year during which control is in effect, the owner or operator of each retail outlet to which this section applies shall provide the State with a detailed accounting of gasoline received from each distributor, the total amount of gasoline received from each distributor, the total amount of gasoline sold during the year, and the amount of gasoline on hand at the beginning and end of the year. The State may require any other reports as it may deem necessary for the implementation of this section.

(e) The State of Utah shall submit no later than October 1, 1973, a detailed compliance schedule showing steps it will take to establish and enforce the limitation program specified in paragraphs (c) and (d) of this section, including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) A date by which the State shall adopt procedures to ensure that no more than the amount of gasoline specified in paragraph (c) of this section is delivered to retail outlets in the Region. Such date shall be no later than March 30, 1974.

(3) A date by which any report necessary for establishing such procedures will be furnished to the State by the distributors. Such date shall be no later than January 1, 1974.

(4) Designation of an agency responsible for implementation and monitoring of this program.

(f) Failure to comply with any provisions of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

[FR Doc.73-14269 Filed 7-13-73;8:45 am]

[40 CFR Part 52]

WASHINGTON

Approval and Promulgation of Implementation Plans

Background. The transportation control plan submitted to EPA on April 16, 1973, by the State of Washington for attainment of the primary national ambient air quality standards for carbon monoxide and photochemical oxidants (hydrocarbons) in the Puget Sound Intrastate Air Quality Control Region and for carbon monoxide in the Washington portion of the Eastern Washington-Northern Idaho Interstate Region was approved with certain exceptions on June 15, 1973 (38 FR 16550). This Notice of Proposed Rule Making sets forth regulations that in the Administrator's judgment can be implemented in addition to the approved portions of the Washington transportation control plan to attain national standards in the two regions by May 31, 1975.

If, prior to Federal promulgation, the State of Washington submits transportation control plan revisions which will assure attainment of national standards by May 31, 1975, and which the Administrator determines are acceptable, these proposed Federal regulations will be withdrawn. If revisions to the State plan are submitted and determined to be approvable after promulgation of Federal regulations, then those regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain national standards in both Regions be a State plan carried out by the State or by authorized local governments. To the greatest extent feasible, the Federal regulations proposed are designed to implement transportation control measures that are acceptable to the State and/or that received public support at the State hearings held on April 11 and 12, 1973, or that were contained in the comments submitted to EPA following EPA receipt of the State transportation control plan.

Pollution in the Puget Sound Intrastate Region

The Puget Sound Intrastate Region encompasses the four counties of King, Pierce, Snohomish, and Kitsap. In this Region, an urbanized corridor containing over a million people and including the cities of Everett, Seattle, and Tacoma stretches the length of a north-south basin lying between the Olympic Mountains to the west and the Cascade mountains to the east. The highest valid carbon monoxide concentration measurements taken in the Puget Sound Region were recorded in the Seattle central business district during 1972. The transportation control strategy submitted by Washington, therefore, deals principally with the Seattle portion of the Region. In 1972 the 8-hour national ambient air quality standard for carbon monoxide of 9 parts per million (10 milligrams per cubic meter), not to be exceeded more than once per year, was exceeded on 107 days. The maximum 8-hour concentration recorded in Seattle in 1972 was 22 parts per million. The highest 1-hour concentration of carbon monoxide was 38 parts per million, compared to a 1-hour national ambient air quality standard of 35 parts per million. The State forecasts that by 1975 the emission reductions resulting from implementation of Federal emission standards for new cars will be sufficient to prevent the 1-hour carbon monoxide standard from being exceeded and will reduce to approximately 37 the number of days the 8-hour standard will be exceeded. In December 1972, EPA began monitoring carbon monoxide concentrations at two locations in the Seattle central business district to acquire data for use in validating a carbon monoxide dispersion model. Based on the measurements recorded thus far, concentrations higher than those recorded by the State do occur. The ambient carbon monoxide data collected by EPA are now being evaluated; the results will be forwarded to the State upon completion of the evaluation.

The 1-hour national ambient air quality standard for photochemical oxidants of 0.08 part per million (160 micrograms per cubic meter), not to be exceeded more than once per year, was exceeded seven times during 2 days in 1972. The maximum 1-hour oxidant concentration measured was 0.14 part per million. The State indicates, but has not adequately demonstrated, that by 1975 no reductions in hydrocarbon emissions beyond those resulting from implementation of the Federal emission standards for new motor vehicles will be necessary to meet national ambient air quality standards for photochemical oxidants.

Pollution in the Eastern Washington-Northern Idaho Interstate Region

The Washington portion of the Eastern Washington-Northern Idaho Interstate Region encompasses the counties of Spokane, Lincoln, Grant, Adams, Whitman, Columbia, Garfield, and Asotin. The City of Spokane is the major urbanized area in the Region and the only location where a carbon monoxide problem has been identified. In terms of meteorological factors influencing air pollution levels, the Spokane area is protected from Pacific storms by the Cascade Mountains to the west and from Canadian storms by the Rocky Mountains to the east. The topographical features and dry climate of the area favor the formation of stable, stagnant air masses and the accumulation of air pollutants.

The highest 8-hour carbon monoxide concentration measured in Spokane was 22 parts per million, recorded during 1972. That year the 8-hour national ambient air quality standard for carbon monoxide was exceeded on 59 days. The highest 1-hour carbon monoxide concentration recorded was 40 parts per million. Based on information submitted by the State, the reduction in carbon monoxide emissions resulting from implementation of Federal emission standards for new cars will be sufficient to prevent the 1-hour carbon monoxide standard from being exceeded and will reduce to approximately 25 the number of days the 8-hour standard is exceeded.

Summary of State Plans

The measures adopted by the State for implementation in the Seattle portion of the Puget Sound Intrastate Region and in the Spokane portion of the Eastern Washington-Northern Idaho Interstate Region and submitted to EPA on April 16 include (1) annual inspection to determine emissions from and maintenance required for gasoline-powered light-duty vehicles; (2) exclusion of gasoline-powered heavy-duty vehicles from the central business districts through regulation of the hours for loading and unloading; (3) traffic-signal optimization programs to improve vehicle low; and (4) intermittent exclusion of gasoline-powered light- and heavy-duty vehicles from the central business districts as an alternative measure if the State is unsuccessful in obtaining the legal authority and funding to implement its inspection/maintenance program. Two additional measures, an "accelerated" transit plan that will include satellite parking facilities, and second-level sidewalks that will improve vehicle flow through reduction of pedestrian-vehicle conflicts, are included in the strategy for the Spokane portion of the Eastern Washington-Northern Idaho Region.

State Emission Density Calculations

In developing the transportation control strategies it submitted, the State used a proportional mathematical model to establish the maximum emission densities allowable if the 8-hour national ambient air quality standard for carbon monoxide is to be attained and maintained in the Puget Sound Intrastate and the Eastern Washington-Northern Idaho Interstate Regions. The reductions in motor vehicle carbon monoxide emissions necessary to attain the ambient carbon monoxide standard by 1975 were determined by forecasting the emission densities for that year and subtracting the allowable emission densities established by means of the proportional model. Estimates of 1975 emissions were calculated on a square mile basis for areas with high traffic densities in both Regions. Based on these calculations the State determined that the only locations where the 8-hour ambient carbon monoxide standard will be exceeded are the central business districts of Seattle and Spokane. An estimated 41 percent reduction in motor vehicle carbon monoxide emissions, in addition to the reductions achieved by implementation of the Federal emission standards for new motor vehicles, is required to attain the 8-hour national ambient air quality standard in Seattle by 1975. A 36 percent reduction in carbon monoxide emissions is required in Spokane to attain the standard.

Tabular Summary—Control Strategy Effects

The following tables summarize the effect of each of the control measures included in the strategies adopted by the State of Washington on the overall emission reductions necessary in the Puget Sound Intrastate and Eastern Washington-Northern Idaho Interstate Regions. The State estimates that the 8-hour standard for carbon monoxide can be met in the central business district of Seattle by reducing the emission density per 8-hour period to 5786 kilograms per square mile. The emission density forecast for 1975 is 9823 kilograms per square mile. The 1975 estimate takes into account the reduction in emissions from the Federal standards for new motor vehicles and assumes implementation of the transit plan adopted by the Municipality of Metropolitan Seattle.

The emission density that the State estimates will enable the attainment of the 8-hour carbon monoxide standard in Spokane is 3729 kilograms per square mile. The estimated 1975 emission density, again taking into account the reduction in emissions resulting from the Federal standards for new motor vehicles, is 5845 kilograms per square mile.

The emission reductions needed in the Seattle and Spokane central business districts can be achieved by combining either the inspection and maintenance of light-duty vehicles (alternative 1), or the intermittent exclusion of light- and heavy-duty vehicles (alternative 2) with the other emission reduction measures included in the strategy for each area. The State indicates that the intermittent exclusion procedures can be varied so that this measure alone will achieve the emission reductions required to meet the national standards for carbon monoxide.

Compilation of Control Strategy Effects of State Plans on May 31, 1975

Seattle central business district

Transportation control measure	Carbon monoxide reductions			
	Alternative 1		Alternative 2	
	kg/mi²-8 hr	%	kg/mi²-8 hr	%

Maximum emissions allowable to attain standard	3729	------	3729	------

V 38-135 JUL 16 73 XUM

Control Measures Required in Tacoma

In preparing the transportation control strategy for the Puget Sound Intrastate Region, the State did not evaluate, subsequent to the rescinding of the 2-year extension by EPA, the need for additional measures to meet standards for carbon monoxide in Tacoma by 1975. The implementation plan submitted by the State in January 1972 indicated that in the central business district of Tacoma an additional 24 percent reduction in carbon monoxide emissions, beyond the reductions achieved by implementation of the Federal emission standards for new motor vehicles, is needed to attain the national ambient air quality standards for carbon monoxide by 1975. The measured concentrations upon which the need for the additional 24 percent reduction is based may be influenced by stationary sources of carbon monoxide and may not be entirely the result of motor vehicle emissions. EPA has requested the State to better define the nature of the carbon monoxide problem in Tacoma, to submit an assessment of the problem to EPA, and to submit a timetable for developing additional motor vehicle emission reduction measures if they are required.

Deficiencies in State Plans

Although the types of transportation control measures adopted by the State of Washington to attain national standards are generally acceptable to the Administrator, the manner of implementation proposed for some of the measures appears questionable. Consequently, the implementation and enforcement procedures for the intermittent exclusion of light- and heavy-duty vehicles must be explicit in any resubmission to obviate promulgation of EPA proposals. Proposed surveillance procedures to determine and monitor the effectiveness of all the adopted measures must be provided by the State.

The percentage reductions in carbon monoxide emissions claimed for the traffic-signal optimization programs appear optimistic and attainable only if the forecasted improvements in traffic flow can be achieved and maintained. There is no demonstration by the State that the traffic-signal optimization programs will not eventually result in increased traffic volumes sufficient to increase carbon monoxide emissions. The Seattle Engineering Department indicates that such programs are experimental and that the reductions in vehicle stops and starts gained through implementation of the programs may be short-lived. The State did not propose any surveillance procedures to monitor the efficacy of the traffic-signal optimization programs in improving traffic flow and reducing motor vehicle carbon monoxide emissions.

The hours proposed (10 a.m. to 6 p.m.) for excluding heavy-duty vehicles from the central business districts of Seattle and Spokane do not include the period of morning peak traffic. Emissions from heavy-duty vehicles could account for a significant portion of the pollutants emitted during the period of morning peak traffic (particularly if increased heavy-duty vehicle traffic occurs during the morning peak). Loading and unloading vehicles during the period of morning peak traffic could also hinder traffic flow and increase emissions from through traffic. The regulations and administrative policies implementing this strategy must be submitted by the State to EPA no later than December 30, 1973.

There are many uncertainties associated with the intermittent exclusion of gasoline-powered motor vehicles from the central business district. As with all intermittent control systems, the exclusion measure will, if implemented, provide significant improvement in air quality, but will not provide positive assurance that the national ambient air quality standards for carbon monoxide will be attained and maintained. A prediction accuracy of 80 to 90 percent in forecasting days when ambient standards may be exceeded could still result in four to seven violations of the 8-hour standard for carbon monoxide in Seattle and four to five violations of the standard in Spokane. The ability of the State to develop a model for predicting the days when a potential for exceeding ambient standards exists is obviously the element critical to the successful implementation of the intermittent exclusion measure.

The type of inspection system the State intends to implement is not indicated in sufficient detail, nor is the geographical area identified to which the requirement for inspection will apply. A schedule detailing specific milestones, such as securing necessary funding, acquiring land and equipment, and constructing facilities, is not included in the State's submittal. It appears unlikely that the inspection system can be implemented by the State by May 31, 1975.

Proposed Federal Regulations

Because of the lack of specificity of the administrative and enforcement procedures for implementing the State program for emission inspection and maintenance of light-duty vehicles, the uncertainty concerning the emission reductions that will result from traffic flow improvements and the potential difficulties in developing a forecast capability sufficiently accurate to make intermittent exclusion of vehicles a viable control measure, Federal regulations are proposed to implement the following transportation control measures:

1. An inspection and maintenance program, using an idle emission test, for light-duty vehicles. No retrofitting is proposed as part of this measure.

2. A parking management program that will (a) immediately stabilize the amount of parking available in the portions of the Regions where there is not sufficient assurance that national standards will be attained by May 31, 1975; (b) prevent increases in parking elsewhere within the Region where such a parking increase might result in an increase in motor vehicle emission sufficient to cause national standards to be exceeded.

3. Selective exclusion of vehicles from portions of the Puget Sound Intrastate and the Eastern Washington-Northern Idaho Interstate Regions where there is not sufficient assurance that national standards will be attained by May 31, 1975, through implementation of the measures contained in the State transportation control plan.

These Federally proposed measures are intended to strengthen and supplement, not wholly replace, State-adopted transportation control measures.

A more stringent selective vehicle-use exclusion program could be implemented that would, by itself, achieve the needed reductions in motor vehicle emissions. The more stringent program would necessitate those entering the central business districts of Seattle and Spokane to find alternative means of transportation, other than their own automobiles, approximately once every week rather than once every two weeks as would be necessary under the currently proposed program.

Other measures are available to EPA and to the State that will, if implemented, assist in achieving a reduction in motor vehicle emissions equivalent to that resulting from the three proposed measures. In the State of California, for example, EPA is proposing regulations that will require the establishment of a system of traffic lanes for the exclusive use of buses and car pools. The proposed regulations require that, for streets having four or more traffic lanes in one direction, at least one lane must be designated for use only by buses or by buses and car pools with an additional lane during rush hours. In the case of a street or highway with only three lanes in one direction, at least one of the lanes must be open only to buses or buses and car pools from 6:30 to 9:30 a.m. and from 3:30 to 6:30 p.m.

If Federal promulgation of any of the regulations is necessary, the selection of the measures to be implemented will be based to the greatest extent possible on testimony presented at the public hearing held prior to Federal promulgation. The first two Federally proposed measures, the inspection and maintenance program and the parking management program, did receive support in testimony presented at the public hearings held by the State. Although the third measure, a selective vehicle use exclusion program, was not discussed at the public hearings, it is a measure that should strengthen other State-adopted measures, such as traffic flow improvement and transit patronage increases, that did receive public support.

The inspection and maintenance program proposed by the State was disapproved because administrative and enforcement procedures were not specified in the plan, nor was a schedule of dates submitted by which significant steps in the inspection program will be implemented. The Administrator is continuing to assess the earliest practicable date on which the inspection and maintenance program can be fully implemented. He may revise this date based on results of this assessment. Under the Federally proposed inspection program, emission limits for light-duty vehicles with no emission control systems will not be set at a level which would necessitate retrofitting.

Because the State may not be able to develop the forecasting capability necessary to successfully implement the intermittent exclusion measure, and because of the uncertainty of the emission reductions resulting from the State-adopted programs for traffic-signal optimization, exclusion of heavy-duty vehicles, improvement of public transit, and construction of second-level sidewalks, Federal regulations are also proposed for the establishment and implementation of a parking management program and a selective vehicle-use exclusion program.

The proposed parking management programs are intended to stabilize immediately the supply of parking in areas where transportation control measures are necessary for attainment of national standards. In addition to helping assure the success of the State-adopted programs for traffic flow improvement and increased transit patronage, management of the parking supply should also encourage car pooling.

The selective vehicle-use exclusion program will provide for metering the amount of traffic entering those areas of Seattle and Spokane where air quality standards are presently not being met. To implement the program, portions of the Puget Sound and Eastern Washington-Northern Idaho Regions where national standards are presently being exceeded will be designated as "vehicle-limited zones." The areas now proposed for such designation are the central business districts of Seattle and Spokane. The exact boundaries of these areas are identified in the proposed regulations.

Traffic entering the vehicle-limited zones will be metered to limit the vehicle miles of travel within the zone so that the resultant motor vehicle emissions will not cause national standards to be exceeded. To meter the amount of traffic entering a zone, the State will be required to issue an "access certificate" to each vehicle registered within certain counties of the affected Regions. The certificate will be affixed in a prominent place on the vehicle. On specified days of the week, vehicles displaying designated certificates will be prohibited from operating or parking in vehicle-limited zones between 7 a.m. and 5 p.m. The number of categories of access certificates to be prohibited each weekday will be determined by the State no later than the time of submittal to EPA of the November 1974 semiannual report of progress on implementation of the State plan for achieving national standards. This determination will be based upon the effectiveness of other State and/or Federal motor vehicle emission reduction programs.

Two alternative transportation control strategies that could be implemented in Seattle and Spokane, should the State be unable to implement an intermittent exclusion program, are presented in the following tables.

Compilation of State/Federal Transportation Control Strategy Effects on May 31, 1975

Seattle Central Business District

Transportation control measures	Carbon monoxide reductions: EPA Proposal kg/mi[1] −8 hr	%	EPA Alternative kg/mi[1] −8 hr	%
Traffic-signal optimization [1]	−518	5.3	−518	5.3
Exclusion of heavy-duty vehicles [1]	−1331	13.6	−1331	13.6
Inspection and maintenance of light-duty vehicles (no retrofit) [1]	−982	10.0		
Selective vehicle-use exclusion [2]	−1206	12.2	−2188	22.2
Parking management [2]				
Total	−4037	41.1	−4037	41.1
Motor vehicle emissions forecast in 1975	9823		9823	
Motor vehicle emissions remaining	5786		5786	
Maximum emissions allowable to attain standard	5786		5786	

[1] State-adopted transportation control measure.
[2] EPA-proposed transportation control measure.

Compilation of State/Federal Transportation Control Strategy Effects on May 31, 1975

Spokane Central Business District

Transportation control measures	Carbon monoxide reductions: EPA Proposal kg/mi[1] 8 hr	%	EPA Alternative kg/mi[1] 8 hr	%
Traffic-signal optimization [1]	−170	2.9	−170	2.9
Exclusion of heavy-duty vehicles [1]	−476	8.1	−476	8.1
Accelerated transit plan [1]	−58	1.0	−58	1.0
Second-level sidewalks [1]	−18	0.3	−18	0.3
Inspection and maintenance of light-duty vehicles (no retrofit) [1]	−585	10.0		
Selective vehicle-use exclusion [2]	−809	13.9	−1394	23.9
Parking management [2]				
Total	2116	36.2	2116	36.2
Motor vehicle emissions forecast in 1975	5845		5845	
Motor vehicle emissions remaining	3729		3729	
Maximum emissions allowable to attain standard	3729		3729	

[1] State-adopted transportation control measure.
[2] EPA-proposed transportation control measure.

The alternative strategies shown assume that the State's estimates of the emission reductions resulting from the traffic-signal optimization and heavy-duty vehicle exclusion programs are achievable. Alternative 1, the current Federal proposal, indicates the additonal carbon monoxide emission reductions that will be achieved through the implementation of the selective vehicle-use exclusion and parking management programs together with State-adopted measures. No reduction in motor vehicle emissions is attributed to the parknig management program. The parking management program is proposed to assure the efficacy of other control measures and to assist in the maintenance of national standards. Alternative 2 indicates the emission reductions that will result if only the selective vehicle-use program is used to supplement the State-adopted measures.

Social and Economic Impacts of Proposed Federal Transportation Control Measures

A quantitative assessment of the economic and social impacts of the proposed Federal transportation control measures on the two Regions in the State of Washington has not been possible due to the short time available for development of the measures and the innate complexities of the issues involved. However, an attempt has been made to identify some of the more important impacts that will result if the proposed Federal measures are promulgated and implemented.

First, if the proposed inspection/maintenance program is implemented, vehicle owners will probably have to assume directly some of the costs of vehicle inspection and all of the costs of any vehicle maintenance required to meet the inspection emission standards. If a failure rate of 50 percent is set for the inspection/maintenance program, the annual cost for each vehicle inspected is estimated to average $15.

Second, reductions in the accessibility of the Seattle and Spokane central business districts could result if automobile use is restricted through either selective vehicle exclusion or parking management and no adequate alternative mode of transportation is provided. If the central business districts become less convenient to workers and shoppers, the economies of these districts may be adversely affected. Property values could fall and private profits and government revenues could decline. The extent of adverse economic effects and the degree to which these effects can be ameliorated through providing alternatives to travel by automobile are difficult to estimate. However, economic losses in the central business districts may be offset by gains elsewhere within the Regions.

EPA Efforts To Mitigate the Effects of Proposed Regulations

The proposed Federal regulations, together with the State-adopted measures, will eliminate the danger to human health and welfare that exists in the Puget Sound Intrastate Region and the Washington portion of the Eastern Washington-Northern Idaho Interstate Region as a result of air pollution from motor vehicles. The regulations may, however, have adverse economic and social impacts. The Administrator will make every effort to mitigate the adverse effects of his final promulgation. He will be in contact with the Department of Transportation and other departments as necessary. The Administrator will request that these departments give special attention to the need for funding of programs necessary to offset any adverse effects resulting from the implementation of transportation control measures.

Public Comments Solicited

The Administrator intends that any Federal regulations which must be promulgated be as responsive as possible to the needs of the Puget Sound Intrastate and Eastern Washington-Northern Idaho Interstate Regions; he therefore desires to obtain the comments and sug-

V 38-135 JUL 16 73 XUM

gestions of the public on the proposed regulations and on any other measures that may be taken by Federal, State, or local governments to strengthen, supplement, or replace the proposed measures.

Public hearings will be held on this and any alternative proposals in Seattle at the Orcas Room, Coliseum Northwest, Seattle Center, at 7:30 p.m., on July 31, 1973, and in Spokane at the Rennaissance Room, Gonzaga University, at 7:30 p.m. on July 30, 1973.

In any promulgation of regulations necessary, the Administrator will consider all comments and testimony he receives, as well as any additional strategies submitted by the State.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Administrator, EPA, Region X, 1200 Sixth Avenue, Seattle, Washington 98101, Attention: A. J. Frankel. All relevant comments received within 30 days of this date will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the EPA Region X library. The changes proposed by this notice, with appropriate modifications, will be effective as noted. This notice of proposed rule making is issued under the authority of sections 110(c) and 301(a) of the Clean Air Act.

(42 U.S.C. 1857c et seq.)

Dated July 6, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart WW—Washington

1. Subpart WW is amended by adding §§ 52.2485, 52.2486, and 52.2487 as follows:

§ 52.2485 Inspection and maintenance program.

(a) Definitions.

(1) "Inspection and maintenance program" means a program for reducing emissions from in-use gasoline-powered vehicles through identifying vehicles which need emission-control-related maintenance and requiring that maintenance be performed.

(2) All other terms used in this section which are defined in Part 51, Appendix N, of this chapter are used herein with the meanings so defined.

(b) This regulation is applicable in all the counties which constitute the Puget Sound Intrastate Air Quality Control Region and in the counties of Spokane, Lincoln, Adams, and Whitman in the Eastern Washington-Northern Idaho Interstate Air Quality Control Region (hereafter referred to as the Regions).

(c) The State of Washington shall establish an inspection and maintenance program applicable to all light-duty gasoline-powered vehicles which operate on public streets or highways within the applicable counties. No later than March 1, 1974, the State shall obtain necessary authority and shall adopt regulations to establish such a program. The regulations shall include:

(1) Provisions for inspection of all gasoline-powered light-duty motor vehicles at periodic intervals no more than 1 year apart by means of an idle-mode emission test.

(2) Provisions for inspection failure criteria consistent with the emission reductions claimed in the plan for the strategy. These criteria shall include failure of 50 percent of the vehicles in the first inspection cycle.

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. These shall include sanctions against individual owners and repair facilities; retest of failed vehicles following maintenance; use of a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts, and knowledge to perform the tasks satisfactorily; and use of such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This enforcement program might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Provisions for beginning the first inspection cycle by January 1, 1975, and completing it by May 31, 1975.

(6) Designation of an agency or agencies responsible for conducting, overseeing, and enforcing the inspection and maintenance program.

(d) After May 31, 1975, the State shall not register or allow to operate on public streets or highways any light-duty gasoline-powered vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section. This shall not apply to the initial registration of a new motor vehicle.

(e) After May 31, 1975, no owner of a light-duty gasoline-powered vehicle shall operate or allow the operation of such vehicle which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(f) The State of Washington shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce an inspection and maintenance program pursuant to paragraph (c) of this section, including:

(1) The text of needed statutory proposals and of regulations which it will propose for adoption.

(2) The date by which the State will recommend needed legislation to the State legislature.

(3) The date by which necessary equipment will be ordered.

(4) A signed statement from the Governor or his designee identifying the sources and amounts of funds for the program. If funds cannot legally be obligated under existing statutory authority, the text of needed legislation shall be submitted.

(g) Failure to comply with any provisions of this paragraph shall render such person or governmental entity failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.2486 Management of parking supply.

(a) Definitions

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means the owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot, or portion thereof, used primarily for temporary storage of motor vehicles.

(b) This regulation is applicable in all counties included in the Puget Sound Intrastate Air Quality Control Region and in the counties of Spokane, Lincoln, Adams, and Whitman in the Washington-Northern Idaho Interstate Air Quality Control Region (hereafter referred to as the Regions).

(c) No person, after the date of this regulation, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating that construction, modification or enlargement of such facility will not interfere with attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include but not be limited to a requirement that before a permit may be issued the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the proposed facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include but not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of vehicle miles of travel within any area the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of § 51.4(b) of this chapter; and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

§ 52.2487 Selective vehicle-use exclusion.

(a) Definitions:

(1) "Selective vehicle-use exclusion program" means a program whereby use of light- and heavy-duty vehicles within a specified area is selectively prohibited in a manner equitable for all vehicle operators.

(2) "Seattle central business district" means an area enclosed by Yesler Way, the I–5 freeway, Eighth Street, Virginia, and the Alaska Way Viaduct. Traffic on I–5 and the Alaska Way Viaduct is not included.

(3) "Spokane central business district" means an area enclosed by Trent, Monroe, Third Street, and Division. Traffic on Division is not included.

(4) "Vehicle-limited zone" means the geographic area to which a selective vehicle-use exclusion program applies.

(b) On or before October 1, 1973, the Governor of the State of Washington shall submit to the Administrator for his approval a compliance schedule containing the text of proposed procedures for designating and issuing up to 10 primary categories of access certificates for vehicles registered, beginning no later than January 1, 1975, in all the counties included within the Puget Sound Intrastate Air Quality Control Region and in the counties of Spokane, Lincoln, Adams, and Whitman in the Eastern Washington-Northern Idaho Interstate Air Quality Control Region and for selectively restricting vehicle use in vehicle-limited zones consisting of the Seattle and Spokane central business districts. The procedures shall include:

(1) Provisions to assure that multiple-vehicle owners or households receive no more than one category of access certificate.

(2) Provisions that additional categories of access certificates may be issued for vehicles the use of which is deemed essential by the State of Washington, including, but not limited to, police and fire vehicles, ambulances, and public transit vehicles.

(3) Prohibitions of vehicles bearing specified certificates from being operated or parked on public streets within designated vehicle-limited zones. These prohibitions shall provide for excluding vehicles bearing one or more types of the primary categories of access certificates from the vehicle-limited zones between 7:00 a.m. and 5:00 p.m. on specific workdays. The number of categories excluded each day shall be specified no later than the semiannual report to be submitted to EPA by the State of Washington in November 1974.

(4) Provisions that certificates of access will be distributed to vehicle owners during the motor vehicle registration period beginning no later than January 1, 1975. However, all such certificates shall be issued by March 31, 1975.

(5) Designation of an agency or agencies which shall be responsible for administration and enforcement of this program.

(6) An explanation of procedures necessary to implement and enforce this program (such as establishing spot-check locations at major intersections and issuing citations to those driving on prohibited days).

(7) Provisions that actual exclusion will begin as expeditiously as practicable; however, this exclusion shall begin no later than May 31, 1975.

(c) No later than March 1, 1974, the State shall submit legally adopted regulations to EPA establishing such a vehicle use exclusion program specified in paragraph (b) of this section.

(d) Beginning no later than January 1, 1975, the State of Washington shall not register any motor vehicle subject to the provision of subparagraph (b) of this section without issuing suitable access certificates to vehicle owners.

(e) Beginning no later than March 31, 1975, no owner or operator of a vehicle subject to the provisions of paragraph (b) of this section shall operate or allow the operation of his vehicle unless an access certificate is prominently affixed to that vehicle.

(f) Failure to comply with any provisions of this paragraph shall render a person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

FEDERAL HEALTH INSURANCE FOR AGED

Conditions of Participation for Home Health Agencies

No. 135—Pt. III——1

V 38 - 135 JUL 16 73 XUM

Title 20—Employees' Benefits

CHAPTER III—SOCIAL SECURITY ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

[Reg. 5, further amended]

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED (1965)

Subpart L—Conditions of Participation; Home Health Agencies

On September 18, 1971, there was published in the FEDERAL REGISTER (36 FR 18696) a notice of proposed rule making which set forth proposed amendments to regulations relating to the conditions of participation for home health agencies.

Interested parties were given the opportunity to submit within 30 days data, views, or arguments with regard to the proposed amendments.

Comments were received from many persons (including representatives of national, State, and local organizations) concerned with home care and with the qualifications and duties of health care personnel rendering services under Medicare. The comments received reflected a variety of concerns. Some advocated retention of the biennial program evaluation requirements. Some urged inclusion in the regulations of qualification requirements for nutritionists, and expansion of home health services to include nutritional services. Some recommended a regulation on pharmaceutical consultation. There were recommendations for and against permitting the physical therapist assistant to provide physical therapy services. There were objections to the hospital-based home health agency's certification being separate from that of the hospital. There were suggestions that some of the regulations be changed for the sake of clarity. All the comments have been carefully considered.

The amendments as announced under the notice of proposed rule making (36 FR 18696) are adopted with the following changes:

(a) All factors and some standards have been omitted for conciseness;

(b) Section 405.1201(a) has been revised to incorporate an amendment to section 1861(o) of the Social Security Act made by Public Law 92–603;

(c) The last sentence of § 405.1201(b) and §§ 405.1201(c) through 405.1208 (which set forth certification procedures common to all providers of services) have been omitted, pending further revision and incorporation into Subpart F (Agreements, Elections, Contracts, Nominations, and Notices);

(d) Definitions applicable to home health agencies have been included in the section now designated as § 405.1202;

(e) Section 405.1209 has been redesignated as § 405.1230;

(f) Sections 405.1222 and 405.1223 have been combined with § 405.1221 under the new title *Organization, services, administration;*

(g) Section 405.1224 has been redesignated as § 405.1222 and retitled *Group of professional personnel;*

(h) Sections 405.1225 and 405.1226 have been redesignated as §§ 405.1223 and 405.1224, respectively;

(i) Sections 405.1227 through 405.1229 have been combined, redesignated as § 405.1225, and retitled *Therapy services;*

(j) Sections 405.1230 through 405. 1233 have been redesignated as §§ 405.1226 through 405.1229, respectively;

(k) Higher requirements which are applicable in certain States have been relocated in the Appendix;

(l) The provisions relating to qualification requirements of health care personnel have been amended to permit qualification through proficiency testing until December 31, 1977, as required by section 241 of Public Law 92–603.

Effective date. These amendments shall be effective July 13, 1973.

(Catalog of Federal Domestic Assistance Program No. 13.800, Health Insurance for the Aged—Hospital Insurance)

Dated: June 14, 1973.

ARTHUR E. HESS,
Acting Commissioner of Social Security.

Approved: July 9, 1973.

CASPAR W. WEINBERGER,
Secretary of Health, Education, and Welfare.

Subpart L of Part 405 of Chapter III of Title 20 of the Code of Federal Regulations is revised to read as follows:

Subpart L—Conditions of Participation; Home Health Agencies

Sec.
405.1201 General.
405.1202 Definitions.
405.1220 Condition of participation: Compliance with Federal, State, and local laws.
405.1221 Condition of participation: Organization, services, administration.
405.1222 Condition of participation: Group of professional personnel.
405.1223 Condition of participation: Acceptance of patients, plan of treatment, medical supervision.
405.1224 Condition of participation: Skilled nursing service.
405.1225 Condition of participation: Therapy services.
405.1226 Condition of participation: Medical social services.
405.1227 Condition of participation: Home health aide services.
405.1228 Condition of participation: Clinical records.
405.1229 Condition of participation: Evaluation.
405.1230 Condition of participation: Qualifying to provide outpatient physical therapy services.
Appendix—Addenda for Several States Incorporating Conditions of Participation Higher Than Those Imposed by the Health Insurance for the Aged Program.

AUTHORITY: Secs. 1102, 1842, 1862, 1870, 1871, 49 Stat. 647, as amended, 79 Stat. 309, 79 Stat. 325, 79 Stat. 331, 81 Stat. 846–847; 42 U.S.C. 1302, 1395 et seq.

Subpart L—Conditions of Participation; Home Health Agencies

§ 405.1201 General.

(a) In order to participate as a home health agency in the health insurance program for the aged, an institution must be a "home health agency" within the meaning of section 1861(o) of the Social Security Act. This section of the law states a number of specific requirements which must be met by participating home health agencies and authorizes the Secretary of Health, Education, and Welfare to prescribe other requirements considered necessary in the interest of health and safety of beneficiaries. Section 1861 (o) of the Act provides:

(o) The term "home health agency" means a public agency or private organization, or a subdivision of such an agency or organization, which—

(1) Is primarily engaged in providing skilled nursing services and other therapeutic services;

(2) Has policies, established by a group of professional personnel (associated with the agency or organization), including one or more physicians and one or more registered professional nurses, to govern the services (referred to in paragraph (1)) which it provides, and provides for supervision of such services by a physician or registered professional nurse;

(3) Maintains clinical records on all patients;

(4) In the case of an agency or organization in any State in which State or applicable local law provides for the licensing of agencies or organizations of this nature, (A) is licensed pursuant to such law, or (B) is approved, by the agency of such State or locality responsible for licensing agencies or organizations of this nature, as meeting the standards established for such licensing;

(5) Has in effect an overall plan and budget that meets the requirements of subsection (z); and

(6) Meets such other conditions of participation as the Secretary may find necessary in the interest of the health and safety of individuals who are furnished services by such agency or organization; except that such term shall not include a private organization which is not a nonprofit organization exempt from Federal income taxation under section 501 of the Internal Revenue Code of 1954 (or a subdivision of such organization) unless it is licensed pursuant to State law and it meets such additional standards and requirements as may be prescribed in regulations; and except that for purposes of Part A such term shall not include any agency or organization which is primarily for the care and treatment of mental diseases.

(b) The requirements included in the statute and the additional health and safety requirements prescribed by the Secretary are set forth in the conditions of participation for home health agencies.

§ 405.1202 Definitions.

As used in this subpart, the following definitions apply:

(a) *Administrator, home health agency.* A person who:

(1) Is a licensed physician; or

(2) Is a registered nurse; or

(3) Has training and experience in health service administration and at least 1 year of supervisory or administrative experience in home health care or related health programs.

(b) *Bylaws or equivalent.* A set of rules adopted by a home health agency for governing the agency's operation.

(c) *Branch office.* A location or site from which a home health agency provides services within a portion of the total geographic area served by the parent agency. The branch office is part of the home health agency and is located sufficiently close to share administration, supervision, and services in a manner that renders it unnecessary for the branch independently to meet the conditions of participation as a home health agency.

(d) *Clinical note.* A dated written notation by a member of the health team of a contact with a patient containing a description of signs and symptoms, treatment and/or drug given, the patient's reaction, and any changes in physical or emotional condition.

(e) *Nonprofit agency.* An agency exempt from Federal income taxation under section 501 of the Internal Revenue Code of 1954.

(f) *Occupational therapist.* A person who:

(1) Is a graduate of an occupational therapy curriculum accredited jointly by the Council on Medical Education of the American Medical Association and the American Occupational Therapy Association; or

(2) Is eligible for the National Registration Examination of the American Occupational Therapy Association; or

(3) Has 2 years of appropriate experience as an occupational therapist, and has achieved a satisfactory grade on a proficiency examination conducted, approved, or sponsored by the U.S. Public Health Service, except that such determinations of proficiency do not apply with respect to persons initially licensed by a State or seeking initial qualification as an occupational therapist after December 31, 1977.

(g) *Occupational therapy assistant.* A person who:

(1) Meets the requirements for certification as an occupational therapy assistant established by the American Occupational Therapy Association; or

(2) Has 2 years of appropriate experience as an occupational therapy assistant, and has achieved a satisfactory grade on a proficiency examination conducted, approved, or sponsored by the U.S. Public Health Service, except that such determinations of proficiency do not apply with respect to persons initially licensed by a State or seeking initial qualification as an occupational therapy assistant after December 31, 1977.

(h) *Parent home health agency.* The agency that develops and maintains administrative controls of subunits and/or branch offices.

(i) *Physical therapist.* A person who is licensed as a physical therapist by the State in which practicing, and

(1) Has graduated from a physical therapy curriculum approved by

(i) The American Physical Therapy Association, or

(ii) The Council on Medical Education and Hospitals of the American Medical Association, or

(iii) The Council on Medical Education of the American Medical Association and the American Physical Therapy Association; or

(2) Prior to January 1, 1966,

(i) Was admitted to membership by the American Physical Therapy Association, or

(ii) Was admitted to registration by the American Registry of Physical Therapists, or

(iii) Has graduated from a physical therapy curriculum in a 4-year college or university approved by a State department of education; or

(3) Has 2 years of appropriate experience as a physical therapist, and has achieved a satisfactory grade on a proficiency examination conducted, approved, or sponsored by the U.S. Public Health Service except that such determinations of proficiency do not apply with respect to persons initially licensed by a State or seeking qualification as a physical therapist after December 31, 1977; or

(4) Was licensed or registered prior to January 1, 1966, and prior to January 1, 1970, had 15 years of full-time experience in the treatment of illness or injury through the practice of physical therapy in which services were rendered under the order and direction of attending and referring physicians; or

(5) If trained outside the United States,

(i) Was graduated since 1928 from a physical therapy curriculum approved in the country in which the curriculum was located and in which there is a member organization of the World Confederation for Physical Therapy.

(ii) Meets the requirements for membership in a member organization of the World Confederation for Physical Therapy,

(iii) Has 1 year of experience under the supervision of an active member of the American Physical Therapy Association, and

(iv) Has successfully completed a qualifying examination as prescribed by the American Physical Therapy Association.

(j) *Physical therapist assistant.* A person who is licensed as a physical therapist assistant, if applicable, by the State in which practicing, and

(1) Has graduated from a 2-year college-level program approved by the American Physical Therapy Association; or

(2) Has 2 years of appropriate experience as a physical therapist assistant, and has achieved a satisfactory grade on a proficiency examination conducted, approved, or sponsored by the U.S. Public Health Service, except that such determinations of proficiency do not apply with respect to persons initially licensed by a State or seeking initial qualification as a physical therapist assistant after December 31, 1977.

(k) *Physician.* A doctor of medicine or osteopathy legally authorized to practice medicine and surgery by the State in which such function or action is performed.

(l) *Practical (vocational) nurse.* A person who is licensed as a practical (vocational) nurse by the State in which practicing.

(m) *Primary home health agency.* The agency that is responsible for the service rendered to patients and for implementation of the plan of treatment.

(n) *Progress note.* A dated, written notation by a member of the health team summarizing facts about care and the patient's response during a given period of time.

(o) *Proprietary agency.* A private profit-making agency licensed by the State.

(p) *Public agency.* An agency operated by a State or local government.

(q) *Public health nurse.* A registered nurse who has completed a baccalaureate degree program approved by the National League for Nursing for public health nursing preparation or post-registered nurse study which includes content approved by the National League for Nursing for public health nursing preparation.

(r) *Registered nurse.* A graduate of an approved school of professional nursing, who is licensed as a registered nurse by the State in which practicing.

(s) *Social work assistant.* A person who:

(1) Has a baccalaureate degree in social work, psychology, sociology, or other field related to social work, and has had at least 1 year of social work experience in a health care setting; or

(2) Has 2 years of appropriate experience as a social work assistant, and has achieved a satisfactory grade on a proficiency examination conducted, approved, or sponsored by the U.S. Public Health Service, except that such determinations of proficiency do not apply with respect to persons initially licensed by a State or seeking initial qualification as a social work assistant after December 31, 1977.

(t) *Social worker.* A person who has a master's degree from a school of social work accredited by the Council on Social Work Education, and has 1 year of social work experience in a health care setting.

(u) *Speech pathologist or audiologist.* A person who:

(1) Meets the education and experience requirements for a Certificate of Clinical Competence in the appropriate area (speech pathology or audiology) granted by the American Speech and Hearing Association; or

(2) Meets the educational requirements for certification and is in the process of accumulating the supervised experience required for certification.

(v) *Subdivision.* A component of a multi-function health agency, such as the home care department of a hospital

V 38 I 135 JUL 16 73 XUM

or the nursing division of a health department, which independently meets the conditions of participation for home health agencies. A subdivision which has subunits and/or branches is regarded as a parent agency.

(w) *Subunit.* A semi-autonomous organization, which serves patients in a geographic area different from that of the parent agency. The subunit by virtue of the distance between it and the parent agency is judged incapable of sharing administration, supervision, and services on a daily basis with the parent agency and must, therefore, independently meet the conditions of participation for home health agencies.

(x) *Summary report.* A compilation of the pertinent factors from the clinical notes and progress notes regarding a patient, which is submitted as a summary report to the patient's physician.

(y) *Supervision.* Authoritative procedural guidance by a qualified person for the accomplishment of a function or activity with initial direction and periodic inspection of the actual act of accomplishing the function or activity. Unless otherwise provided in this subpart, the supervisor must be on the premises if the person does not meet qualifications for assistants specified in the definitions in this section.

§ 405.1220 Condition of participation: Compliance with Federal, State, and local laws.

The home health agency and its staff are in compliance with all applicable Federal, State, and local laws and regulations. If State or applicable local law provides for the licensure of home health agencies, an agency not subject to licensure must be approved by the licensing authority as meeting the standards established for such licensure. A proprietary organization which is not exempt from Federal income taxation under section 501 of the Internal Revenue Code of 1954 must be licensed as a home health agency pursuant to State law. If no State law exists for the licensure of a proprietary home health agency, it cannot be certified for participation in the health insurance program.

§ 405.1221 Condition of participation: Organization, services, administration.

Organization, services provided, administrative control, and lines of authority for the delegation of responsibility down to the patient care level are clearly set forth in writing and are readily identifiable. Administrative and supervisory functions are not delegated to another agency or organization and all services not provided directly are monitored and controlled by the primary agency, including services provided through subunits of the parent agency. If an agency has subunits, appropriate administrative records are maintained for each subunit.

(a) *Standard: Services provided.* Part-time or intermittent skilled nursing services and at least one other therapeutic service (physical, speech, or occupational therapy; medical social services; or home health aide services) must be made available, on a visiting basis, in a place of residence used as a patient's home. A public or nonprofit home health agency must provide at least one of the qualifying services directly through agency employees but may arrange with another public or nonprofit agency or organization to provide the second qualifying service and any additional services. A proprietary agency, however, must provide all services directly, through agency employees.

(b) *Standard: Governing body.* A governing body (or designated persons so functioning) assumes full legal authority and responsibility for the operation of the agency. The governing body appoints a qualified administrator, arranges for professional advice (see § 405.1222), adopts and periodically reviews written bylaws or an acceptable equivalent, and oversees the management and fiscal affairs of the agency. The name and address of each officer, director, and owner are disclosed. If the agency is a corporation, all ownership interests of 10 percent or more (direct or indirect) are also disclosed.

(c) *Standard: Administrator.* The administrator, who may also be the supervising physician or registered nurse (see paragraph (d) of this section), organizes and directs the agency's ongoing functions; maintains ongoing liaison among the governing body, the group of professional personnel, and the staff; employs qualified personnel and ensures adequate staff education and evaluations; ensures the accuracy of public information materials and activities; and implements an effective budgeting and accounting system. A qualified person is authorized in writing to act in the absence of the administrator.

(d) *Standard: Supervising physician or registered nurse.* The skilled nursing and other therapeutic services provided are under the supervision and direction of a physician or a registered nurse (who preferably has at least 1 year of nursing experience and is a public health nurse). This person, or similarly qualified alternate, is available at all times during operating hours and participates in all activities relevant to the professional services provided, including the developing of qualifications and assignments of personnel.

(See Connecticut, Massachusetts, New Jersey, and Rhode Island Addenda in the Appendix.)

(e) *Standard:* Personnel policies. Personnel practices and patient care are supported by appropriate, written personnel policies. Personnel records include job descriptions, qualifications, licensure, performance evaluations, and health examinations, and are kept current.

(f) *Standard: Personnel under hourly or per visit contracts.* (1) If personnel under hourly or per visit contracts are utilized by the home health agency, there is a written contract between such personnel and the agency clearly designating:

(i) That patients are accepted for care only by the primary home health agency,

(ii) The services to be provided,

(iii) The necessity to conform to all applicable agency policies including personnel qualifications,

(iv) The responsibility for participating in developing plans of treatment,

(v) The manner in which services will be controlled, coordinated, and evaluated by the primary agency,

(vi) The procedures for submitting clinical and progress notes, scheduling of visits, periodic patient evaluation, and

(vii) The procedures for determining charges and reimbursement.

(g) *Standard: Coordination of patient services.* All personnel providing services maintain liaison to assure that their efforts effectively complement one another and support the objectives outlined in the plan of treatment. The clinical record or minutes of case conferences establish that effective interchange, reporting, and coordinated patient evaluation does occur. A written summary report for each patient is sent to the attending physician at least every 60 days.

(h) *Standard: Services under arrangements.* Services (see paragraph (a) of this section) provided under arrangement with another public or nonprofit agency must be subject to a written contract conforming with the requirements specified in paragraph (f) of this section.

§ 405.1222 Condition of participation: Group of professional personnel.

(a) A group of professional personnel, which includes at least one physician and one registered nurse (preferably a public health nurse), and with appropriate representation from other professional disciplines, establishes and annually reviews the agency's policies governing scope of services offered, admission and discharge policies, medical supervision and plans of treatment, emergency care, clinical records, personnel qualifications, and program evaluation. At least one member of the group is neither an owner (§ 405.1221(b)) nor an employee of the agency.

(b) *Standard:* Advisory and evaluation *function.* The group of professional personnel meets frequently to advise the agency on professional issues, to participate in the evaluation of the agency's program, and to assist the agency in maintaining liaison with other health care providers in the community and in its community information program. Its meetings are documented by dated minutes.

(See New Jersey Addendum in the Appendix.)

§ 405.1223 Condition of participation; Acceptance of patients, plan of treatment, medical supervision.

Patients are accepted for treatment on the basis of a reasonable expectation that the patient's medical, nursing, and social needs can be met adequately by the agency in the patient's place of residence. Care follows a written plan of treatment established and periodically reviewed by a physician, and care continues under the supervision of a physician.

(a) *Standard: Plan of treatment.* The plan of treatment developed in consultation with the agency staff covers all pertinent diagnoses, including mental status, types of services and equipment required, frequency of visits, prognosis, rehabilitation potential, functional limitations, activities permitted, nutritional requirements, medications and treatments, any safety measures to protect against injury, instructions for timely discharge or referral, and any other appropriate items. If a physician refers a patient under a plan of treatment which cannot be completed until after an evaluation visit, the physician is consulted to approve additions or modifications to the original plan. Orders for therapy services include the specific procedures and modalities to be used and the amount, frequency, and duration. The therapist and other agency personnel participate in developing the plan of treatment.

(b) *Standard: Periodic review of plan of treatment.* The total plan of treatment is reviewed by the attending physician and home health agency personnel as often as the severity of the patient's condition requires, but at least once every 60 days. Agency professional staff promptly alert the physician to any changes that suggest a need to alter the plan of treatment.

(c) *Standard: Conformance with physician's orders.* Drugs and treatments are administered by agency staff only as ordered by the physician. The nurse or therapist immediately records and signs oral orders and obtains the physician's countersignature. Agency staff check all medicines a patient may be taking to identify possibly ineffective drug therapy or adverse reactions, significant side effects, drug allergies, and contraindicated medication, and promptly report any problems to the physician.

§ 405.1224 Condition of participation: Skilled nursing service.

The home health agency provides skilled nursing service by or under the supervision of a registered nurse and in accordance with the plan of treatment.

(See Connecticut, Massachusetts, and Rhode Island Addenda in the Appendix.)

(a) *Standard: Duties of the registered nurse.* The registered nurse makes the initial evaluation visit, regularly reevaluates the patient's nursing needs, initiates the plan of treatment and necessary revisions, provides those services requiring substantial specialized nursing skill, initiates appropriate preventive and rehabilitative nursing procedures, prepares clinical and progress notes, coordinates services, informs the physician and other personnel of changes in the patient's condition and needs, counsels the patient and family in meeting nursing and related needs, participates in inservice programs, and supervises and teaches other nursing personnel.

(b) *Standard: Duties of the licensed practical nurse.* The licensed practical nurse provides services in accordance with agency policies, prepares clinical and progress notes, assists the physician and/or registered nurse in performing specialized procedures, prepares equipment and materials for treatments observing aseptic technique as required, and assists the patient in learning appropriate self-care techniques.

§ 405.1225 Condition of participation: Therapy services.

Any therapy services offered by the home health agency directly or under arrangement are given by a qualified therapist or by a qualified therapist assistant under the supervision of a qualified therapist in accordance with the plan of treatment. The qualified therapist assists the physician in evaluating level of function, helps develop the plan of treatment (revising as necessary), prepares clinical and progress notes, advises and consults with the family and other agency personnel, and participates in inservice programs.

(a) *Standard: Supervision of physical therapist assistant and occupational therapy assistant.* Services provided by a qualified physical therapist assistant or qualified occupational therapy assistant may be furnished under the supervision of a qualified physical or occupational therapist. A physical therapist assistant or occupational therapy assistant performs services planned, delegated, and supervised by the therapist, assists in preparing clinical notes and progress reports, and participates in educating the patient and family, and in inservice programs.

(b) *Standard: Supervision of speech therapy services.* Speech therapy services are provided only by or under supervision of a qualified speech pathologist or audiologist.

§ 405.1226 Condition of participation: Medical social services.

Medical social services, when provided, are given by a qualified social worker or by a qualified social work assistant under the supervision of a qualified social worker, and in accordance with the plan of treatment. The social worker assists the physician and other team members in understanding the significant social and emotional factors related to the health problems, participates in the development of the plan of treatment, prepares clinical and progress notes, works with the family, utilizes appropriate community resources, participates in discharge planning and inservice programs, and acts as a consultant to other agency personnel.

§ 405.1227 Condition of participation: Home health aide services.

Home health aides are selected on the basis of such factors as a sympathetic attitude toward the care of the sick, ability to read, write, and carry out directions, and maturity and ability to deal effectively with the demands of the job. Aides are carefully trained in methods of assisting patients to achieve maximum self-reliance, principles of nutrition and meal preparation, the aging process and emotional problems of illness, procedures for maintaining a clean, healthful, and pleasant environment, changes in patient's condition that should be reported, work of the agency and the health team, ethics, confidentiality, and recordkeeping. They are closely supervised to assure their competence in providing care.

(See Connecticut and Oregon Addenda in the Appendix.)

(a) *Standard: Assignment and duties of the home health aide.* The home health aide is assigned to a particular patient by a registered nurse. Written instructions for patient care are prepared by a registered nurse or therapist as appropriate. Duties include the performance of simple procedures as an extension of therapy services, personal care, ambulation and exercise, household services essential to health care at home, assistance with medications that are ordinarily self-administered, reporting changes in the patient's conditions and needs, and completing appropriate records.

(b) *Standard: Supervision.* The registered nurse, or appropriate professional staff member, if other services are provided, makes a supervisory visit to the patient's residence at least every 2 weeks, either when the aide is present to observe and assist, or when the aide is absent, to assess relationships and determine whether goals are being met.

(See Massachusetts Addendum in the Appendix.)

§ 405.1228 Condition of participation: Clinical records.

A clinical record containing pertinent past and current findings in accordance with accepted professional standards is maintained for every patient receiving home health services. In addition to the plan of treatment (see § 405.1223(a)), the record contains appropriate identifying information; name of physician; drug, dietary, treatment, and activity orders; signed and dated clinical and progress notes (clinical notes are written the day service is rendered and incorporated no less often than weekly); copies of summary reports sent to the physician; and a discharge summary.

(a) *Standards: Retention of records.* Clinical records are retained for 5 years after the month the cost report to which the records apply is filed with the intermediary, unless State law stipulates a longer period of time. Policies provide for retention even if the home health agency discontinues operations. If a patient is transferred to another health facility, a copy of the record or abstract accompanies the patient.

(b) *Standards: Protection of records.* Clinical record information is safeguarded against loss or unauthorized use. Written procedures govern use and removal of records and conditions for release of information. Patient's written consent is required for release of information not authorized by law.

V 38 135 JUL 16 73 XUM

§ 405.1229 Condition of participation: Evaluation.

The home health agency has written policies requiring an overall evaluation of the agency's total program at least once a year by the group of professional personnel (or a committee of this group), home health agency staff, and consumers, or by professional people outside the agency working in conjunction with consumers. The evaluation consists of an overall policy and administrative review and a clinical record review. The evaluation assesses the extent to which the agency's program is appropriate, adequate, effective, and efficient. Results of the evaluation are reported to and acted upon by those responsible for the operation of the agency and are maintained separately as administrative records.

(a) *Standard: Policy and administrative review.* As a part of the evaluation process the policies and administrative practices of the agency are reviewed to determine the extent to which they promote patient care that is appropriate, adequate, effective, and efficient. Mechanisms are established in writing for the collection of pertinent data to assist in evaluation. The data to be considered may include but are not limited to: number of patients receiving each service offered, number of patient visits, reasons for discharge, breakdown by diagnosis, sources of referral, number of patients not accepted with reasons, and total staff days for each service offered.

(b) *Standard: Clinical record review.* At least quarterly, appropriate health professionals, representing at least the scope of the program, review a sample of both active and closed clinical records to assure that established policies are followed in providing services (direct services as well as services under arrangement). There is a continuing review of clinical records for each 60-day period that a patient receives home health services to determine adequacy of the plan of treatment and appropriateness of continuation of care.

§ 405.1230 Condition of participation: Qualifying to provide outpatient physical therapy services.

Section 1861(p) of the Social Security Act provides in pertinent part as follows:

> (p) The term "outpatient physical therapy services" means physical therapy services furnished by a provider of services, a clinic, rehabilitation agency, or a public health agency, or by others under an arrangement with, and under the supervision of, such provider, clinic, rehabilitation agency or public health agency to an individual as an outpatient * * *

As a provider of services, a home health agency may qualify to provide outpatient physical therapy services if such agency meets the statutory requirements of section 1861(o) of the Act and complies with other health and safety requirements prescribed by the Secretary for home health agencies, and, additionally, is in compliance with applicable health and safety requirements pertaining to rendition of outpatient physical therapy services. The applicable health and safety requirements pertaining to outpatient physical therapy services are included in the conditions of participation in Subpart Q of this part. (See §§ 405.1719, 405.1720, 405.1722, 405.1724, and 405.1725.)

APPENDIX—ADDENDA FOR SEVERAL STATES INCORPORATING CONDITIONS OF PARTICIPATION HIGHER THAN THOSE IMPOSED BY THE HEALTH INSURANCE FOR THE AGED PROGRAM

ADDENDA TO § 405.1221(d)

Pursuant to the provisions of section 1863 of title XVIII of the Act, there are approved the following higher conditions of participation relating to agency supervision applicable in those States identified below:

CONNECTICUT

Agency supervision—condition. The home health agency designates a physician or registered professional nurse qualified as a public health nurse director or nursing supervisor to supervise the agency's performance in providing home health services in accordance with the orders of the physician responsible for the care of the patient and under a plan of treatment established by the physician. The following qualifications apply to the supervisor and director.

(a) *Supervisor.* The minimum qualifications of the nursing supervisor are a baccalaureate degree from a university program in nursing approved by the National League for Nursing for public health nursing preparation, and a minimum of 2 years of experience in a public health nursing program under qualified nursing supervision which included supervisory responsibilities.

(b) *Director.* When a unit through which home health services are provided reaches a total nursing staff of nine to 12, depending upon the number of towns involved and area served, a qualified public health nursing director shall be employed in addition to the nursing supervisor.

(1) *Preferred.* A master's degree with a major in public health nursing administration or supervision from a university program approved by the National League for Nursing, or a master's degree in public health from a university program approved by the American Public Health Association, and at least 5 years of experience in public health nursing, including 2 years under qualified supervision and 3 years as a supervisor.

(2) *Acceptable.* A baccalaureate degree from a university program in nursing approved by the National League for Nursing, for public health nursing preparation supplemented by approved courses in public health nursing supervision and administration, and at least 5 years of experience in public health nursing, including 2 years under qualified supervision and 3 years as a supervisor.

MASSACHUSETTS

Agency supervision—condition. The home health agency designates a physician or registered professional nurse qualified as a public health nursing director and/or supervisor to direct the agency's services. In the event that a physician is the administrator of the home health agency, the nursing service shall be under the direction of a registered professional nurse qualified as a public health nursing director and/or supervisor. All home health services shall be provided in accordance with the orders of a physician responsible for the care of the patient and under a plan of treatment established by such physician.

(a) *Public Health Nursing Director—qualifications.* The public health nursing director is currently licensed to practice professional nursing by the State and meets the following requirements:

A master's degree with a major in public health nursing administration or supervision from a program approved by the National League for Nursing or a master's degree in public health from a program approved by the American Public Health Association, and at least 5 years of progressively responsible experience in public health nursing or community health nursing, some of which should be in supervision, teaching, and/or consultation.

(b) *Public Health Nursing Supervisor—qualifications.* The public health nursing supervisor meets the following minimum requirements:

A master's degree in nursing from a program approved by the National League for Nursing and 1 year of experience in a family-centered public health nursing program which included supervisory responsibilities, or a baccalaureate degree from a program approved by the National League for Nursing for public health nursing preparation and 2 years of the above-described experience.

NEW JERSEY

Agency supervision—condition. The home health agency designates a physician or registered professional nurse qualified as a public health nurse director or supervisor to supervise the agency's performance in providing home health services in accordance with orders of the physician responsible for the care of the patient and under a plan of treatment established by such physician. In the event that a physician is designated to supervise the agency's services, the nursing service shall be under the direction of a registered professional nurse qualified as a public health nurse director or supervisor. The following are the requirements for qualifying as a public health nurse director or supervisor:

(a) *Director.* A public health nurse director has completed:

(1) A master's degree program accredited by the National League for Nursing with a nursing major in supervision, teaching, consultation or administration and advanced study in a clinical specialty; or a master's program in public health in an institution accredited by the American Public Health Association; and

(2) Five years of experience in public health nursing, 1 year of which shall have been in a supervisory experience.

(b) *Supervisor.* A public health nurse supervisor has completed:

(1) A baccalaureate degree program approved by the National League for Nursing for public health nursing preparation or postbaccalaureate study which includes content approved by the National League for Nursing for public health nursing preparation; and

(2) Three years of experience in public health nursing under qualified nursing supervision.

RHODE ISLAND

Agency supervision—condition. The home health agency designates a physician or registered professional nurse qualified as a public health nurse director to direct the agency's services. In the event that a physician is the administrator of the home health agency, the nursing service shall be under the direction of a registered professional nurse qualified as a public health nurse director. All home health services shall be provided in accordance with the orders of the physician responsible for the care of the patient and under a plan of treatment established by such physician.

(d) It is desirable for the group to include lay persons knowledgeable in health affairs and also to have a wide range of professional representatives such as social worker; nutritionist; speech, physical, and occupational therapists.

ADDENDA TO § 405.1224

Pursuant to the provisions of section 1863 of title XVIII of the Act, there are approved the following higher conditions of participation relating to skilled nursing services in those States identified below:

CONNECTICUT

Skilled nursing service—condition. Skilled nursing service is provided by or under the supervision of a public health nursing supervisor currently licensed by the State.

(a) *Professional nursing services—duties.* (The provisions of § 405.1224(a) are applicable.)

(b) *Public Health Nursing Supervisor—qualifications.* The public health nursing supervisor must have a baccalaureate degree from a university program in nursing approved by the National League for Nursing for public health nursing preparation, and a minimum of 2 years of experience in a public health nursing program under qualified nursing supervision which included supervisory responsibilities.

(c) *Registered Professional Nurse—qualifications.* (See § 405.1202.)

(d) *Public Health Nurse—qualifications.* (See § 405.1202.)

(e) *Practical nursing—duties.* (The provisions of § 405.1224(b) are applicable.)

(f) *Practical Nurse—qualifications.* (See § 405.1202.)

MASSACHUSETTS

Skilled nursing service—condition. Skilled nursing service is provided by or under the supervision of a qualified public health nursing director and/or supervisor. (See § 405.1221(d) regarding qualifications.)

RHODE ISLAND

Skilled nursing service—condition. Skilled nursing service is provided by or under the supervision of a qualified public health nursing supervisor currently licensed by the State.

(a) *Professional nursing services—duties.* (The provisions of § 405.1224(a) are applicable.)

(b) *Public Health Nursing Supervisor—qualifications.* A public health nursing supervisor is currently licensed to practice professional nursing by the State and has a baccalaureate degree from a university program in nursing approved by the National League for Nursing for public health nursing preparation and preferably with additional academic preparation in supervision and with experience in a public health nursing program under qualified nursing supervision for a minimum of 2 years.

(c) *Registered Professional Nurse—qualifications.* (See § 405.1202.)

(d) *Public Health Nurse—qualifications.* (See § 405.1202.)

(e) *Practical nursing—duties.* (The provisions of § 405.1224(b) are applicable.)

(f) *Practical nursing—qualifications.* (See § 405.1202.)

ADDENDA TO § 405.1227

Pursuant to the provisions of section 1863 of title XVIII of the Act, there are approved the following higher conditions of participation relating to home health aides in those States identified below:

CONNECTICUT

Training of Home Health Aides—condition. The home health agency determines that home health aides receive or have received a basic training program for home health aides approved by the Connecticut State Department of Health.

MASSACHUSETTS

Supervision of Home Health Aides—condition. The qualified nursing supervisor should provide direct supervision as necessary and is readily available at other times by telephone. The supervisor should be constantly evaluating the home health aide in terms of the aide's ability to carry out assigned duties, to relate well to the homebound patient, and to work effectively as a member of a team of health workers.

OREGON

Home Health Aide Services—condition. When a home health agency provides home health aide services, the home health aides are selected, trained, assigned and supervised.

Selection—Home health aides are currently registered with the State Board of Health as proof of qualification for employment as a home health aide.

Training—Home health aides complete an approved basic educational course for home health aides. All programs for home health aide training must be approved by the State Advisory Committee for Home Health Aide Programs.

PART IV

ENVIRONMENTAL PROTECTION AGENCY

■

PREVENTION OF SIGNIFICANT AIR QUALITY DETERIORATION

Proposed Rulemaking

V 38 - 135 JUL 16 73 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Prevention of Significant Air Quality Deterioration

Notice is hereby given that the Administrator of the Environmental Protection Agency (EPA) intends to issue regulations setting up a mechanism for preventing significant deterioration of air quality in areas where air pollution levels currently are below the national ambient air quality standards (40 CFR Part 50). These regulations would be issued under the Clean Air Act and would prescribe steps to be taken by the States. This notice sets forth four proposed plans reflecting various approaches to defining and preventing significant deterioration. It is the Administrator's intention not only to receive written comments on these proposals but also to hold public hearings in various places in order to provide the greatest possible opportunity for public involvement in this rule-making. Certain questions on which public comment is specifically invited are identified in the concluding section of this preface.

Publication of this notice is related to a suit filed May 24, 1972, in which the Sierra Club and other groups sought a declaratory judgment and injunction requiring the Administrator to disapprove all State implementation plans which did not contain procedures for preventing significant deterioration in any portion of any State where air quality is superior to national standards. On May 30, 1972, the District Court for the District of Columbia granted the plaintiffs' motion for a preliminary injunction and issued a preliminary injunction requiring the Administrator, within four months thereafter, to review all State plans and "disapprove any portion of a State plan which fails to effectively prevent significant deterioration of existing air quality." The preliminary injunction also required the Administrator to promulgate regulations "as to any State plan which he finds, on the basis of his review, either permits the significant deterioration of existing air quality in any portion of any State or fails to take the measures necessary to prevent such significant deterioration." On November 1, 1972, the decision of the District Court was affirmed by the U.S. Court of Appeals for the District of Columbia Circuit on the basis of an opinion filed by the District Court on June 2, 1972. Subsequently, the U.S. Supreme Court stayed the effect of the District Court's decision pending its consideration and disposition of the case on application for a writ of certiorari. On June 11, 1973, the Supreme Court, by an equally divided court, affirmed the judgment of the Court of Appeals; no opinion was issued.

Each State plan has been reviewed in accordance with the preliminary injunction issued by the District Court. Although many State plans included regulations which have the potential for resulting in the attainment of air quality better than that required by the national standards, and although some State plans contained general policy statements indicating an intent to prevent or minimize deterioration of air quality, none was found to contain explicit and enforceable regulations for implementing such a policy. Accordingly, all State plans were disapproved by the Administrator on November 9, 1972 (37 FR 23836), insofar as they failed to provide for the prevention of significant deterioration. This disapproval did not affect the status of any previously or subsequently approved regulations designed to provide for the attainment and maintenance of national ambient air quality standards. Furthermore, in the absence of Federal regulations prescribing requirements for prevention of significant deterioration the Administrator's disapproval was necessarily based on a generalized assessment of the State plans. To the extent that any State plan is determined to meet any of the requirements ultimately established as a result of this rulemaking proceeding, the Administrator's disapproval will be appropriately modified.

In EPA's view, there has been no definitive judicial resolution of the issue whether the Clean Air Act requires prevention of significant deterioration of air quality. When the issue was presented to the Supreme Court, the Court was equally divided. The Court's action had the effect of permitting to stand the judgment of the Court of Appeals for the District of Columbia Circuit, which was entered in the procedural context of the issuance of a preliminary injunction.

In the absence of a definitive judicial decision on the issue, the Administrator adheres to the view that Section 110 of the Clean Air Act requires EPA to approve State implementation plans that will attain and maintain the national ambient air quality standards, and that the Act does not require EPA or the States to prevent significant deterioration of air quality. The proposed alternative regulations set forth herein would establish a mechanism for preventing significant deterioration pursuant to the preliminary injunction issued by the District Court.

Public Policy Issue

The question raised by the Sierra Club suit was a legal issue, i.e., interpretation of the language and legislative history of the Clean Air Act. Thus, the courts were asked to determine that the Act requires the Administrator to ensure that State implementation plans will not permit significant deterioration of air quality. What the courts were not asked to determine is what constitutes significant deterioration and exactly how it will be prevented.

A national policy of preventing significant deterioration, however defined and implemented, will have a substantial impact on the nature, extent, and location of future industrial, commercial, and residential development throughout the United States. It could affect the utilization of the Nation's mineral resources, the availability of employment and housing in many areas, and the costs of producing and transporting electricity and manufactured goods. Without implying any judgment as to the general acceptability of any of the effects of a "no significant deterioration" policy, the Administrator believes that they are potentially so far-reaching that the question of how such a policy should be defined and implemented cannot properly be addressed, much less decided, on narrow legal grounds. Rather, it is a question that must be discussed, debated, and decided as a public policy issue, with full consideration of its economic and social implications. To approach the question in any other manner would be much too simplistic. There is, perhaps, no other environmental issue that imposes upon the Administrator, and the public, a greater obligation to formulate and objectively evaluate a range of possible solutions. The usual rulemaking procedure of putting forth a single proposal clearly is inadequate in this case. Accordingly, this notice sets forth four alternative sets of proposed regulations based upon different philosophies and administrative approaches to defining and preventing significant deterioration.

Current Constraints on Deterioration

It is important to recognize that many State plans, as well as certain rule making actions already completed under provisions of the Clean Air Act, will have the effect of attaining or maintaining air quality significantly better than the national secondary standards in many places, and that these actions will have the effect of generally improving air quality nationwide. The following paragraphs summarize the more significant of these actions, and there is no intent that the alternatives proposed herein should in any way mitigate the impact of these actions.

1. The Administrator has promulgated (36 FR 8186) national primary and secondary ambient air quality standards. In accordance with the Act, the primary standards were set at a level that provides an adequate margin of safety for protection of the public health, and secondary standards were set at a level that protects the public welfare from any known or anticipated adverse effects. All States have submitted implementation plans to attain and maintain these standards. In many areas of the country, air quality was not sufficient to meet these standards and, hence, in these areas, the State plans will ensure that deterioration cannot occur because the regulations require specific improvements in air quality.

2. Emission control actions to be taken by the States, in accordance with their plans to implement the National Ambient Air Quality Standards in heavily polluted areas, will reduce air pollution concentrations in the periphery of such areas. For example, the annual average sulfur dioxide concentration in Mercer County, New Jersey, is expected to drop from about 25 micrograms per cubic meter to about 10 micrograms per cubic meter (as compared to the national secondary standard of 60 micrograms) as a result of emission reductions in and around Philadelphia.

3. Emissions reductions to be achieved under State plans in major urban and industrial centers will significantly affect total national emissions and thereby lower the background pollutant concentrations in rural areas. Thus a 25 percent reduction in the background concentration of particulate matter (from about 40 micrograms per cubic meter to about 30 micrograms) in rural areas in the Northeast is anticipated.

4. Emission limitations and other regulations, including restrictions on the sulfur content of fossil fuels as prescribed by many State plans, go beyond what is minimally necessary for attainment of the national standards. In many instances, emission control regulations necessary for attainment of national standards in the most polluted area(s) of a State have been applied statewide. For sulfur dioxide, this has occurred in 33 States. Although implementation of these regulations may be deferred in some clean areas in order to make available low sulfur fuels for use in heavily polluted areas, these regulations will eventually result in further improvement in air quality in many areas where the secondary standards were not exceeded.

5. Federal emission standards for new motor vehicles will result in a steady decrease in motor vehicle emissions in all parts of the Nation through the 1970's and well into the 1980's, as new automobiles equipped to meet these emission standards replace older models which were subject to less restrictive emission standards or none at all. For example, 1974 model automobiles will have emission reductions (per mile) of approximately 80% for carbon monoxide, 70% for hydrocarbons, and 35% for oxides of nitrogen, as compared to vehicles sold prior to 1969. This trend is a result of the Federal emission standards already in effect; it will be accelerated by the even more stringent emission standards due to take effect in the 1975 and 1976 model years.

6. Control of sulfur dioxide, nitrogen oxides, and hydrocarbon emissions to meet national ambient air quality standards and/or Federal emission standards for new stationary sources and motor vehicles can be expected to inhibit atmospheric reactions involving these pollutants and thereby reduce ambient air concentrations of particulate matter such as sulfates, nitrates, and organics. Current State implementation plans generally do not consider this secondary reduction of particulate levels.

It can be seen that there are very strong regulatory measures in existence to prevent any deterioration of air quality in regions where the national standards are currently exceeded. Strong regulatory measures also exist to insure that air quality in currently clean areas cannot deteriorate sufficiently to subject the public health or welfare to any currently quantifiable adverse effects. Although the effect of these regulations is to mitigate any deterioration in most sections of the country, the alternatives presented herein are intended to prevent, in accordance with the District Court's preliminary injunction, any significant deterioration of air quality in any portion of any State.

Conceptual Issues

Section 109 of the Clean Air Act requires the Administrator to establish national primary ambient air quality standards "to protect the public health" and national secondary ambient air quality standards, "to protect the public welfare from any known or anticipated adverse effects," including, as specified by section 302(h), "effects on soils, water, crops, vegetation, man-made materials, animals, wildlife, weather, visibility, and climate, damage to and deterioration of property, and hazards to transportation, as well as effects on economic values and on personal comfort and well-being." Such national standards must be based on air quality criteria which, under section 108, must "reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health and welfare which may be expected from the presence [of air pollutants] in the ambient air, in varying quantities." Thus, standard-setting under section 109 is necessarily limited to demonstrable or predictable adverse effects which can be quantitatively related to pollutant concentrations in the ambient air.

The basis for preventing significant deterioration therefore lies in a desire to protect aesthetic, scenic, and recreational values, particularly in rural areas, and in concern that some air pollutants may have adverse effects that have not been documented in such a way as to permit their consideration in the formulation of national ambient air quality standards. Pending the development of adequate scientific data on the kind and extent of adverse effects of air pollutant levels below the secondary standards, significant deterioration must necessarily be defined without a direct quantitative relationship to specific adverse effects on public health and welfare. It should be emphasized that defining significant deterioration in this way does not imply a judgment by EPA on the question of whether it is sound public policy to define "deterioration" as any increment above existing air pollution levels and to attempt to define "significant" deterioration in the absence of documentation on the adverse effects thereof. Furthermore, it is possible, indeed probable, that even when there are additional data, it will be evident that there are levels below which some of the pollutants covered by national standards do not have effects that can be considered adverse to public health and welfare.

To the extent that the Act provides any basis for defining significant deterioration, it does so only in section 101(b)(1), which declares that one of the purposes of the Act is "to protect and enhance the quality of the Nation's air resources so as to promote the public health and welfare and the productive capacity of its population". Additional guidance is available from the legislative history; specifically, the Report of the Senate Committee on Public Works (Report No. 91–1196, dated September 17, 1970) contained the following statement:

> In areas where current air pollution levels are already equal to; or better than, the air quality goals, the Secretary should not approve any implementation plan which does not provide, to the maximum extent practicable, for the continued maintenance of such ambient air quality.

Though the Report also suggested that it might be possible to prevent all deterioration, it is apparent that the measures necessary for that purpose would bring growth and development virtually to a standstill in many areas and therefore are incompatible with protecting the "productive capacity" of the Nation's population.

Clearly, it is not within the province of EPA, under either the Clean Air Act or any other statute, to impose limitations on the Nation's growth. Neither the Sierra Club nor any of the States or organizations that filed amicus curiae briefs with the Supreme Court in support of the Sierra Club's position argued that the District Court's preliminary injunction means that EPA must limit economic growth, as such, in order to prevent significant deterioration of air quality. To the contrary, it was agreed that growth could and would continue, albeit with the restrictions necessary to prevent significant deterioration.

The Sierra Club, for example, made the following statement:

> The development of rural areas will not be prevented by a prohibition against significant deterioration of air quality. Such a prohibition on its face does not prevent all increases in pollution. If the best available technological developments are utilized and if numerous pollution producing sources are not concentrated in one place, most industry can enter clean areas without causing significant deterioration. (p. 94)

And the State of California made the following statements:

> Prevention of significant deterioration of air quality does not foreclose the construction in clean air basins and partially polluted air basins of well-planned and well-disbursed fossil fuel power plants and other polluting industries which utilize, on a continuing basis, the best available technology. 'No significant deterioration' simply means that certain large and inaedquately controlled pollution sources will not be permitted. (pp. 1–2) Of course, economic and social factors may well require some degradation of air quality in certain areas. But this case does not involve any question of prohibiting growth or prohibiting *any* deterioration of air quality. It is not a 'non-degradation' case. (p. 28)

V38-135 JUL 16 73 XUM

There is, therefore, a consensus that the definition of significant deterioration is intended to represent some level above zero deterioration. An upper bound can also be established on the definition of significant deterioration by recognizing that existing regulations prevent deterioration to levels in excess of the secondary air quality standards.

Hence, any quantitative definition of significant deterioration must fall between the levels of zero deterioration and deterioration up to the secondary standards. Any quantitative definition within this range must be essentially subjective, because, within this range, data are not available with which to quantify any adverse impact on either public health or welfare.

Nationally, the steady deterioration in air quality over the last several decades has already been reversed by existing regulations, and air quality generally has begun to improve in the last few years. Further, this improvement will continue for the foreseeable future. The following table summarizes the expected reductions in total national emissions by 1980. The percentages shown are based on the national emissions of 1970, and include (i.e. "absorb") the growth in sources anticipated for the 1970–1980 period.

Pollutant:	*Percent Reduction in Emissions*
Particulates	40
Sulfur Dioxide	70
Carbon Monoxide	80
Oxides of Nitrogen	40
Hydrocarbons	60

However, even though the nationwide trend in emissions and air quality is favorable, in many local areas which are now quite clean there is the possibility that deterioration could occur. This is because trends in the nationwide averages are predominately influenced by severe emission controls being applied in the large urban areas to attain and maintain the national ambient air quality standards. These controls could drive major polluters into the semi-urban and rural areas, thereby degrading air quality in those areas to a degree that could approach (but not exceed) the secondary standards. Additionally, the growth patterns throughout the country are continually changing, and the normal economic expansion can be expected to lead to increased emissions in some local areas which previously were undeveloped. In some of these areas, the public may feel that the improved economic conditions do not justify the resulting environmental deterioration, even though that deterioration is insufficient to cause a quantifiable adverse impact on either the health or welfare of the population.

However, the future nationwide reduction in emissions, and hence in pollutant concentrations, will be significant. Although much of this reduction is being accomplished in highly industrialized urban areas in order to attain and maintain the national standards, a considerable reduction is also being accomplished in semi-urban areas already well below the standards. Depending upon the plan selected with which to prevent significant deterioration, much of this latter reduction could be used to accommodate future growth without significant deterioration. Further improvements in emission control technology would allow additional growth without causing significant deterioration. The proposed plans would serve to stimulate such improvements.

Nevertheless, it is not possible to rely solely on improved emission control technology to offset the increased emissions attendant to population and economic expansion and redistribution. Many areas of the country have virtually no man-made emissions. To establish a policy that new emissions can only be introduced to the extent that current emissions are reduced would forever relegate these areas to an essentially undeveloped status. This feature would, in turn, require that new pollution sources be located only in the semi-urban and urban areas of the country in which improved control technology would have the greatest impact. This would force the majority of the new emissions into these areas in which the majority of the Nation's population resides.

The relative significance of air quality versus economic growth may be a variable dependent upon regional conditions. For example, relatively minor deterioration of the aesthetic quality of the air may be very significant in a recreational area in which great pride (and economic development) is derived from the "clean air." Conversely, in areas with severe unemployment and little recreational value, the same level of deterioration might very well be considered "insignificant" in comparison to the favorable impact of new industrial growth with resultant employment and other economic opportunities. Accordingly, the definition of what constitutes significant deterioration must be accomplished in a manner to minimize the imposition of inequitable regulations on different segments of the Nation.

Many States have expressed the desire that federal regulations be promulgated in a manner which would permit all States to prevent significant deterioration without placing any individual states in unfairly advantageous or disadvantageous positions for attracting new industry. It is therefore desirable to insure that industry is provided with no incentive to "shop" for areas in which efforts to prevent significant deterioration are deliberately relaxed. Because the competition for new industry is extremely keen among many States, this would require that the philosophy for preventing significant deterioration be enforced uniformly throughout the Nation, even though the definition of what constitutes significant deterioration could include regional variations.

The problem of preventing significant deterioration can be somewhat simplistically, stated as that of reducing emissions to the lowest practicable level, and then distributing those residual emissions in a manner in which they do the least harm. The four alternative plans discussed herein would accomplish this at requiring application of best available control technology to all new or significantly modified major sources regardless of any expected level of deterioration. In addition, each plan is based upon a different type of decision criterion which would be used to determine whether a proposed new or significantly modified source would be permitted to commence construction in any specific location. The four decision criteria would be based upon (1) definition of "significant deterioration" as a constant increment in air quality applicable nationwide, (2) definition of "significant deterioration" as the greater of either a percentage increase in emissions or an emission increment, (3) definition of "significant deterioration" on a case-by-case basis by the public in the local area affected, and (4) definition of "significant deterioration" as one of two air quality increments depending upon land use projections by the State. Each of these plans are discussed in subsequent sections. However, all four plans contain several common features which are worthy of consolidated discussion.

Pollutants Subject to Deterioration Control

Each of the alternative proposals set forth below would require, as a minimum, that best available control technology be applied to certain categories of new sources of sulfur dioxide, particulate matter, carbon monoxide, hydrocarbons, and nitrogen oxides. Thus, this requirement would apply directly or, in the case of photochemical oxidents, indirectly to all pollutants covered by national ambient air quality standards.

The second basic requirement is a review to determine that individual new sources within the specified source categories will not cause significant deterioration. This requirement would applied only to particulate matter and sulfur dioxide. The other pollutants covered by national standards are related primarily or substantially to motor vehicle emissions. As a result of the application of EPA's emissions standards for new motor vehicles, total motor vehicle emissions are decreasing and will continue decreasing well into the future. Accordingly, the purpose of preventing significant deterioration related to carbon monoxide, hydrocarbons, nitrogen oxides, and photochemical oxidants is in the Administrator's judgment, adequately served by the proposed additional requirement for applying best available technology to new stationary sources.

Furthermore, the formation of photochemical oxidants from hydrocarbons and nitrogen oxides and the formation of nitrogen dioxide from nitric oxides involve complex photochemical processes which are time-dependent and related to atmospheric conditions and the interaction of emissions from a variety of sources. It is not possible to relate a specific isolated point source of hydrocarbons or nitrogen oxides to a specific ambient concentration of photochemical oxidents or nitrogen dioxide because the techniques and assumptions that permit correlation of emissions with ambient air quality in multiple-source areas generally are not valid for application to point sources in relatively clean areas.

Sources Subject to Review

All the proposals set forth below would require preconstruction review of certain types of stationary sources. The proposed preconstruction review procedures are similar to those already required by State implementation plans. These procedures require that source owners or operators submit data to the State and apply for approval to construct, and that the State approves or disapproves the request based on specific criteria. In relation to air quality deterioration, the criteria for this "yes or no" decision are inherent in each plan proposed herein, and are described in the section on each plan.

The initial list of sources proposed for this specific review in each plan represents the Administrator's best judgment as to which sources, in and of themselves, have the potential for causing "significant deterioration" as defined by the four alternative plans. The proposed regulations contain sixteen source categories which currently account for approximately 30 percent of the particulate matter and 75 percent of the sulfur dioxide emitted into the atmosphere each year nationwide, and account for essentially all of these pollutants emitted in clean areas. The regulations also require that any other sources emitting more than 4000 tons of sulfur dioxide or particulate matter annually be subjected to this review.

It is important to note that under the three alternative plans which place a ceiling on pollutant concentrations or emissions from an area, this initial list of sources will be subject to revision as an area approaches its ceiling.

The list of source categories has been restricted in the proposed regulations because it is considered unwise and unnecessary to divert available resources from other air pollution control activities in order to review new sources which do not have the potential to violate the proposed decision-making criteria. It may eventually be necessary to establish a mechanism for making advance assessments of the aggregate air quality impact of smaller sources. Such a mechanism is likely to involve projections of future growth and estimates of air quality impact, similar to those required by the recently promulgated amendments (38 FR 15834, dated June 18, 1973) to new source review requirements applicable to State implementation plans.

Best Available Control Technology

Each of the plans proposed herein would require, as a minimum, application of "best available control technology" (BACT) to specified categories of new sources. The proposed regulations specify that control systems adequate to comply with new source performance standards (NSPS) promulgated under section 111 of the Clean Air Act generally will be considered BACT (with the exception noted below). The proposed regulations also specify that until such time as new source performance standards (NSPS) are promulgated, BACT for a particular source will be determined by considering: reasonably available control technology [as defined in Appendix B to the Administrator's regulations for the preparation, adoption, and submittal of state implementation plans (40 CFR Part 51)]; the processes, fuels, and raw materials to be employed by an affected source; the engineering aspects of the application of various types of control techniques; and the cost of employing the available control techniques, including hardware and alterantive processes, fuels, and raw materials. However, all specified sources are expected to be covered by NSPS within 18 to 24 months and, because NSPS generally represent the lowest practicable level of emissions, the attainment of NSPS will generally be compatible with application of BACT.

The proposed exception to this equivalency of NSPS to BACT exists with respect to sulfur dioxide emissions from fossil fuel-fired steam electric plants. The levels of emissions from these plants have an extremely wide range due to the varying amounts of sulfur in fuels available in different parts of the country. Current NSPS are set at a level which requires use of a control system on plants burning high sulfur coal. However, in some regions, coal with sulfur content low enough to meet the NSPS is readily available and would be used even in the absence of emission limitations. In these situations, use of the low sulfur regional coal with no additional efforts to control sulfur dioxide emissions would not automatically constitute application of BACT. This use of NSPS as a maximum emission limitation, with the possibility of requiring additional control on a case-by-case basis, is being proposed because the NSPS are designed for uniform application nationwide, whereas significant deterioration is essentially a local or regional issue. Therefore, each of the proposed regulations requires that a case-by-case analysis of fossil fuel-fired electric plants be conducted to determine if emissions can and should be further reduced.

Alternatively, control systems adequate to meet NSPS could be considered BACT in all cases where NSPS exist, including the case of fossil fuel-fired electric generating plants. Since NSPS are required to reflect "the degree of emission limitation achievable through the application of the best system of emission reduction which (taking into account the cost of achieving such reduction) the Administrator determines has been adequately demonstrated," they could be considered to represent a sufficient degree of emission control to prevent significant deterioration "to the maximum extent practicable," in all areas. This alternative definition of BACT is not specifically included in the proposed regulations but since it is arguably consistent with the District Court's preliminary injunction, it is described herein and specifically called to the attention of all interested parties so that there will be an adequate opportunity for public comment thereon.

Baseline for Measuring Deterioration

Most of the plans which have been considered for preventing significant deterioration require that an identifiable level of air quality or emissions be established as a baseline from which to measure deterioration. The three principal alternatives which have been considered are the level existing in 1970 (to correspond to passage of the Clean Air Act), the level existing in 1972 (to correspond to the litigation to which these proposals are related), and the level existing in 1973 (to correspond to these proposed regulations.)

The use of 1970 as a nationwide baseline would present several practical problems. Foremost among these is that in the interim between 1970 and the current time, growth patterns have changed sufficiently that, although the nationwide air quality has improved substantially, in some (particularly non-urban) areas the air quality has already deteriorated—in some places to the extent that the deterioration could be considered significant under some alternative plans. The status of sources which have received prior authorization to construct in these areas would become questionable. Yet, it does not appear equitable to withdraw that authorization due to newly promulgated regulations. In many other areas, air quality could have improved so dramatically that use of 1970 as a baseline would render any deterioration regulations virtually meaningless.

In addition, the availability of air quality data from which to measure deterioration represents a severe problem. Generally, air monitoring has been most intensive in heavily polluted areas. There has been only scattered monitoring in relatively clean areas. However, it is in these relatively clean areas that the deterioration issue is most critical, and to effectively apply most deterioration plans it is essential that relatively precise baseline data be available. Even today, the precise air quality or emission levels in many of these areas are unknown; this, problem is compounded if baseline requirements are extended into the past.

However, the use of 1973 as a baseline year is also impractical, because the baseline must be established upon data for an entire year. Since annual data for 1973 could not be made available in sufficient time for initial application of these regulations, the use of 1973 would require that all data be estimated.

For these reasons, those plans discussed herein which require establishment of a baseline air quality or emission level are developed around the measured or estimated data for 1972. This minimizes, but does not eliminate, the problems associated with lack of data. It also tends to minimize many inequities associated with use of prior year baselines. It does, however, retain the problem regarding treatment of new or modified sources which

V 38 I 135 JUL 16 73 XUM

have already been approved for construction by the appropriate air pollution agency, but whose emissions and impact on air quality would not be included in the 1972 data base. Because it does not appear equitable to withdraw the construction approval from these sources, the 1972 baseline as defined in the proposed regulations consists of the measured or estimated air quality (or emissions) existing in 1972 as modified by the estimated impact of any source approved (prior to date of this proposal) for construction.

The selection of 1972 as the baseline year also introduces potential problems for a number of growth-oriented regions which improved their air quality in the period 1970–1972 to levels substantially superior to the national standards in anticipation of using that full increment to accommodate future economic expansion. The proposed regulations could substantially reduce that flexibility. The use of 1972 also tends to benefit those areas which were comparatively slow to implement emission reductions. These areas may now implement reductions in the future, and use the resulting air quality or emission increment for future economic expansion. Although this feature appears to penalize growth-oriented regions which implemented stringent controls to achieve air quality substantially superior to the national standards, the disadvantages of the alternative baseline concepts appear to be more significant. Hence, in all plans proposed herein requiring a baseline year, the year 1972 is used.

One or, possibly, some combination of the following four alternatives to prevent significant deterioration will be promulgated as Federal regulations to be enforced by the States until such time as each State possesses authority to enforce similar State regulations.

I. Air Quality Increment Plan

This section discusses a plan to prevent significant deterioration by establishing, for nationwide application, a maximum allowable increment in air quality above the baseline air quality. It is based upon the premise that "significant" deterioration can be defined as a finite increment in air quality, and that the resulting quantitative definition is appropriate for all sections of the country regardless of socio-elonomic conditions, and regardless of the current level of air quality (so long as national ambient air quality standards or other limitations are not exceeded). In addition to establishing this allowable increment, which is applicable to sulfur dioxide and particulate matter, the plan also incorporates the requirement common to all plans that all new or modified sources employ best available control technology.

Regulations which would implement this plan are proposed as the first set of alternative regulations in this notice. The regulations list the sixteen source categories for which deterioration review must be conducted, and also require the review of additional sources with potential emissions in excess of 4000 tons per year.

The definition of significant deterioration on which this plan is based consists of specific allowable increments to be added to the baseline air quality level. These increments are specified in the proposed regulations as:

For particulate matter:
- 10 $\mu g/m^3$ (annual average)
- 30 $\mu g/m^3$ (24 hour average)

For sulfur dioxide:
- 15 $\mu g/m^3$ (annual average)
- 100 $\mu g/m^3$ (24 hour average)
- 300 $\mu g/m^3$ (3 hour average)

The averaging times have been selected to be compatible with the existing secondary standards for these pollutants, and the times would be revised to be compatible with any revisions to the standards. This use of compatible time periods is necessary to insure maximum availability of baseline data, and also to facilitate incorporation of the deterioration review procedures into the existing new source review procedures.

Although there are no quantitative data to support the choice of any specific increment below the national standards, the increments proposed represent the Administrator's best judgment of increments which would prevent significant deterioration of currently clean areas, and yet not totally prevent the economic development of selected areas if that development were in the public interest.

If this proposed regulation were implemented, it would limit future development to the level of light industrial and residential complexes, or a very small amount of heavy industry such as stringently controlled power plants. For example, a recently constructed large apartment complex (15,375 units) in New York City is estimated to increase the 3-hour SO_2 concentration by 70 $\mu g/m^3$. This type of development would be allowed. A single well controlled large (1000–1500 MW) coal fired power plant can be expected to increase 24-hour SO_2 from 50 to 200 $\mu g/m^3$ depending on terrain conditions, the emission height and the dispersive characteristics of the atmosphere. The lower numbers represent typical values associated with construction in areas of good dispersion and relatively level terrain; a power plant of this type could be constructed to operate within the proposed criteria. The large increases represent plant construction in non-level terrain or areas of limited dispersion capability: If a plant were to locate in these areas a reduction in emissions beyond NSPS would be required. In general, most other types of sources would have a smaller impact on sulfur dioxide concentrations than a coal fired power plant and, if well controlled, could probably be constructed in most areas. However, in most areas if a source such as a power plant were constructed, the influence of emissions from this source would possibly raise the pollutant concentration over a large area (as great at 700 sq. miles) to a level which would be incompatible with any additional significant development.

The examples cited above assume that emission levels would be comparable to New Source Performance Standards. However, if a coal fired power plant used, for example, 80 percent efficient stack gas cleaning in addition to low sufur (approximately 0.7 percent) coal, the 24-hour SO_2 increase could be limited to 10–40 $\mu g/m^3$, thus permitting construction of several sources. This example further emphasizes that prevention of significant deterioration need not necessarily prevent significant economic development so long as major emphasis is placed on improving emission reduction techniques.

The proposed regulations for this plan would require that all applicable new or modified sources submit comprehensive data to the State describing the source, the type and amount of projected emissions, the type of controls planned, the impact that the new or modified source would have on air quality, and an estimate of the existing air quality in the vicinity of the source. This information would be used by the State, subject to the Administrator's approval, to determine if the source would exceed the allowable air quality or emission limitations and to insure that the source plans to apply best available control technology. Prior to making this determination, the State would be required to provide opportunity for public comment on all information available.

In addition, the proposed regulations require that, unless the State determines that there is already an adequate air quality monitoring network in the vicinity, the source install a minimum of two continuous air quality monitoring instruments and one meteorological instrument in the areas of expected maximum concentration. This feature would assist in developing adequate air quality information for monitoring of the source's impact, and for analysis of the potential impact of proposed future sources to insure that the deterioration ceiling is not exceeded.

Unfortunately, the type of air quality data needed to accurately establish the baseline air quality is not currently available in many clean areas of the country. It would therefore become necessary to initially estimate this information by use of diffusion modeling and other appropriate techniques.

Despite the problems generated by lack of data in most very clean areas, this alternative has some generally desirable features. The increments proposed would not totally prevent economic development of all currently clean areas, but they would force large sources to employ increasingly effective control techniques, would provide the incentive for strong control technology research and development, would prevent construction in difficult terrain areas such as valleys or mountainous areas with poor dispersion characteristics, and would also prevent clustering of large sources with the potential for high localized pollutant concentrations.

The impact of this alternative on currently developed regions is more difficult to assess. As time progresses, improved control technology will cause significant

improvements in the air quality of currently developed areas and these areas will therefore be capable of absorbing more new development than the currently clean areas. This plan would therefore cause currently clean areas to remain relatively clean, but only at the expense of forcing new sources back into the more highly developed and populated areas.

A basic problem of this plan is the land use implications implied with no provisions to insure that they are in the best interests of the public or compatible with public desires. Inherent in any plan with a single deterioration definition applied nationally is the arbitrarily equal treatment of all equally clean areas. It may not be wise to restrict the development of waste lands to the same degree that a scenic national park is restricted, particularly if that restriction forces additional air quality deterioration on the heavily populated regions of the nation.

II. Emission Limitation Plan

This section discusses an alternative plan to indirectly prevent significant deterioration of air quality by preventing significant increases in emissions. Although the correlation between emissions and air quality is often difficult to establish, control of emissions may result in the same effects as are intended by preventing significant deterioration of air quality. Although the national ambient air quality standards are intended to adequately protect the public health and welfare from adverse effects, there are suspected effects that may be related more closely to total atmospheric loading than to specific ambient concentrations. These effects include visibility reduction; reduction in solar radiation reaching the ground; acidification of rain, lakes, and streams; conversion of sulfurous and nitrogenous emissions into sulfates and nitrates; and increases in "background" concentrations. None of these effects have been quantified to the extent that a precise relationship between pollutant emissions, pollutant concentrations, and the degree of adverse effects can be stated. There is, however, at least a qualitative basis for the prevention of significant increases in the load of pollutants carried by the atmosphere.

Atmospheric loading is poorly indicated by ground level concentration measurement due to the influence of meteorological dispersion and source location. Emission density (regional emissions/regional area) is an excellent indicator of atmospheric loading. Furthermore, emission data are more readily available and easier to acquire than air quality distribution data. Thus, emission density is a relevant and practical measure of, and means of control for, types of ambient air deterioration not presently limited by ambient air quality standards.

The calculation of emission density requires the choice of an area over which emissions are to be averaged. The regulations proposed for this plan specify an Air Quality Control Region (AQCR) as this area. There are several reasons for this choice. The AQCR is an established geographical subdivision for purposes of air quality analysis. Considerable data are available on this basis. Furthermore, an area of median AQCR size is necessary in order to provide the kind of development flexibility required with currently available technology. If the averaging area is too small, then no large source of source cluster could locate within it without violating the emission ceiling. A larger averaging area allows the location of a few such large sources because the total emission increase can be allocated to a small portion of the land (thus assuring that the remaining area will remain at low emission density).

It is recognized that AQCRs differ in size and that rigid adherence to the AQCR subdivision could lead to inequitable development opportunity; therefore it is anticipated that, if this proposal is promulgated, States would develop procedures to permit subdivision of large AQCRs and aggregation of small ones. This would also permit relatively pollution free portions of Priority I and II AQCRs to be included in the regions covered by this plan during the AQCR size adjustment process. As the proposed regulations are currently written, this plan would apply only to Priority IA and III AQCRs.

Given the size of an AQCR or averaging region, the baseline annual emissions of sulfur dioxide and particulate matter can be determined. A ceiling emission rate is then calculated by adding either 20% to the baseline emissions, or by calculating a ceiling based on emission density, whichever is larger. This establishes the emission limits for the region. Implementation of this plan would then consist of insuring that the total annual emissions from the region remained below the established emission ceiling.

The incremental increase is difficult to select due to a deficiency of relevant data and theory on the relationship between emission density, atmospheric loading, and the effects to be limited. The emission density factors included in the proposed regulations are 10 tons/year/sq. mile for sulfur dioxide and 3 tons/year/sq. mile for particulates. No AQCR with sulfur dioxide emission densities below these has exhibited air quality poorer than secondary national standards. Particulate emission densities display no general correlation of this type. However, most relatively clean areas have manmade particulate emissions below this level. It should be noted, however, that sulfur dioxide emission densities as high as 200 tons/year/sq. mile may be compatible with Priority III status. The poor correlation between emission density and measured air quality is due to the effect of meteorological factors and source location, as mentioned earlier.

Given the size of the region the allowable emission density factor or percentage increase and the baseline emissions, the emission ceiling for each region can be calculated. The resulting ceilings apply to *all* emitters in the region. For practical reasons, only the large sources included in the proposed regulations must be given formal review, but the contributions of new and existing small sources to the total emissions must also be inventoried.

The regulations proposed for this plan would require each new or modified major source to provide information necessary for the determination of the probable emission rate, compliance with BACT, siting analysis under current new source review procedures, and for public information on which to base comments.

This plan would allow each region considerable flexibility on the selection and location of new emitting sources. The amount of new development possible under the emission ceiling depends critically on the degree of emission control applied to both new and existing sources. The ground level air quality at a given point in the region depends on the distribution of sources about that point. It is possible that the development of small residential and commercial sources could be limited because the available emission increment is used by a few large new emitters. It is also possible that ground level air quality could increase to secondary standards in one or more places due to large new sources or source clusters (although this would insure that air quality in the rest of the region would have no deterioration).

The determination of how emission density is to be distributed in each region would be the State's prerogative, and the Administrator would accept any distribution provided that the emission ceiling and national ambient air quality standards are observed. It is strongly recommended, however, that the allowable regional emissions be distributed in some rational and equitable manner so that the best available ground level air quality is maintained, development is balanced between industry, commerce, and residences, and that the review and approval of the sources specified in this regulation precludes the possibility that a few large sources usurp all of the available air resources of the region.

As an example of how this plan operates, assume that an AQCR of 10,000 square mile area has baseline emissions of 40,000 tons/year of sulfur dioxide. The applicable emission ceiling in this case would be 100,000 tons/year. Assume also that existing sources are expected to reduce emissions from 40,000 to 20,000 tons/year by 1980, and that small source growth is expected to equal 10,000 tons/year. The net available emissions through 1980 would amount to 70,000 tons/year. A coal fired power plant of 1,000 megawatt capacity which meets NSPS will emit about 50,000 tons of sulfur dioxide per year. Such a plant could be located in this AQCR, but it would use a large proportion of the available emission allowance. The State would have to balance its need for electricity against other anticipated emission increases to determine if such a power plant was desirable,

V 38 I 135 JUL 16 73 XUM

if this type of plant was necessary, or if the emissions from the plant should be reduced below NSPS by applying lower sulfur coal and/or more efficient stack gas cleaning equipment.

III. Local Definition Plan

One of the major problems in defining significant deterioration is that the level at which air quality deterioration becomes "significant" is essentially subjective, and is often logically dependent upon a large number of factors which vary from location to location. Accordingly, the proposed regulations supporting this alternative plan would ensure that the rate of deterioration is minimized in all areas and requires State decision-making, with public participation, on the question of whether the deterioration resulting from particular sources would be considered "significant." In order to accomplish this, the regulations incorporate the following four features:

All major new or modified sources would be required to incorporate Best Available Control Technology, as defined previously, thus insuring that deterioration by any major source is held to the lowest practicable minimum regardless of the air quality in the surrounding area.

Any proposed source would be required to submit detailed information to the State concerning the amount and type of emissions anticipated, and the projected impact of those emissions on the air quality in the surrounding areas. The requirement for this type of information is intended to insure that adequate information is available on which to base an objective assessment regarding the significance of any resulting deterioration. Although not specifically required by the proposed regulations, it is anticipated that in many cases the State or local agency would analyze this information in relation to other sources impacting on air quality in the area. This would permit identification of existing sources which could be candidates for additional emission control capable of minimizing or offsetting the potential deterioration attributed to the proposed new source. In any event, the analysis of this type of information would insure that the decisions regarding the significance of any projected deterioration would be based upon the best information available.

The State would be required to make full disclosure of all pertinent information and solicit public participation in the determination of what constitutes significant deterioration. As a minimum, the State would serve public notice of the proposed construction or modification, would make full disclosure of source and State generated information, and would allow at least 30 days for public comment. However, the regulations for this alternative would not preclude the holding of public hearings if the proposal is of sufficient public interest. The intent of this requirement is to insure that the definition of significant deterioration is based upon all pertinent air quality data, the attitudes and goals of the affected population, and the socio-economic conditions and requirements of the affected area.

The State would then determine whether the source would create significant deterioration of air quality. The regulations would provide sufficient legal authority for all States to prohibit construction or modification which could result in significant deterioration of air quality, but pertinent information would also be submitted to the Environmental Protection Agency for review. The Administrator could disapprove the State's determination of what constitutes Best Available Control Technology, or could disapprove the procedures by which the determination of significant deterioration was made, but so long as the required procedures were followed the Administrator would not have authority to reverse the State's judgment of what constitutes significant deterioration in any specific location.

Under this alternative, sufficient information, procedures, and legal authority would be provided to make a valid determination of what constitutes significant deterioration, in the view of the affected public, and to enforce the prevention of that deterioration regardless of any unique circumstances surrounding any individual case. However, sufficient safeguards would be included to insure that a State's determination that the resulting deterioration was not significant could not be used to circumvent other requirements dealing with National Ambient Air Quality Standards, New Source Performance Standards, State emission limitations, or any other legal requirements designed to protect the quality of the ambient air.

This approach has the major advantage that the governmental units and citizens most affected by decisions on maintenance of air quality would make those decisions, based upon conditions existing at that time, thereby ensuring that local requirements and preferences with regard to matters such as land use, economic development, and use of natural resources are taken into consideration. Thus, economic growth would not be arbitrarily restricted to conform to national views on nationwide deterioration, but, rather, would be subjected to State and local decisions as to the form, direction, extent, and distribution of such growth and as to the conditions to be imposed on the construction or modification of facilities which could have a significant impact on air quality.

A somewhat modified version of this plan is currently in restricted use in portions of several States. In these cases, the States have established extremely low ambient air quality standards for selected regions within their boundaries, in most cases to protect State parks, national forests, scenic vistas, etc. This is, of course, within the rights of all States, but many States do not currently have adequate legal authority to prevent construction or modification unless the national ambient air quality standards are threatened. It would, therefore, be necessary to promulgate Federal regulations of the type presented herein to give all States the required legal authority until they can pass suitable State legislation.

Although this alternative is intuitively attractive for a variety of reasons, it is not without drawbacks. There is some justifiable concern that State and local agencies and populations could be subjected to undue pressure exerted by industries desirous of locating within a particular area, and that this pressure could cause definitions of "significant" which might not be in the best long-range interests of these populations. Additionally, the local definition plan uses what is essentially a "sliding baseline" in that deterioration is always measured relative to the current air quality. Hence, there is no control over the ultimate level of deterioration, which could progress in finite increments up to the level of the secondary standards. A final major disadvantage of this alternative is that the long range impact of deterioration is not completely restricted to the local area. The proposed regulations associated with this plan require public comment from within "the area significantly affected by the potential emissions." However, it is entirely possible that the cumulative effects of a large number of "growth-oriented" regions could have a significant impact on the air quality of neighboring "clean-air oriented" regions, and these neighboring regions would thereby lose control over their own environment. Although the feature that the State, rather than the local population, has final authority for the definition of significant tends to mitigate this concern, it nevertheless remains a problem which could lead to inequitable treatment of some areas.

IV. Area Classification Plan

One of the major problems associated with the previously discussed Air Quality Increment Plan involves the possible inequities resulting from establishment of a single air quality increment applicable nationwide. The fourth alternative proposed herein partially alleviates this problem by defining two nationwide air quality increments which would be applied to the appropriate areas of the State compatible with the long range growth patterns and development objectives associated with each of those areas. The application of this proposed alternative would be similar to that of the Air Quality Increment Plan except for the features noted herein.

The proposed regulations would require each State to identify each area of its territory as belonging to one of the two "zones" of allowable deterioration. The following table presents the proposed zones with their associated deterioration increments.

Permissible Deterioration Increments (μg/m³)

	Particulate Matter		Sulfur Dioxide		
	Annual	24 Hour	Annual	24 Hour	3 Hour
Zone I	5	15	2	5	25
Zone II	10	30	15	100	300

Deterioration above the Zone II levels would constitute, in the Administrator's judgment, a significant deterioration in most areas of the country. This level is identical to that of the Air Quality Increment Plan and, as discussed under that Plan, would permit a reasonable amount of growth potential so long as well developed air pollution control strategies are applied. This increment would provide a strong incentive for improved control technology, would prevent construction of new sources in locations conducive to higher than normal ground level concentrations, would prevent clustering of major new sources, and would require that both new and existing sources employ increasingly effective control technology in order to maintain a reasonable growth capability for the region. The proposed regulations specify that the Zone II criteria would become effective nationwide upon promulgation of these regulations.

Zone I represents an extremely stringent deterioration criteria, and application of this increment would prohibit the introductoin of even one small fossil fuel fired power plant, municipal incinerator, medium apartment complex (assuming oil heating), or any other medium scale residential or commercial development using normal emission control techniques. However, this does not necessarily mean that development would be totally prohibited: It means only that new emissions would be permitted only to the degree that current emissions are reduced. Strong incentives are therefore inherent for improved emission control technology and introduction of low-pollution development. Although Zone I could be applied to a semi-urban or urban area in which it was desired to inhibit further development; it is anticipated that Zone I would normally be applied to those ultra-clean areas such as national and state forests and parks, and other recreational areas in which it is desired to maintain essentially no deterioration of air quality.

The regulations proposed in support of this plan also contain provisions for exceptions to the required deterioration increments in special circumstances. It could be in the public interest to permit some isolated areas a higher increment in circumstances under which the resulting deterioration would not be considered significant. Each of these cases would require public hearings in the areas involved, and would require specific approval by the Administrator. It is expected that these cases would exist infrequently, but they might occur due to the unusual availability of raw materials in the area; or in order to support comprehensive, long-range development plans; or to avoid the necessity for locating relatively pollution-prone industries near populated areas where a larger deterioration increment might be available. As further insurance that the State's request for an exception is justified, the administrator would consider the extent to which the State has applied Zone I criteria as an expression of good faith efforts to comply with the intent of the proposed regulations.

The proposed regulations require that States accomplish initial zoning within six months from the date of promulgation of these regulations. Retention of the Zone II criteria in an area would be considered the norm, and the degree of public participation would be at the State's discretion. Assignment of Zone I would require that public hearings be held in the region affected due to the severe growth restrictions inherent in the Zone I criteria. If any State fails to submit the required plan, all areas of the State would remain under the Zone II criteria as assigned upon promulgation of these regulations.

Subsequent to submittal of the initial zoning plan, changes in the plan could be accomplished to accommodate changes in growth patterns and development plans; such proposed changes would be presented at public hearings in each of the affected areas.

It is important to note that the proposed regulations would not allow the Administrator to disapprove any assignment of zones made by the State so long as the required procedures are carried out. By requiring the establishment of these zones, and specifying the maximum allowable deterioration associated with each zone, it is not the Administrator's intention to establish how the land in any particular area should be used, nor to establish any particular relationship between current air quality and assigned zoning. Areas assigned to Zone I could retain an option for significant growth capability: The very stringent air quality criteria require only that any growth be restricted to a form which has a low air pollution potential. Use of the land is the prerogative of the State and local population, and hence complete flexibility is provided, consistent with prevention of significant deterioration as appropriate for each zone. In making the determinations necessary to implement this alternative, the States would be encouraged to consider many factors, including but not limited to; growth projections and local land use plans; existing land use; location of raw materials and markets; and existing constraints on land use imposed by other State, local, and Federal requirements.

Unfortunately, as with the Air Quality Increment Plan, the type of air quality data needed to accurately establish the baseline air quality for this alternative is not currently available in many clean areas of the country. It would therefore become necessary to estimate this information by use of diffusion modeling and other appropriate techniques. To eventually alleviate these problems, the plan would establish additional air quality monitoring requirements around new major sources.

Despite the data availability problems, this alternative has some very attractive features. Unlike the other ceiling plans proposed herein, this plan ensures that future developmental patterns can be based on rational planning rather than on previous growth patterns which form the basis for most other ceiling approaches. This alternative also seems superior to the "local definition" plan, in that it is not based on case-by-case local projections of growth patterns which may not be desirable from an overall point of view, but requires that the State establish long range growth patterns and goals. In essence, this plan puts emphasis on longer range strategic planning as opposed to short range case-by-case decisions. The plan also gives States the flexibility needed to meet their long range growth goals without the imposition of arbitrary constraints.

This alternative also has some drawbacks. The proposed regulations require that the State make very difficult and comprehensive decisions impacting on land use in a tight time frame. The results of these State decisions would have far reaching implications on the future of many States. There are no firm criteria which a State may use to make its decisions and as a result, the decisions would be somewhat subjective in nature. The required decisions also would force the States to exercise great care in establishing the boundaries between zones so that the effect of a source in a Zone II does not cause the air quality in a Zone I to increase more than allowed. This problem becomes more severe along State boundaries and would require cooperation among States. Nevertheless, of the available alternatives for preventing significant deterioration, this plan appears to be superior in many, if not all, respects.

Other Plans of Interest

Although the preceding plans (including variations and combinations of these) represent the more feasible alternatives for preventing significant deterioration, the Administrator has given a variety of other plans careful consideration. Two of the more interesting are based upon a volumetric emission density restriction, and application of an emission charge or penalty.

The application of a volumetric emission density restriction is the essential feature of a plan proposed by the Sierra Club. Under this plan, significant deterioration for most pollutants would be defined as either a small incremental increase, or a percentage increase in pollutant concentration, averaged either over that volume of air within one km of the source, or that ground level area within one km of the source, whichever gives the higher value. Although the impact of this criteria is highly dependent upon the instantaneous local meteorological conditions, the philosophy is essentially similar to that of more conventional air quality and emission limitation plans.

V 38 I 135 JUL 16 73 XUM

The fundamental difference is that the Sierra Club plan considers an exceptionally small area (or volume) on which to base the deterioration criteria. This requires that, in order to restrict regional deterioration to reasonable levels, the allowable increment applied to the one km baseline area must be very small. The result is that this plan would permit a large number of small sources to be uniformly distributed throughout the region, but would completely prohibit construction of conventional coal fired power plants and other major sources of the type listed in the proposed regulations, unless those sources were located in areas in which major improvements in air quality had been accomplished after the baseline level had been established. This feature would tend to drive all new major sources of air pollution into the more heavily populated sections of the country. This anomaly is the result of choosing too small an area (or volume) over which to average the emissions, and is no more a failure of the volumetric averaging technique than any technique in which emission density restrictions are applied to an excessively small area. Conversely, if too large an area is chosen, then the peak concentrations in a local area may become excessive even though total atmospheric loading is reduced. However, the volumetric averaging plan is not proposed herein primarily because the computation technique is unnecessarily complex and is only indirectly representative of the physical characteristics of pollution sources, the baseline data required (particularly for particulates) is largely nonexistent, the monitoring and control costs would be excessive, and simpler plans could be developed to achieve substantially the same results without the practical application problems inherent in the volumetric averaging concept.

A second type of plan containing interesting ramifications but which had to be rejected for practical reasons was one based on the imposition of emission charges. The general reasoning behind such a plan is that secondary NAAQS comprise adequate upper limits on pollutant concentrations, but air quality superior to those limits is desirable. The emission charge would provide a continuous incentive for sources to seek and apply emission controls to minimize their emission charges. The collective effect of these individual cost minimizations would be to maintain air quality at levels superior to NAAQS in most areas. The level of air quality maintained would be a function of the emission charge rate, the development potential of the area, and the state-of-the-art of emission control.

The major advantages of this plan are that the cost of emitting would be "internalized", i.e., it would be taken into consideration in the normal economic appraisal of plant design and location alternatives. Sources would have numerous options as to control method, cost, and degree of control from which to make the optimum choice. The state-of-the-art of emission control would be continuously advanced. Finally, the means of enforcement would be charge collection for which there is ample precedent and experience.

Unfortunately, several problems attend such a plan, particularly in view of the requirement that "significant deterioration" be prevented in any portion of any State. If significant deterioration of air quality is to be prevented by the emission charge, some relationship between the charge rate and the resultant air quality must be found. Such a relationship is not presently available. Even if this relationship were available, the emission charge rate would have to vary from place to place to offset the variation in developmental potential offered by different land areas and the variable capacity of the air to disperse waste under different meteorological and topographical conditions. But most important, an emission charge would not guarantee that significant deterioration could not take place in some portions of some States. Consequently, the emission charge, while possessing some desirable attributes, does not appear to be a practical means of preventing significant deterioration of air quality.

PROBLEMS COMMON TO ALL DETERIORATION PLANS

Jurisdictional Ambiguities—There is a potential jurisdictional problem associated with all plans proposed to prevent significant deterioration. The problem could arise whenever a source in one State is degrading the air quality of a second State. The problem is compounded when small deterioration increments or ceilings are established because a relatively small external source may "use up" a large portion of the growth potential available to the neighboring regions. The region in question would have no apparent resource, and its own growth potential would thereby be curtailed. The recent court order has established the Administrator's authority to prevent significant deterioration regardless of the source's location, but the Administrator has no criteria by which he can dictate whether the allowable deterioration should be allocated to an internal or external source. Hence, in cases such as this, any allowable deterioration increment would have to be allocated on a "first come, first served" basis, regardless of the location of the source.

De Facto Land Use Decisions—It has been pointed out previously that all currently practical plans to prevent significant deterioration essentially impose restrictions on the use of the air resource, and hence, use of land. Depending upon the plan selected, these restrictions would be imposed by local, State, or Federal decisions. However, in all cases, there is a certain amount of flexibility inherent in the regulations regarding land use, and the States are encouraged to exploit this flexibility in order to make most effective use of the available resources. This exploitation is expected to take the form of State legislation permitting State determination of the type and amount of developmental growth authorized to "use" the allowable air quality increment. Complimentary to enactment of this legislation would be long range planning actions to determine the type of growth desired, any constraints on this growth in addition to air quality deterioration constraints, and any additional means for air quality improvements which might, in turn, make possible additional growth. In the absence of such State action, it can be anticipated that the allowable deterioration increment will be used up quite rapidly in many areas, and that this use would be made on a "first come—first served" basis without regard for the longer range requirements and goals of the region. In effect, Federal promulgation of any of the alternatives proposed herein will force States to develop and implement additional land use planning activities through which the available air resource can be allocated for the optimum purposes. These activities will be actively encouraged by the Administrator, and it is planned that eventually the prevention of significant deterioration will be accomplished solely through State Implementation Plan procedures, although such SIPs would have to be in accordance with Federal guidelines.

The Impact of Urban Sprawl—This problem refers to the characteristic trend of most urban areas to spread in to the surrounding countryside thereby creating gradual air quality deterioration due to residential heating and associated small but numerous sources of emission. There is no adequate deterioration plan which can automatically accommodate this deterioration, and yet urban sprawl can use up a large portion of any allowable deterioration increment. The periodic development of emission inventories, and routine air quality sampling, will track the effect of this sprawl, but it must also be projected into the future in order to insure that its impact, in addition to the impact of new major sources, does not violate the deterioration restrictions. For this reason, it may become desirable to include requirements for growth projections in the proposed regulations in a manner similar to those of the recently promulgated complex source regulations.

The Impact of Fuel Switching—Many sources have the capability to switch among various types of fuel—i.e., natural gas, low and high sulfur oil, low and high sulfur coal, etc.—thus altering their emission levels. Although there is generally sufficient low sulfur fuel available, in conjunction with other emission reduction techniques, to attain and maintain the national standards nationwide, there is not currently sufficient fuel of this type (particularly low sulfur coal) to satisfy all potential users. Accordingly, it may become necessary for some sources in relatively clean areas to temporarily switch to higher sulfur fuel in order to make available additional low sulfur fuel for use in areas in which the ambient air quality could have an adverse impact on public health. Because pollutant emissions are approximately proportional to the sulfur content of the fuel (i.e., a switch from 1 percent to 3 percent sulfur coal would approximately triple sulfur oxides emissions) this procedure would tend to temporarily degrade air quality in clean areas. A preliminary review indicates that most plans to prevent deterioration could accommodate this temporary increase in emissions. However, it is conceivable that there may be unusual cases, as where a source might have to switch from natural gas to coal, which could not be accommodated within some proposed deterioration limits. The Administrator solicits all available information concerning cases of this type, and is interested in comments on the advisability of including variance procedures in the proposed regulations to accommodate temporary emission increases of this type.

The Right of Regional Self-Sufficiency—It is desirable that all participants in this rulemaking carefully consider the full impact of deterioration restrictions, particularly as they would influence relatively clean areas in which the allowable deterioration increments might be very small. Due impart to the threat to the NAAQS, most large urban areas can no longer provide enough electrical power to supply their own needs; their power must come from non-urban, relatively clean, areas. However, in the future it may develop that even non-urban areas will not be able to supply their own power needs due to the threat of significant deterioration. For example, Iowa can be considered as a typical agricultural State with only nominal heavy industry. It is estimated that by 1980, the rural areas of Iowa will require approximately 1,700 megawatts of additional power per year. The production of that power, with application of best available control technology and regionally available fuel, would produce approximately 160,000 tons of sulfur dioxide per year, or an approximately fifty percent increase in emissions over the 1970 levels for those areas. Any deterioration plan must consider factors such as these to insure that the impact on each individual region can be tolerated and is consistent with the public interest.

OPPORTUNITY FOR PUBLIC PARTICIPATION

The Administrator solicits widespread public involvement in all aspects of the significant deterioration issue, and interested indivduals and groups are encouraged to actively participate in this rulemaking. In order to assist in the development of objective comments and debate, the Environmental Protection Agency's Office of Public Affairs and the Regional Offices will have available sets of technical documentation summarizing types and sizes of typical sources, typical emissions, estimated costs of emission controls, breakouts of total national emissions by type and type source, distribution of current emissions by AQCR, and associated data of value in assessing the impact of alternative deterioration plans. Copies of this information will be made available to the public upon request. Requestors should reference this issue of the FEDERAL REGISTER.

There are several questions on which EPA is particularly interested in receiving public comments and relevant data. One of the most important involves the concepts of "deterioration of air quality" and "significant deterioration of air quality." With respect to the term "deterioration," the question arises as to what type of change in ambient air quality represents "deterioration." With respect to "significant deterioration," questions arise as to whether it should be interpreted in the absolute or relative sense, and whether it should be determined on a national, State, or regional basis. Attention is therefore expressly directed to, and public comment requested on, the questions of what might appropriately be considered "deterioration" and, further, what degree of deterioration might appropriately be considered "significant."

Other questions on which public comment and relevant data are particularly requested include: whether, if an Air Quality Increment Plan or Emission Limitation Plan is adopted, the specific increments or limitations proposed herein are appropriate to prevent significant deterioration without severely disrupting growth and development; whether it is necessary and appropriate to require application of best available control technology as a minimum requirement of any plan for preventing significant deterioration; and whether the proposed definition of best available technology is appropriate. EPA also requests information which would explicitly define the possible economic impact of each of the proposed alternatives. Finally, the fact that four alternatives are specifically presented does not preclude interested parties from offering others for consideration.

Public hearings on these proposals are scheduled as follows:

Washington, D.C.: August 27 and 28
Time and place to be announced.
Atlanta: September 4 and 5; 10:00 a.m.
Civic Center
395 Piedmont Avenue, N.E.
Dallas: September 5 and 6; 9:00 a.m.
Environmental Protection Agency
Suite 1000
Conference Rooms A and B
1600 Patterson Street
Denver: September 5 and 6; 9:00 a.m.
U.S. Post Office Auditorium
Room 269
1823 Stout Street
San Francisco: September 5 and 6; 9:00 a.m. to 5:00 p.m.
Hyatt Regency Hotel
Seacliff Room
Embarcadero Center

Written comments in triplicate may also be submitted to the Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attn: Mr. Padgett. All relevant comments received not later than 90 days after the date of publication of this notice will be considered. Receipt of comments will be acknowledged but substantive responses will not be provided. Comments received will be available for public inspection during normal business hours at the Office of Public Affairs, 401 M Street, SW., Washington, D.C. 20460.

These alternative amendments are being proposed pursuant to an order of the U.S. Court of Appeals for the District of Columbia Circuit in the case of Sierra Club, et al., V. Administrator of EPA, case No. 72–1528. This notice of proposed rulemaking is issued under the authority of section 301(a) of the Clean Air Act as amended (42 U.S.C. 1857, et seq.).

Dated: July 12, 1973.

ROBERT W. FRI,
Acting Administrator,
Environmental Protection Agency.

Subpart A, Part 52, Chapter I, Title 40, Code of Federal Regulations, is proposed to be amended by adding to § 52.21 a new paragraph (b) and one of the paragraphs herein designated (c), (d), (e), and (f):

§ 52.21 Significant deterioration of air quality.

(a) Subsequent to May 31, 1972, the Administrator reviewed State implementation plans to determine whether or not the plans permit or prevent significant deterioration of air quality in any portion of any State where the existing air quality is better than one or more of the secondary standards. The review indicates that State plans generally do not contain regulations or procedures specifically addressed to this problem. Accordingly, all State plans are disapproved to the extent that such plans lack procedures or regulations for preventing significant deterioration of air quality in portions of States, where air quality is now better than the secondary standards. The disapproval applies to all States listed in Subparts B through DDD of this part. Nothing in this section shall invalidate or otherwise affect the obligations of States, emission sources, or other persons with respect to all portions of plans approved or promulgated under this part.

(b) For purposes of this section:

(1) The term "baseline air quality concentration" means the maximum air quality concentrations measured or estimated in an area in which the proposed source has a significant effect representative of the year 1972 plus the estimated increase in those concentrations caused by all sources granted approval for construction prior to the date of proposal of this section in the FEDERAL REGISTER but not operating during the year 1972.

(2) The term "baseline emissions" means the annual emissions for the year 1972 plus the estimated emissions from

V 38 I 135 JUL 16 73 XUM

all sources granted approval for construction prior to the date of proposal of this section in the FEDERAL REGISTER but not operating during the year 1972.

(3) The term "potential emission rate" means the total weight rate at which sulfur dioxide or particulate matter, in the absence of any air cleaning device, would be emitted from a stationary source when such source is operated at its rated capacity. Total weight rates shall be those actually expected for a specified source but in the absence of such information, it shall be estimated on the basis of the emission factors specified in "Compilation of Air Pollution Emission Factors," Office of Air Programs Publication No. AP-42, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, February 1972.

(4) The term "air cleaning device" means any article, machine, equipment, or other contrivance, chemical or process, the use of which may eliminate, reduce or control the emission of air pollutants into the atmosphere.

(c) *Regulation for preventing significant deterioration of air quality through application of an air quality increment.* (1) This paragraph applies to sources identified below, the construction or modification of which is commenced after the date of proposal of this paragraph in the FEDERAL REGISTER.

(i) Any new or modified stationary source of a type listed below:

(*a*) Fossil-Fuel Fired Steam Electric Plants of more than 1000 million B.t.u. per hour heat input.

(*b*) Coal Cleaning Plants (thermal dryers).

(*c*) Kraft Pulp Mill Recovery Furnaces.

(*d*) Portland Cement Plants.

(*e*) Primary Zinc Smelters.

(*f*) Iron and Steel Mill Metallurgical Furnaces.

(*g*) Primary Aluminum Ore Reduction Plants.

(*h*) Primary Copper Smelters.

(*i*) Municipal Incinerators capable of charging more than 250 tons of refuse per day.

(*j*) Sulfuric Acid Plants.

(*k*) Petroleum Refineries.

(*l*) Lime Plants.

(*m*) Phosphate Rock Processing Plants.

(*n*) By-Product Coke Oven Batteries.

(*o*) Sulfur Recovery Plants.

(*p*) Carbon Black Plants (furnace process).

(ii) Any new or modified stationary source not identified in subdivision (i) of this subparagraph having a total annual potential emission rate on any premises equal to or greater than 4000 tons for any of the following pollutants:

(*a*) Particulate matter.

(*b*) Sulfur dioxide.

(*c*) Nitrogen oxides.

(*d*) Hydrocarbons.

(*e*) Carbon monoxide.

(2) No owner or operator shall commence construction or modification of a source to which this paragraph is applicable unless:

(i) The State in which the source is or will be located determines in accordance with this paragraph:

(*a*) That the effect on air quality of the source or modification of the source considered with the effect on air quality of existing, new or modified sources, will not cause the air quality to be increased above the baseline air quality concentration by more than any of the following:

(*1*) 10 $\mu g/m^3$ of particulate matter, annual geometric mean.

(*2*) 30 $\mu g/m^3$ of particulate matter, 24-hour maximum.

(*3*) 15 $\mu g/m^3$ of sulfur dioxide, annual arithmetic mean.

(*4*) 100 $\mu g/m^3$ of sulfur dioxide, 24-hour maximum.

(*5*) 300 $\mu g/m^3$ of sulfur dioxide, 3-hour maximum.

(*b*) That the source or modified portion of the source will be constructed and operated to employ best available control technology for minimizing emissions of particulate matter, sulfur dioxide, nitrogen oxides, hydrocarbons, and carbon monoxide.

(ii) The Administrator approves the State's determination under subdivision (i) of this subparagraph.

(3) In making the determinations required by subparagraph (2)(i) of this paragraph, the State shall, as a minimum, require the source to submit: Site information, plans, descriptions, specifications, and drawings showing the design of the source, calculations showing the nature and amount of emissions, a description of the manner in which the source will be operated and controlled, the cost of control, measurements or estimates of existing air quality levels, and the impact that the construction or modification will have on air quality levels and the air environment around the source.

(4)(i) In determining best available control technology, the following shall be considered:

(*a*) Reasonably available control technology as defined in Appendix B to Part 51 of this chapter,

(*b*) The process, fuels, and raw materials employed,

(*c*) The engineering aspects of the application of various types of control techniques,

(*d*) Process and fuel changes, and

(*e*) The cost of the application of the control techniques, process changes, alternative fuels, etc.

(ii) A system of control which is determined by the State and approved by the Administrator to be adequate to comply with standards of performance for new stationary sources under Part 60 of this chapter may be deemed to constitute best available control technology.

NOTE: Under the alternative definition of Best Available Control Technology, as set forth in the preamble, subdivision (iii) would be eliminated.

(iii) In the case of sources identified at subparagraph (1)(i)(*a*) of this paragraph, best available control technology for sulfur oxides shall consist, as a minimum, of a control strategy determined to be capable of complying with standards of performance for new stationary sources specified in Part 60 of this chapter. However, individual analysis of each new or modified source which considers the availability of fuel and the cost and efficiency of other or additional control strategies may result in additional control for individual plants.

(5) Subject to subdivision (x) of this subparagraph, the owner or operator of a source subject to the provisions of subparagraph (2) of this paragraph shall install, or cause to be installed, a minimum of two continuous ambient air quality monitoring instruments for sulfur dioxide and/or two intermittent ambient air quality monitoring instruments for particulate matter.

(i) The State shall specify which pollutant(s) the source shall monitor.

(ii) When source, meteorological and/or terrain conditions warrant, the State may require additional samplers above the minimum number specified in this paragraph.

(iii) Such systems shall include one site equipped to monitor wind speed and wind direction.

(iv) The instruments shall meet the performance and operating specifications of § 51.17(a)(1) of this chapter.

(v) The locations of such instruments shall be located in areas of expected maximum concentrations determined by meteorological diffusion modeling or best judgment.

(vi) The instruments shall be maintained, calibrated, and operated in accordance with the methods prescribed by the manufacturer of such instrument(s) and other procedures consistent with good engineering practice.

(vii) The owner or operator of the source subject to this paragraph shall maintain a record of all measurements required by this subparagraph. Measurement results shall be summarized monthly and reported to the State semi-annually, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1–June 30 and July 1–December 31, with the initial reporting period starting as indicated in subdivision (viii) of this subparagraph.

(viii) The continuous monitoring and recordkeeping requirements of this subparagraph shall become applicable 6 months after initial start-up of the source.

(ix) Information collected pursuant to this subparagraph shall be made available to the Administrator upon his request.

(x) The State may demonstrate to the Administrator that the existing air quality surveillance system in the area in which a source is to be constructed or modified meets the requirements of this subparagraph.

(6)(i) Prior to making the determinations required by subparagraph (2)(i) of this paragraph, the State shall provide opportunity for public comment on the information submitted by the owner or operator and on the State's analysis of the effect of such construction or modification on ambient air quality. Opportunity for public comment shall include, as a minimum:

(*a*) Availability for public inspection, in at least one location in the region affected, of the information submitted by the owner or operator, and the State or local agency's analysis of the effect on air quality,

(*b*) a 30-day period for submittal of public comment, and

(*c*) a notice by prominent advertisement in the region affected of the location of the source information and analysis specified in subparagraphs (2)(i), and (3) of this paragraph.

(ii) Within 90 days from an owner or operator's submission of the information required under subparagraph (3) of this paragraph, the State shall publicly announce and transmit in writing to the Administrator its determinations under subparagraph (2)(i) of this paragraph, together with:

(*a*) Copies of all information prepared by the State under subparagraph (2)(i) of this paragraph; (*b*) a copy of the public notices issued in conformity with subdivision (i) of this subparagraph and (*c*) a statement that the State has complied with the requirements of this paragraph.

(7)(i) The Administrator will notify the State of his determination and the reasons for any disagreement under subparagraph (2)(ii) of this paragraph no later than 25 days following the State's submission of the information required under subparagraph (6)(ii) of this paragraph.

(ii) The State will notify the owner or operator in writing of the approval or denial to construct or modify a source within 120 days of the owner or operator's submission of the information required under subparagraph (3) of this paragraph.

(8) The Administrator may cancel an approval to construct if the construction is not begun within two years from the date of issuance, or if during the construction, work is suspended for one year.

(9) Approval to construct or modify shall not relieve any owner or operator of the responsibility to comply with all local, State, or Federal regulations which are part of the applicable plan.

(d) *Regulation for preventing significant deterioration of air quality through application of an emission ceiling.* (1) This paragraph applies to sources identified below, the construction or modification of which is commenced in any Air Quality Control Region (AQCR) classified Priority Ia or III with respect to sulfur dioxide and/or particulate matter, after the date of proposal of this paragraph in the FEDERAL REGISTER.

(i) Any new or modified stationary source of a type listed below:

(*a*) Fossil-Fuel Fired Steam Electric Plants of more than 1000 million B.t.u. per hour heat input.

(*b*) Coal Cleaning Plants (thermal dryers).

(*c*) Kraft Pulp Mill Recovery Furnaces.

(*d*) Portand Cement Plants.

(*e*) Primary Zinc Smelters.

(*f*) Iron and Steel Mill Metallurgical Furnaces.

(*g*) Primary Aluminum Ore Reduction Plants.

(*h*) Primary Copper Smelters.

(*i*) Municipal Incinerators capable of charging more than 250 tons of refuse per day.

(*j*) Sulfuric Acid Plants.

(*k*) Petroleum Refineries.

(*l*) Lime Plants.

(*m*) Phosphate Rock Processing Plants.

(*n*) By-Product Coke Oven Batteries.

(*o*) Sulfur Recovery Plants.

(*p*) Carbon Black Plants (furnace process).

(ii) Any new or modified stationary source not identified in subdivision (i) of this subparagraph having a total annual potential emission rate on any premises equal to or greater than 4000 tons for any of the following pollutants:

(*a*) Particulate matter.

(*b*) Sulfur dioxide.

(*c*) Nitrogen oxides.

(*d*) Hydrocarbons.

(*e*) Carbon monoxide.

(2) No owner or operator shall commence construction or modification of a source to which this paragraph is applicable unless:

(i) The State in which the source is or will be located determines in accordance with this paragraph:

(*a*) That the source or modified portion of the source considered with the cumulative effect on emission levels of all existing, new or modified stationary sources will not cause the maximum allowable emissions as determined by subparagraph (9) of this paragraph to be exceeded.

(*b*) That the source or modified portion of the source will be constructed and operated to employ best available control technology for minimizing emissions of particulate matter, sulfur dioxide, nitrogen oxides, hydrocarbons, and carbon monoxide.

(ii) The Administrator approves the State's determination under subdivision (i) of this subparagraph.

(3) In making the determinations required by subparagraph (2)(i) of this paragraph, the State shall, as a minimum, require the source to submit: Site information, plans, descriptions, specifications, and drawings showing the design of the source, calculations showing the nature and amount of emissions, a description of the manner in which the source will be operated and controlled, and the cost of control.

(4)(i) In determining best available control technology, the following shall be considered:

(*a*) Reasonably available control technology as defined in Appendix B to Part 51 of this chapter,

(*b*) The process, fuels, and raw materials employed,

(*c*) The engineering aspects of the application of various types of control techniques,

(*d*) Process and fuel changes, and

(*e*) The cost of the application of the control techniques, process changes, alternative fuels, etc.

(ii) A system of control which is determined by the State and approved by the Administrator to be adequate to comply with standards of performance for new stationary sources under Part 60 of this chapter may be deemed to constitute best available control technology.

(iii) In the case of sources identified at subparagraph (1)(i)(*a*) of this paragraph, best available control technology for sulfur oxides shall consist, as a minimum, of a control strategy determined to be capable of complying with standards of performance for new stationary sources specified in Part 60 of this chapter. However, individual analysis of each new or modified source which considers the availability of fuel and the cost and efficiency of other or additional control strategies may result in additional control for individual plants.

NOTE: Under the alternative definition of Best Available Control Technology, as set forth in the preamble, subdivision (iii) would be eliminated.

(5)(i) Prior to making the determinations required by subparagraph (2)(i) of this paragraph, the State shall provide opportunity for public comment on the information submitted by the owner or operator and on the agency's review of such information. Opportunity for public comment shall include, as a minimum:

(*a*) Availability for public inspection, in at least one location in the region affected, of the information submitted by the owner or operator, and the State or local agency's analysis of such information.

(*b*) A 30-day period for submittal of public comment, and

(*c*) A notice by prominent advertisement in the region affected of the location of the source information and analysis specified in subparagraphs (2)(i), and (3) of this paragraph.

(ii) Within 60 days from an owner or operator's submission of the information required under subparagraph (3) of this paragraph, the State shall also publicly announce and transmit in writing to the Administrator its determinations under subparagraph (2)(i) of this paragraph, together with:

(*a*) A copy of the public hearing notices issued in conformity with subdivision (i) of this subparagraph and

(*b*) A statement that the State has complied with the requirements of this paragraph.

(6)(i) The Administrator will notify the State of his determination and reasons for any disagreement under subparagraph (2)(ii) of this paragraph no later than 25 days following the State's submission of the information required under subparagraph (5)(ii) of this paragraph. (ii) The State will notify the

V 38 135 JUL 16 73 XUM

owner or operator in writing of the approval or denial to construct or modify a source within 90 days of an owner or operator's submission of the information required under subparagraph (3) of this paragraph.

(7) The Administrator may cancel an approval to construct if the construction is not begun within two years from the date of issuance, or if during the construction, work is suspended for one year.

(8) Approval to construct or modify shall not relieve any owner or operator of the responsibility to comply with all local, State, or Federal regulations which are part of the applicable plan.

(9) The maximum allowable emissions for an Air Quality Control Region shall be the following:

(i) For particulate matter the product of the area (square miles) for an AQCR and 3 tons of particulate matter/year/square mile or 120 percent of the baseline emissions for particulate matter, whichever is greater.

(ii) For sulfur oxides the product of the area (square miles) of an AQCR and 10 tons of sulfur dioxide/year/square mile or 120 percent of the baseline emissions for sulfur dioxide, whichever is greater.

(10) The State shall make available to the Administrator upon his request:

(i) The baseline emission inventory for particulate matter and sulfur dioxide, and

(ii) An annually updated emission inventory for each affected AQCR for all pollutants to which this paragraph is applicable.

(e) *Regulation for preventing significant deterioration of air quality through a local definition of significant deterioration.* (1) This paragraph applies to sources identified below, the construction or modification of which is commenced after the date of proposal of this paragraph in the FEDERAL REGISTER.

(i) Any new or modified stationary source of a type listed below:

(*a*) Fossil-Fuel Fired Steam Electric Plants of more than 1000 million B.t.u. per hour heat input.

(*b*) Coal Cleaning Plants (thermal dryers).

(*c*) Kraft Pulp Mill Recovery Furnaces.

(*d*) Portland Cement Plants.

(*e*) Primary Zinc Smelters.

(*f*) Iron and Steel Mill Metallurgical Furnaces.

(*g*) Primary Aluminum Ore Reduction Plants.

(*h*) Primary Copper Smelters.

(*i*) Municipal Incinerators capable of charging more than 250 tons of refuse per day.

(*j*) Sulfuric Acid Plants.

(*k*) Petroleum Refineries.

(*l*) Lime Plants.

(*m*) Phosphate Rock Processing Plants.

(*n*) By-Product Coke Oven Batteries.

(*o*) Sulfur Recovery Plants.

(*p*) Carbon Black Plants (furnace process).

(ii) Any new or modified stationary source not identified in subdivision (i) of this subparagraph having a total annual potential emission rate on any premises equal to or greater than 4000 tons for any of the following pollutants.

(*a*) Particulate matter.

(*b*) Sulfur dioxide.

(*c*) Nitrogen oxides.

(*d*) Hydrocarbons.

(*e*) Carbon monoxide.

(2) No owner or operator shall commence construction or modification of a source to which this paragraph is applicable unless:

(i) The State in which the source is or will be located determines in accordance with this paragraph:

(*a*) That the source or modified portion of the source will be constructed and operated to employ best available control technology for minimizing emissions of particulate matter, sulfur dioxide, nitrogen oxides, hydrocarbons, and carbon monoxide.

(*b*) That particulate matter and sulfur dioxide emissions from the source when controlled by best available control technology will not cause significant deterioration in air quality;

(ii) The Administrator approves the State's determination under subdivision (i) (*a*) of this subparagraph.

(iii) The Administrator approves the procedure employed by the State in making the determination required by subdivision (i) (*b*) of this subparagraph.

(3) No owner or operator shall operate a source to which this paragraph applies unless the emission control system determined to constitute best available control technology and approved by the Administrator under this paragraph is fully installed and properly functioning.

(4) No determination or approval under this paragraph shall relieve any source from compliance with any local, State or Federal requirement which is part of the implementation plan, including any standard of performance under Part 60 of this chapter.

(5) (i) In determining best available control technology, the following shall be considered:

(*a*) Reasonably available control technology as defined in Appendix B to Part 51 of this chapter,

(*b*) The process, fuels, and raw material employed,

(*c*) The engineering aspects of the application of various types of control techniques,

(*d*) Process and fuel changes, and

(*e*) The cost of the application of the control techniques, process changes, alternative fuels, etc.

(ii) Except as provided in subdivision (iii) of this subparagraph a system of control which is determined by the State and approved by the Administrator to be adequate to comply with standards of performance for new stationary sources under Part 60 of this chapter may be deemed to constitute best available control technology.

(iii) In the case of sources identified at subparagraph (1) (i) (*a*) of this paragraph, best available control technology for sulfur oxides shall consist, as a minimum, of a control strategy determined to be capable of complying with standards of performance for new stationary sources specified in Part 60 of this chapter. However, individual analysis of each new or modified source which considers the availability of fuel and the cost and efficiency of other or additional control strategies may result in additional control for individual plants.

NOTE: Under the alternative definition of Best Available Control Technology, as set forth in the preamble, subdivision (iii) would be eliminated.

(6) In making the determinations required by subparagraph (2) (i) of this paragraph, the State shall, as a minimum, require the source to submit: site information, plans, descriptions, specifications, and drawings showing the design of the source, calculations showing the nature and amount of emissions, a description of the manner in which the source will be operated and controlled, the cost of control, an estimate of existing air quality levels, and the impact that the construction or modification will have on air quality levels and the air environment around the source.

(7) (i) Prior to making the determinations required by subparagraph (2) (i) of this paragraph, the State shall provide opportunity for public comment on the information submitted by the owner or operator and on the agency's analysis of the effect of such construction or modification on ambient air quality. Opportunity for public comment shall include, as a minimum:

(*a*) Availability for public inspection, in at least one location in the region affected, of the information submitted by the owner or operator, and the State or local agency's analysis of the effect on air quality.

(*b*) A 30-day period for submittal of public comment, and

(*c*) A notice by prominent advertisement in the region affected of the location of the source information and analysis specified in subparagraphs (2) (i), and (3) of this paragraph.

(ii) Within 90 days from an owner or operator's submission of the information required under subparagraph (3) of this paragraph, the State shall also publicly announce and transmit in writing to the Administrator its determinations under subparagraph (2) (i) of this paragraph, together with: (*a*) copies of all information prepared by the State under subparagraph (2) (i) of this paragraph; (*b*) a copy of the public notices issued in conformity with subdivision (i) of this subparagraph and (*c*) a statement that the State has complied with the requirements of this paragraph.

(8) (i) The Administrator will notify the State of his determination and reasons for any disagreement under subparagraph (2) (ii) of this paragraph no later than 25 days following the State's submission of the information required under subparagraph (6) (ii) of this paragraph.

(ii) The State will act within 120 days on an owner or operator's submission of the information required under subparagraph (6) of this paragraph and will notify the owner or operator in writing of the approval or denial to construct or modify a source.

(9) The Administrator may cancel an approval to construct if the construction is not begun within two years from the date of issuance, or if during the construction, work is suspended for one year.

(f) *Regulation for preventing significant deterioration of air quality through application of area classification.* (1) This paragraph applies to sources identified below, the construction or modification of which is commenced after the date of proposal of this paragraph in the FEDERAL REGISTER.

(i) Any new or modified stationary source of a type listed below:

(*a*) Fossil-Fuel Fired Steam Electric Plants of more than 1000 million B.t.u. per hour heat input.

(*b*) Coal Cleaning Plants (thermal dryers).

(*c*) Kraft Pulp Mill Recovery Furnaces.

(*d*) Portland Cement Plants.

(*e*) Primary Zinc Smelters.

(*f*) Iron and Steel Mill Metallurgical Furnaces.

(*g*) Primary Aluminum Ore Reduction Plants.

(*h*) Primary Copper Smelters.

(*i*) Municipal Incinerators capable of charging more than 250 tons of refuse per day.

(*j*) Sulfuric Acid Plants.

(*k*) Petroleum Refineries.

(*l*) Lime Plants.

(*m*) Phosphate Rock Processing Plants.

(*n*) By-Product Coke Oven Batteries.

(*o*) Sulfur Recovery Plants.

(*p*) Carbon Black Plants (furnace process).

(ii) Any new or modified stationary source not identified in subdivision (i) of this subparagraph having a total annual potential emission rate on any premises equal to or greater than 4000 tons for any of the following pollutants:

(*a*) Particulate matter.

(*b*) Sulfur dioxide.

(*c*) Nitrogen oxides.

(*d*) Hydrocarbons.

(*e*) Carbon monoxide.

(2) For purposes of this paragraph areas of a State classified as Zone I or Zone II shall be limited to increases in pollutant concentrations shown below:

AREA CLASSIFICATION

Pollutant	Zone I	Zone II
Particulate matter:		
Annual geometric mean	5	10
24-hour maximum	10	30
Sulfur dioxide:		
Annual arithmetic mean	2	15
24-hour maximum	5	100
3-hour maximum	25	300

(3) (i) All areas of all States are classified as Zone II as of the effective date of this regulation.

(ii) The State may, within six (6) months subsequent to the effective date of this regulation:

(*a*) Submit to the Administrator, after a public hearing has been held, a designation showing certain areas of the State which are classified Zone I.

(*b*) Submit for the Administrator's approval plans showing certain limited areas of the State which may be allowed to increase concentrations of particulate matter and sulfur dioxide up to the national ambient air quality standards provided that:

(*1*) Public hearings are held,

(*2*) Appropriate documentation is submitted to justify such a request. This documentation shall include an explanation of the special characteristics of the area which demonstrates why this area should be allowed to increase in concentration up to the national standard. This explanation shall include such materials as developmental plans, location of raw materials such as mineral deposits, markets, growth and economic projections. In addition, the State must demonstrate that they considered classifying as Zone I areas of he State of recreational, ecological, and scenic value.

(4) No owner or operator shall commence construction or modification of a source to which this paragraph is applicable unless:

(i) The State in which the source is or will be located determines in accordance with this paragraph:

(*a*) That the effect on air quality concentrations of the source or modification considered with the effect on air quality concentrations of all other existing, new, and modified sources will not cause the baseline air quality concentration in any zone of the State to be increased above the limits shown in subparagraph (2) of this paragraph.

(*b*) That the source or modified portion of the source will be constructed and operated to employ best available control technology for minimizing emissions of particulate matter, sulfur dioxide, nitrogen oxides, hydrocarbons, and carbon monoxide.

(ii) The Administrator shall approve the State's determination under subdivision (i) of this paragraph.

(5) In makng the determinations required by subparagraphs (4) (i) of this paragraph, the State shall, as a minimum, require the source to submit: Site information, plans, descriptions, specifications, and drawings showing the design of the source, calculations showing the nature and amount of emissions, a description of the manner in which the source will be operated and controlled, the cost of control, an estimate of existing air quality levels, and the impact that the construction or modification will have on air quality levels and the air environment around the source.

(6) (i) In determining best available control technology, the following shall be considered:

(*a*) Reasonably available control technology as defined in Appendix B to Part 51 of this chapter,

(*b*) The process, fuels, and raw materials employed.

(*c*) The engineering aspects of the application of various types of control techniques,

(*d*) Process and fuel changes, and

(*e*) The cost of the application of the control techniques process changes, alternative fuels, etc.

(ii) A system of control which is determined by the State and approved by the Administrator to be adequate to comply with standards of performance for new stationary sources under Part 60 of this chapter may be deemed to constitute best available control technology.

(iii) In the case of sources identified at subparagraph (1) (i) (*a*) of this paragraph, best available control technology for sulfur oxides shall consist, as a minimum, of a control strategy determined to be capable of complying with standards of performance for new stationary sources specified in Part 60 of this chapter. However, individual analysis of each new or modified source which considers the availability of fuel and the cost and efficiency of other or additional control strategies may result in additional control for individual plants.

NOTE: Under the alternative definition of Best Available Control Technology, as set forth in the preamble, subdivision (iii) would be eliminated.

(7) The owner or operator of a source subject to the provisions of subparagraph (4) of this paragraph shall install, or cause to be installed, a minimum of two continuous ambient air quality monitoring instruments for sulfur dioxide and/or two intermittent ambient air quality monitoring instruments for particulate matter.

(i) The State shall specify which pollutant(s) the source shall monitor.

(ii) When source, meteorological and/or terrain conditions warrant, the State may require additional samplers above the minimum number specified in this paragraph.

(iii) Such systems shall include one site equipped to monitor wind speed and wind direction.

(iv) The instruments shall meet the performance and operating specifications of § 51.17(a) (1) of this chapter.

(v) The locations of such instruments shall be located in areas of expected maximum concentrations determined by meterological diffusion modeling or best judgment or in any other area specified by the State.

(vi) The instruments shall be maintained, calibrated, and operated in accordance with the methods prescribed by the manufacturer of such instrument(s) and other procedures consistent with good engineering practice.

(vii) The owner or operator of the source subject to this paragraph shall maintain a record of all measurements required by this subparagraph. Measurement results shall be summarized monthly and reported to the State semi-annually, and shall be submitted within 45 days after the end of the reporting period. Reporting periods are January 1–June 30, July 1–December 31, with the

V 38 135 JUL 16 73 XUM

initial reporting period starting as indicated in subdivision (viii) of this subparagraph.

(viii) The continuous monitoring and recordkeeping requirements of this subparagraph shall become applicable six months after initial start-up of the source.

(ix) Information collected pursuant to this subparagaraph shall be made available to the Administrator upon his request.

(x) The State may demonstrate to the Administrator that the existing air quality surveillance system in the area in which the source is to be constructed or modified meets the requirements of this subparagraph.

(8) (i) Prior to maikng the determinations required by subparagraphs (4) (i) of this paragraph, the State shall provide opportunity for public comment on the information submitted by the owner or operator and on the agency's analysis of the effect of such construction or modification on ambient air quality. Opportunity for public comment shall include, as a minimum:

(*a*) Availability for public inspection, in at least one location in the region affected, of the information submitted by the owner or operator, and the State or local agency's analysis of the effect on air quality.

(*b*) A 30-day period for submittal of public comment, and

(*c*) A notice by prominent advertisement in the region affected of the location of the source information and analysis specified in subparagraph (4) (i) of this paragraph.

(ii) Within 90 days from an owner or operator's submission of the information required under subparagraph (5) of this paragraph, the State shall also publicly announce and transmit in writing to the Administrator its determination under subparagraph (4) (i) of this paragraph, together with:

(*a*) Copies of all information prepared by the State under subparagraph (4) (i) of this paragraph,

(*b*) A copy of the public notices issued in conformity with subdivision (1) of this subparagraph, and

(*c*) A statement that the State has complied with the requirements of this paragraph.

(9) (i) The Administrator will notify the State of his determination and reasons for any disagreement under subparagraph (4) (ii) of this paragraph no later than 25 days following the State's submission of the information required under subparagraph (8) (ii) of this paragraph. (ii) The State will notify the owner or operator in writing of the approval or denial to construct or modify a source within 120 days of the owner or operator's submission of the information required under subparagraph (5) of this paragraph.

(10) The Administrator may cancel an approval to construct if the construction is not begun within two years from the date of issuance, or if the construction work is suspended for one year.

(11) Approval to construct or modify shall not relieve any owner or operator of the responsibility to comply with all local, State, or Federal regulations which are part of the applicable plan.

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

CAPTIVE NATIONS WEEK, 1973—Presidential proclamation 19007

ENVIRONMENT—Justice Department provides for public comment on proposed judgments against discharge of pollutants 19029

AIRCRAFT EMISSIONS—
EPA standards for control of air pollution 19087
EPA proposed standards for in-use aircraft after 1–1–83; comments by 9–17–73 19050

PESTICIDES—EPA specifications for Bacillus Thuringiensis; effective 7–17–73 19045

SMOKING ON AIRCRAFT—FAA proposal withdrawn 19048

NEW ANIMAL DRUGS—
FDA approves use of copper naphthenate solution; effective 7–17–73 19025
FDA notice of opportunity for hearing on Led-O-San; requests by 8–16–73 19059

FOOD ADDITIVES—FDA provides for use of certain substances used in manufacture of polyolefin plastics; effective 7–17–73 19025

INVESTIGATORY RECORDS—Justice Department policy regarding criteria for discretionary access 19029

OCCUPATIONAL SAFETY—OSHA regulations on selection of fire extinguishers; effective 8–17–73 19030

NUCLEAR POWER PLANTS—AEC amends fracture toughness and surveillance program requirements; effective 8–16–73 19012

BANKS AND BANKING—
FRS amends discount rates 19016
FHLBB proposals on lending area restrictions (2 documents); comments by 8–15–73 ..... 19051, 19052

MULTIENGINE AIRCRAFT—FAA clarifies certain operational rules; effective 8–16–73 19024

POSTAL SERVICE—Regulations on packaging, postage meters, insured mail indemnity claims, and rural mailboxes (4 documents) 19030, 19033, 19041

PEANUTS—USDA quality regulations for 1973 crop 19054

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 3—The President

PROCLAMATION 4229

Captive Nations Week, 1973

By the President of the United States of America

A Proclamation

As a nation we seek no imposition of our beliefs. But as human beings, we must always keep alive the hope that our great heritage of freedom will one day be enjoyed throughout the world.

As we make progress toward world peace and security, let us continue to show our sympathies for others who aspire to liberty and self-determination. In support of this sentiment, the Eighty-Sixth Congress on July 17, 1959, by a joint resolution, authorized and requested the President to proclaim the third week in July in each year as Captive Nations Week.

NOW, THEREFORE, I, RICHARD NIXON, President of the United States of America, do hereby designate the week beginning July 15, 1973, as Captive Nations Week.

I call upon the people of the United States to observe this week with appropriate ceremonies and activities, and I urge rededication to the high purpose of individual liberty for all men.

IN WITNESS WHEREOF, I have hereunto set my hand this thirteenth day of July, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America the one hundred ninety-eighth.

Richard Nixon

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

PART 947—IRISH POTATOES GROWN IN MODOC AND SISKIYOU COUNTIES IN CALIFORNIA AND IN ALL COUNTIES IN OREGON EXCEPT MALHEUR COUNTY

Minimum Quality Standards and Inspection Requirements

This regulation, designed to promote orderly marketing of Oregon-California potatoes, imposes minimum quality standards and requires inspection of fresh shipments to keep low quality potatoes from being shipped to consumers.

Notice of rulemaking with respect to a proposed handling regulation to be made effective under Marketing Agreement No. 114 and Order No. 947, both as amended (7 CFR Part 947), regulating the handling of Irish potatoes grown in the production area defined therein, was published in the FEDERAL REGISTER July 2, 1973 (38 FR 17500). This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

The notice afforded interested persons an opportunity to file written data, views, or arguments pertaining thereto not later than July 9, 1973. None was filed.

Findings. After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice which was recommended by the Oregon-California Potato Committee, it is hereby found and determined that this handling regulation, as hereinafter set forth, will tend to effectuate the declared policy of the act.

The grade, size, quality, maturity and pack requirements as provided herein are necessary to prevent potatoes of quality or undesirable sizes from being distributed into fresh market channels. They will also provide consumers with good quality potatoes consistent with the overal quality of the crop, and standardize the quality of the potatoes shipped from the production area in order to provide the consumer with a more acceptable product.

Exceptions are provided to certain of these requirements to recognize special situations in which such requirements would be inappropriate or unreasonable.

A specified quantity of potatoes may be handled without regard to maturity requirements in order to permit growers to make test diggings without loss of the potatoes so harvested.

Shipments may be made to certain special purpose outlets without regard to minimum grade, size, cleanliness, and maturity requirements, provided that safeguards are used to prevent such potatoes from reaching unauthorized outlets.

Shipments for use as livestock feed within the production area or to specified adjacent areas are exempt; a limit to the destinations of such shipments is provided so that their use for the purpose specified may be reasonably assured. Shipments of potatoes between Districts 2 and 4 for planting, grading, and storing are exempt from requirements because these two areas have no natural division. Other districts are more clearly separated and do not have this problem. For the same reason, potatoes grown in District 5 may be shipped without regard to the aforesaid requirements to specified locations in Idaho, Washington, and Malheur County, Oregon, for grading and storing. Since no purpose would be served by regulating potatoes used for charity purposes, such shipments are exempt. Exemption of potatoes for most processing uses is mandatory under the legislative authority for this part and therefore shipments to processing outlets are unregulated.

Requirements for export shipments differ from those for domestic markets; while high quality standards are desired in foreign outlets, smaller sizes are more acceptable. Therefore, different requirements for export shipments are provided.

Inspection requirements are waived in certain portions of District 4 because the area is remote from inspection facilities and this requirement would cause unreasonable hardship to growers in the area.

It is hereby found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that shipments of potatoes grown in the production area are currently being marketed and the regulation should become effective at the time herein provided to maximize the benefits to producers and consumers. The Oregon-California Potato Committee, after due notice, held an open meeting June 13, 1973, to consider recommendations for a handling regulation, and interested persons were afforded an opportunity to submit their views at this meeting; information regarding the provisions of the recommendations by the committee, which are similar to those in effect during the previous season, has been disseminated among the growers and handlers of potatoes in the production area; and compliance with this section will not require any special preparation of potato sorting and packing equipment on the part of handlers subject thereto which cannot be completed on or before the effective time hereof.

Termination of regulations. Limitation of shipments § 947.331 effective July 24, 1972, through October 15, 1973 (37 FR 14754–14756) shall be terminated upon the effective date of this section.

§ 947.332 Handling regulation.

During the period July 18, 1973, through October 15, 1974, no person shall handle any lot of potatoes unless such potatoes meet the requirements of paragraphs (a), (b), (c), (d), (e), and (i) of this section, or unless such potatoes are handled in accordance with paragraphs (f), (g), (h), and (j) of this section.

(a) *Grade requirements.* All varieties—U.S. No. 2, or better grade: Except that potatoes designated U.S. Commercial shall meet all of the requirements and tolerances of U.S. No. 1, except that they may be no more than "slightly dirty."

(b) *Size requirements.* All varieties—2 inches minimum diameter, or 4 ounces minimum weight: *Provided,* That U.S. No. 1 potatoes for export may be 1½ inches minimum diameter.

(c) *Cleanliness requirements.* All varieties and grades—As required in the United States Standards for Grades of Potatoes, except that U.S. Commercial may be no more than "slightly dirty."

(d) *Maturity (skinning) requirements.* (1) All varieties—no more than "moderately skinned."

(2) Not to exceed a total of 100 hundredweight of potatoes may be handled any seven day period without meeting these maturity requirements. Prior to shipment of potatoes exempt from the above maturity requirements, the handler shall obtain from the committee a Certificate of Privilege.

(e) *Pack.* Potatoes packed in 50 pound cartons must be U.S. No. 1 or better grade.

(f) *Special purpose shipments.* The minimum grade, size, cleanliness, pack, and maturity requirements set forth in paragraphs (a), (b), (c), (d), and (e) of this section shall not be applicable to shipments of potatoes for any of the following purposes.

(1) Certified seed, subject to applicable safeguard requirements of paragraph (g) of this section.

V 38 1 136 JUL 17 73 XUM

(2) Livestock feed: *Provided*, That potatoes may not be handled for such purposes if destined to points outside of the production area, except that shipments to the Counties of Benton, Franklin and Walla Walla in the State of Washington and to Malheur County, Oregon, may be made, subject to the safeguard provisions of paragraph (g) of this section.

(3) Planting: *Provided*, That potatoes may not be shipped for this purpose to points outside of the district where grown, except that potatoes grown in District No. 2 or District No. 4 may be shipped between those two districts.

(4) Grading or storing, under the following provisions:

(i) Between districts within the production area for grading or storing if such shipments meet the safeguard requirements of paragraph (g) of this section.

(ii) Potatoes grown in District No. 2 or District No. 4 may be shipped for grading or storing between those two districts without regard to the safeguard requirements of paragraph (g) of this section.

(iii) Potatoes grown in District No. 5 may be shipped for grading and storing to points in the Counties of Adams, Benton, Franklin and Walla Walla in the State of Washington, or to Malheur County, Oregon, subject to the safeguard provisions of paragraph (g) of this section.

(5) Charity: *Provided*, That shipments for charity may not be resold if they do not meet the requirements of the marketing order: *And further provided*, That shipments in excess of 5 hundredweight per charitable organization shall be subject to the safeguard provisions of paragraph (g) of this section.

(6) Starch manufacture.

(7) Canning, freezing, prepeeling, and "other processing," as hereinafter defined (including storage for such purposes).

(g) *Safeguards.* (1) Each handler making shipments of certified seed outside the district where grown pursuant to subparagraph (1), of paragraph (f) of this section shall obtain from the committee a Certificate of Privilege, and shall furnish a report of shipments to the committee on forms provided by it.

(2) Each handler making shipments of potatoes pursuant to paragraphs (f) (2), (4) (i), (4) (iii), and (5) of this section shall obtain a Certificate of Privilege from the committee, and shall:

(i) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(ii) At the time of applying to the committee for a Certificate of Privilege, or promptly thereafter furnish the committee with a receiver's or buyer's certification that the potatoes so handled are to be used only for the purpose stated in the application and that such receiver will complete and return to the committee such periodic receiver's reports that the committee may require;

(iii) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(iv) Bill each shipment directly to the applicable receiver.

(3) Each handler making shipments pursuant to paragraph (f) (7) of this section may ship such potatoes to persons or firms designated as manufacturers of potato products by the committee and shall:

(i) First apply to the committee for and obtain a Certificate of Privilege to make shipments for processing;

(ii) Make shipments only to those firms whose names appear on the committee's current list of approved manufacturers of potato products;

(iii) Upon request by the committee, furnish reports of each shipment pursuant to the applicable Certificate of Privilege;

(iv) Mail to the office of the committee a copy of the bill of lading for each Certificate of Privilege shipment promptly after the date of shipment;

(v) Bill each shipment directly to the applicable processor.

(4) Each receiver of potatoes for processing pursuant to paragraph (f) of this section shall:

(i) Complete and return an application form for listing as a manufacturer of potato products;

(ii) Certify to the committee and to the Secretary that potatoes received from the production area for processing will be used for such purpose and will not be placed in fresh market channels;

(iii) Report on shipments received as the committee may require and the Secretary approve.

(h) *Minimum quantity exemption.* Any person may handle not more than 19 hundredweight of potatoes on any day without regard to the inspection requirements of § 947.60 and to the assessment requirements of § 947.41 of this part: *Provided*, That no potatoes may be handled pursuant to this exemption which do not meet the requirements of paragraphs (a), (b), (c), and (d) of this section. This exemption shall not apply to any part of a shipment which exceeds 19 hundredweight.

(i) *Inspection.* (1) Except when relieved by paragraphs (f) or (h) of this section, or by subparagraph (2) of this paragraph, no person shall handle potatoes without first obtaining inspection from an authorized representative of the Federal-State Inspection Service.

(2) Shipments originating in Modoc or Siskiyou Counties of California, from points over 40 airline miles from Merrill, Oregon, are not required to obtain Federal-State inspection: *Provided*, That shippers agree to meet safeguard procedures of the committee.

(3) For the purpose of operation under this part, unless exempted from inspection by the provisions of this section, each required inspection certificate is hereby determined, pursuant to § 947.60 (c), to be valid for a period of not to exceed 14 days following completion of inspection as shown on the certificate. The validity period of an inspection certificate covering inspected and certified potatoes that are stored in mechanically refrigerated storage within 14 days of the inspection shall be 14 days exclusive of the number of days that the potatoes were held in refrigerated storage.

(4) Any lot of potatoes previously inspected pursuant to § 947.60(b) is not required to have additional inspection under § 947.60(b) after regrading, resorting, or repacking such potatoes, if the inspection certificate is valid at the time of such regrading, resorting, or repacking the potatoes.

(j) *Definitions.* (1) The terms "U.S. No. 1," "U.S. Commercial," "U.S. No. 2," and "moderately skinned" shall have the same meaning as when used in the U.S. Standards for Potatoes (§§ 51.1540–51.1566 of this title as amended February 5, 1972, (37 FR 2745)) including the tolerances set forth therein.

(2) The term "slightly dirty" means potatoes that are not damaged by dirt.

(3) The term "prepeeling" means potatoes which are clean, sound, fresh tubers prepared commercially in a prepeeling plant by washing, removing the outer skin or peel, trimming, and sorting preparatory to sale in one or more of the styles of peeled potatoes described in § 52.2422 United States Standards for Grades of Peeled Potatoes (§§ 52.2421–52.2433 of this title).

(4) The term "other processing" has the same meaning as the term appearing in the act and includes, but is not restricted to, potatoes for dehydration, chips, shoestrings, or starch, and flour. It includes only that preparation of potatoes for market which involves the application of heat or cold to such an extent that the natural form or stability of the commodity undergoes a substantial change. The act of peeling, cooling, slicing, or dicing, or the application of material to prevent oxidation does not constitute "other processing."

(5) Other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 114, as amended, and this part.

(Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674)

Dated July 12, 1973, to become effective July 18, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-14580 Filed 7-16-73;8:45 am]

PART 980—VEGETABLES: IMPORT REGULATIONS: ONIONS

Establishment of Minimum Quality Requirements

This regulation will establish minimum quality requirements for imported onions.

Notice of rulemaking regarding proposed requirements on the importation of onions into the United States to be made effective under section 8e of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 608e–1), was published in the June 29, 1973, FEDERAL REGISTER (38 FR 17238).

The notice afforded interested persons an opportunity to file data, views, or arguments in regard thereto not later than July 6, 1973. None was filed.

Section 8e of the act provides that whenever a Federal marketing order is in effect for onions, the importation of onions shall be prohibited unless they comply with the grade, size, quality and maturity provisions of such order. The provisions hereinafter set forth comply with those which will become effective July 16, 1973, under Marketing Order No. 958 for onions grown in Idaho and Malheur County, Oregon. It is not contemplated that any other marketing order will have concurrent grade, size, quality and maturity provisions in effect regulating onions until the spring of 1974.

Findings. (a) After consideration of all relevant matters, including the proposal set forth in the aforesaid notice, and other available information, it is hereby found that the proposal as published in the notice should be issued and that imported onions comply with the grade, size, quality and maturity requirements, as hereinafter provided, applicable to onions produced in the United States, and effective under Marketing Order No. 958, as amended (7 CFR Part 958) regulating the handling of onions grown in designated counties of Idaho and Malheur County, Oregon. This regulation is subject to amendment with adequate notice as domestic regulations are changed.

(b) It is hereby further found that good cause exists for not postponing the effective date of this regulation beyond the time specified (5 U.S.C. 553) in that (1) the requirements established by this regulation are mandatory under section 8e of the act; (2) all known onion importers were notified of the proposed regulation; and (3) notice hereof was published in the June 29, 1973, FEDERAL REGISTER (38 FR 17238), and such notice is determined to be reasonable.

§ 980.112 Onion import regulation.

Except as otherwise provided herein, during the period beginning July 20, 1973, and continuing through April 30, 1974, no person may import onions of the yellow or white varieties unless such onions are inspected and meet the requirements of this section.

(a) *Grade, size, and maturity requirements*—(1) *Yellow varieties.* U.S. No. 2, or better grade, 1½ inches minimum diameter.

(2) *White varieties.* U.S. No. 2, or better grade, 1 inch minimum diameter.

(3) *Yellow and white varieties.* At least "moderately cured."

(b) *Condition.* Due consideration shall be given to the time required for transportation and entry of onions into the United States. Onions with transit time from country of origin to entry into the United States of ten or more days may be entered if they meet an average tolerance for decay of not more than 5 percent, provided they meet the other requirements of this section.

(c) *Minimum quantity.* Any importation which in the aggregate does not exceed 100 pounds in any day, may be imported without regard to the provisions of this section.

(d) *Plant quarantine.* Provisions of this section shall not supersede the restrictions or prohibitions on onions under the Plant Quarantine Act of 1912.

(e) *Designation of governmental inspection service.* The Federal or the Federal-State Inspection Service, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, and the Fruit and Vegetable Division, Production and Marketing Branch, Canada Department of Agriculture, are designated as governmental inspection services for certifying the grade, size, quality and maturity of onions that are imported into the United States under the provisions of section 8e of the act.

(f) *Inspection and official inspection certificates.* (1) An official inspection certificate certifying the onions meet the United States import requirements for onions under section 8e of the act (7 U.S.C. 608e–1), issued by a designated governmental inspection service and applicable to a specific lot is required on all imports of onions.

(2) Inspection and certification by the Federal or Federal-State Inspection Service will be available and performed in accordance with the rules and regulations governing certification of fresh fruits, vegetables and other products (Part 51 of this title). Each lot shall be made available and accessible for inspection as provided therein. Cost of inspection and certification shall be borne by the applicant.

(3) Since inspectors may not be stationed in the immediate vicinity of some smaller ports of entry, importers of onions should make advance arrangements for inspection by ascertaining whether or not there is an inspector located at their particular port of entry. For all ports of entry where an inspection office is not located, each importer must give the specified advance notice to the applicable office listed below prior to the time the onions will be imported.

Ports	Office	Advance Notice
All Puerto Rico points.	Darrell McNeal, P.O. Box 10163, Santurce Santurce, Puerto Rico 00908 (Phone 809-783-2230 or 4116)	2 days
New York City..	Frank J. McNeal, Rm. 28A Hunts Point Market Bronx, New York 10474 (Phone 212-991-7669-7668)	1 day
New Orleans....	Pascal J. Lamarca, 5027 Federal Office Building 701 Loyola Avenue New Orleans, Louisiana 70113 (Phone 504-527-6741-6742)	1 day
All other points..	D. S. Matheson, Fruit and Vegetable Division, AMS Washington, D.C. 20250 (Phone 202-447-5870)	3 days

(4) Inspection certificates shall cover only the quantity of onions that is being imported at a particular port of entry by a particular importer.

(5) In the event the required inspection is performed prior to the arrival of the onions at the port of entry, the inspection certificate that is issued must show that the inspection was performed at the time of loading such onions for direct transportation to the United States; and if transportation is by water, the certificate must show that the inspection was performed at the time of loading onto the vessel.

(6) Each inspection certificate issued with respect to any onions to be imported into the United States shall set forth, among other things:

(i) The date and place of inspection;

(ii) The name of the shipper, or applicant;

(iii) The commodity inspected;

(iv) The quantity of the commodity covered by the certificate;

(v) The principal identifying marks on the containers;

(vi) The railroad car initials and number, the truck and trailer license number, the name of the vessel, or other identification of the shipment; and

(vii) The following statement, if the facts warrant; Meets import requirements of 7 U.S.C. 608e–1.

(g) *Reconditioning prior to importation.* Nothing contained in this part shall be deemed to preclude any importer from reconditioning prior to importation any shipment of onions for the purpose of making it eligible for importation.

(h) *Definitions.* For the purpose of this section, "Onions" means all varieties of Allium cepa marketed dry, except dehydrated, canned and frozen onions, onion sets, green onions, and pickling onions. The term "moderately cured" means the onions are mature and are more nearly well cured than fairly well cured. "Importation" means release from custody of the United States Bureau of Customs.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Ports	Office	Advance Notice
All Texas points..	L. M. Denbo, P.O. Box 107 San Juan, Texas 78589 (Phone 512-787-4091 or 6881)	1 day
All Arizona points	B. O. Morgan, P.O. Box 1614 Nogales, Arizona 85621 (Phone 602-287-2902)	1 day
All California points	D. P. Thompson, 784 S. Central Avenue Room 266 Los Angeles, California 90021 (Phone 213-622-8756)	3 days
All Hawaii points.	Stevenson Ching, P.O. Box 5425, Pawaa Substation 1428 S. King Street Honolulu, Hawaii 96814 (Phone 808-941-3071)	1 day

CHAPTER X—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MILK), DEPARTMENT OF AGRICULTURE

[Milk Order No. 63]

PART 1063—MILK IN THE QUAD CITIES-DUBUQUE MARKETING AREA

Order Suspending Certain Provisions

This suspension order is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the Quad Cities-Dubuque marketing area.

Notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 16878) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the months of July and August 1973, the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1063.14, the proviso which reads:

"Provided, That in any of the months of July through January milk diverted from the farm of a producer on more than the number of days that milk was delivered to a pool plant from such farm during the month shall not be deemed to have been received by the diverting handler."

Statement of consideration. The suspension action will permit unlimited diversion of producer milk under the Quad Cities-Dubuque order during July and August 1973.

The suspension is requested by Mississippi Valley Milk Producers Association, Inc., Land O'Lakes, Inc., and Mid American Dairymen, Inc., to accommodate the handling of reserve milk on the market. The seasonal increase in milk production in conjunction with a decline in Class I sales has created a surplus milk disposal problem in this market. Without the suspension much of the reserve milk on the market would have to be moved from farms to pool plants and then reshipped to manufacturing plants in order to remain pooled instead of being moved directly from farms to manufacturing plants. The additional labor and hauling costs involved with such milk movements would adversely affect the economic handling of milk in excess of fluid requirements. This suspension will allow more economic handling of the market's reserve milk while the dairy farmers involved, retain producer status.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that the most efficient method of handling the market's reserve milk supply is movement directly from producers' farms to milk manufacturing plants. This suspension would allow such handling during July and August 1973, while the dairy farmers involved retain producer status;

(b) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension. No views were received in opposition to the proposed suspension.

Therefore, good cause exists for making this order effective with respect to producer milk deliveries during July and August 1973.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of July and August 1973.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Effective date: July 17, 1973.

Signed at Washington, D.C., on July 12, 1973.

CLAYTON YEUTTER,
Assistant Secretary.

[FR Doc.73-14582 Filed 7-16-73;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

PART 72—TEXAS (SPLENETIC) FEVER IN CATTLE

Permitted Dips

The purpose of this amendment is to lower the concentration at which approved proprietary brands of Dioxathion (Delnav®) may be used as a permitted dip in official dipping for interstate movement.

Statement of consideration. The Environmental Protection Agency has recommended a change in the proposed use pattern for Dioxathion (Delnav®) when used on beef cattle, horses, sheep and goats which would reduce the maximum concentration at which this product may be used from 0.160 percent to 0.150 percent. Such a concentration is within the effective range for disinfection purposes.

Therefore, to conform with the Environmental Protection Agency's proposed use pattern and pursuant to the provisions of the Act of March 3, 1905, as amended, the Act of February 2, 1903, as amended, and the Act of May 29, 1884, as amended (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126), § 72.13(b)(2) is amended to read as follows:

§ 72.13 Permitted dips and procedures.

* * * * *

(b) * * *

(2) Approved proprietary brands of a Dioxathion (Delnav®) emulsifiable concentrate used at a concentration of 0.125 to 0.150 percent.[2]

* * * * *

(Secs. 1, 2, 32 Stat. 791-792, as amended; secs. 4-7, 23 Stat. 32, as amended; secs. 1-4, 33 Stat. 1264, 1265, secs. 3 and 11, 76 Stat. 130, 132 as amended; 21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134f; 37 FR 28464, 28477.)

Effective date. The foregoing amendment shall become effective July 17, 1973.

The amendment relieves certain restrictions presently imposed but no longer deemed necessary to prevent the interstate spread of Texas fever ticks and must be made effective promptly to be of maximum benefit to persons subject to the restrictions which are relieved. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedures provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 11th day of July 1973.

F. J. MULHERN,
Administrator, Animal and Plant Health Inspection Service.

[FR Doc.73-14581 Filed 7-16-73;8:45 am]

Title 10—Atomic Energy

CHAPTER I—ATOMIC ENERGY COMMISSION

PART 50—LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Fracture Toughness and Surveillance Program Requirements

On July 3, 1971 the Atomic Energy Commission published in the FEDERAL REGISTER (36 FR 12697) proposed amendments to its regulations in 10 CFR Part 50 which would add new appendices entitled, "Appendix G, Fracture Toughness Requirements," and "Appendix H, Reactor Vessel Material Surveillance Program Requirements."

Interested persons were invited to submit written comments within 60 days. Upon consideration of the comments received and other factors involved, the Commission has adopted the proposed amendments with certain modifications in the form set forth below.

Significant differences in Appendix G from the amendments published for comment are:

(1) Terminology was changed to be consistent with that of the ASME Code.[1]

(2) The method of combining the results of the Charpy and dropweight tests to get a combined measure of toughness was changed.

The proposed rule would have required characterization of the fracture toughness of the ferritic materials in the reactor coolant pressure boundary in terms of the temperature dependence of two quantities: (a) Energy absorbed in Charpy V-notch impact tests (ASTM[2] Standard A-370) and (b) the nil-ductility transition (NDT) temperature obtained from dropweight tests (ASTM Standard E-208). Charpy tests were to be run at appropriate temperatures to characterize the transition from fully ductile, "upper shelf," behavior to low-energy, "brittle," behavior. To obtain a toughness characterization that depended on both types of tests, the "Charpy curve" was to be adjusted upward on the temperature scale to make the 15 ft. lb. level correspond to the NDT temperature from the dropweight tests.

These amendments continue the requirement contained in the proposed rule that fracture toughness be measured by the Charpy test and the dropweight test. However, to reflect comments urging consistency with the ASME Code, fracture toughness of the material is characterized by its reference temperature, RT_{NDT}. This temperature is the higher value of the NDT temperature from the dropweight test or the temperature that is 60° F below the temperature at which Charpy test data meet a specified toughness level (50 ft. lbs. and 35 mils lateral expansion).

The concept of a lowest pressurization temperature given in the proposed rule was changed to a concept based on fracture mechanics that allows a continuous buildup of pressure as a function of temperature and wall thickness.

The proposed rule would have required a "thickness correction" whereby the Charpy curve was to be shifted up the temperature scale 7°F per inch of material thickness. The thickness correction would have been added to the shift required for consistency between the two types of toughness tests to obtain a curve of "adjusted fracture energy" versus temperature. Fracture control would have been achieved by requiring the "lowest pressurization temperature" at which system pressure could exceed 25 percent of normal operating pressure, or at which the rate of temperature change could exceed 50°F/hr., to be the temperature at which the adjusted fracture energy exceeded a certain level, which was higher for thick material than for thin.

Many of the comments questioned the validity of the dependence placed on the Charpy test by the proposed rule. The thickness correction was considered excessive for thick sections and inadequate for thin sections. Other comments asked that the rules treat stresses more quantitatively to take account of the operators' ability to control pressure and rate of temperature change and the designers' ability to calculate pressure and thermal stresses. Specifically, they urged the adoption of the approach that now appears in the 1972 Summer Addenda to the ASME Code. The proposed rules were also revised to reflect these comments. As required by these amendments, fracture control is achieved by requiring that stress in the pressure boundary be limited as a function of the metal temperature relative to the reference temperature, RT_{NDT}, and as a function of material thickness according to the "K_{IR} curve" given in the ASME Code. Taken from fracture mechanics, the term "stress intensity factor" (K) defines a quantity that is proportional to the product of gross stress and the square root of crack depth, and includes factors to account for crack shape and for the manner of loading. Critical values of K, determined from tests in which precracked specimens are loaded to failure, are a convenient measure of fracture toughness, because differences in crack size and shape and differences in manner of loading between specimen and component can be treated quantitatively. The K_{IR} curve in the ASME Code gives allowable values of fracture toughness as a function of temperature relative to RT_{NDT}. The curve is based on data obtained from tests of large specimens in the HSST[3] program. Rather than require the estimation of maximum expected flaw size, these amendments require that in areas of the reactor vessel remote from discontinuities, the assumed flaw size be proportional to wall thickness. Thus, from the value of K_{IR} at a given temperature, allowable stress values are obtained that are inversely proportional to the square root of wall thickness.

(4) Fracture control procedures described in paragraph (3), above, are supplemented in these amendments by a requirement that whenever the core is critical, the metal temperature of the reactor vessel shall exceed specified values dependent on the concurrent stress level.

(5) The Charpy V-notch upper-shelf energy requirements for beltline region materials was set at 75 ft. lbs. for all cases, without distinction as to the predicted amount if irradiation damage.

(6) Fracture toughness requirements for the various components of the pressure boundary were separated to reflect comments suggesting that the rules fit the anticipated severity of service to which the component might be subjected.

(7) The definition of "beltline region of the reactor vessel" was broadened to include more shell material above and below the core.

Significant differences in Appendix H from the amendments published for comment are:

(1) Terminology was changed to be consistent with that of Appendix G and the ASME Code. In particular, the adjustment for irradiation effects is described in these amendments as an adjustment of the reference temperature, RT_{NDT}, and the amount of temperature shift is determined by a slightly different treatment of the Charpy data than that given in the proposed amendment.

(2) Provision was made for accelerated irradiation capsules and for modification of capsule withdrawn schedules based on results of tests of specimens that received the accelerated irradiation.

(3) A general provision for an integrated surveillance program was substituted for the specific requirements given in the proposed rule. It appeared from comments that it would be impractical to meet the requirements of the proposed rule for commonality of multiple reactors.

Appendices G and H are intended to implement General Design Criterion 31, "Fracture Prevention of Reactor Coolant Pressure Boundary," of 10 CFR Part 50, Appendix A, "General Design Criteria for Nuclear Power Plants," to the extent described below. The margin of safety against brittle fracture will be controlled more quantitatively by these amendments than by the proposed rule, particularly with regard to specific guidelines for the treatment of heatup and cooldown conditions. Appendices G and H track the language of the ASME Code and have adopted certain of its requirements but also include several key supplemental requirements. For the vessel beltline, inservice requirements are based on the reference temperature as adjusted to account for irradiation damage. There is also an additional fracture toughness requirement in the form of shelf energy values from the Charpy curve for the material in its unirradiated condition.

Although the requirements of Appendices G and H become effective on August 16, 1973, the Commission recognizes that there may be an interim period when, for plants now under construction, the method of compliance with certain provisions may be determined on a case-by-case basis. For

V 38-136 JUL 17 73 XUM

example, if the test data needed to establish certain fracture control requirements are not available because they were not required at the time material sampling was done, estimated values that are appropriately conservative may be acceptable.

Pursuant to the Atomic Energy Act of 1954, as amended, and sections 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 50, are published as a document subject to codification to be effective on August 16, 1973.

1. In § 50.55a of 10 CFR Part 50, the existing paragraph (i) is redesignated paragraph (j), a new paragraph (i) is added, and subdivision (a)(2)(i) and the prefatory language in paragraph (a)(2) are amended to read as follows:

§ 50.55a Codes and standards.

Each construction permit for a utilization facility shall be subject to the following conditions, in addition to those specified in § 50.55:

(a)(1) • • •

(2) As a minimum, the systems and components of boiling and pressurized water-cooled nuclear power reactors specified in paragraphs (c), (d), (e), (f), (g), and (i) of this section shall meet the requirements described in those paragraphs, except that the American Society of Mechanical Engineers (hereinafter referred to as ASME) Code N-symbol need not be applied, and the protection systems of nuclear power reactors of all types shall meet the requirements described in paragraph (h) of this section, except as authorized by the Commission upon demonstration by the applicant for or holder of a construction permit that:

(i) Design, fabrication, installation, testing, or inspection of the specified system or component, is to the maximum extent practical, in accordance with generally-recognized codes and standards, and compliance with the requirements described in paragraphs (c) through (i) of this section or portions thereof would result in hardships or unusual difficulties without a compensating increase in the level of quality and safety; or

• • • • •

(i) Fracture toughness requirements: Pressure-retaining components of the reactor coolant pressure boundary shall meet the requirements set forth in Appendices G and H to this part.

(j) Power reactors for which a notice of hearing on an application for a provisional construction permit or a construction permit has been published on or before December 31, 1970, may meet the requirements of paragraphs (c)(1), (d)(1), (e)(1), and (f)(1) of this section instead of paragraphs (c)(2), (d)(2), (e)(2), and (f)(2) of this section, respectively.

2. New Appendices G and H are added to Part 50 to read as follows:

APPENDIX G—FRACTURE TOUGHNESS REQUIREMENTS

I. INTRODUCTION AND SCOPE

This appendix specifies minimum fracture toughness requirements for ferritic materials of pressure-retaining components of the reactor coolant pressure boundary of water cooled power reactors to provide adequate margins of safety during any condition of normal operation, including anticipated operational occurrences and system hydrostatic tests, to which the pressure boundary may be subjected over its service lifetime.

The requirements of this appendix apply to the following materials:

A. Carbon and low-alloy ferritic steel plate, forgings, castings, and pipe with specified minimum yield strengths not over 50,000 psi.

B. Welds and weld heat-affected zones in the materials specified in section I.A.

C. Materials for bolting and other types of fasteners with specified minimum yield strengths not over 130,000 psi.

Adequacy of the fracture toughness of other ferritic materials shall be demonstrated to the Commission on an individual case basis.

II. DEFINITIONS

A. "ASME Code" means the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, section III, "Rules for the Construction of Nuclear Power Plant Components" (unless another section is specified), 1971 Edition, and addenda through the Winter, 1972 Addenda.[1]

B. "Ferritic material" means carbon and low-alloy steels, higher alloy steels including all stainless alloys of the 4xx series, and maraging and precipitation hardening steels with a predominantly body-centered cubic structure.

C. "System hydrostatic tests" means all preoperational system leakage and hydrostatic pressure tests and all system leakage and hydrostatic pressure tests performed during the service life of the pressure boundary in compliance with the ASME Code, section XI, "Rules for Inservice Inspection of Nuclear Reactor Coolant Systems."

D. "Specified minimum yield strength" means the minimum yield strength (in the unirradiated condition) of a material specified in the construction code under which the component is built pursuant to § 50.55a.

E. "Lowest service temperature" means the lowest service temperature as defined by paragraph NB–2332 of the ASME Code.

F. "Reference temperature" means the reference temperature, RT_{NDT}, as defined in paragraph NB–2331 of the ASME Code.

G. "Adjusted reference temperature" means the reference temperature as adjusted for irradiation effects (see Appendix H) by adding to RT_{NDT} the temperature shift in the Charpy V-notch curve for the irradiated material relative to that for the unirradiated material, measured at the 50 ft lb level or measured at the 35 mil lateral expansion level, whichever temperature shift is greater.

H. "Beltline region of reactor vessel" means the shell material (including welds and weld heat-affected zones) that directly surrounds the effective height of the fuel element assemblies and any additional height of shell material for which the predicted adjustment of reference temperature at end of service life of the reactor vessel exceeds 50° F.

I. "Material surveillance program" means the provisions for the placement of reactor vessel beltline material specimens in the reactor vessel, and the program of periodic withdrawal and testing of such specimens to monitor, over the service life of the vessel, changes in the fracture toughness properties of the beltline as a result of exposure to neutron irradiation and the thermal environment.

J. "Integrated surveillance programs" means the combination of individual material surveillance programs as applied to one or more reactor vessels to yield results which serve to monitor the changes in fracture toughness properties for a group of vessels.

III. FRACTURE TOUGHNESS TESTS

A. To demonstrate compliance with the minimum fracture toughness requirements of sections IV and V of this appendix, ferritic materials shall be tested in accordance with the ASME Code, section NB–2300, "Fracture toughness requirements for materials." Both unirradiated and irradiated ferritic materials shall be tested for fracture toughness properties by means of the Charpy V-notch test specified by paragraph NB–2321.2 of the ASME Code. In addition, when required by the ASME Code, unirradiated ferritic materials shall be tested by means of the dropweight test specified by paragraph NB–2321.1 of the ASME Code. Provision shall be made for supplemental tests in crucial situations such as that described in Section V.C.

B. Charpy V-notch impact tests and dropweight tests shall be conducted in accordance with the following requirements:

1. Location and orientation of impact test specimens shall comply with the requirements of paragraph NB–2322 of the ASME Code.

2. Materials used to prepare test specimens shall be representative of the actual materials of the finished component as required by the applicable rules of the construction code under which the component is built pursuant to § 50.55a, except that ferritic materials intended for the reactor vessel beltline region shall comply with the additional requirements of section III.C. of this appendix.

3. Calibration of temperature instruments and Charpy V-notch impact test machines used in impact testing shall comply with the requirements of paragraph NB–2360 of the ASME Code.

4. Individuals performing fracture toughness tests shall be qualified by training and experience and shall have demonstrated competency to perform the tests in accord with written procedures of the component manufacturer.

5. Fracture toughness test results shall be recorded and shall include a certification by the licensee or person performing the tests for the licensee that:

a. The tests have been performed in compliance with the requirements of this appendix,

b. The test data are correctly reported and identified with the material intended for a pressure-retaining component,

c. The tests have been conducted using machines and instrumentation with available records of periodic calibration, and

d. Records of the qualifications of the individuals performing the tests are available upon request.

C. In addition to the test requirements of section III.A. of this appendix, tests on materials of the reactor vessel beltline shall be conducted in accordance with the following minimum requirements:

1. Charpy V-notch (C_V) impact tests shall be conducted at appropriate temperatures over a temperature range sufficient to define the C_V test curves (including the upper-shelf levels) in terms of both fracture energy and lateral expansion of specimens. Location and orientation of impact test specimens shall comply with the requirements of paragraph NB–2322 of the ASME Code.

2. Materials used to prepare test specimens for the reactor vessel beltline region shall be taken directly from excess material and welds in the vessel shell course(s) following completion of the production longitudinal weld joint, and subjected to a heat treatment that produces metallurgical effects equivalent to those produced in the vessel material throughout its fabrication process, in accordance with paragraph NB–2211 of the ASME Code. Where seamless shell forgings are used, or where the same welding process is used for longitudinal and circumferential welds in plates, the test specimens may be taken from a separate weldment provided that such a weldment is prepared using excess material from the shell forging(s) or plates, as applicable, the same heat of filler material, and the same production welding conditions as those used in joining the corresponding shell materials.

IV. FRACTURE TOUGHNESS REQUIREMENTS

A. The pressure-retaining components of the reactor coolant pressure boundary that are made of ferritic materials shall meet the following requirements for fracture toughness during system hydrostatic tests and any condition of normal operation, including anticipated operational occurrences:

1. The materials shall meet the acceptance standards of paragraph NB–2330 of the ASME Code, and the requirements of sections IV.A.2, 3 and 4 and IV.B. of this appendix.

2. For vessels, exclusive of bolting or other fasteners:

a. Calculated stress intensity factors shall be lower than the reference stress intensity factors by the margins specified in the ASME Code Appendix G, "Protection Against Non-Ductile Failure". The calculation procedures shall comply with the procedures specified in the ASME Code Appendix G, but additional and alternative procedures may be used if the Commission determines that they provide equivalent margins of safety against fracture, making appropriate allowance for all uncertainties in the data and analyses.

b. For nozzles, flanges and shell regions near geometric discontinuities, the data and procedures required in addition to those specified in the ASME Code shall provide margins of safety comparable to those required for shells and heads remote from discontinuities.

c. Whenever the core is critical, the metal temperature of the reactor vessel shall be high enough to provide an adequate margin of protection against fracture, taking into account such factors as the potential for overstress and thermal shock during anticipated operational occurrences in the control of reactivity. In no case when the core is critical (other than for the purpose of low-level physics tests) shall the temperature of the reactor vessel be less than the minimum permissible temperature for the inservice system hydrostatic pressure test nor less than 40°F above that temperature required by section IV.A.2.a.

d. If there is no fuel in the reactor during the initial preoperational system leakage and hydrostatic pressure tests, the minimum permissible test temperature shall be determined in accordance with paragraph G2410 of the ASME Code except that the factor of safety applied to each term making up the calculated stress intensity factor may be reduced to 1.0. In no case shall the test temperature be less than $RT_{NDT}+60°F$.

3. Materials for piping (i.e., pipe, tubes and fittings), pumps, and valves (excluding bolting materials) shall meet the requirements of paragraph G3100 of the ASME Code.

4. Materials for bolting and other fasteners with nominal diameters exceeding 1 inch shall meet the minimum requirements of 25 mils lateral expansion and 45 ft lbs in terms of Charpy V-notch tests conducted at the preload temperature or at the lowest service temperature, whichever temperature is lower.

B. Reactor vessels beltline materials shall have minimum upper-shelf energy, as determined from Charpy V-notch tests on unirradiated specimens in accordance with paragraphs NB–2322.2(4) and 2322.2(6) of the ASME Code, of 75 ft lbs unless it is demonstrated to the Commission by appropriate data and analyses based on other types of tests that lower values of upper shelf fracture energy are adequate.

C. Reactor vessels for which the predicted value of adjusted reference temperature exceeds 200°F shall be designed to permit a thermal annealing treatment to recover material toughness properties of ferritic materials of the reactor vessel beltline.

V. INSERVICE REQUIREMENTS—REACTOR VESSEL BELTLINE MATERIAL

A. The properties of reactor vessel beltline region materials, including welds, shall be monitored by a material surveillance program conforming to the "Reactor Vessel Material Surveillance Program Requirements" set forth in Appendix H.

B. Reactor vessels may continue to be operated only for that service period within which the requirements of section IV.A.2. are satisfied, using the predicted value of the adjusted reference temperature at the end of the service period to account for the effects of irradiation on the fracture toughness of the beltline materials. The basis for the prediction shall include results from pertinent radiation effects studies in addition to the results of the surveillance program of section V.A.

C. In the event that the requirements of section V.B. cannot be satisfied, reactor vessels may continue to be operated provided all of the following requirements are satisfied:

1. An esentially complete volumetric examination of the beltline region of the vessel including 100 percent of any weldments shall be made in accordance with the requirements of Section XI of the ASME Code.

2. Additional evidence of the changes in fracture toughness of the beltline materials resulting from exposure to neutron irradiation shall be obtained from results of supplemental tests, such as measurements of dynamic fracture toughness of archive material that has been subjected to accelerated irradiation.

3. A fracture analysis shall be performed that conservatively demonstrates, making appropriate allowances for all uncertainties, the existence of adequate margins for continued operation.

D. If the procedures of section V.C. do not indicate the existence of an adequate safety margin, the reactor vessel beltline region shall be subjected to a thermal annealing treatment to effect recovery of material toughness properties. The degree of such recovery shall be measured by testing additional specimens that have been withdrawn from the surveillance program capsules and annealed under the same time-at-temperature conditions as those given the beltline material. The results shall provide the basis for establishment of the adjusted reference temperature after annealing. The reactor vessel may continue to be operated only for that service period within which the predicted fracture toughness of the beltline region materials satisfies the requirements of section IV.A.2., using the values of adjusted reference temperature that include the effects of annealing and subsequent irradiation.

E. The proposed programs for satisfying the requirements of sections V.C. and V.D. shall be reported to the Commission for review and approval on an individual case basis at least 3 years prior to the date when the predicted fracture toughness levels will no longer satisfy the requirements of section V.B.

APPENDIX H—REACTOR VESSEL MATERIAL SURVEILLANCE PROGRAM REQUIREMENTS

I. INTRODUCTION

The purpose of the material surveillance program required by this appendix is to monitor changes in the fracture toughness properties of ferritic materials in the reactor vessel beltline region of water cooled power reactors resulting from their exposure to neutron irradiation and the thermal environment. Under this program, fracture toughness test data are obtained from material specimens withdrawn periodically from the reactor vessel. These data will permit the determination of the conditions under which the vessel can be operated with adequate margins of safety against fracture throughout its service life.

II. SURVEILLANCE PROGRAM CRITERIA

A. No material surveillance program is required for reactor vessels for which it can be conservatively demonstrated by analytical methods, applied to experimental data and tests performed on comparable vessels, making appropriate allowances for all uncertainties in the measurements, that the peak neutron fluence (E 1MeV) at the end of the design life of the vessel will not exceed 10^{17} n/cm².

B. Reactor vessels constructed of ferritic materials which do not meet the conditions of section II.A. shall have their beltline regions monitored by a surveillance program complying with the American Society for Testing and Materials (ASTM) Standard Recommended Practice for Surveillance Tests for Nuclear Reactor Vessels, ASTM Designation: E–185–73,[1] except as modified by this appendix.

C. The surveillance program shall meet the following requirements:

1. Surveillance specimens shall be taken from locations alongside the fracture toughness test specimens required by section III of Appendix G. The specimen types shall comply with the requirements of section III.A. of Appendix G (except that drop weight specimens are not required).

2. Surveillance capsules containing the surveillance specimens shall be located near but not attached to the inside vessel wall in the beltline region, so that the neutron flux received by the specimens is at least as high but not more than three times as high

[1] Copies may be obtained from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th Street, New York, N.Y. 10017. Copies are available for inspection at the Commission's Public Document Room, 1717 H St. N.W., Washington, D.C.

[1] Effective March 1, 1973. Copies may be obtained from the American Society for Testing and Materials, 1916 Race St., Philadelphia, Pa. 19103, either as a separate or (when available) as part of the 1973 Annual Book of ASTM Standards, Part 30 and also in Part 31. Copies are available for inspection at the Commission's Public Document Room, 1717 H St. NW., Washington, D.C.

V 38-136 JUL 17 73 XUM

as that received by the vessel inner surface, and the thermal environment is as close as practical to that of the vessel inner surface. The design and location of the capsules shall permit insertion of replacement capsules. Accelerated irradiation capsules, for which the calculated neutron flux will exceed three times the calculated maximum neutron flux at the inside wall of the vessel, may be used in addition to the required number of surveillance capsules specified in section II.C.3.

3. The required number of surveillance capsules and their withdrawal schedules are as follows:

a. For reactor vessels for which it can be conservatively demonstrated by experimental data and tests performed on comparable vessel steel, making appropriate allowances for all uncertainties in the measurements, that the adjusted reference temperature established in accordance with section IV.B. will not exceed 100°F at the end of the service lifetime of the reactor vessel, at least three surveillance capsules shall be provided for subsequent withdrawal as follows:

WITHDRAWAL SCHEDULE

First capsule—One-fourth service life
Second capsule—Three-fourths service life
Third capsule—Standby

In the event that the surveillance specimens exhibit, at one-quarter of the vessel's service life, a shift of the reference temperature greater than originally predicted for similar material as recorded in the applicable technical specification, the remaining withdrawal schedule shall be modified as follows:

REVISED
WITHDRAWAL SCHEDULE

Second capsule—One-half service life
Third capsule—Standby

b. For reactor vessels which do not meet the conditions of section II.C.3.a. but for which it can be conservatively demonstrated by experimental data and tests performed on comparable vessel steels that the adjusted reference temperature will not exceed 200°F at the end of the service lifetime of the reactor vessel, at least four surveillance capsules shall be provided for the subsequent withdrawal as follows:

WITHDRAWAL SCHEDULE

First capsule—At the time when the predicted shift of the adjusted reference temperature is approximately 50°F or at one-fourth service life, whichever is earlier.
Second capsule—At approximately one-half of the time interval between first and third capsule withdrawal.
Third capsule—Three-fourths service life.
Fourth capsule—Standby.

c. For reactor vessels which do not meet the conditions of section II.C.3.b., at least five surveillance capsules shall be provided for subsequent withdrawal as follows:

WITHDRAWAL SCHEDULE

First capsule—At the time when the predicted shift of the adjusted reference temperature is approximately 50°F or at one-fourth service life, whichever is earlier.
Second and third capsules—At approximately one-third and two-thirds of the time interval between first and fourth capsule withdrawal.
Fourth capsule—Three-fourths of service life.
Fifth capsule—Standby.

d. Provision shall also be made for additional surveillance tests to monitor the effects of annealing and subsequent irradiation.

e. Withdrawal schedules may be modified to coincide with those refueling outages or plant shutdowns most closely approaching the withdrawal schedule.

f. If accelerated irradiation capsules are employed in addition to the minimum required number of surveillance capsules, the withdrawal schedule may be modified, taking into account the test results obtained from testing of the specimens in the accelerated capsules. The proposed modified withdrawal schedule in such cases shall be approved by the Commission on an individual case basis.

g. Proposed withdrawal schedules that differ from those specified in paragraphs a. through f. shall be submitted, with a technical justification therefor, to the Commission for approval. The proposed schedule shall not be implemented without prior Commission approval.

4. For multiple reactors located at a single site, an integrated surveillance program may be authorized by the Commission on an individual case basis, depending on the degree of commonality and the predicted severity of irradiation.

III. FRACTUAE TOUGHNESS TESTS

A. Fracture toughness testing of the specimens withdrawn from the capsules shall be conducted in accordance with the requirements of section III of Appendix G, "Fracture Toughness Requirements."

B. The adjusted reference temperatures for the base metal, heat-affected zone, and weld metal shall be obtained from the test results by adding to the reference temperature the amount of the temperature shift in the Charpy test curves between the unirradiated material and the irradiated material, measured at the 50 foot-pound level or that measured at the 35 mil lateral expansion level, whichever temperature shift is greater. The highest adjusted reference temperature and the lowest upper-shelf energy level of all the beltline materials shall be used to verify that the fracture toughness requirements of section V.B. of Appendix G are satisfied.

IV. REPORT OF TEST RESULTS

A. Each capsule withdrawal and the results of the fracture toughness tests shall be the subject of a summary technical report to be provided to the Commission. The report shall include a schematic diagram of the capsule locations in the reactor vessel, identification of specimens withdrawn, the test results, and the relationship of the measured results to those predicted for the reactor vessel beltline region.

B. The report shall also include the dosimetry measurements performed at each specimen withdrawal, analyses of the results which yield the calculated neutron fluence which the reactor vessel beltline region has received at the time of the tests, and comparisons with the originally predicted values of fluence.

C. The operating pressure and temperature limitations established for the period of operation of the reactor vessel between any two surveillance specimen withdrawals shall be specified in the report, including any changes made in operational procedures to assure meeting such temperature limitations.

(Sec. 161, 68 Stat. 948; 42 U.S.C. 2201)

Dated at Germantown, Md., this 11th day of July 1973.

For the Atomic Energy Commission.

GORDON M. GRANT,
Acting Secretary of the Commission.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register on May 29, 1973.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

PART 201—EXTENSIONS OF CREDIT BY FEDERAL RESERVE BANKS

Changes in Rates

Pursuant to section 14(d) of the Federal Reserve Act (12 U.S.C. 357), and for the purpose of adjusting discount rates with a view to accommodating commerce and business in accordance with other related rates and the general credit situation of the country, Part 201 is amended as set forth below:

1. Section 201.51 is amended to read as follows:

§ 201.51 Advances and discounts for member banks under sections 13 and 13a.

The rates for all advances and discounts under sections 13 and 13a of the Federal Reserve Act (except advances under the last paragraph of such section 13 to individuals, partnerships, or corporations other than member banks) are:

Federal Reserve Bank of	Rate	Effective
Boston	7	July 2, 1973
New York	7	July 2, 1973
Philadelphia	7	July 2, 1973
Cleveland	7	July 2, 1973
Richmond	7	July 2, 1973
Atlanta	7	July 2, 1973
Chicago	7	July 2, 1973
St. Louis	7	July 2, 1973
Minneapolis	7	July 2, 1973
Kansas City	7	July 2, 1973
Dallas	7	July 2, 1973
San Francisco	7	July 2, 1973

2. Section 201.52 is amended to read as follows:

§ 201.52 Advances to member banks under section 10(b).

The rates for advances to member banks under section 10(b) of the Federal Reserve Act are:

Federal Reserve Bank of	Rate	Effective
Boston	7-½	July 2, 1973
New York	7-½	July 2, 1973
Philadelphia	7-½	July 2, 1973
Cleveland	7-½	July 2, 1973
Richmond	7-½	July 2, 1973
Atlanta	7-½	July 2, 1973
Chicago	7-½	July 2, 1973
St. Louis	7-½	July 2, 1973
Minneapolis	7-½	July 2, 1973
Kansas City	7-½	July 2, 1973
Dallas	7-½	July 2, 1973
San Francisco	7-½	July 2, 1973

3. Section 201.53 is amended to read as follows:

§ 201.53 Advances to persons other than member banks.

The rates for advances under the last paragraph of section 13 of the Federal Reserve Act to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the United States or any agency thereof are:

Federal Reserve Bank of	Rate	Effective
Boston[1]	9	July 2, 1973
New York	9	July 2, 1973
Philadelphia	9	July 2, 1973
Cleveland	9	July 2, 1973
Richmond[1]	9	July 2, 1973
Atlanta[1]	9	July 2, 1973
Chicago[1]	9	July 2, 1973
St. Louis[1]	9	July 2, 1973
Minneapolis[1]	9	July 2, 1973
Kansas City[1]	9	July 2, 1973
Dallas[1]	9	July 2, 1973
San Francisco	9	July 2, 1973

[1] A rate of 7 percent was approved, effective on the indicated dates on advances to nonmember banks, to be applicable in special circumstances resulting from implementation of changes in Regulation J (see 37 FR 12714).

(12 U.S.C. 248(1). Interprets or applies 12 U.S.C. 357)

By order of the Board of Governors, July 6, 1973.

[SEAL] CHESTER B. FELDBERG,
Secretary of the Board.

[FR Doc.73-14417 Filed 7-16-73;8:45 am]

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER A—GENERAL

[Docket No. 73-852]

PART 500—ORGANIZATION AND CHANNELLING OF FUNCTIONS

PART 501—OPERATIONS

Organization and Channelling of Functions

JUNE 20, 1973.

The Federal Home Loan Bank Board has periodically published in the FEDERAL REGISTER statements of the general course and method by which its functions are channelled and determined. The last such statement was FR Doc. 67-7146 which was published in the June 24, 1967 issue of the FEDERAL REGISTER (32 FR 9041). These statements are not codified as part of the Board's codified regulations.

The Board considers it advisable to make certain minor changes and to codify its current rules on organization and channelling of functions. Also, the Board considers it advisable to include in such codification a list of certain forms which are available at the Federal Home Loan Banks. Accordingly, on the basis of such considerations, the Federal Home Loan Bank Board hereby (1) rescinds FEDERAL REGISTER Document 67-7146 which was published in the FEDERAL REGISTER on June 24, 1967 (32 FR 9041), (2) redesignates § 500.10 of the general regulations of the Federal Home Loan Bank Board (12 CFR 500.10) as § 501.2 of said regulations (12 CFR 501.2), and (3) amends Part 500 of said regulations (12 CFR Part 500) to read as set forth below, effective July 17, 1973.

1. The headings and the text of amended Part 500 are as follows:

Subpart A—Functions and Responsibilities of the Board

Sec.
500.1 General statement and statutory authority.
500.2 The Federal Home Loan Bank System.
500.3 The Federal savings and loan system.
500.4 The Federal Savings and Loan Insurance Corporation.
500.5 District of Columbia savings and loan associations.

Subpart B—General Organization

500.10 The Board.
500.11 Secretary to the Board.
500.12 Congressional Liaison Officer.
500.13 Director of the Office of Management Systems and Administration.
500.14 Director of the Office of Economic Research.
500.15 Director of the Office of Audits.
500.16 Director of the Office of Communications.
500.17 The General Counsel.
500.18 Director of the Office of Examinations and Supervision.
500.19 Director of the Office of Industry Development.
500.20 Director of the Office of the Federal Savings and Loan Insurance Corporation.
500.21 Director of the Office of the Federal Home Loan Banks.
500.22 Director of the Office of Housing and Urban Affairs.

Subpart C—Procedures

500.30 General statement concerning procedures and forms.
500.31 Forms.
500.32 Offices of the Board; information and submittals.

AUTHORITY: Sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1437, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071.

Subpart A—Functions and Responsibilities of the Board

§ 500.1 General statement and statutory authority.

The Federal Home Loan Bank Board (referred to in this subchapter as "Board") is responsible for the administration and enforcement of the Federal Home Loan Bank Act, the Home Owners' Loan Act of 1933, Title IV of the National Housing Act, and with respect to institutions subject to provisions of the foregoing acts and title, the Bank Protection Act of 1968, the Truth in Lending Act, and the Fair Credit Reporting Act. The members of the Board constitute the Board of Directors of the Federal Home Loan Mortgage Corporation, which was created by Title III of the Emergency Home Finance Act of 1970.

§ 500.2 The Federal Home Loan Bank system.

The Board supervises the Federal Home Loan Banks created by the Federal Home Loan Bank Act and issues regulations and orders for carrying out the purposes of the provisions of that Act. Savings and loan associations and other institutions specified in section 4 of the Federal Home Loan Bank Act that make long-term home mortgage loans are eligible to become members of a Federal Home Loan Bank. The functions of the Board with respect to the Banks and their members include, but are not limited to, the following: prescribing the conditions upon which a Federal Home Loan Bank is authorized to make advances to its members and to nonmember borrowers; prescribing rules governing the payment and advertisement of interest or dividends on deposits, shares, or withdrawable accounts that may be paid by Bank members, other than those members the deposits of which are insured in accordance with the provisions of the Federal Deposit Insurance Act; prescribing rules and conditions upon which a Federal Home Loan Bank shall be authorized to borrow, to pay interest upon its borrowings, and to issue obligations; issuing upon such conditions as the Board may prescribe consolidated Federal Home Loan Bank bonds or debentures which are the joint and several obligations of all Federal Home Loan Banks; requiring examination of each Federal Home Loan Bank at least annually; appointing four directors to the board of directors of each Bank and conducting the election of the remaining directors by the members; approving dividends paid by each Federal Home Loan Bank; and acting on applications for Bank membership.

§ 500.3 The Federal savings and loan system.

The Board is authorized under such rules and regulations as it may prescribe to provide for the organization, incorporation, examination, operation, and regulation of Federal savings and loan associations. Under this authority, the Board's functions include, but are not limited to, regulation of the corporate structure of such associations, regulation of the distribution of their earnings, regulation of their lending and other investment powers, acting upon their applications for branch offices, mobile facilities, and satellite offices, the regulation of mergers, conversions, and dissolutions involving such associations, the appointment of conservators and receivers for such associations, and the enforcement of laws, regulations, or conditions against such associations or the officers or directors thereof by proceedings under section 5 of the Home Owners' Loan Act of 1933, as amended.

§ 500.4 The Federal Savings and Loan Insurance Corporation.

The Federal Savings and Loan Insurance Corporation is under the direction of the Federal Home Loan Bank Board. The Corporation insures the accounts of all Federal savings and loan associations and of other building and loan, savings and loan, and homestead associations and cooperative banks that are eligible for insurance and the applications of which have been approved by the Corporation. The Corporation regulates and examines insured institutions within the authority conferred by Title IV of the National Housing Act and is authorized to enforce applicable laws, regulations, or conditions against insured institutions or the officers or directors thereof by proceedings under section 407 of the National Housing Act, as amended. The Corporation also regulates and supervises savings and loan holding companies pursuant to the provisions of section 408 of the National Housing Act, as amended.

§ 500.5 District of Columbia savings and loan associations.

The Board exercises supervisory and regulatory authority over all building and

V 38-136 JUL 17 73 XUM

loan or savings and loan associations and similar institutions of or doing business in or maintainig offices in the District of Columbia.

Subpart B—General Organization

§ 500.10 The Board.

The Board is composed of three members, not more than two of whom are members of the same political party. The members are appointed by the President with the advice and consent of the Senate for four year terms. The Chairman is designated by the President and is the chief executive officer of the Board. Executive and administrative functions of the Board were transferred to the Chairman by Reorganization Plan No. 6 of 1963. The Board is assisted by a staff that includes eleven Offices.

§ 500.11 Secretary to the Board.

The Secretary to the Board is responsible for the secretarial functions of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation. The Secretary to the Board is responsible for the preparation and maintenance of the Minute Record of all official actions of the Board and for the authentication of documents. The Office of the Secretary provides general record services for the Board through the Files and Docket Section, which is under the direction and supervision of the Secretary to the Board. The Secretary to the Board is Liaison Officer to the FEDERAL REGISTER. The same person may be the Secretary to the Board and the Director of an Office at the same time.

§ 500.12 Congressional Liaison Officer.

The Congressional Liaison Officer is responsible to the Chairman for ensuring appropriate co-ordination and communication with Congress.

§ 500.13 Director of the Office of Management Systems and Administration.

The Director of the Office of Management Systems and Administration is the Executive Assistant to the Chairman. The Director is responsible for the supervision and administration of the Office of Management Systems and Administration, which is divided into four divisions: The Comptroller's Division, the Administration and Methods Division, the Personnel Management Division, and the Information Systems Division.

(a) The Comptroller's Division is responsible for the administration and management of the internal financial operations of the Board and the Federal Savings and Loan Insurance Corporation, including budgeting, accounting, the receipt and disbursement of funds, the control, processing, and payment of expenses, and the maintenance of pay and leave records. This Division is also responsible for the preparation of the Board's annual budget submissions to the Office of Management and Budget and to the Congress.

(b) The Administration and Methods Division is responsible for internal management reports and studies, records and forms control, and the maintenance of a manual of procedures. The Board's emergency planning program for the continuity of operations and relocation of the agency in the event of an emergency is also a function of this Division. The Division is responsible for conducting purchase and supply operations, sorting, receiving, and distributing mail, maintenance, transportation, acquiring and allocating space, contract administration and other housekeeping functions for the Board. The Management Information Center is maintained as part of this Division. A printing and reproduction plant is operated by this Division, as authorized by the Congressional Joint Committee on Printing.

(c) The Personnel Management Division is responsible for the development and execution of the personnel management program of the Board. The program includes recruitment, placement and staffing; position classification and wage administration; employee development and training; employee-management relations; health; and incentive awards. The Director of the Personnel Management Division is also responsible for carrying out the purposes of Executive Order No. 10450, as amended, as Personnel Security Officer of the Board.

(d) The Information Systems Division compiles and distributes information essential in measuring the operations of the members of the Federal Home Loan Bank System, as well as that information necessary to the internal operations of the Board itself. The Division is responsible for the planning, design, programming, operation, and maintenance of Electronic Data Processing systems for the Board and for furnishing technical advice and assistance to other Offices and Divisions in connection with Electronic Data Processing operations.

§ 500.14 Director of the Office of Economic Research.

The Director of the Office of Economic Research is the principal economic adviser to the Board and is responsible for the analysis of economic data, including but not limited to the conditions and operations of savings and loan institutions, financial intermediaries, mortgage and housing markets, and real estate matters generally. The Director selects and conducts economic studies that he determines to be of need and value of the Board. The Director has joint responsibility with the Director of the Office of Management Systems and Administration for the collection and internal use of savings and loan data and is responsible for the dissemination of such data in statistical form outside the Board. He is responsible for the economic analysis of merger applications with respect to possible impact on competition; and for assisting and co-ordinating the work and programs of Federal Home Loan Bank economists.

§ 500.15 Director of the Office of Audits.

The Director of the Office of Audits is responsible for the continuing audit of the operations of the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation. The Director is also responsible for an annual examination of each Federal Home Loan Bank.

§ 500.16 Director of the Office of Communications.

The Director of the Office of Communications is responsible for the communication of Board actions and policy to the public and news media and for the preparation of responses to inquiries of a general nature respecting such actions and policy.

§ 500.17 The General Counsel.

The General Counsel is the chief legal officer of the Board and has, among other functions, those set forth below. He is responsible for the representation of the Board and the Federal Savings and Loan Insurance Corporation in judicial proceedings in which the Board or the Corporation is involved as a party or as amicus curiae and in administrative proceedings under the Federal Home Loan Bank Act, the Home Owners' Loan Act of 1933, and Title IV of the National Housing Act. He is responsible for advising the Board with respect to interpretations involving questions of law, for the preparation of legislation submitted by the Board to Congress, for the preparation of Board comments to Congress upon pending legislation, and for the preparation of regulations. He is also responsible for dealing with general problems arising under the Administrative Procedure Act and for dealing with legal problems arising under applications to the Board and the Federal Savings and Loan Insurance Corporation.

§ 500.18 Director of the Office of Examinations and Supervision.

The Director of the Office of Examinations and Supervision is responsible for the performance of the responsibilities of the Board and the Federal Savings and Loan Insurance Corporation with respect to the examination and supervision of Federal savings and loan associations under the Home Owners' Loan Act of 1933 and of State-chartered insured institutions, savings and loan holding companies, and subsidiaries of savings and loan holding companies under Title IV of the National Housing Act. The Director is also responsible for advising the Board with respect to matters of policy decision, legislation, and regulation to which his functions of supervision and examination are related. The Director is responsible for the management of the examination process and the development and improvement of examination techniques and for the direction of supervisory and enforcement activities of the staff and agents of the Board and the Federal Savings and Loan Insurance Corporation. This Office supervises the security programs of insured institutions required by the Bank Protection Act of 1968 and the enforcement of the Truth in Lending Act and the Fair Credit Reporting Act.

§ 500.19 Director of the Office of Industry Development.

The Director of the Office of Industry Development is responsible for the processing, review, and evaluation of certain applications to the Board and the Federal Savings and Loan Insurance Corporation, except for those instances in which such applications are approved by an agent or officer of the Board pursuant to delegated authority. Applications for which the Director is responsible concern the following matters: permission to organize a Federal savings and loan association; a branch office, limited facility branch office, satellite office, or mobile facility of an existing Federal savings and loan association; insurance of accounts; conversion from Federal to State or from State to Federal charter; membership in the Federal Home Loan Bank System; a merger involving a Federal savings and loan association; voluntary dissolution of a Federal savings and loan association; an increase in accounts of an insurable type through merger, consolidation, or purchase of bulk assets; investment in a service corporation by a Federal savings and loan association; a change in office location; investment in an office building; waiver or modification of a condition for insurance of accounts or issuance of a Federal charter; release of pledged savings accounts or escrowed stock; extension of a lending area; approval of designation of a reserve account as part of the Federal insurance reserve; approval of amendments to charter, bylaws, or security forms; permission to issue subordinated debt securities; and other applications for which the Director of this Office may be assigned responsibility. The Director of this Office is also responsible for planning and coordinating new programs to stimulate the development of the savings and loan industry by encouraging financially sound restructuring.

§ 500.0 Director of the Office of the Federal Savings and Loan Insurance Corporation.

The Director of the Office of the Federal Savings and Loan Insurance Corporation is responsible for advising the Board with respect to the policies and operations of the Corporation. In co-ordination with the General Counsel and the Director of the Office of Examinations and Supervision, the Director is responsible for the development and implementation of plans of financial assistance to prevent the default of insured institutions. He is also responsible for the implementation and settlement of the Corporation's insurance obligations and for the management and liquidation of assets acquired by the Corporation as receiver or otherwise.

§ 500.21 Director of the Office of the Federal Home Loan Banks.

The Director of the Office of the Federal Home Loan Banks is responsible for reviewing the activities of the Banks and for directing and co-ordinating their operating procedures to ensure conformity with the goals and objectives of the Board. The Director is responsible for establishing standards of accounting, reporting, and financial analysis for the Banks and for providing advice and assistance to the Banks in their operations, including but not limited to, data processing, planning, and community activity. He is also responsible for advising the Board with respect to policy decisions respecting the Banks and making recommendations concerning such matters as budgets, the elections of officers and counsel, salaries, dividends, and bylaw amendments.

§ 500.22 Director of the Office of Housing and Urban Affairs.

The Director of the Office of Housing and Urban Affairs is responsible for advising the Board on the subject of housing, urban problems, and minority affairs and for recommending policies pertaining thereto. This Office develops and implements programs in low- and moderate-income housing, inner-city housing investment and rehabilitation, preventing discrimination in lending and employment by the savings and loan industry, and assisting minority groups who apply for Federal charters or insurance of accounts. The Center for Executive Development is maintained as part of this Office.

Subpart C—Procedures

§ 500.30 General statement concerning procedures and forms.

(a) Rules and procedures of the Board and the Federal Savings and Loan Insurance Corporation are published in Chapter V of Title 12 of the Code of Federal Regulations and in supplementary material published in the Federal Register. The statutes administered by the Board and the rules and regulations promulgated pursuant to such statutes prescribe the course and method of the formal procedures to be followed in proceedings of the Board or the Federal Savings and Loan Insurance Corporation. These are supplemented where practicable by informal procedures designed to aid the public and facilitate the execution of the Board's functions. The informal procedures of the Board consist principally in the rendering of advice and assistance to members of the public dealing with the Board. Opinions expressed by members of the staff do not constitute an official expression of the views of the Board, but do represent views of persons working with the provisions of the statute or regulation involved.

(b) Information with respect to procedures, forms, and instructions of the Board and the Federal Savings and Loan Insurance Corporation is available to the public at the headquarters of the Board or at the offices of the Federal Home Loan Banks. Forms of concern to the public consist principally of periodic financial reports and of applications to the Board or the Federal Savings and Loan Insurance Corporation. The Board and the Federal Savings and Loan Insurance Corporation may from time to time require the completion by individuals or institutions of miscellaneous forms, questionnaires, reports, or other papers. In each instance, the individual or institution is given actual and timely notice of the scope and contents of the papers in question.

§ 500.31 Forms.

(a) The following forms, which are available at the offices of agents of the Board and the Federal Savings and Loan Insurance Corporation at the Federal Home Loan Banks, shall be used for the purposes indicated.

(1) Forms with permanent numbers, excepting Savings and Loan Holding Company forms in the H and HC series:

Form	
93	Confidential Report of Security Information and Protection Devices: Report P–1 (Insured institution)
94	Confidential Report of Crimes Against Insured Institutions: Report P–2 (Insured institution)
107	Monthly Report of Selected Financial Data (Insured institution)
138	Application for Permission to Organize a Federal Savings and Loan Association
138(IS)	Outline of Information to be Submitted in Support of an Application for Permission to Organize a Federal Savings and Loan Association
139	Confidential Biographical and Financial Report (Certain applications)
140	Application for Insurance of Accounts (State-chartered applicant)
140(IS)	Outline of Information to be Submitted in support of an Application for Insurance of Accounts or a Request for a Commitment to Insure Accounts of a State-chartered institution
141	Request for a Commitment to Insure Accounts (State-chartered institution)
142	Proposed Operating Budget (Insured institution)
159	Preliminary Application for Conversion into a Federal association—Exhibit J
186	Application for Insurance of Accounts (Federal Savings and Loan Association and State-chartered applicant for Conversion)
241	Emergency and Disaster Preparedness Measures (Insured institution)
297	Affidavit (Pursuant to §§ 556.2 and 571.5)
300	Reserve Agreement (Applicant for Federal charter or insurance of accounts)
303	Statement of Condition (Federal Savings and Loan Association)
443	Report of Liquidity Deficiency (Bank member)
450	Application for Membership and Subscription to Stock in Federal Home Loan Bank
457	Dividend Agreement—Exhibit A (State-chartered applicant for Insurance of Accounts)

V 38-136 JUL 17 73 XUM

Form	
458	Stockholder's Affidavit (State-chartered institution)
601	Pledge & Escrow Agreement (New Federal Savings and Loan Association)
602	Pledge & Escrow Agreement (Converted Association)
603	Pledge & Escrow Agreement (Insurance of Accounts)
631	Depositary and Interlock Report (Insured institution)
638	Dividend Agreement (Applicant for a Charter for a Federal Savings and Loan Association)
646	Lender's Application for Borrower Approval and Firm Commitment of Housing Opportunity Allowance (Bank member)
647	Lender's Schedule of Housing Opportunity Allowance Programs (Bank member)
660	Confidential Biographical and Financial Report (Holding Company)
700	Application for Permission to Establish a Branch Office (Federal Savings and Loan Association)
700(IS)	Applicant Instructions for a Branch Office (Federal Savings and Loan Association)
709	Application for Permission to Increase Accounts of an Insurable Type (State-chartered institution)
710	Application for Merger (Pursuant to §§ 546.1, 546.2, and 556.2)
709 710 (IS)	Applicant Instructions for Preparation of Merger Applications (Pursuant to §§ 546.2 and 563.22)
712	Statement of Condition (Submitted with Form 709 or 710)
713	Comparative Operating Statement (Submitted with Form 709 or 710)
714	Part I & Part II—Report of Officers and Directors In Institution "C" (Submitted with Form 709 or 710)
718	Report of Permanent Stock (Voting Shares) (Submitted with Form 709 or 710)
719	Part I & Part II—Report of Advisory Board or Committee and Consultants for Institution "C" (Submitted with Form 709 or 710)
720	Report of Assets, Savings and Mortgages (Submitted with Form 709 or 710)
721	Institution Address List (Submitted with Form 709 or 710)
722	Random Sampling of Savings Accounts Outstanding (Submitted with Form 709 or 710)
723	Report of Mortgage Loans Made (Submitted with Form 709 or 710)
724	Report of Mortgage Recordings (Submitted with Form 709 or 710)
741	Pertinent Financial Ratios (Submitted with Form 709 or 710)
742	Financial Footnotes and Commentary (Submitted with Form 709 or 710)
743	Application for Final Approval of Exact Location of Authorized Branch Office (Federal Savings and Loan Association)
754	Checklist of Supporting Documents for Branch Office Application (Federal Savings and Loan Association)
756	Checklist of Supporting Documents for Permission to Organize (Federal Savings and Loan Association)
774a	Semiannual report: Statement of Condition—Assets (Insured institution)
774b & c	Semiannual report: Statement of Condition—Liabilities, Net Worth (Insured institution)
775	Semiannual report: Income and Expense (Insured institution)
776	Semiannual report: Slow loans and Scheduled Items (Insured institution)
777	Semiannual report: Supplemental Data (Insured institution)
850	Application for Permission to Change Location of an Office (Federal Savings and Loan Association)
861	Application for Permission to Establish a Satellite Office (Federal Savings and Loan Association)
873	Application for Permission to Establish a Limited Facility Office (Federal Savings and Loan Association)
893	Determination of Compliance with Insurance Regulation 563.13

(2) Savings and Loan Holding Company forms (described more fully in § 584.10 of this chapter):

Form	
H-(b)3	Registration Statement (Corporation as trustee)
H-(b)4	Registration Statement (Creditor as savings and loan company)
H-(b)5	Registration Statement (Voting Trust)
H-(b)10	Registration Statement
H-(b)11	Annual Report
H-(b)12	Current Report
H-(d)1	Application (Pursuant to § 584.3(a)(4))
H-(d)2	Application (Pursuant to § 584.3(a)(6))
H-(e)1	Application under § 584.4
H-(e)2	Application under § 584.4
H-(e)3	Application under § 584.4
H-(f)	Dividend Notification
H-(g)	Application under § 584.6
HC-F	Instructions: Form and Content of Financial Statements of Savings and Loan Associations Required in Filings Pursuant to Section 408 of the National Housing Act, as amended

(3) Forms with temporary numbers:

Form	
1-T	Application for Authorization to Invest in Office Building (Federal Savings and Loan Association)
2-T	Application for Permission to Establish and Operate a Mobile Facility (Federal Savings and Loan Association)
3-T	Application for Conversion into a Federal Association (Charter K revised)
4-T	Application for Conversion into a Federal Association (Charter N)
6-T	Petition for Charter (Charter K revised)
7-T	Petition for Charter (Charter N or K)
8-T	Agreement for Operating Policies (Insured institution)

10-T	Subscription to Capital (Federal Savings and Loan Association)
11-T	Dividend Agreement (Uninsured State-chartered Applicants for Conversion)
12-T	Affidavit of Transferor (Permanent stock)
13-T	Affidavit of Transferee (Permanent stock)
14-T	Escrow of Permanent Stock—Resolution of Institution Directors (under Exhibit "X"); Certification
15-T	Escrow Agreement—Exhibit "X" (Permanent stock)
16-T	List of Stockholders
17-T	Escrow of Permanent Stock—Resolution of Institution Directors (under Exhibit "W"); Certification
18-T	Escrow Agreement—Exhibit "W" (Permanent stock)
19-T	Substitute Stock Escrow Agreement
20-T	Applicant's Instructions for Extension of Lending Area (Pursuant to § 563.9(b))
21-T	Escrow of Permanent Stock—Form of Receipt

(b) The following forms, which are available at the offices of the Federal Savings and Loan Insurance Corporation, Federal Home Loan Bank Board Building, 101 Indiana Avenue, NW., Washington, D.C. 20552, are prescribed for use by members of the public:

Form	
400	Notice of Default (Loans)
681	Affidavit as to Ownership interest in Non-qualifying Joint Accounts
683	Agreement to Indemify (Payment of Claim for Insurance)
844	Affidavit for Lost Passbook or Certificate Claim for Insurance and Assignment of Insured Account

§ 500.32 Offices of the Board; information and submittals.

(a) The headquarters of the Federal Home Loan Bank Board is located at 101 Indiana Avenue, NW, Washington, D.C. 20552. General information concerning the Federal Home Loan Bank Board, the Federal Home Loan Bank system, the Federal savings and loan system, or the Federal Savings and Loan Insurance Corporation may be obtained in person at that location or by written request addressed to the Secretary to the Federal Home Loan Bank Board, 101 Indiana Avenue, NW, Washington, D.C. 20552.

(b) Sections 501.10 and 501.11 of the general regulations of the Federal Home Loan Bank Board set forth the purposes for which the President of a Federal Home Loan Bank or officer or employee of a Federal Home Loan Bank when designated by the Board may be agents of the Board and the Federal Savings and Loan Insurance Corporation. General information concerning the Board, the Federal Home Loan Bank System, the Federal savings and loan system, or the Federal Savings and Loan Insurance Corporation may be obtained from agents of the Board and the Federal Savings and Loan Insurance Corporation at the offices of the Federal Home Loan Banks. Submittals to the Board or the Federal Savings and Loan Insurance Corporation should be made to the President of the Federal Home Loan Bank of the district in which the submitting person or institution resides or is located. The Federal Home Loan Banks and their districts are as follows:

(1) Federal Home Loan Bank of Boston
One Union Street, Boston, Massachusetts 02108
District 1: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

(2) Federal Home Loan Bank of New York
60 Broad Street, New York, New York 10004
District 2: New Jersey, New York, Puerto Rico, Virgin Islands

(3) Federal Home Loan Bank of Pittsburgh
Eleven Stanwix Street, Fourth Floor, Gateway Center
Pittsburgh, Pennsylvania 15222
Philadelphia Branch Office
Three Parkway Building
16th and Benjamin Franklin Parkway, Philadelphia, Pennsylvania 19102
District 3: Delaware, Pennsylvania, West Virginia

(4) Federal Home Loan Bank of Atlanta
Coastal States Building
260 Peachtree Street, N. W.
Atlanta, Georgia 30303
District 4: Alabama, District of Columbia, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia

(5) Federal Home Loan Bank of Cincinnati
2500 DuBois Tower
Cincinnati, Ohio 45202
District 5: Kentucky, Ohio, Tennessee

(6) Federal Home Loan Bank of Indianapolis
2900 Indiana Tower
One Indiana Square
Indianapolis, Indiana 46204
District 6: Indiana, Michigan

(7) Federal Home Loan Bank of Chicago
111 East Wacker Drive
Chicago, Illinois 60601
District 7: Illinois, Wisconsin

(8) Federal Home Loan Bank of Des Moines
Federal Home Loan Bank Building
Second at Center
Des Moines, Iowa 50309
District 8: Iowa, Minnesota, Missouri, North Dakota

(9) Federal Home Loan Bank of Little Rock
1400 Tower Building
Little Rock, Arkansas 72201
District 9: Arkansas, Louisiana, Mississippi, New Mexico, Texas

(10) Federal Home Loan Bank of Topeka
Federal Home Loan Bank Building
Seventh and Harrison Streets
Topeka, Kansas 66601
District 10: Colorado, Kansas, Nebraska, Oklahoma

(11) Federal Home Loan Bank of San Francisco
The Crown Zellerbach Building
One Bush Street
San Francisco, California 94104
Los Angeles Branch Office
615 South Flower Street
Los Angeles, California 90017
District 11: Arizona, California, Nevada

(12) Federal Home Loan Bank of Seattle
600 Stewart Street
Seattle, Washington 98101
District 12: Alaska, Hawaii and Guam, Idaho, Montana, Oregon Utah, Washington, Wyoming

(c) A Chief Examiner in charge of a staff of field examiners and office personnel is stationed in each of the Federal Home Loan Bank districts. Under the direction of the Director of the Office of Examinations and Supervision, each Chief Examiner is responsible for examinations conducted in his district. The address of the district office and, where it exists, of any branch office of a Chief Examiner may be obtained from the President of the Federal Home Loan Bank serving the Chief Examiner's district.

(d) The field offices of the Federal Savings and Loan Insurance Corporation are as follows:

900 Wilshire Boulevard
Suite 840
Los Angeles, California 90017
10001 West Roosevelt Road
Westchester, Illinois 60153

2. The heading and the text of § 501.2, formerly § 500.10, are as follows:

§ 501.2 Assessments.

Beginning with the assessment for the last half of calendar year 1972, each semiannual assessment under the provisions of subsection (b) of section 18 of the Federal Home Loan Bank Act, as amended, to meet the estimated expenses of the Board shall be made on the following basis: Each Federal Home Loan Bank will be assessed such amount as may be necessary to meet the Board's expenses, such assessment to be upon the several Banks in the same proportion as the total paid-in value of capital stock of the respective Banks bears to the total paid-in value of capital stock of all the Banks at the same point in time. For the assessment for the first half of a calendar year, total paid-in value of capital stock shall be determined from information contained in the reports of the respective Banks as of November 30; and for the assessment for the last half of the calendar year, such determination shall be made from information contained in the reports of the respective Banks as of May 31.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 6]

PART 120—BUSINESS LOAN POLICY

On March 9, 1973, the Small Business Administration published in the FEDERAL REGISTER (38 FR 6409) a notice of proposed rulemaking which consolidated revision 5 and its several amendments. It also deleted policy relating to disaster loans, which policy has been added to Part 123 of these regulations, effective July 1, 1973. It also proposed changes relating to refusals by lending institutions prior to SBA approval of direct loans, gambling activities involving the sale of official State lottery tickets, and the one-time guaranty fee. The public was invited to comment by March 29, 1973. Such comment has been received and considered, and the proposed revision is adopted with minor modifications. This Revision 6 is effective as of July 1, 1973, as follows:

Sec.
120.1 Introduction.
120.2 Business loans and guarantees.
120.3 Terms and conditions of business loans and guarantees.

AUTHORITY: 72 Stat. 387, as amended, 15 U.S.C. 636, sec. 5, 72 Stat. 385, 15 U.S.C. 634 (b)(6).

§ 120.1 Introduction.

(a) This part is established by the SBA to set forth principles and policies which will be followed in the granting and denial of financial assistance for business loans to small business concerns. It is not intended that this general statement of policy provide answers to all questions which may arise in connection with specific applications.

(b) "Financial assistance" as used in this part shall include direct loans made by SBA, immediate participation loans, and guaranteed loans.

(c) "Financial institutions" as used in this part shall include, but not be limited to, banks and other lending institutions whose regular course of business entails the making of commercial, industrial and/or other loans of the type authorized to be made by SBA to eligible small business concerns, and who otherwise meet the criteria specified in § 120.3(c).

§ 120.2 Business Loans and Guarantees.

Basic principles governing the granting and denial of applications for financial assistance:

(a) Applications for financial assistance may be considered only when there is evidence that the desired credit is not otherwise available on reasonable terms. The financial assistance applied for shall be deemed to be otherwise available on reasonable terms, unless it is satisfactorily demonstrated that:

(1) Proof of refusal of the required financial assistance has been obtained from—

(i) The applicant's bank of account;

(ii) If the amount of financial assistance applied for is in excess of the

V 38-136 JUL 17 73 XUM

amount that the lender normally lends to any one borrower, then a refusal from a correspondent bank or from any other lending institution whose lending capacity is adequate to cover the financial assistance applied for; and

(iii) Not less than 2 financial institutions for direct loans in cities where the population exceeds 200,000.

Proof of refusal must contain the date, amount and terms requested, and the reasons for not granting the desired credit. Refusals to advance credit should not be considered the full test of unavailability of credit and, where there is knowledge or reasons to believe that credit is otherwise available on reasonable terms from other sources, the financial assistance applied for cannot be granted notwithstanding the receipt of written refusals from such lending institutions.

(2) The financial assistance required does not appear to be obtainable:

(i) On reasonable terms through the public offering or private placing of securities of the applicant;

(ii) Through the disposal at a fair price of assets not required by the applicant in the conduct of its existing business or not reasonably necessary to its potential healthy growth; and

(iii) Without undue hardship through utilization of the personal credit or resources of the owner, partners, management, or principal shareholders of the applicant;

(iv) Through other applicable Government financing.

(b) It is the policy to stimulate and encourage loans by banks and other lending institutions.

(1) An applicant for a direct SBA loan must show that an immediate participation or guaranteed loan is not available. An applicant for an immediate participation loan must show that a guaranteed loan is not available.

(2) SBA's share of immediate participation loans shall not exceed 75 percent of the loan. Exceptions may be made in cases when the participant's legal lending limit precludes a 25-percent participation. In such cases the participant will be required to share in the loan to the extent of its legal lending limit but in no event less than 10 percent. In guaranteed loans the exposure of SBA under the guaranty may not exceed 90 percent of the unpaid principal balance and accrued interest.

(3) No agreement to extend financial assistance under the Small Business Act shall establish any preferences in favor of a bank or other lending institution.

(c) Assurance of repayment, change of ownership, and recreational and amusement enterprises.

(1) No financial assistance shall be extended unless there exists reasonable assurance that the loan can and will be repaid pursuant to its terms. Reasonable assurance of repayment will exist only where the past earnings record and future prospects indicate ability to repay the loan and other obligations. It will be deemed not to exist when the proposed loan is to accomplish an expansion which is unwarranted in the light of the applicant's past experience and management ability, or when the effect of making the loan is to subsidize inferior management.

(2) Where the purpose of the loan application is to effect a change in the ownership of the applicant small business concern, the loan may usually be approved where there is a reasonable justification for the change in ownership on the ground that the change will promote the sound development or preserve the existence of a small business concern; or will contribute to a well-balanced national economy by facilitating ownership of small business concerns by persons whose participation in the free enterprise system has been prevented or hampered because of economic, physical, or social disadvantages, or because of disadvantages in the business or residential locations.

(3) Where the purpose of the financial assistance is to finance the construction, acquisition, conversion, or operation of recreational or amusement enterprises, any such enterprise must be open to the general public, it must be properly licensed by appropriate State or local authority, and the character and reputation of the applicant will be given special consideration.

(d) Financial assistance will not be granted by SBA:

(1) If the direct or indirect purpose or result of granting such assistance would be to—

(i) Pay off a creditor or creditors of the applicant who are inadequately secured and are in position to sustain a loss.

(ii) Provide funds, directly or indirectly, for payment distribution, or as a loan to owners, partners, or shareholders of the applicant which do not change ownership interests in applicant. This shall not apply to ordinary compensation for services rendered.

(iii) Refund a debt owed to a Small Business Investment Company.

(iv) Replenish funds theretofore used for such purposes.

(2) If the financial assistance will provide or free funds for speculation in any kind of property, real or personal, tangible or intangible;

(3) If the applicant is an eleemosynary institution or other nonprofit enterprise: *Provided, however,* That this provision shall not be construed to bar financial assistance to a cooperative if it carries on a business activity and the purpose of such activity is to obtain pecuniary benefit for its members in the operation of their otherwise eligible small business concerns. An otherwise eligible small business concern will not become ineligible because it is owned in whole or in part by a nonprofit organization.

(4) If the applicant is a newspaper, magazine, book publishing company, radio broadcasting company, television broadcasting company, film production company, or similar enterprise;

(5) If any part of the gross income of the applicant (or of any of its principal owners) is derived from gambling activities, except in those cases where an otherwise eligible small business concern obtains less than one-third of its gross income from its income or commission from the sale of official state lottery tickets under a state license.

(6) If the financial assistance is to provide funds to an enterprise primarily engaged in the business of lending or investments or to any otherwise eligible enterprise for the purpose of financing investments not related or essential to the enterprise;

(7) If the purpose of the financial assistance is to finance the acquisition, construction, improvement, or operation of real property which is, or is to be, held primarily for sale or investment;

(8) If the effect of the granting of the financial assistance will be to encourage monopoly or will be inconsistent with the accepted standards of the American system of free competitive enterprise;

(9) Generally, if the financial assistance would be used primarily in agricultural activities. Agricultural activities include, but are not limited to, the production of food and fiber. Where the applicant is engaged in an agricultural activity and financial assistance has been formally declined by an Agency of the Federal Government or an agricultural credit service supervised by the Farm Credit Administration, such applicant may be eligible for financial assistance from SBA: *Provided, however,* That an activity will not be eligible for financial assistance if it (i) produces (or in the last growing season produced) one or more crops currently eligible for U.S. Department of Agriculture support payment or production loan; (ii) is engaged in the production of livestock or poultry, including eggs, except for (*a*) the operation of a hatchery for the production of baby chicks for sale to others, provided that the hatchery purchases from others more than 50 percent of its eggs; or (*b*) the operation of a commercial feed yard for cattle or hogs where its income is derived from the service operation of housing and feeding animals, either owned by others or purchased from producers solely for the purpose of fattening and resale prior to slaughter; or (*c*) the operation of a commercial poultry feed yard where its income is derived from the service operation of housing and feeding poultry owned by others, even when such operation results in the production of eggs; or (iii) is engaged in the production of fish, unless the production process or type of fish is novel, innovative, or experimental in nature.

(10) Generally, if the financial assistance to be provided is for use in multi-level sales distribution plans.

§ 120.3 Terms and conditions of business loans and guarantees.

(a) *Maturities.* The maturity of business loans made under the Small Business Act shall be restricted to the minimum consistent with sound business practice. The maturity may not exceed 10 years, except that such portion of a loan made for the purpose of constructing facilities may have a maturity not in excess of 15 years.

(b) *Charges and interest rates*—(1) *Charges.* In guaranteed loans (those made by a financial institution with which SBA has entered into an agreement to guarantee as set forth in the Part 122 of this chapter), a guaranty charge shall be payable by the financial institution to SBA for such agreement. The guaranty charge shall be one-fourth of 1 percent per annum of the portion of the loan which SBA has guaranteed, for guarantees approved prior to January 1, 1973. Effective January 1, 1973, the guaranty charge is set on a one-time basis at 1 percent of the amount of the authorized guaranteed portion of the loan, and is payable at first disbursement by the participating lender. For loans made under a revolving line of credit with a maturity of up to 12 months, the guaranty charge is one quarter of one percent of the guaranteed portion payable initially by the participating lender at the time of SBA approval of the line of credit. Longer maturities, or extensions, will be pro-rated on the basis of one quarter of one percent per annum, payable to SBA at the time of approval of the extension of maturity.

(2) *Interest.* (i) Except as provided in subdivision (iii) of this subparagraph, interest on SBA's share of immediate participation loans shall not exceed 5½ percent per annum and where the rate of interest on the share of the loan of the bank or other financial institution is less than 5½ per annum then the rate of SBA's share of the loan shall be at the same rate, but not less than 5 percent per annum. Subject to the approval of SBA, a participating financial institution may establish such rate of interest on its share of a loan as shall be legal and reasonable. Subject to the above guidelines, lending institutions may be given the option of utilizing a fluctuating rate of interest. The fluctuations may occur no more than semiannually, and must rise or fall on the same basis.

(ii) Direct loans: Except as provided in subdivision (iii) of this subparagraph, interest on all direct loans which may be made by SBA shall be at the rate of 5½ percent per annum except as may be otherwise required by reason of the provisions of the Servicemen's Readjustment Act of 1944, as amended.

(iii) Interest on SBA's share of financial assistance, which may be extended to Group Corporations shall be at the rate of 5 percent per annum. Subject to the approval of SBA, financial institutions may establish such rate of interest on their share of participation or guaranteed loans as shall be legal and reasonable.

(iv) Except as provided in subdivision (iii) of this subparagraph, the interest rate on guaranteed loans, subject to the approval of SBA, may be established by the participating financial institution at a rate that shall be legal and reasonable. Subject to the above guidelines, lending institutions may be given the option of utilizing a fluctuating rate of interest. The fluctuations may occur no more than semiannually, and must rise or fall on the same basis. When purchased by SBA, the rate of interest to the borrower on SBA's share of the loan shall be 5½ percent per annum, except where the rate of interest on the share of the loan of the financial institution is less than 5½ percent per annum then the rate on SBA's share of the loan shall be at the same rate, but not less than 5 percent per annum. When SBA purchases its guaranteed share, its payment to the guaranteed participant of accrued interest to the date of purchase shall be at the interest rate established by participant but shall not exceed an effective rate of interest of 8 percent per annum, and without any future adjustment for any unpaid accrued interest in excess of 8 percent per annum.

(v) The interest which a financial institution pays SBA for temporary advances under the liquidity privilege in a guaranty loan agreement varies according to the approval date of SBA's guaranty on a given loan.

(vi) From time to time SBA may publish in the FEDERAL REGISTER notices of the maximum rates acceptable to SBA under the immediate participation and guaranty programs.

(3) *Service fees.* In immediate participation loans, and guaranteed loans where SBA has purchased its portion, made and serviced by a financial institution, the financial institution may deduct a service fee only out of interest collected for the account of SBA so long as the bank is servicing the loan: *And provided,* That such fee shall not be added to any amount which borrower is obligated to pay under the loan. Where SBA's share of the loan is 75 percent or less, the service fee shall be three-eighths of 1 percent per annum on the unpaid principal balance of SBA's share of the loan. Where SBA's share is in excess of 75 percent of the loan, the service fee shall be one-fourth of 1 percent per annum on the unpaid principal balance of SBA's portion of the loan.

(4) *Closing fees.* A closing fee equivalent to one-eighth of 1 percent of SBA's approved portion of the loan, or $10, whichever is the greater, shall be imposed upon all direct loans and immediate participation loans made and serviced by SBA which are authorized pursuant to section 7(a) of the Small Business Act, as amended. The fee shall be paid to SBA prior to disbursement of the loan and shall be exclusive of any other closing costs (such as recording fees and taxes, costs of title examination and title insurance, and other charges incident to the transaction) which are customarily paid by the borrower.

(c) *Eligible loan participant.* SBA is authorized by appropriate enabling legislation to make participation loans to small concerns in cooperation with banks or other lending institutions through agreements to participate on an immediate or deferred basis. In order to serve as an eligible loan participant in a particular loan transaction with SBA, the financial institution must—

(1) *Capacity to service loan.* Have the continuing capacities for processing; evaluating, disbursing, and servicing commercial term, and other loans authorized to be made by SBA to small concerns.

(2) *Capital structure and financial standing.* Have an adequate capital structure aggregating not less than $200,000, which must be so unimpaired or of such tangible nature to be considered sound (except that the $200,000 minimum shall not apply to institutions which are subject to supervisory and examining control of State or Federal chartering, licensing or similar regulatory authority) and, together with its existing or proposed directors, officers, other employees, and other persons connected with its organization and operations, possess good character as well as general standing and reputation in the community based on their lending and other established financial ability and experience.

(3) *Qualified management.* Have and maintain in charge of operations qualified management which shall be available to the public during regular business hours, and hold itself out to the public as engaged in the making of commercial, industrial and other loans of the type authorized to be made by SBA to eligible small concerns.

(4) *Supervisory and examining authority.* Be operating subject to applicable supervisory and examining control of State or Federal chartering, licensing or similar regulatory authority, or, in the absence of such control, be authorized to and shall enter into a written agreement with SBA to submit appropriate financial reports to SBA or to make available for SBA examination its books, records, accounts and affairs deemed necessary and appropriate by SBA to the protection of its interest in the transaction.

(5) *Absence of other financial or self-dealing interest in borrower concern.* Not possess, nor may any of its officers, directors, stockholders owning ten (10) or more percent of any class of shares, investment advisers, or other associates or affiliates, possess any interest directly or indirectly, in the small business concern (or in the case of a loan to a Local Development Company, the small business concern to be assisted) by reason of a stock or warrants position, or as a result of financing its own sales or business operations (except that any such interest in the borrower by a small business investment company, duly licensed by SBA, associated or affiliated with a loan participant shall not disqualify such otherwise eligible loan participant). Concerns operating as a subsidiary or affiliate engaged primarily in lending for the purpose of financing the sale of products or services or other business operations of an affiliate or parent concern are not considered eligible. In the event the borrower shall be required to obtain personal insurance coverage (as contrasted with hazard insurance to protect collateral), it shall be only in such minimum amounts and costs as are necessary to protect the loan. Such insurance coverage shall be limited to declining term policies, providing a decrease in coverage

V 38-136 JUL 17 73 XUM

consistent with the decreasing loan balance outstanding.

(6) *Ineligibility of SBIC's.* Not operate as a small business investment company duly licensed by SBA.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73–NE–20; Amdt. 39–1686]

PART 39—AIRWORTHINESS DIRECTIVES

Sikorsky S–61 Helicopters

Amendment 39–1216, AD 71–11–7, requires visual inspection of the fuselage hinge fittings of specified Sikorsky S–61 helicopters for cracks. After issuing Amendment 39–1216, reports have been received by the FAA indicating the occurrence of corrosion of certain of the fuselage hinge fittings and the pylon hinge fitting lugs which could result in failure of these hinge fitting assemblies. Since this condition is likely to exist or develop in other aircraft of the same type design, an AD is being issued superseding AD 71–11–7 which will require an inspection of the fuselage hinge fittings and pylon hinge fittings for corrosion in accordance with a revised Sikorsky Service Bulletin No. 61B20–6A, dated June 18, 1973. The visual inspection of the fuselage hinge fittings required in AD 71–11–7 is being retained with the modification that the previous compliance interval of 120 days is being changed to 150 hours time in service so as to make this inspection coincide with the new inspection for corrosion.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new AD:

SIKORSKY AIRCRAFT—Applies to all S–61A, S61D, S–61E, S–61V and S–61L Helicopters certificated in all categories.

Compliance required as indicated.

To prevent fatigue failures of the rear fuselage and pylon hinge fitting assemblies, accomplish the following:

(a) For aft fuselage upper and lower hinge fitting assemblies S6120–65118–3, S6120–65118–4, S6120–65118–34, S6120–65121–0, S6120–75702–1 and S6120–75702–2:

(1) Within the next 15 hours time in service after the effective date of this AD, unless already accomplished, inspect the hinge fittings in accordance with Section 2A of Sikorsky Service Bulletin No. 61B20–6A dated June 18, 1973 or later approved revisions or an equivalent method approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration New England Region;

(2) Thereafter, on a daily basis inspect the hinge fitting assemblies in accordance with Section 2C of said Bulletin or later approved revisions or an equivalent method approved as above; and

(3) At each 150 hours time in service after the initial inspection described in (a) (1) or approved equivalent period inspection, inspect the hinge fitting assemblies in accordance with Section 2G of said bulletin or later approved revisions or an equivalent method approved as above.

(b) For aft fuselage upper and lower hinge fitting assemblies and upper and lower pylon hinge fitting assemblies S6120–65118–3, S6120–65118–4, S6120–65118–34, S6120–65121–0, S6120–75702–1, S6120–75702–2, S6120–66117–0, S6120–66117–2, S6120–66120–0, S6120–66120–2:

(1) Within the next 15 days after the effective date of this AD, unless already accomplished, inspect the aft fuselage hinge fitting lugs and the pylon hinge fitting lugs in accordance with Section 2B of Sikorsky Service Bulletin No. 61B20–6A dated June 18, 1973 or later approved revisions or an equivalent inspection method approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, New England Region.

(2) Thereafter, at intervals not to exceed 50 hours time in service from the last inspection, inspect the aft fuselage hinge fitting lugs and the pylon hinge fitting lugs in accordance with Section 2D of said Bulletin, or later approved revisions, or an equivalent inspection method approved as above; and

(3) At each 150 hours time in service after the initial inspection described in (b) (1) or approved equivalent period inspection, inspect the aft fuselage hinge fitting lugs and the pylon hinge fitting lugs in accordance with Section 2F of said Bulletin, or later approved revisions or an equivalent inspection method as approved above.

(c) If a crack is found, remove and replace the hinge fitting prior to further flight.

(d) These inspections are not required on the steel upper hinge fitting assemblies or on any hinge fitting assemblies in the T73 condition. (This supersedes AD–71–11–7)

This amendment becomes effective July 27, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1345(a), 1421 and 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Burlington, Massachusetts on July 6, 1973.

FERRIS J. HOWLAND,
Director, New England Region.

[Docket No. 12326, Amdt. No.91–118]

PART 91—GENERAL OPERATING AND FLIGHT RULES

Large and Turbine-Powered Multiengine Airplanes: Charges for Certain Operations

The purpose of these amendments to Subpart D of Part 91 of the Federal Aviation Regulations is to clarify and more specifically prescribe those items that may be charged under § 91.181.

Interested persons have been afforded an opportunity to participate in the making of this amendment by a notice of proposed rulemaking (Notice 72–28) issued on October 20, 1972, and published in the FEDERAL REGISTER on October 25, 1972 (37 FR 22798). Due consideration has been given to all comments presented in response to the notice. Except for minor editorial changes, and except as specifically discussed hereinafter, these amendments and the reasons therefor are the same as those in Notice 72–28.

The FAA received over 35 comments in response to Notice 72–28. All but one favored adoption of the proposed amendments to Subpart D of Part 91. However, most of the commentators favoring adoption recommended that the list of permissible charges in proposed § 91.181 (d) be changed so as to specifically permit charging for expenses that could be attributed to a particular flight, although they are not incurred as a direct result of that flight in that they are incurred irrespective of whether or not the flight is conducted. Such expenses include (1) salaries of flight crews employed by the aircraft operator, (2) aircraft depreciation, (3) insurance premiums (hull and liability), (4) crew training costs, and (5) maintenance costs. In this regard, a number of means were suggested by commentators whereby these expenses could be recovered as charges for a particular flight.

With respect to the proposal in the notice that a charge equal to 100 percent of the cost of the fuel for the flight be allowed instead of a specific computation of these expenses, a number of commentators contended that such a provision would not, in many cases, permit recovery of all of the expenses resulting from the operation of the aircraft. However, the FAA believes, based on the information available to it, that the allowance of such a charge would provide for the recovery by the operator of an amount that would reasonably approximate expenses not incurred as a direct result of a particular flight, but appropriately attributed thereto. This would, at the same time, relieve the FAA of the administrative burden of verifying in detail the various methods used by operators to compute those expenses, in order to ensure that a profit is not made. Accordingly, § 91.181(d)(10), as adopted, allows an additional charge equal to 100 percent of the expenses listed in § 91.181(d)(1), and does not provide for authorization by the Administrator of any other charge.

It should be noted that, although the FAA does not foresee compliance with § 91.181(d) causing an unreasonable burden on any operator, individual operators who believe that the uniqueness of their particular situation justifies a specific charge not provided for in subparagraph (d) may, of course, petition for an appropriate exemption in accordance with the procedures contained in Part 11.

The National Air Transportation Conferences, Inc., in its comment on the notice, suggested that the word "registered" be inserted before the word "owners" in proposed § 91.181(c)(3), in order to prevent abuse of this provision through attempts to conceal the sale of air transportation under the guise of temporary ownership of an aircraft. The FAA agrees with this comment. Section 47.3(b)(1) provides that no person may operate an aircraft that is eligible for registration under section 501 of the Federal Aviation Act of 1958, unless that aircraft has been registered by its owner. Accordingly, proposed § 91.181(c)(3), as adopted, is clarified by inserting the word "registered" before the words "joint owners" wherever they appear.

(Secs. 313(a), 601, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421; sec. 6(c), Department of Transportation Act; 49 U.S.C. 1655(c))

In consideration of the foregoing, and for the reasons given in Notice 72–28, Part 91 of the Federal Aviation Regulations is amended, effective August 16, 1973, as follows:

1. Section 91.181 is amended as follows:

a. By amending subparagraphs (3) through (5), and subparagraph (7) of paragraph (b);

b. In paragraph (b)(9), by amending the parenthetical phrase "other than transportation" to parenthetically read "other than transportation by air";

c. By amending paragraph (c); and by

d. Adding a new paragraph (d) to read as follows:

§ 91.181 Applicability.

* * * * * * *

(b) * * *

(3) Flights for the demonstration of an airplane to prospective customers when no charge is made except for those specified in paragraph (d) of this section;

(4) Flights conducted by the operator of an airplane for his personal transportation, or the transportation of his guests when no charge, assessment, or fee is made for the transportation;

(5) The carriage of officials, employees, guests, and property of a company on an airplane operated by that company, or the parent or a subsidiary of that company or a subsidiary of the parent, when the carriage is within the scope of, and incidental to, the business of the company (other than transportation by air) and no charge, assessment or fee is made for the carriage in excess of the cost of owning, operating, and maintaining the airplane, except that no charge of any kind may be made for the carriage of a guest of a company, when the carriage is not within the scope of, and incidental to, the business of that company.

* * * * * * *

(7) The carriage of property (other than mail) on an airplane operated by a person in the furtherance of a business or employment (other than transportation by air) when the carriage is within the scope of, and incidental to, that business or employment and no charge, assessment, or fee is made for the carriage other than those specified in paragraph (d) of this section;

* * * * * * *

(c) As used in this section

(1) A "time sharing agreement" means an arrangement whereby a person leases his airplane with flight crew to another person, and no charge is made for the flights conducted under that arrangement other than those specified in paragraph (d) of this section;

(2) An "interchange agreement" means an arrangement whereby a person leases his airplane to another person in exchange for equal time, when needed, on the other person's airplane, and no charge, assessment, or fee is made, except that a charge may be made not to exceed the difference between the cost of owning, operating, and maintaining the two airplanes;

(3) A "joint ownership agreement" means an arrangement whereby one of the registered joint owners of an airplane employs and furnishes the flight crew for that airplane and each of the registered joint owners pays a share of the charges specified in the agreement.

(d) The following may be charged, as expenses of a specific flight, for transportation as authorized by paragraphs (b) (3) and (7) and (c)(1) of this section:

(1) Fuel, oil, lubricants, and other additives.

(2) Travel expenses of the crew, including food, lodging, and ground transportation.

(3) Hangar and tie-down costs away from the aircraft's base of operations.

(4) Insurance obtained for the specific flight.

(5) Landing fees, airport taxes, and similar assessments.

(6) Customs, foreign permit, and similar fees directly related to the flight.

(7) In flight food and beverages.

(8) Passenger ground transportation.

(9) Flight planning and weather contract services.

(10) An additional charge equal to 100 percent of the expenses listed in subparagraph (1) of this paragraph.

Issued in Washington, D.C., on July 9, 1973.

ALEXANDER P. BUTTERFIELD,
Administrator.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

ANTIOXIDANTS AND/OR STABILIZERS FOR POLYMERS

By publication in the FEDERAL REGISTER of January 20, 1972 (37 FR 889), notice was given that a petition (FAP 2B2759) had been filed by Weston Chemical Inc., 103 Spring Road, Montavale, NJ 07645, proposing that § 121.2566 *Antioxidants and/or stabilizers for polymers* (21 CFR 121.2566) be amended to provide for the safe use of distearyl pentaerythritol diphosphite as an antioxidant and/or stabilizer in the manufacture of polyolefin plastics intended for food contact use.

The Commissioner of Food and Drugs, having evaluated the data in the petition, and other relevant material, concludes that the proposal should be adopted for the petitioned additive under the preferred chemical nomenclature, as set forth below.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.2566(b) is amended by alphabetically adding to the list of substances a new item as follows:

§ 121.2566 Antioxidants and/or stabilizers for polymers.

* * * * * * *

(b) List of substances:

	Limitations
* * *	* * *
Cyclic neopentanetetrayl bis (octadecyl phosphite); the phosphorus content is in the range of 7.8–8.2 weight percent.	For use only at levels not to exceed 0.25 percent by weight of olefin polymers complying with § 121.2501 (c), items 1.1 or 2.1.
* * *	* * *

Any person who will be adversely affected by the foregoing order may at any time on or before August 16, 1973 file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective July 17, 1973.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: July 10, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73–14572 Filed 7–16–73;8:45 am]

SUBCHAPTER C—DRUGS

PART 135a—NEW ANIMAL DRUGS FOR OPHTHALMIC AND TOPICAL USE

Copper Naphthenate Solution, Veterinary

The Commissioner of Food and Drugs has evaluated a supplemental new ani-

V 38-136 JUL 17 73 XUM

mal drug application (12-991V) filed by Ayerst Laboratories, Div. of American Home Products Corp., 685 Third Ave., New York, NY 10017, proposing the safe and effective use of copper naphthenate solution, veterinary for the treatment of horses, cattle, swine, sheep, goats, and dogs. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135a is amended by adding a new section as follows:

§ 135a.51 Copper naphthenate solution, veterinary.

(a) *Specification.* The drug contains 37.5 percent copper naphthenate in a suitable solute.

(b) *Sponsor.* See code No. 038 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) It is used in the treatment of lesions in horses, cattle, swine, sheep, goats, and dogs including footrot, ringworm, wounds, for drying up superficial sores, for drying necrotic material for subsequent removal, to keep open lesions clean, and for treating udder sores. It is used in cattle for treating heal cracks, hoof punctures, and dehorning wounds. It is used in horses for treating thrush, scratches, and for toughening hooves (spongy). It is used in dogs for treating cracked skin over elbows and for toughening foot pads.

(2) Necrotic material should be removed prior to application if damage is extensive. The drug is applied daily. If a scab is present, the drug should be applied once a day until the scab is easily removed; then the drug is applied every other day until fully healed. After dehorning, the drug is applied to the open wound with a swab.

(3) Do not use on teats of lactating dairy animals.

Effective date. This order shall be effective July 17, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: July 11, 1973.

C. D. VAN HOUWELING,
Director, Bureau of Veterinary Medicine.

[FR Doc.73-14573 Filed 7-16-73;8:45 am]

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7282]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

PART 301—PROCEDURE AND ADMINISTRATION

Declaration of Estimated Tax by Individuals and Waiver of Penalty for Underpayment by Individuals of 1971 Estimated Income Tax

By a notice of proposed rulemaking appearing in the FEDERAL REGISTER for Friday, March 23, 1973 (38 FR 7567), amendments to the Income Tax Regulations (26 CFR Part 1) and the Regulations on Procedure and Administration (26 CFR Part 301) were proposed in order to conform such regulations to the provisions of sections 207 and 209 of the Revenue Act of 1971 (85 Stat. 512, 517), relating to declaration of estimated tax by individuals and waiver of penalty for underpayment by individuals of 1971 estimated income tax. No comments were presented by interested persons regarding the notice of proposed rule making. The proposed amendments of the Income Tax Regulations (26 CFR Part 1) and the Regulations on Procedure and Administration (26 CFR Part 301) are adopted by this document.

The new regulations conform to the changes made in section 6015(a) of the Code by section 209 of the Revenue Act of 1971. Under paragraph (a) of the revision to § 1.6015(a)-1, the income level at which a declaration of estimated tax must be filed is increased over that under prior law to amounts in excess of $20,000 for a single person, a head of household, a surviving spouse, or a married individual whose spouse does not receive wages and amounts in excess of $10,000 for a married individual where both spouses receive wages. The income level remains at amounts in excess of $5,000 for a married individual if either spouse is a nonresident alien, if they are separated under a decree of divorce or of separate maintenance, or if they have different taxable years. A declaration is also required if gross income is expected to include more than $500 of income from sources other than wages. However, no declaration is required if the estimated tax can reasonably be expected to be less than $100. These amounts were increased over those under prior law. All of these changes are effective for taxable years beginning after December 31, 1971.

New § 1.6654-4 provides, pursuant to section 207 of the Revenue Act of 1971, that, in the case of individuals, the penalty prescribed by section 6654(a) and § 1.6654-1 for underpayment of estimated tax shall not apply in certain cases to taxable years beginning after December 31, 1970, and ending before January 1, 1972. Generally, those taxpayers for whom the penalty is waived are single persons (or married persons not entitled to file a joint return) whose gross income does not exceed $10,000, heads of households and surviving spouses if their gross income does not exceed $20,000, and married individuals entitled to file a joint return whose aggregate gross income does not exceed $20,000. However, the waiver does not apply if the taxpayer had more than $200 ($400 in the case of married taxpayers entitled to file a joint return) in income from sources other than wages.

Adoption of amendments to the regulations. On Friday, March 23, 1973, notice of proposed rule making with respect to the Income Tax Regulations (26 CFR Part 1) and the Regulations on Procedure and Administration (26 CFR Part 301) under sections 6015 and 6654 of the Internal Revenue Code of 1954 to conform such regulations to sections 207 and 209 of the Revenue Act of 1971 (85 Stat. 512, 517), relating to declaration of estimated tax by individuals and waiver of penalty for underpayment by individuals of 1971 estimated income tax, was published in the FEDERAL REGISTER (38 FR 7567). No comments were presented by interested persons regarding the rules proposed. The regulations as proposed are hereby adopted.

(Sec. 7805, Internal Revenue Code of 1954, 68A Stat. 917; 26 U.S.C. 7805)

[SEAL] DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: July 11, 1973.

JOHN H. HALL,
Deputy Assistant Secretary of the Treasury.

In order to conform the Income Tax Regulations (26 CFR Part 1) and the Regulations on Procedure and Administration (26 CFR Part 301) to the provisions of sections 207 and 209 of the Revenue Act of 1971 (85 Stat. 512, 517), such regulations are amended as follows:

PARAGRAPH 1. Section 1.6015 is amended by revising section 6015(a) and by adding to the historical note. These revised and added provisions read as follows:

§ 1.6015(a) Statutory provisions; declaration of estimated income tax by individuals.

Sec. 6015. *Declaration of estimated income tax by individuals*—(a) *Requirement of declaration.* Except as otherwise provided in this section, every individual shall make a declaration of his estimated tax for the taxable year if—

(1) The gross income for the taxable year can reasonably be expected to exceed—

(A) $20,000, in the case of—

(i) A single individual, including a head of a household (as defined in section 2(b)) or a surviving spouse (as defined in section 2(a)); or

(ii) A married individual entitled under subsection (b) to file a joint declaration with his spouse, but only if his spouse has not received wages (as defined in section 3401(a)) for the taxable year; or

(B) $10,000, in the case of a married individual entitled under subsection (b) to file a joint declaration with his spouse, but only if both he and his spouse have received wages (as defined in section 3401(a)) for the taxable year; or

(C) $5,000, in the case of a married individual not entitled under subsection (b) to file a joint declaration with his spouse; or

(2) The gross income can reasonably be expected to include more than $500 from sources other than wages (as defined in section 3401(a)).

Notwithstanding the provisions of this subsection, no declaration is required if the estimated tax (as defined in subsection (c)) can reasonably be expected to be less than $100.

[Sec. 6015(a) as amended by sec. 5, Act of Sept. 14, 1960 (Pub. Law 86-779, 74 Stat. 1000); sec. 103(j)(1), Foreign Investors Tax Act 1966 (80 Stat. 1554); sec. 803(d)(7), Tax Reform Act 1969 (83 Stat. 684); sec. 209, Rev. Act 1971 (85 Stat. 517)]

PAR. 2. Section 1.6015(a)-1(a) as amended by revising the caption of subparagraph (1) and so much of such subparagraph as precedes subdivision (i) thereof, by redesignating such revised subparagraphs (1) and (2) as subparagraphs (2) and (3) respectively, by inserting immediately before such redesignated subparagraph (2) a new subparagraph (1), and by revising paragraphs (c) and (e). These revised, redesignated, and added provisions read as follows:

§ 1.6015(a)-1 Declaration of estimated income tax by individuals.

(a) *Requirement*—(1) *Taxable years beginning after December 31, 1971.* With respect to taxable years beginning after December 31, 1971, a declaration of estimated income tax by an individual is not required if the estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $100. In all other cases a declaration of estimated income tax shall be made by every individual if the following conditions are met and if such individual is not a nonresident alien individual who is excepted under section 6015(i) and § 1.6015(i)-1 from the requirements of making a declaration:

(i) The gross income for the taxable year can reasonably be expected to exceed—

(*a*) $20,000, in the case of—

(*1*) A single individual including a head of a household (as defined in section 2(b)) or a surviving spouse (as defined in section 2(a)); or

(2) A married individual entitled under section 6015(b) to file a joint declaration with his spouse, if his spouse has not received wages (as defined in section 3401(a)) for the taxable year; or

(*b*) $10,000, in the case of a married individual entitled under section 6015(b) to file a joint declaration with his spouse, if both he and his spouse have received wages (as defined in section 3401(a)) for the taxable year; or

(c) $5,000, in the case of a married individual not entitled under section 6015(b) to file a joint declaration with his spouse; or

(ii) The gross income can reasonably be expected to include more than $500 from sources other than wages (as defined in section 3401(a)).

(2) *Taxable years beginning after December 31, 1966, and before January 1, 1972.* With respect to taxable years beginning after December 31, 1966, and before January 1, 1972, a declaration of estimated income tax by an individual is not required if the estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $40. In all other cases a declaration of estimated income tax shall be made by every individual if the following conditions are met and if such individual is not a nonresident alien individual who is excepted under section 6015(i) and § 1.6015(i)-1 from the requirement of making a declaration:

(i) The gross income for the taxable year can reasonably be expected to exceed—

(*a*) $5,000, in the case of—

(*1*) A single individual other than a head of a household (as defined in section 1(b)(2) for taxable years ending before January 1, 1971, or as defined in section 2(b) of the Code as amended by the Tax Reform Act of 1969 for taxable years beginning after December 31, 1970); or

(2) A married individual entitled under section 6015(b) to file a joint declaration with his spouse; or

(3) A married individual entitled under section 6015(b) to file a joint declaration with his spouse, but only if the aggregate gross income of such individual and his spouse for the taxable year can reasonably be expected to exceed $10,000; or

(*b*) $10,000, in the case of—

(*1*) A head of household (as defined in section 1(b)(2) for taxable years ending before January 1, 1971, or as defined in section 2(b) of the Code as amended by the Tax Reform Act of 1969 for taxable years beginning after December 31, 1970); or

(2) A surviving spouse (as defined in section 2(b)) and his gross income can reasonably be expected to exceed $20,000, he is required to file a declaration of estimated tax for 1972. Since it was not reasonable to assume that H's gross income for 1972 would exceed $20,000 until July 1972 (after June 1 and before September 2), H is not required to file a declaration until September 15, 1972. However, if H's estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $100, he is not required to file a declaration of estimated tax. See section 6073 and §§ 1.6073-1 to 1.6073-4, inclusive, for rules as to when a declaration must be filed.

(ii) The gross income can reasonably be expected to exceed $200 from sources other than wages (as defined in section 3401(a)).

(c) *Exemption of spouse.* For the purpose of determining whether a declaration of estimated tax is required under the provisions of paragraph (a)(3) of this section, a married person filing a separate declaration may not take into account the exemption of his spouse, if his spouse has, or is reasonably expected to have, gross income, or is reasonably expected to be the dependent of another taxpayer for the taxable year.

(e) *Examples.* The application of the provisions of this section may be illustrated by the following examples:

Example (1). H maintains as his home a household which is the principal place of abode of himself and his two dependent children. H's wife died in 1970 and he has not remarried. H and his wife filed a joint return for 1970. H's salary from January 1 to June 30, 1972, is at the annual rate of $18,000. However, effective July 1, 1972, his annual salary is increased to $24,000, and under the facts then existing it is reasonable to assume that his salary for the remaining portion of 1972 will remain unchanged and that his total salary for the year will, therefore, be $21,000. Since H is a surviving spouse (as defined in section 2(a)) and his gross income can reasonably be expected to exceed $20,000, he is required to file a declaration of estimated tax for 1972. Since it was not reasonable to assume that H's gross income for 1972 would exceed $20,000 until July 1972 (after June 1 and before September 2), H is not required to file a declaration until September 15, 1972. However, if H's estimated tax (as defined in section 6015(c)) can reasonably be expected to be less than $100, he is not required to file a declaration of estimated tax. See section 6073 and §§ 1.6073-1 to 1.6073-4, inclusive, for rules as to when a declaration must be filed.

Example (2). H, a taxpayer making his return on the calendar year basis, has an annual salary of $12,000 in 1972. W, H's wife, received wages (as defined in section 3401(a)) in December 1972. W did not receive wages prior to December. Assuming that H and W are entitled to file a joint declaration of estimated tax under section 6015(b), H would not be required to file a declaration for 1972 until January 15, 1973, since prior to December 1972 W had not received wages. Since W received wages after September 1, 1972, H must file a declaration on or before January 15, 1973, because, under the rule contained in paragraph (a)(1)(i)(*b*) of this section, H's gross income could reasonably be expected to exceed $10,000 for 1972. However, no declaration would be required if H's estimated tax (as defined in section 6015(c)) could reasonably be expected to be less than $100. No declaration is required prior to January 15, 1973, because, under the rule contained in paragraph (a)(1)(i)(*a*)(2) of this section, H's gross income for 1972 could not reasonably be expected to exceed $20,000.

Example (3). P is a taxpayer making his return on the calendar year basis. P is engaged in the practice of his profession on his own account and has gross income of $2,000 from such profession for the 2 months of January and February 1972. He reasonably expects that his gross income from his

V 38 136 JUL 17 73 XUM

profession will continue to average $1,000 each month throughout the year and that he will have no income from any other source during 1972. Since P has gross income which does not constitute wages subject to withholding, he is required to file a declaration of estimated tax for that year since he has income of more than $500 from sources other than wages, unless he reasonably expects his estimated tax to be less than $100.

Example (4). S, a married taxpayer, has been regularly employed for many years. As of January 1, 1972, his weekly wages are $305. For many years, S has also owned stock in a corporation which has regularly paid him annual dividends ranging from $575 to $600. Because his gross income can reasonably be expected to include more than $500 from sources other than wages, S is required to make a declaration of estimated tax for 1972, unless he reasonably expects his estimated tax to be less than $100.

* * * * *

PAR. 3. Immediately after the historical note of § 1.6654 is inserted the following:

Sec. 207. [Revenue Act of 1971] *Waiver of penalty for underpayment of 1971 estimated income tax*—(a) *Waiver of penalty.* Notwithstanding any other provision of law, section 6654(a) of the Internal Revenue Code of 1954 (relating to addition to tax for failure by individual to pay estimated income tax) shall not apply to any taxable year beginning after December 31, 1970, and ending before January 1, 1972—

(1) If gross income for the taxable year does not exceed $10,000 in the case of—

(A) A single individual other than a head of a household (as defined in section 2(b) of such Code) or a surviving spouse (as defined in section 2(a) of such Code); or

(B) A married individual not entitled under section 6013 of such Code to file a joint return for the taxable year; or

(2) If gross income for the taxable year does not exceed $20,000 in the case of—

(A) A head of a household (as defined in section 2(b) of such Code); or

(B) A surviving spouse (as defined in section 2(a) of such Code); or

(3) In the case of a married individual entitled under section 6013 of such Code to file a joint return for the taxable year, if the aggregate gross income of such individual and his spouse for the taxable year does not exceed $20,000.

(b) *Limitation.* Subsection (a) shall not apply if the taxpayer has income from sources other than wages (as defined in section 3401 (a) of such Code) in excess of $200 for the taxable year ($400 in the case of a husband and wife entitled to file a joint return under section 6013 of such Code for the taxable year).

[Sec. 207, Rev. Act 1971 (85 Stat. 512)]

PAR. 4. Section 1.6654–2 is amended by revising so much of paragraph (a) as follows subparagraph (4) to read as follows:

§ 1.6654–2 Exceptions to imposition of the addition to the tax in the case of individuals.

(a) *In general.* * * *

In the case of a taxpayer whose taxable year consists of 52 or 53 weeks in accordance with section 441(f), the rules prescribed by paragraph (b) of § 1.441–2 shall be applicable in determining, for purposes of subparagraph (1) of this paragraph, whether a taxable year was a year of 12 months and, for purposes of subparagraphs (3) and (4) of this paragraph, the number of calendar months in a taxable year preceding the date prescribed for payment of an installment of estimated tax. For the rule to be applied in determining taxable income for any period described in subparagraphs (3) and (4) of this paragraph in the case of a taxpayer who employs accounting periods (e.g., 13 4-week periods or four 13-week periods) none of which terminates with the end of the applicable period described in subparagraph (3) or (4) of this paragraph, see paragraph (a)(5) of § 1.6655–2. See § 1.6654–4 for certain cases where the imposition of the addition to the tax prescribed by section 6654(a) shall not apply with respect to taxable years beginning after December 31, 1970, and ending before January 1, 1972.

PAR. 5. Section 1.6654–4 is redesignated as § 1.6654–5.

PAR. 6. The following section is inserted immediately following § 1.6654–3:

§ 1.6654–4 Waiver of penalty for underpayment of 1971 estimated tax by an individual.

(a) *In general.* Section 207 of the Revenue Act of 1971 provides that, in the case of individuals, the penalty prescribed by section 6654(a) and § 1.6654–1 for underpayment of estimated tax shall not apply in certain cases to taxable years beginning after December 31, 1970, and ending before January 1, 1972. The penalty shall be waived only if the taxpayer meets one of the gross income requirements contained in paragraph (b) of this section and if the limitation contained in paragraph (c) of this section is not applicable.

(b) *Gross income requirement.* Except as provided in paragraph (c) of this section, the waiver provided in paragraph (a) of this section shall be applicable only—

(1) If the gross income for the taxable year does not exceed $10,000 in the case of—

(i) A single individual who is neither a head of a household (as defined in section 2(b)) nor a surviving spouse (as defined in section 2(a)), or

(ii) A married individual not entitled under section 6013 to file a joint return for the taxable year, or

(2) If the gross income for the taxable year does not exceed $20,000 in the case of—

(i) A head of a household (as defined in section 2(b)) or

(ii) A surviving spouse (as defined in section 2(a)), or

(3) If the aggregate gross income for the taxable year does not exceed $20,000 in the case of a married individual (entitled under section 6013 to file a joint return for the taxable year) and his spouse.

(c) *Limitation.* Notwithstanding any other provision of this section, the waiver provided in paragraph (a) of this section shall not be applicable if, in the taxable year, the taxpayer has income from sources other than wages (as defined in section 3401(a)) in excess of $200 ($400 in the case of a husband and wife entitled to file a joint return for the taxable year under section 6013). Thus, for example, even if the aggregate gross income of a husband and wife (entitled under section 6013 to file a joint return for the taxable year) does not exceed $20,000, the waiver of the penalty for underpayment of estimated tax shall not apply if the husband and wife have, in the aggregate, income from sources other than wages in excess of $400.

PAR. 7. Section 301.6015 is amended by revising section 6015(a) and by adding to the historical note. These revised and added provisions read as follows:

§ 301.6015 Statutory provisions; declaration of estimated income tax by individuals.

Sec. 6015. *Declaration of estimated income tax by individuals*—(a) *Requirement of declaration.* Except as otherwise provided in this section, every individual shall make a declaration of his estimated tax for the taxable year if—

(1) The gross income for the taxable year can reasonably be expected to exceed—

(A) $20,000, in the case of—

(i) A single individual, including a head of a household (as defined in section 2(b)) or a surviving spouse (as defined in section 2(a)); or

(ii) A married individual entitled under subsection (b) to file a joint declaration with his spouse, but only if his spouse has not received wages (as defined in section 3401(a)) for the taxable year; or

(B) $10,000, in the case of a married individual entitled under subsection (b) to file a joint declaration with his spouse, but only if both he and his spouse have received wages (as defined in section 3401(a)) for the taxable year; or

(C) $5,000, in the case of a married individual not entitled under subsection (b) to file a joint declaration with his spouse; or

(2) The gross income can reasonably be expected to include more than $500 from sources other than wages (as defined in section 3401(a)).

Notwithstanding the provisions of this subsection, no declaration is required if the estimated tax (as defined in subsection (c)) can reasonably be expected to be less than $100.

* * * * *

[Sec. 6015 as amended by sec. 74, Technical Amendments Act 1958 (72 Stat. 1660); sec. 5(a), Act of Sept. 14, 1960 (Public Law 86–779, 74 Stat. 1000); sec. 1(a)(1), Act of Sept. 25, 1962 (Public Law 87–682, 76 Stat. 575); sec. 102 (a) and (d), Tax Adjustment Act 1966 (80 Stat. 38); sec. 301(j), Foreign Investors Tax Act 1966 (80 Stat. 1554); sec. 301(b)(12), 803(d)(7), and 944, Tax Reform Act 1969 (83 Stat. 586, 684, 729); sec. 209, Rev. Act 1971 (85 Stat. 517)]

PAR. 8. Immediately after the historical note of § 301.6654 is inserted the following:

Sec. 207. [Revenue Act of 1971] *Waiver of penalty for underpayment of 1971 estimated income tax*—(a) *Waiver of penalty.* Notwithstanding any other provision of law, section 6654(a) of the Internal Revenue Code of 1954 (relating to addition to tax for failure by individual to pay estimated income tax) shall not apply to any taxable year beginning after December 31, 1970, and ending before January 1, 1972—

(1) If gross income for the taxable year does not exceed $10,000 in the case of—

(A) A single individual other than a head of a household (as defined in section 2(b)

of such Code) or a surviving spouse (as defined in section 2(a) of such Code); or

(B) A married individual not entitled under section 6013 of such Code to file a joint return for the taxable year; or

(2) If gross income for the taxable year does not exceed $20,000 in the case of—

(A) A head of a household (as defined in section 2(b) of such Code); or

(B) A surviving spouse (as defined in section 2(a) of such Code); or

(3) In the case of a married individual entitled under section 6013 of such Code to file a joint return for the taxable year, if the aggregate gross income of such individual and his spouse for the taxable year does not exceed $20,000.

(b) *Limitation.* Subsection (a) shall not apply if the taxpayer has income from sources other than wages (as defined in section 3401 (a) of such Code) in excess of $200 for the taxable year ($400 in the case of a husband and wife entitled to file a joint return under section 6013 of such Code for the taxable year).

[Sec. 207, Rev. Act 1971 (85 Stat. 512)]

PAR. 9. Section 301.6654–1 is amended to read as follows:

§ 301.6654–1 Failure by individual to pay estimated income tax.

For regulations under section 6654, see §§ 1.6654–1 to 1.6654–5, inclusive, of this chapter (Income Tax Regulations).

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 529–73]

PART 50—STATEMENTS OF POLICY

Consent Judgments in Actions To Enjoin Discharges of Pollutants

This order establishes a policy of the Department of Justice of affording an opportunity for public comment before the Department consents to a proposed judgment in an action to enjoin discharges of pollutants into the environment.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, and 5 U.S.C. 301, Part 50 of Chapter I of Title 28, Code of Federal Regulations, is amended by adding the following § 50.7 at the end thereof:

§ 50.7 Consent judgments in actions to enjoin discharges of pollutants.

(a) It is hereby established as the policy of the Department of Justice to consent to a proposed judgment in an action to enjoin discharges of pollutants into the environment only after or on condition that an opportunity is afforded persons (natural or corporate) who are not named as parties to the action to comment on the proposed judgment prior to its entry by the court.

(b) To effectuate this policy, each proposed judgment which is within the scope of Paragraph (a) of this section shall be lodged with the court as early as feasible but at least 30 days before the judgment is entered by the court. Prior to entry of the judgment, or some earlier specified date, the Department of Justice will receive and consider, and file with the court, any written comments, views or allegations relating to the proposed judgment. The Department shall reserve the right (1) to withdraw or withhold its consent to the proposed judgment if the comments, views and allegations concerning the judgment disclose facts or considerations which indicate that the proposed judgment is inappropriate, improper or inadequate and (2) to oppose an attempt by any person to intervene in the action.

(c) The Assistant Attorney General in charge of the Land and Natural Resources Division may establish procedures for implementing this policy. Where it is clear that the public interest in the policy hereby established is not compromised, the Assistant Attorney General may permit an exception to this policy in a specific case where extraordinary circumstances require a period shorter than 30 days or a procedure other than stated herein.

Dated: July 11, 1973.

ELLIOTT RICHARDSON,
Attorney General.

[FR Doc.73–14518 Filed 7–16–73;8:45 am]

[Order No. 528–73]

PART 50—STATEMENTS OF POLICY

Policy Regarding Criteria for Discretionary Access to Investigatory Records of Historical Interest

Under and by virtue of the authority vested in me by section 509 of Title 28 of the United States Code, Part 50 of Title 28 of the Code of Federal Regulations is amended by adding at the end thereof the following new section:

§ 50.8 Policy with regard to criteria for discretionary access to investigatory records of historical interest.

(a) In response to the increased demand for access to investigatory files of historical interest that were compiled by the Department of Justice for law enforcement purposes and are thus exempted from compulsory disclosure under the Freedom of Information Act, the Department has decided to modify to the extent hereinafter indicated its general practice regarding their discretionary release. Issuance of this section and actions considered or taken pursuant hereto are not to be deemed a waiver of the Government's position that the materials in question are exempted under the Act. By providing for exemptions in the Act, Congress conferred upon agencies the option, at the discretion of the agency, to grant or deny access to exempt materials unless prohibited by other law. Possible releases that may be considered under this section are at the sole discretion of the Attorney General and of those persons to whom authority hereunder may be delegated.

(b) Persons outside the Executive Branch engaged in historical research projects will be accorded access to information or material of historical interest contained within this Department's investigatory files compiled for law enforcement purposes that are more than fifteen years old and are no longer substantially related to current investigative or law enforcement activities, subject to deletions to the minimum extent deemed necessary to protect law enforcement efficiency and the privacy, confidences, or other legitimate interests of any person named or identified in such files. Access may be requested pursuant to the Department's regulations in 28 CFR Part 16A, as revised February 14, 1973, which set forth procedures and fees for processing such requests.

(c) The deletions referred to above will generally be as follows:

(1) Names or other identifying information as to informants;

(2) Names or other identifying information as to law enforcement personnel, where the disclosure of such information would jeopardize the safety of the employee or his family, or would disclose information about an employee's assignments that would impair his ability to work effectively;

(3) Unsubstantiated charges, defamatory material, matter involving an unwarranted invasion of privacy, or other matter which may be used adversely to affect private persons;

(4) Investigatory techniques and procedures; and

(5) Information the release of which would deprive an individual of a right to a fair trial or impartial adjudication, or would interfere with law enforcement functions designed directly to protect individuals against violations of law.

(d) This policy for the exercise of administrative discretion is designed to further the public's knowledge of matters of historical interest and, at the same time, to preserve this Department's law enforcement efficiency and protect the legitimate interests of private persons.

Dated: July 11, 1973.

ELLIOTT L. RICHARDSON,
Attorney General.

[FR Doc.73–14517 Filed 7–16–73;8:45 am]

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

REGIONAL ADMINISTRATOR; CHANGE IN TITLE

Pursuant to section 8 (g)(2) of the Williams-Steiger Occupational Safety and Health Act of 1970 (29 U.S.C. 657), 29 CFR 1911.5, and Secretary of Labor's Orders Nos. 12–71 (36 FR 8754) and 13–73, Chapter XVII of Title 29 of the Code of Federal Regulations is hereby amended to replace in all instances the term "Regional Administrator" with the term "Assistant Regional Director."

Signed at Washington, D.C., this 10th day of July 1973.

JOHN STENDER,
Assistant Secretary of Labor.

[FR Doc.73–14520 Filed 7–16–73;8:45 am]

V38-136 JUL 17 73 XUM

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

Fire Extinguishers; Approval

On page 15317 of the FEDERAL REGISTER of July 29, 1972, there was published a notice of proposed rulemaking regarding amendments to §§ 1910.157 and 1910.160 of Title 29, Code of Federal Regulations. Interested persons were given 30 days in which to submit written objections, data, views, and arguments concerning the proposed amendments, and to request a hearing, if desired. No objections have been received, and no hearing has been requested. The proposed amendments are hereby adopted, for the reasons set forth in the July 29 notice, without change and are set forth below.

Effective date. These amendments shall become effective on August 17, 1973.

1. In § 1910.157, paragraph (b)(1) is revised to read as follows:

§ 1910.157 Portable fire extinguishers.

* * * * *

(b) *Selection of extinguishers*—(1) *General.* The selection of extinguishers for a given situation will depend upon the character of the fires anticipated, the construction and occupancy of the individual property, the vehicle or hazard to be protected, ambient-temperature conditions, and other factors. The number of extinguishers required shall be determined by reference to paragraph (c) of this section. Approved fire extinguishers shall be used to meet the requirements of this section.

* * * * *

2. In § 1910.160, paragraphs (b)(1) and (c)(1)(iv) are revised to read as follows:

§ 1910.160 Fixed dry chemical extinguishing systems.

* * * * *

(b) *Alarms and indicators*—(1) *General.* Alarms and/or indicators are used to indicate the operation of the system, hazard to personnel, or failure of any supervised device or equipment. The devices may be audible or visual. The type, number, and location of the devices shall be such that their purpose is satisfactorily accomplished.

* * * * *

(c) *Inspection and maintenance*—(1) *Inspection and tests.* * * *

(iv) Between the regular annual inspection or tests, the system shall be inspected visually or otherwise by competent personnel, following a predetermined schedule.

* * * * *

(Sec. 6, Public Law 91-596, 84 Stat. 1593 (29 U.S.C. 655), Secretary of Labor's Order No. 12-71 (36 FR 8754))

Signed at Washington, D.C., this 10th day of July 1973.

JOHN STENDER,
Assistant Secretary of Labor.

[FR Doc.73-14519 Filed 7-16-73;8:45 am]

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 121—PACKAGING

Regulations dealing with the packaging of matter to be mailed have been revised as to requirements and criteria for containers, cushioning, closure, reinforcement, and marking.

Publication of the revisions in the FEDERAL REGISTER is effective immediately.

Sec.
121.1 Packaging adequacy.
121.2 Definitions.
121.3 Packaging for mailing.
121.4 Marking.
121.5 Mailability.

AUTHORITY: 39 U.S.C. 401.

§ 121.1 Packaging adequacy.

Articles accepted for mailing shall be prepared according to the general criteria and regulations specified herein.

§ 121.2 Definitions.

(a) *Types of loads.* In the transportation industry there are three recognized types of loads. They are determined by the contents, degree of protection, and the strength of the package. The types of loads are:

(1) *An easy load.* Items of moderate density, which completely fill the container, or items packaged in interior containers which completely fill the outer mailing container. Easy loads are not readily damaged by puncture or shock and do not shift or otherwise move within the package or present a hazard to other parcels.

(2) *An average load.* Moderately concentrated items, which are packed directly into a shipping container or which may be subjected to an intermediate stage of packing, and which provide partial support to all surfaces of the container. Average loads may be prepackaged by wrapping or by positioning in partitions or paperboard boxes or by other means which provide some support to the faces of the package.

(3) *A difficult load.* Items which require a high degree of protection to prevent puncture, shock or distortion either to themselves or the package. Fragile items, delicate instruments, high density, small bulk items, etc., which do not support the mailing container are not acceptable in paperboard or fiberboard boxes or bags or wraps of any type.

(b) *Other definitions.* The "Glossary of Packaging Terms" also defines terms frequently used in the packaging field. This joint Government-industry developed document may be obtained from the Packaging Institute Inc., 342 Madison Avenue, New York, NY 10017. Federal Government agencies may obtain it as the current revision of Federal Standard 75 from established distribution points.

§ 121.3 Packaging for mailing.

(a) *Preservation.* It is the responsibility of the mailer to provide protection against deterioration or degradation of the contents. Preshipment testing is practiced by the airline carriers and by many company managers to determine the effectiveness of their packaging as well as the durability and the quality of their product. The mailer should be aware of the characteristics of the item he is mailing, the transit time, and the mail handling and transportation environment. Postmasters and customer services representatives will keep customers advised on service and transit times for parcel post.

(b) *Containers acceptable for mailing*—(1) *Boxes.* (i) Paperboard boxes, similar to suite boxes, are acceptable for easy and average loads up to 10 pounds.

(ii) Metal-stayed paperboard boxes are acceptable for easy and average loads up to 20 pounds.

(iii) Solid and corrugated fiberboard boxes are acceptable for easy and average loads up to the following weight limits:

(A) 175 pound test board up to 20 pounds.

(B) 200 pound test board up to 45 pounds.

(C) 275 pound test board up to 70 pounds.

(iv) Wood, metal or plastic boxes are acceptable for all types of loads depending on the adequacy of their construction, their ability to withstand the forces of shock and pressure, and their potential as a source of damage to other items. Boxes with difficult loads to out of town destinations will be reinforced with banding about every six inches in each of the two directions around the package.

(v) The size of the box must be adequate to contain the item(s) and provide enough extra space for cushioning material. If the box is too large and the load is not properly blocked and cushioned, the contents will shift in transit. If it is too small, the cushioning will not be effective and container failure is liable to occur.

(vi) Good, rigid used boxes with all flaps intact are acceptable. If a box of the desired size cannot be found, a larger one may be cut down as shown in Illustration 1. Bend the four sides over the articles which have been cushioned in the box and close and band as in illustration 7. Illustration 2 shows a method of making an acceptable container by using two boxes of the same general dimensions from which the flaps have been removed.

(2) *Outside wraps for boxes.* Paperboard and fiberboard boxes may be wrapped as shown in Illustration 3. Closure and reinforcement may be accomplished by the use of tape, twine, or cord.

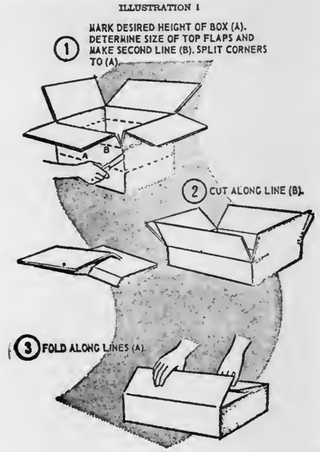
See paragraph (d) of this section. Although wrapping paper equivalent to a regular large grocery bag, 60 pounds basis weight, may be used as an outside cover for boxes, it is preferable that paper wrappers be omitted if the box itself constitutes an adequate shipping container.

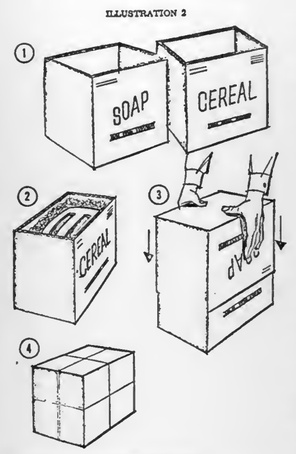
(3) *Bags, bales, bundles and wraps.* Bags, bales, bundles and wraps shall not be accepted with difficult loads. The contents in bags, bales, bundles and wraps will be compressed whenever possible:

(i) Paper bags and wraps are acceptable for easy loads of up to five pounds when they are at least 60 pounds basis weight, the strength of the average large grocery bag, and the items are immune from impact or pressure damage. A combination of plies adding up to or exceeding 60 pounds is not acceptable (e.g. three plies of 20 pound basis weight paper). Reinforced bags are acceptable for easy and average loads of up to 10 pounds. Nonreinforced loose-fill padded bags are not acceptable as exterior containers, except when the exterior ply is at least 60 pounds basis weight.

(ii) Plastic bags shall, as a minimum, be at least four mil thick polyethylene or equivalent for easy loads up to five pounds and six mil for easy loads up to 10 pounds. Experience indicates that plastic bags, which will stretch and resist puncturing, are more durable than most nonreinforced paper bags and provide a high degree of waterproofness. However, the ordinary plastic bag is to be avoided.

ILLUSTRATION 1





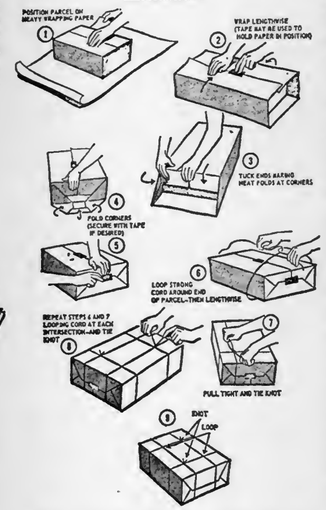


ILLUSTRATION 2

The usual point of fracture is at the taped corners.

ILLUSTRATION 3

(iii) Cloth bags are acceptable for easy and average loads of up to 10 pounds provided their seams are equivalent in strength to the basic material.

(iv) Bales and bundles are acceptable within postal weight limits provided they are adequately compressed and reinforced to contain the material.

(4) *Envelopes.* Envelopes are acceptable as containers for stationery, publications, and similar material up to one pound in weight and one inch in thickness. Many other items may be mailable in large envelopes or flats if stiffeners provide a flat and stable surface. Pens, bottle caps, and similar items are not acceptable in letter size envelopes because they could burst the envelope and damage mail processing equipment or injure employees.

(5) *Fiberboard Tubes and Similar Long Packages.* Fiberboard tubes and similar long packages are acceptable providing their length does not exceed 10 times their girth. As a minimum, the strength of the tube ends must be equal to the tube sidewall strength, except when the contents are lightweight rolled items. Crimped, masking, or cellophane taped end closures are not acceptable for other than lightweight, rolled items. Tape must completely encircle the seams on friction slide closures of mailing tubes.

(6) *Cans and drums.* Cans and drums are acceptable with positive closures. Generally, friction closures by themselves are not acceptable. Protruding devices, such as locking rings, shall be shielded by padding to prevent injury to Postal employees, equipment or other mail.

(c) *Cushioning.* (1) Cushioning absorbs and distributes forces caused by shock and vibration. Examples of cushioning materials are foamed plastics, rubberized hair, corrugated fiberboard, and loose fill material, such as polystyrene, excelsior and shredded newspapers. Illustrations 4, 5 and 6 show ways of using cushioning material for packaging odd shaped items, picture frames, fragile ceramic articles and electronic equipment.

(2) Loose fill cushioning must overfill the container prior to closure to hold the item and prevent its movement to an outside surface of the container or to other items in the package, but the cushioning should not distort the container. Combinations of several types of cushioning should not distort corrugated fiberboard pads and less dense, loose fill material are most effective in force distribution. Shock and pressure forces must be dissipated over as much of the surface of the item as possible.

(3) When several items are within a package they must be protected from each other as well as from external

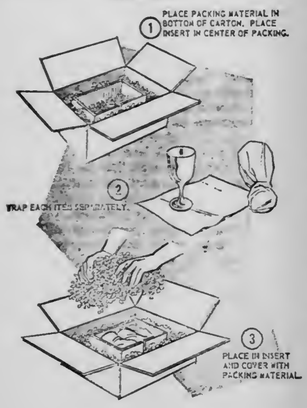
V 38 1 136 JUL 17 73 XUM

forces. Concentrated heavy items must not be packaged with fragile items unless extreme care is exercised to separate the items from each other. Heavy items must be adequately blocked and braced.

(d) *Closure and reinforcement*—(1) *General.* Closure and reinforcement of packages are primary considerations in the preparation and acceptability of any parcel. The principal methods of closure and reinforcement employ gummed and pressure sensitive tapes, adhesives, strapping, twine and cord;. staples for boxes and bags; and various friction closures, screw caps and locking devices for cans and similar containers.

ILLUSTRATION 4

ILLUSTRATION 5



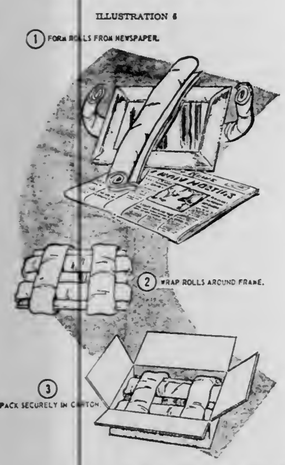


ILLUSTRATION 6

(2) *Tape.* (i) Tape is used for closure, sealing and reinforcement of containers. Cellophane and masking tape shall not be used for closure or reinforcement of packages, but may be used to augment adhesive closures on envelopes or to cover staples on bags. Pressure sensitive, filament reinforced tape is recommended.

(ii) Gummed paper tape must be at least 60 pounds basis weight kraft. This tape is widely used for closure and sealing, but is not adequate for reinforcement. Reinforced kraft paper tape is considerably more durable than plain kraft tape, and takes less time and tape for an equal closure. The adhesives on gummed tapes must be adequately dissolved prior to application, by the use of warm water with a wetting agent, and must be firmly applied with the tape extending at least three inches over the adjoining side of the box. Improper application results when the gummed adhesive is not activated or when the water is absorbed by the fibrous container. The tape must be kept from freezing for at least an hour. Care should be taken when extremely cold temperatures are anticipated. Even properly applied gummed tapes tend to crack under these conditions.

(iii) Pressure sensitive tapes come with various paper, cloth or plastic backings, both plain and reinforced, and may be readily applied at any temperature above freezing. Application, especially in below freezing temperature, requires that the tape be rubbed down well to assure adhesion. Pressure sensitive tape should be used on the container in the same way as gummed tapes.

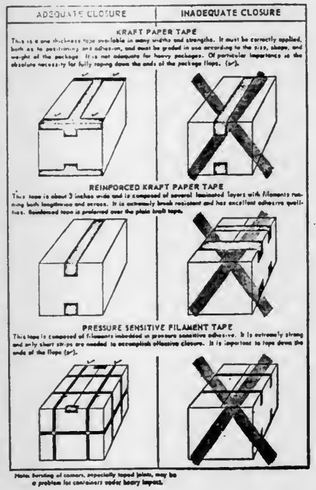
(iv) Illustration 7 shows proper and improper methods of applying reinforced and gummed paper tapes and reinforced pressure sensitive tapes. Tapes can also be used to close other types of packages not illustrated, including those of irregular shapes and soft wrapped items. Packages properly closed with reinforced tape are substantially stronger than are parcels closed with nonreinforced paper tape.

(3) *Adhesive.* Adhesive is a general term covering cement, glue, mucilage, paste, thermoplastic adhesive, etc. An adhesive must cover at least 50% of the box flaps and should be applied not more than ¼ inch from the ends of the box flaps.

(4) *Strapping, twine, and cord.* When nonpressure sensitive strapping, twine, or cord is used for closure and reinforcement, it should encircle the package at least once girthwise and lengthwise over the sides, ends and tops of rectangular containers and bundles. Twine and cord must be at least 20 pounds tensile strength and must be secured at an intersection at least once on each side. Strapping includes both metallic and nonmetallic banding and pressure sensitive filament tape. Loose strapping, especially metal, is not acceptable because it constitutes a hazard to employees and equipment and does not reinforce the container.

(5) *Staples and steel stitching.* Staples and steel stitching are acceptable providing they are spaced not more than 2½ inches apart and not more than 1¼ inches from the ends of the box. Boxes that do not meet these requirements may be made acceptable by application of a strip of three-inch-wide tape in the gap between the staples or by strapping to compensate for the gap in the staple closure. Illustration 8 shows staple and augmented staple closures.

ILLUSTRATION 7



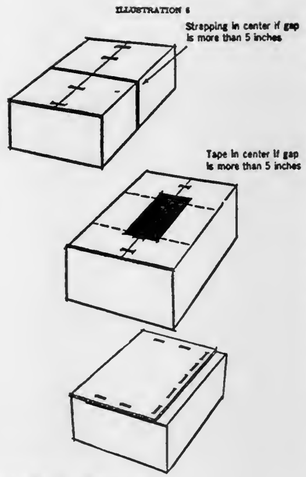


ILLUSTRATION 8

§ 121.4 Marking.

(a) *General.* Marking by the mailer must be by a material which is not readily water soluble of which can easily be rubbed off or smeared and will be sharp and clear at a distance of two feet. It is recommended that the name and address of the sender and addressee also be inserted within the package to aid in delivery if the address on the package is defaced.

(b) *Special markings.* Special markings as identified shall be placed in an area below the postage and above the name of the addressee:

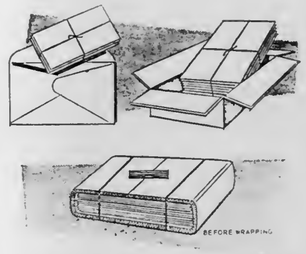
(1) Fragile markings shall be applied to any package containing delicate items such as glass and electrical appliances. Identification of contents is not required.

(2) Perishable markings shall be applied to any package which will degrade or decompose rapidly such as meat, produce, plants, or certain chemical samples.

(3) Handling markings, such as *DO NOT BEND,* should be used only when contents are protected with stiffeners.

(4) Words implying expedited handling, such as *RUSH DO NOT DELAY,* shall not be used on any package except those intended for shipment as special delivery or special handling mail.

(5) Unauthorized labels which do not designate the address, nature of contents, or handling are not permitted. Obsolete markings will be obliterated. Containers improperly identified as to contents are not acceptable; e.g., a box marked as containing seafood which contains dry goods.



(c) *Marking surfaces.* Marking methods or surfaces shall be of such type as to permit postal endorsements to be made by hand stamp, ball point pen, or Number 2 grade pencil. Package surfaces which will not retain an adhesive stamp, postage meter impression, ball point pen or pencil markings are not acceptable.

§ 121.5 Mailability.

(a) *Acceptability.* Acceptability of packaging is a principal criteria of mailability. No item shall be packaged so that its contents may harm mail handling personnel or equipment. Fragile items must be packaged to withstand the mail processing and transportation environment. Heavy items must be braced and cushioned to prevent damage to other mail. Some general classes of items which cause a continuing problem due to packaging deficiencies are described in this section. Further information may be obtained from parcel post window clerks, dock foremen, and mailing requirements personnel. Requests for exceptions to the prohibitions set forth herein shall be submitted for a ruling to the Office of Mail Classification, Finance Department, U.S. Postal Service, Washington, D.C. 20260.

(b) *Publications.* Publications and stationery-type items ranging from packages of several single sheets to hard back books weighing several pounds each constitute a major source of *loose-in-the-mail* items. Problems occur because of unrestrained, concentrated or shifting contents, and the use of containers, internal packaging, closures and reinforcements which are inadequate. Publications and stationery-type items exceeding one inch in depth or one pound in weight should not be accepted in envelopes. Publications in packages must be unitized by tying or banding or through the use of partitions or close fitting interior containers to prevent shifting. Illustration 9 gives several examples of unitizing this type material. Boxes of publications must be adequately closed and should be reinforced with metal, nonmetallic or tape strapping.

(c) *Liquids.* Liquids, particularly gallon containers with friction top closures, are a source of loss and damage to other mail and Postal equipment. As a general rule, containers of liquid with only friction top closures are not acceptable. Screw caps, soldering, clips or other means must be employed to effect closure. Glass and other breakable containers with a capacity of over 4 fluid ounces must be cushioned with an absorbent material sufficient to take up all leakage in case of breakage inside a sealed waterproof container. Containers of liquid with a capacity of over 32 fluid ounces shall not be acceptable for mailing unless cushioned as above and packaged within another sealed waterproof container, such as a can or plastic bag. The outer shipping container must be of sufficient strength to provide physical protection to the contents. Exceptions to this procedure must be submitted for a mailability ruling as prescribed in § 123.8 of this title.

(d) *Aerosols.* Aerosol containers with inadequate friction cap closures, or other nonpositive means to prevent accidental discharge of contents, are a source of loss of contents and contamination to other mail. These cans must be so constructed as to preclude accidental discharge of contents in the mail. This may be accomplished through the use of recessed valves, screw thread caps, tape closures or other means of preventing discharge.

ROGER P. CRAIG,
Deputy General Counsel.

[FR Doc.73-14515 Filed 7-16-73;8:45 am]

PART 144—POSTAGE METERS AND METER STAMPS

Postage Meters and Meter Stamps

Regulations codified under Part 144 with respect to postage meters, have been revised. Matters affected by this revision include but are not limited to prepayment of reply postage by postage meter stamps; payment of metered postage; failure to make required daily entries; use of fluorescent ink; appropriate dating of metered mail; deposits of mail in post office other than where meter is licensed.

Section 144.4(c) dealing with mandatory use of fluorescent ink for postage imprints on letter size metered mail took effect on July 1, 1973. This requirement was published as an amendment to § 144.4 in 37 FR 17830 as corrected in 37 FR 18466.

Part 144 has, as indicated above, already been revised by the Postal Service. Publication in the FEDERAL REGISTER is effective immediately.

Sec.
144.1 Postage meters.
144.2 Meter license.
144.3 Setting meters.
144.4 Meter stamps.
144.5 Mailings.
144.6 Security.
144.7 Post office meters.
144.8 [Reserved]
144.9 Manufacture and distribution of postage meters.

AUTHORITY: 39 U.S.C. 401, 404.

§ 144.1 Postage meters.

(a) *Use of meter stamps.* (1) Postage may be paid by printing meter stamps

V 38 I 136 JUL 17 73 XUM

with a postage meter on any class of mail. Metered mail is entitled to all privileges and subject to all conditions applying to the various classes of mail.

(2) Meter stamps may be used to prepay reply postage on letters and postcards under the following conditions:

(i) Meter stamps must be printed directly on the envelope or card that bears the return address of the meter license holder in an amount sufficient to prepay in full the first-class or airmail rate.

(ii) Any photographic, mechanical, or electronic process, or any combination of such processes, other than handwriting, typewriting, or handstamping, may be used to prepare the address side of reply mail prepaid by meter stamps. The address side must be prepared both as to style and content in the following form without the addition of any matter other than a return address:

(Meter stamp to be placed here)

NO POSTAGE STAMP NECESSARY
POSTAGE HAS BEEN PREPAID BY

John Doe Company
123 Tremont Street,
New York, N.Y. 10010

(iii) Reply mail prepaid by meter stamps will be delivered only to the address of the meter license holder. If the address is altered, the mail will be held for postage.

(3) Postage meter stamps for zero postage shall not be affixed to items delivered by other carriers since this would give the impression of Postal Service delivery.

(b) *Description of meters.* Postage meters are made to print single, several, or all denominations of postage. They contain in one sealed unit the printing die or dies and two recording counters. One adds and keeps a total of all postage printed by the meter. The other subtracts and shows the balance of postage remaining in the meter, after the use of which it will lock. From time to time, mailers take the meter to the post office to have this counter set for additional postage, which is added to the balance remaining. Payment must be made for each additional setting.

(c) *Meter manufacturers.* (i) Postage meters may be leased from authorized manufacturers who are held responsible by the Postal Service for the control, operation, maintenance, and replacement, when necessary, of meters manufactured by them. The following manufacturers are presently authorized to lease meters to mailers:

(i) ADS-Anker Data Systems Midwest, Inc., Postalia Division, 2021 Swift Drive, Oak Brook, IL 60421.

(ii) National Cash Register Co., Dayton, OH 45409.

(iii) Pitney-Bowes, Inc., Pacific and Walnut Sts., Stamford, CT 06904.

(iv) The Singer Co., Business Machine Div., 2350 Washington Ave., San Leandro, CA 94577.

§ 144.2 Meter license.

(a) *Application.* A customer may obtain a license to use a postage meter by submitting Application for a Postage Meter License, Form 3601–A (or a form supplied by the manufacturer), to the post office where his metered mail will be deposited. No fee is charged. On approval, the postmaster will issue a license.

(b) *Responsibilities of licensee.* (1) After a meter has been delivered to a licensee, he must keep it in his custody until returned to the authorized manufacturer or to the post office. A customer may not have a meter in his possession unless it has been set, sealed, and checked into service by the Postal Service. Avoiding the payment of postage through tampering with or misusing a meter is punishable by law.

(2) The licensee must enter in the Daily Record of Meter Register Readings, Form 3602–A, the figures appearing in the ascending and descending registers each day the meter is operated. Failure to make such entries will be considered grounds for revocation of a meter license. If at any time the sum of the two figures does not equal the total entered in the Form 3602–A at the last setting, the meter should be taken immediately to the post office, station, or branch where it was set for examination. The post office will provide Form 3602–A when the meter is initially set. Additional copies will be provided as the forms are filed.

(3) The meters in the custody of the licensee and his records relating to meter transactions must be immediately available for examination and audit by the Postal Service upon request.

(4) If a meter is not reset within a 6-month period, it must be presented together with related Forms 3602–A for examination at the post office, station, or branch where it is regularly set.

(5) If the meter's printing or recording mechanism is in any way faulty, it shall be immediately taken to the post office, station, or branch where it is regularly set to be checked out of service. Under no circumstances, shall the faulty meter be used.

(c) *Revocation.* (1) A license may be revoked if a meter is used in operating any scheme or enterprise of an unlawful character, for nonuse during any consecutive 12 months, or for any failure of the licensee to comply with the regulations governing the use of postage meters.

(2) The meter license holder will be notified by the postmaster if the license is to be canceled and the reasons for cancellation. Form 3604, Nonuse of Mailing Permit or Meter License, may be used if cancellation for nonuse is being considered. If no written statement of objection is filed by the license holder within ten days, the postmaster will cancel the license. If a written statement is filed, the appeal shall be referred by the postmaster to the Finance Department, Mail Classification Division, for resolution. The Mail Classification Division will notify the license holder of the decision through the postmaster. If a meter license is revoked, the postmaster will note the date and reason for cancellation on Form 3601–A (see paragraph (a) of this section).

§ 144.3 Setting meters.

(a) *Requirement.* A customer may not have any postage meter in his possession until it has been set, sealed, and checked into service by the Postal Service. The manufacturer will bring the meter to the post office where it is to be regularly set for setting and sealing prior to delivery to the customer.

(b) *Place.* Meter settings, including checking meters in and out of service, will be done only by designated employees at the post office, station, or branch where the metered mail will be deposited, except as provided for in paragraph (d)(5) of this section. Postal employees will not be sent out of the post office to set meters except under programs authorized by the regional mail classification branch. Contract stations and branches are not authorized to set meters.

(c) *Payment.* (1) Payment must be made for postage at the time the meter is set. Payment may be made by cash, check, money order, or by a withdrawal from a trust fund previously established with the post office for that purpose. See section 142, Fiscal Handbook F–1, regarding the acceptance of checks. Trust accounts may be established when the monthly mailing of a licensee is $500 or more. No activity in the account over a 60-day period shall be grounds for closing of the account by the post office and returning the trust funds to the mailer.

(2) Receipts for payment to a trust account shall be made on Form 3544, Post Office Receipt for Money. The original will be given to the customer, the duplicate sent to the office maintaining the cash book, and the triplicate retained by the employee setting the meter. Trust account transactions shall be recorded on Form 25, Trust Fund Account, kept on the individual account by the employee setting the meter. Daily totals of the money received for such trust funds shall be listed on the Daily Cash Report, Form 1412.

(3) Receipts for individual meter settings shall be made on Form 3603, Receipt for Postage Meter Settings, in accordance with paragraph (d)(2) of this section.

(d) *Examination and Setting.*—(1) *Examination.* (i) When meters are brought in for reset or examination in accordance with paragraph (b)(2) of this section, they shall be examined to determine if they operate properly or have been tampered with.

(ii) Meters not reset within a 6-month period shall be examined, if practicable, by an employee not assigned to setting postage meters.

(iii) Meters shall be examined to determine whether the seal, register windows, break-off screws, top cover, lock cover, or other visible parts, have been broken or tampered with, and whether the die hub or meter drum is locked in home position. If evidence of tampering or breakage is found, retain the meter and promptly notify the postal inspector in charge.

(iv) Serial numbers shall be checked to see that they agree with those listed on Form 3610, Record of Postage Meter Settings, and that the total of the two registers equals the last entry in column 8 of Form 3610. If the meter is not registering properly, it shall be checked out of service in accordance with paragraph (e) of this section.

(v) Instances where daily entries are obviously not being made should be brought to the attention of the supervisor for consideration of license revocation. An entry shall be made on Form 3610 when an examination (but no reset) has been made.

(2) *Setting.* (i) Prior to setting, meters shall be examined in accordance with subparagraph (1) of this paragraph.

(ii) Record descending and ascending register readings *before* reset and their sum on Form 3603, prepared in triplicate. Verify that the sum agrees with the last entry in column 8 of Form 3610 and column C of Form 3602–A.

(iii) Set the meter in accordance with the manufacturer's instructions.

(iv) Seal the meter using official USPS sealing pliers furnished by the manufacturer. Assure that the seal is properly affixed and thoroughly compressed. After sealing, the lead seal shall be checked to make sure it cannot move on the wire.

(v) Record readings of descending and ascending registers' readings (after setting) on Form 3603 and complete the form.

(vi) If payment is to be made by withdrawal from a trust account, record the transaction on Form 25 maintained for that account by the employee setting the meter.

(vii) Post information from Form 3603 to Form 3610 and complete the Form 3610 entry.

(viii) The original copy of Form 3603 shall be given to the customer with the meter and Form 3602–A. Copy 2 of Form 3603 shall be sent to the holder of the cash book, and copy 3 shall be kept in the receipt book by the meter setter.

(ix) When a meter manufacturer's representative brings in a meter for initial setting or withdrawal, or reports a meter lost, stolen, recovered or found, he shall provide a copy of an installation or withdrawal form. This shall be forwarded to the office where the meter files are kept (see paragraph (g) of this section.

(3) *Transfer of units.* When units are transferred from one meter to another, a note shall be made after the entries on Forms 3602–A for both meters and Form 3610 as required by subparagraph (2) of this paragraph, indicating the value of the units transferred and the serial number of the postage meter from (to) which the units were transferred. When additional units are purchased at the time of transfer, a receipt Form 3603 shall be prepared for the additional units purchased in accordance with subparagraph (2) of this paragraph.

(4) *Setting meter for use at another post office.* The postmaster who serves the place where a mailer is located may set a meter to be used in paying postage on mail presented at another post office when it will be a convenience to the mailer. Before doing so the following requirements must be met:

(i) The postmaster must obtain confirmation from the Regional Assistant Postmaster General, Mail Processing, in the region where the post office of mailing is located, that the post office of mailing has adequate facilities for handling the mail. This is intended to improve coordination between the Postal Service and the mailer as to which point of mailing can provide the best service by virtue of acceptance and transportation facilities. The postmaster shall request this confirmation by memorandum, describing the nature of the material to be mailed (letter size, flats, etc.), volume, classes and frequency of mailing, and the desired place of mailing.

(ii) The mailer must obtain a meter license from the post office where the mailing is to be presented. When the license is received, it must be presented to the mailer's local post office with the meter for setting. The license will be returned to the licensee.

(iii) The postmark die must show the name of the post office of mailing. A separate meter must be used for each post office.

(iv) Payment for each meter setting must be made by check or money order payable to the postmaster at the post office where mailings will be made. See section 142.1, Handbook F–1, regarding acceptance of checks. Checks must be presented to the local post office when the meter is set. Trust funds will not be utilized to pay for setting such meters.

(v) The employee setting the postage meter will complete Form 3618, Local Setting of Postage Meter Licensed at Another Office, in duplicate. The original of this form with the check and a stamped, self-addressed envelope (furnished by the mailer for return of Form 3603) will be sent in a post office penalty envelope to the postmaster where the mailings are to be made. The duplicate shall be retained by the employee setting the meter. A record of each setting shall be entered on Form 3610 at the office where the mailings are made and the completed Form 3603 will then be sent to the mailer.

(vi) Mail must be presented at a designated receiving point in the post office by the mailer's representative. It may not be consigned to the post office in bulk by freight, express, or other carrier. The postmaster may not act as the mailer's representative and the Postal Service has no responsibility for the articles until they are actually accepted in the mail.

(vii) Matter sent to other post offices for mailing must be shipped in private containers. Post offices will not furnish mail sacks for this purpose. The total weight of containers such as cartons, crates, etc., which must be lifted by postal employees shall not exceed 70 pounds.

(viii) When the use of a meter is discontinued, the meter shall be presented to the post office where it was set, for checking out of service. Any postage adjustment will be made by the postmaster where the mailings have been made.

(5) *Changing place of setting meter.* (i) When the place of setting is changed to a different branch or station of the same post office, Form 3610 shall be retained by the office, branch, or station which previously set the meter. The readings on the registers and the office, branch, or station where future settings are to be made shall be recorded on Form 3610 and a horizontal line drawn under this last entry. Form 3610 shall be retained for 3 years.

(ii) A new Form 3610 will be prepared and sent to the office which will make future resets. It shall have one entry stating office, branch, or station which previously did resets and the register readings when transferred. When appropriate, the second office can obtain this information by telephone and prepare the new Form 3610.

(6) *Reporting receipts.* In filling out the Daily Cash Report (Form 1412 or 1412–A, as appropriate) stations, branches, and main office window unit personnel shall list the total of payments received for deposit in metered postage trust accounts as trust accounts receipts. The total of cash receipts for meter resets shall be listed as Metered Postage, A/C 40220. Duplicate copies of the corresponding Forms 3603 and 3544 shall be attached to the Daily Cash Report. Trust fund transactions shall be recorded on a Form 3083, Trust Accounts Receipts and Withdrawals, and forwarded with the Daily Cash Report to the chief accountant (or person designated to keep the cash book) with copies of corresponding Forms 3603.

(7) *Meter setting supplies.* The manufacturer furnishes the postmaster with instructions for setting various types of meters and provides keys to the locks on the recording mechanism, a stylus (used in setting meters), lead seals and a sealing device. Protect these items to prevent their use by unauthorized persons. Keep the instructions in the binder holding Forms 3610. Requisition additional copies of the manufacturer's setting instructions from the nearest branch or head-

V 38 I 136 JUL 17 73 XUM

quarters office of the meter manufacturer. Requisition additional supplies of lead seals from the headquarters office of the meter manufacturer. Requisition the following forms from your supply office when the first application for a postage meter license is received at your office:

3083	Trust Accounts Receipts and Withdrawals.
3601–A	Application for a Postage Meter License.
3602–A	Daily Record of Meter Register Readings.
3603	Receipt for Postage Meter Settings.
3604	Nonuse of Mailing Permit or Meter License.
3610	Record of Postage Meter Settings.
3616	Report of Quarterly Verification of Metered Mail.
3619	Permit Number Record.
3977	Duplicate Key Envelope.

(8) *Custody of meter setting keys.* Accurate custody records of meter keys will be maintained by post offices. Duplicate keys will be kept in Duplicate Key Envelope, Form 3977, and safeguarded in accordance with the instructions on the envelope. A semiannual verification of keys will be made, with the entry for each key being initialed and dated as evidence of verification. The loss of any key shall be immediately investigated and reported to the regional mail classification branch and the meter manufacturer. If a key is subsequently recovered, promptly notify the regional mail classification branch and the manufacturer. Keys no longer required at an office and emergency requests for meter setting keys will be sent to the sectional center.

(e) *Checking meter out of service—*(1) *Checkout procedures.* (i) When a mailer brings in a meter which he no longer requires or in which the printing and recording mechanism fails to record its operations correctly, promptly check the meter out of service. Notify the manufacturer's representative to call for the meter, if the meter user has not notified him.

(ii) Unused postage in the meter may be transferred to another meter used by the licensee and registered at the same post office, or the postmaster may refund the amount in accordance with provisions of paragraph (e) of § 147.2 of this title if the total readings of the ascending and descending registers are equal to or less than the total settings shown on the Form 3610. If the total of the register readings of the defective meter exceeds the total settings, deduct excess from the amount shown in the descending register to determine the amount of postage to be refunded or transferred. When a meter fails to lock out and prints stamps in excess of the amount for which set, collect the additional amount due from the mailer in cash. Convert the collection into postage-due stamps of a high denomination, affix the stamps to a sheet of paper, cancel and deliver them to the meter user as a receipt for postage collected. Do not furnish any other receipt.

(iii) Clear the descending register to zero or to lowest possible setting.

(iv) Record on Form 3610 the date, reason, and whether unused units were transferred to another meter, including the number of the meter and the number and value of units transferred. When units of postage are refunded, show amounts and method of payment.

(v) Form 3602–A must be submitted by the user when the meter is checked out of service. Enter in the book, below the last entry, the readings of both registers before and after checkout, the amount of postage transferred, and the meter it was transferred to. Make an entry on Form 3602–A of the second meter indicating the amount of postage transferred and the meter it was transferred from. If the meter record book does not show the ascending and descending register readings, totals, and dates for the last three settings, enter these in the book from the information on Form 3610 and notify the supervisor. If Form 3602–A is not available, furnish a report to the manufacturer stating that fact, furnishing register readings, totals, and dates after each of the last three settings. State also the amount of postage transferred to another meter. Return Form 3602–A to the licensee unless the meter was faulty (see subparagraph (2) of this paragraph). The licensee shall keep Form 3602–A for at least one year after date of final entry.

(vi) Enter date of discontinuance on numerical file record card for each meter checked out of service.

(vii) Turn the meter over to the meter manufacturer's representative with the lock unsealed. Provide the manufacturer with Form 3602–A if the meter was faulty.

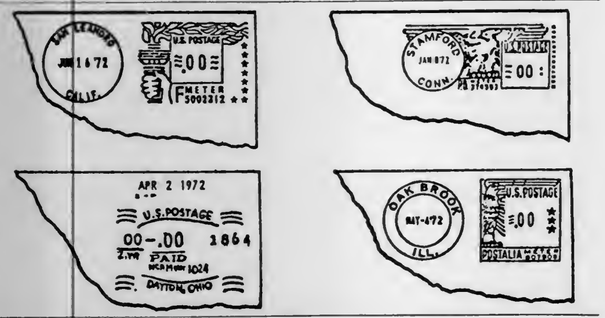
(2) *Checkout of faulty meter.* (i) When a meter is presented for checkout because of mechanical failure, follow the procedures in subparagraph (1) of this paragraph.

(ii) Upon request of the manufacturer, furnish a photostat copy of Form 3610 for any meter checked out because of faulty operation. Send the copy directly to the manufacturer.

(iii) After examination of a meter withdrawn because of apparent faulty operation affecting registration, the manufacturer will return the meter record book directly to the postmaster with a detailed statement explaining why the meter failed to function properly. The manufacturer may also recommend an appropriate postage adjustment. Determine from the manufacturer's report and other facts what postage adjustment, if any, is necessary. Return the meter record book to the meter user. In case of doubt regarding proper postage adjustment, report all facts to the Finance Department, Mail Classification Division, for instructions.

(f) *Refunds for unused meter stamps.* Refunds for unused meter stamps will be made in accordance with paragraph (e) of § 147.2 of this title.

(g) *Records—files.* Three basic files shall be kept for meters and meter licensees: an alphabetical file of licensed meter users, an alphabetical file of meter licensees and meters currently in use by them, and a numeric file of postage meters. These files will be maintained in the main post office. They shall not be duplicated at branches, stations, or other locations but shall be kept so that information is readily obtainable by telephone or other means. Additional information concerning accounting records for Postal Service owned meters is contained in § 144.7(d).



(1) *License file.* A central file shall be maintained of all currently licensed users of postage meters. This file shall consist of approved Forms 3601–A (top portion of form). Canceled licenses shall be maintained for a period of one year and then disposed of.

(2) *Meter user file.* This file consists of cards filed alphabetically by licensee, listing the manufacturer and serial number of meters in use. As meters are withdrawn, delete from the list by simply drawing a line through the serial number. This file and the numeric file shall be kept where they will be available for use any time the post office is open for business or mail is being processed.

(3) *Numeric file.* This file shall consist of cards for each meter set by post office, branch, or station. Cards shall contain the make, model, and serial number of the meter and list the name of the meter user, date of installation, and date when withdrawn or reported lost or stolen.

§ 144.4 Meter stamps.

(a) *Designs.* The types, sizes, and styles of meter stamps are fixed when meters are approved by the Postal Service for manufacture. Only approved designs may be used. Some approved designs are illustrated below.

(b) *Legibility.* Meter stamps must be legible and not overlap. Illegible or overlapping meter stamps will not be counted in determining postage paid.

(c) *Fluorescent ink.* The use of fluorescent ink will be mandatory for postage imprints on letter-size metered mail effective July 1, 1973. Failure to use fluorescent ink may result in the revocation of the meter license. Letter-size mail is defined as being from 4¼" to 11½" long, 3" to 6⅛" wide, and .006" to .25" thick.

(d) *Meter stamps on tape.* When meter stamps are printed on tape, only tape approved by the Postal Service may be used.

(e) *Position.* Meter stamps must be printed or stuck in the upper right corner of the envelope, address label, or tag.

(f) *Content.* Meter stamps must show city, State, meter number, and amount of postage for all classes of mail. When it is necessary to print multidenomination meter stamps on more than one tape, the circle showing the post office must appear on each tape.

(g) *Date of mailing.* (1) Dates shown in the meter postmark of any type or kind of mail shall be the actual date of deposit except when the mailing piece is deposited after the last scheduled collection of the day. When deposit is made after the last scheduled collection of the day, mailers are encouraged but not required to use the date of the next scheduled collection.

(2) The month, day, and year must be shown in the meter postmark on all first-class, airmail, and priority mail (heavy pieces), and on all registered, certified, insured, COD, special delivery, and special handling mail, except prepaid reply postage, whether the postmark is printed directly on the mailing piece or on a separate tape.

(3) The month and year must be shown on meter postmarks printed on a separate tape for second-, third-, and fourth-class pieces. The day may be omitted. Mailing pieces postmarked on a separate tape with only the month and year may be accepted during the month shown and through the third day of the following month when, in the judgment of the postmaster, the mailing was unavoidably delayed prior to its deposit with the Postal Service.

(4) The date (day, month, or year) is not required to be shown on meter postmarks printed directly on a second-, third-, or fourth-class mailing piece.

(5) The date shall not be shown on meter postmarks used to prepay reply postage in accordance with § 144.1(a)(2).

(h) *Hour of Mailing.* The hour of mailing may be shown only on first-class, air, or special delivery mail, and then only when it is mailed in time to be dispatched at the hour shown.

(i) *Meter Slogan and Ad Plates.* Licensees may print advertising matter simultaneously with meter stamps within space limitations. Licensees must obtain the plates for advertising from authorized manufacturers of meters to assure suitable quality and content in accordance with the requirements of the Postal Service. The plates may not be used to print postal endorsements on mail. Slogans must not be objectionable or misleading.

§ 144.5 Mailings.

(a) *Preparation.* The mailer must bundle, box, or otherwise package mailings of 5 or more letter-type pieces with the addresses facing in one direction. This prevents the pieces from becoming mixed with other mail which has to be faced, canceled, and postmarked in the post office. Properly prepared metered mail can go directly to distribution and thereby be expedited in dispatch. Metered mail not properly bundled, boxed, or otherwise packaged as required will be reported by telephone or personal visit to the mailer or his authorized agent. A record of this action will be maintained by the postmaster on Form 3749, Irregularities in the Preparation of Mail Matter. If the mailer or his agent disregards such reports and irregularities are repeated, the mail will be retained by the postmaster and the mailer immediately notified by telephone so that the mailing can be picked up for proper preparation before acceptance and dispatch. Each class and denomination should be bundled separately. Special delivery and airmail should always be bundled separately or located on the top of a bundle.

(b) *Place of Mailing.* (1) Metered mail, other than bulk mailings of third-class mail may be deposited in any street collection box, mail chute, receiving box, cooperative mailing rack, or other place where mail is accepted, which is under the jurisdiction of the post office shown in the meter stamp. To secure faster dispatch, metered mail should be deposited at the main post office or a station or branch thereof.

(2) To expedite dispatch and as a convenience to meter users, limited quantities of airmail, special delivery, and other first-class mail may be deposited at offices other than the one which appears in the meter stamp. A limited quantity is considered to be the quantity of mail a secretary might deposit in a mail receptacle on the way home from work.

(c) *Handling of Metered Mail—*(1) *Mailed at stations and branches.* At stations and branches where mail is not processed, keep metered mail separate from other types of mail insofar as possible so that the advantages of the separation are not lost at the time of processing. When the quantity warrants, place metered mail in pouches, sacks, or hampers, labeled *Metered Mail.* When the quantities are too small be be separately pouched or sacked, tie the pieces securely in bundles, labeled *Metered Mail* so that they may be identified and promptly separated in the distributing unit from other types of mail.

(2) *Postmarking.* Do not postmark metered mail, except as required in 332.35 of the Postal Service Manual and subparagraph (4) of this paragraph.

(3) *Distribution.* Send metered mail to distribution points as soon as received. Distribute in order of priority of receipt regardless of time shown in postmarks or meter stamps.

(4) *Examination.* Examine mail while being routed for distribution to determine that it is properly prepared. This examination may be made by a selective check of the pieces as they are distributed. Metered mail bearing the wrong date of mailing see § 144.4(g) will be run through a canceling machine or otherwise postmarked to show the proper date. Form 3749 will be used by postmasters to call irregularities to the attention of the mailer. If the same irregularity is repeated, the postmaster will notify the head of the firm or his authorized agent in writing. If a mailer disregards such notices on dating of mail, the postmaster may refuse to accept the mail, or if the mail has already been accepted, he may return the mail with instructions to enclose it in new envelopes bearing the correct date in the meter stamp.

§ 144.6 Security.

(a) *Quarterly Verification.* (1) The postal data center provides each post office with a quarterly meter control list of postage meters used for mailings at that post office. These listings should be checked for accuracy in accordance with section 236.4, Handbook F–1.

(2) Area mail processing units and post offices which do initial distribution of originating mail will take a sampling of local originating metered mail (letters and parcels including those bearing Postal Service meter stamps) during a different day of each quarter. Sample sizes will depend on the number of meters under license at the office, the total volume of local originating metered mail, classes of metered mail, and the diversity of mailings. Five to twenty-five percent of the meters set at the office should be included in the sampling, with larger offices using the lower percentage figure and smaller offices the higher. This sampling is designed to:

(i) Detect use of unauthorized meters

(ii) Detect altered metered stamps

(iii) Detect improper metered mail procedures by mailers, especially incorrect postmarks.

(3) Employees making the sample shall be familiar with the requirements of part 144 and shall be provided with copies of Forms 3616 and 3749.

(4) Local originating metered mail with other than a local postmark shall be listed on a separate Form 3616, a separate Form 3616 being used for each postmark.

(5) Metered mail being sampled should also be examined for alterations or counterfeit impressions. Suspect impressions should be immediately reported to the supervisor. Alterations may be indicated by:

(i) Peculiar tint of ink.

(ii) Smudged or uneven impressions.

(iii) Digits which are out of line or vary in size.

(iv) Impressions which appear to have been altered manually by pen and ink or other means.

V 38 136 JUL 17 73 XUM

(6) Metered mail being sampled should also be examined for improper mailing practices such as wrong date and improper preparation. Form 3749 shall be prepared for each irregularity observed.

(7) An employee who did not participate in the sampling shall check the Forms 3616 against the numeric listing of meters set by the post office. Discrepancies which cannot be resolved shall be reported to the regional mail classification branch.

(8) Forms 3616 for mail having other than local postmarks shall be forwarded to the appropriate postmaster to determine if they are authorized. These Forms 3616 shall be filed with Forms 3616 developed during that office's quarterly verification. Postmasters shall report use of unauthorized meters to the regional mail classification branch.

(9) The regional mail classification branch shall attempt to resolve reports of unauthorized meters by comparison with lists of stolen meters and by discussion with meter manufacturers. Meters that are unauthorized or which have previously been reported stolen shall be reported to the Inspection Service and to the manufacturer. The reporting post office shall be advised of any action taken.

(b) *Lost and stolen meters.* Report the loss, theft, or recovery of any lost or stolen meters immediately to the local postmaster, to the mail classification branch for the region in which the meter is licensed for use, and to the local police. Reports shall include the meter model and serial number; the date, location and details of the loss or theft; and a copy of the police report when applicable.

§ 144.7 Post office meters.

(a) *Criteria for use.* Omnidenomination postage meters are assigned to parcel post and registry windows and postage-due units at post offices and classified stations and branches meeting the criteria in section 641.444 of the Postal Service Manual. Post-office-owned meters are not assignable to contract stations or branches.

(b) *Requests for meters.* Requests for postage meters shall be made in accordance with section 641.444 of the Postal Service Manual.

(c) *Operation of meter*—(1) *Instructions by meter manufacturer.* A representative of the manufacturer will instruct employees how to operate the device at time of installation.

(2) *Keys.* (i) Two different keys are needed to operate a postage meter. One key is required to unlock the meter operating lever and must be used each day the machine is operated. A different key, which is the same as the key used to open customers' meters at time of setting, is required to open the meter unit to set an amount of postage in the device. The manufacturer will not furnish an additional meter setting key if you already have one.

(ii) Duplicate keys are provided for the meter operating lever of each machine. One key will be kept in custody of the designated supervisor except during the period the meter is assigned to the meter operator. The duplicate key will be recorded and retained in protective custody.

(3) *Settings.* Meters must be set by an employee authorized to set customer's meters. A meter machine operator must never set his own meter. Record initial setting and all other information called for on Form 3609–PO, *Control for Post Office Meter.* Set each meter at least once each 6 months. Limit settings to multiples of $100.00.

(4) *Conversion to postage due.* (i) Meters are converted to postage-due use by installing a snap-in die plate which imprints the words Postage Due to the left of the postmark circle. Dies are furnished by the Western Area Supply Center, Parts Section, Topeka, KS 66601. Requisition on Form 4984, Repair Parts Requisition. Include the model of meter with all requests.

(ii) Requisition a portable meter stand to move the meter between postage-due units and receiving windows when it is used in a dual capacity.

(iii) Meter operators assigned to receiving mail from the public may not also deliver postage due mail to window callers.

(5) *Affixing meter stamps.* Sell meter postage for packages or parcels of all classes, and for occasional letters presented by mailers of parcels. Affix meter stamps to the mail in presence of mailer. Do not use a meter for quantities of letters or circulars. Do not sell meter stamps to be taken from the post office to be put on parcels elsewhere. You may sell to collectors, stamps of meters installed at parcel post and registry receiving windows provided the stamps are for small amounts and are for philatelic purposes only. Do not issue stamps showing ".00" in the indicia or for less than 5 cents. Do not sell postage-due imprints except to collect postage-due. A meter operator should submit unused meter stamps daily that are printed in error with Form 3533, Application and Voucher for Refund of Postage and Fees, to postmaster for full refund. Do not hold these stamps longer than one week in any case.

(6) *Ink and tape.* Use only tape and red ink furnished by the Postal Service. Requisition from the supply center. Use green ink in meters used exclusively for postage-due mail. Green ink must be obtained from meter manufacturer or their local representative in accordance with local procurement authority in chapter 6 of the Postal Service Manual.

(7) *Protection of meter heads.* Remove meter heads and place in a safe or locked cabinet overnight and at other times when operator is temporarily absent from his station and adequate surveillance cannot be maintained over the meter head to prevent its misuse by unauthorized persons.

(8) *Repairs.* Postage meters are guaranteed against all defects in materials and workmanship for 1 year after installation. Request nearest authorized manufacturer's representative for free service during the 1-year guarantee. For other repairs see part 623 of the Postal Service Manual.

(9) *Slogan Ad Plates.* Except as provided in subparagraph (4) of this paragraph do not use slogan die plates in post-office owned meters.

(d) *Accounting*—(1) *Employees accountable.* (i) Designate a supervisor or other employee not assigned to operating the meter as responsible to check the daily accountability of postage printed by a meter. He shall check the meter in and out of service daily for the operator and see that it is protected as provided in paragraph (c) (7) of this section.

(ii) A meter operator is responsible for all postage printed by a meter while it is checked into his service; and for locking the machine and safeguarding the key during temporary absences. He shall use an informal receipt, or back of Form 3602–PO, when meter is turned over to a relief clerk during lunch or other short period.

(2) *Preparation and verification of accounting records.*—(i) *Form 3602–PO.* This is an accountable form, serially numbered, used daily to record meter register readings and remittance of cash. Each day the meter operator shall record the meter number, unit or station name, date, and ascending and descending register readings. The designated supervisor shall verify the readings of registers and then turn over the lever key to the operating clerk. At the end of his tour, the meter operator shall record the ascending and descending register readings. The difference between the beginning and ending readings represent postage for which the meter operator is accountable. The designated supervisor must verify readings and initial Form 3602–PO when checking a meter out of service or when transferring it to another operator.

(ii) *Form 3609–PO.* (A) Form 3609–PO shall be retained by the director, office of finance, chief accountant or the individual in charge of the office cash records. The first meter setting shall be recorded directly in Form 3609–PO. All other settings are reported on Form 3602–PO and posted to Form 3609–PO.

(B) A copy of Form 3602–PO must be kept with Form 3609–PO and the total amount of postage posted once each accounting period on Form 3609–PO. The numerical sequence of Forms 3602–PO must be verified.

(3) *Ascending register reversion.* The ascending register on reaching its maximum will revert to zero and start a new ascending record. When this occurs, the meter operator shall record the closing ascending register on Form 3602–PO as though it had not reverted by recording the carry-over digits in parentheses, as for example:

Descending register beginning	120000	Ascending register end	(1)0060000
Descending register end	40000	Ascending register beginning	9980000

Amount remitted: $800.00

When Form 3602–PO is received by the employee maintaining records on Form 3609–PO, appropriate notation of the date of reversion shall be made on the Form 3609–PO. Thereafter, readings of the ascending register will be recorded in the usual manner without addition of the digit in parentheses.

(4) *Remittance.* Money collected through postage meter operations must be remitted daily as near the end of the tour as possible. The original of Form 3602–PO must accompany Form 1412 or 1412–A Daily Cash Report. If Form 1412 or 1412–A is not used, send remittance with Form 3602–PO.

(e) *Use by contract stations and branches.*—(1) *Privately owned meters.* Although post-office-owned meters are not furnished to contract stations and branches, the contractor may at his own expense and option obtain a postage meter to collect postage on parcels presented by patrons.

(2) *Accountability.* (i) Settings of meters for contract stations shall be made at the post office or classified station or branch designated by the postmaster.

(ii) If meter is used exclusively for mailings of customers, follow instructions in paragraph (b) (3) of this section and reduce stamp credit. Furnish Form 3602–PO to contractor and require submission of form with daily remission of meter funds.

(iii) If meter is also used by contractor to pay postage on his own mail, require payment for each setting at the time meter is set. Contractor will reimburse himself for meter postage applied to customers' parcels.

(iv) Account for all settings of non-post-office owned meters used at contract stations in the same manner as customer meters. See Handbook F–1.

§ 144.8 [Reserved]

§ 144.9 Manufacture and distribution of postage meters.

(a) *Authorization to manufacture and lease*—(1) *Qualification.* Any concern desiring authorization to manufacture and lease postage meters for use by mailers under § 144.1(c) must qualify as follows:

(i) Satisfy the U.S. Postal Service as to its integrity and financial responsibility.

(ii) obtain approval of at least one model postage meter incorporating all the mechanical features and safeguards specified in paragraph (b) of this section.

(iii) Have, or establish, and maintain under its supervision and control adequate manufacturing facilities suitable to carry out to the satisfaction of the Finance and Administration Department the provisions of paragraph (d) of this section. Such facilities shall be subject to inspection by representatives of the Finance and Administration Department.

(iv) Have, or establish, and maintain adequate facilities for the control, distribution, and maintenance of postage meters and their replacement when necessary.

(2) *Application.* Any person or concern seeking authorization to manufacture postage meters may make application to the Finance and Administration Department, in person or in writing. On qualification and approval, the applicant will be authorized in writing to manufacture postage meters and to lease them to mailers. The name of the manufacturer will be listed in the Postal Service Manual.

(3) *Suspension.* The U.S. Postal Service may require a manufacturer to suspend production and distribution of any or all of his models of postage meters pending investigation to determine whether his authorization should be revoked and the Postal Service will fully advise him of the facts which may warrant such action. The manufacturer will be given an opportunity to demonstrate or achieve compliance with all the lawful requirements within a reasonable, specified time limit.

(4) *Revocation.* Authorization may be revoked if the manufacturer engages in any scheme or enterprise of an unlawful character or fails to comply with any of the provisions of part 144.

(b) *Specifications.* Postage meters must incorporate all of the following mechanical features and safeguards:

(1) A postage meter may be either the detachable portion containing the printing die and registering mechanism of a mailing machine, or it may be complete in itself. In either case, it must be suitable for the mailer to bring to the post office for setting.

(2) A postage meter may be capable of printing one denomination of postage and registering the number of such impressions made (single denomination); or it may be capable of printing several denominations and registering either multiples of the smallest unit printed (multidenomination) or the currency value of the impressions made (omnidenomination). The printing die or dies, counters and counter-actuating mechanism must be inseparable in the unit brought to the post office for setting.

(3) In each postage meter, there must be two accurate and dependable counting devices, one ascending and registering the total imprinted, the other descending and registering the balance of the last setting remaining unused. The descending register must actuate a locking mechanism preventing further operation of the meter after the register has reduced to an amount less than the largest denomination printable in one operation or to zero. The descending register must be so constructed as to be easily set at the post office for any amount of postage or number of impressions within its capacity, prepaid by the mailer.

(4) The entire mechanism must be encased in a substantial housing. The descending register must be accessible to the post office by means of a door equipped with a suitable lock and with provision for a post office seal. The ascending register and all other mechanism must be so shielded as not to be accessible even when the door is open. The readings of both registers must be easily obtainable at any time between operations, either by visibility through closed windows, or by imprint on tape or card, or by a combination of the two methods. The housing must be of such construction that it is impossible to alter the readings of the ascending register except by normal operation, or to gain access to the internal mechanism, except for setting the descending register as provided in subparagraph (3) of this paragraph, without mutilation.

(5) The printing die must either conform in design to one already in use or be approved by the Finance and Administration Department. It must include the serial number of the meter and identification of the manufacturer, and be so constructed or shielded that it is not practically possible without proper registration in the ascending and descending register to obtain imprints fraudulently.

(6) The meter die must include a postmark to print the name of the city and State from which mail is dispatched and the date of mailing. The postmark must be printed at the left of but adjacent to the denomination stamp and may be either included in an overall design with the denomination stamp or separated from it. Provision must be made so that the date may be either printed or omitted as required by the U.S. Postal Service on the various classes of mail. Provision may be made to print an hour of mailing either within or in a close position outside the postmark. Provision may also be made to print designations such as "Nonprofit Org.", and the like, adjacent to and in the same operation with the meter stamp. The denomination die must not be completely exposed at any time during the process of installing or removing postmark dies, daters, hour type, or special designation slugs or when changing the date.

(7) Provision may be made in a meter for a meter slogan or ad plate to print to the left of and adjacent to the postmark. The size and position of a slogan or meter ad must be such that it will not interfere with or obscure the meter stamp or postmark and it must be possible to install the plate easily without exposing the meter stamp die. Plates must be made of suitable, durable material which will not soften or disintegrate while in use. They must be well fitted and so securely fastened to the printing mechanism that they will not become loose or detached or otherwise interfere with proper operation of a meter.

(8) The entire mechanism must be of such solid, substantial, and dependable construction as to protect the U.S. Postal Service amply against loss of revenue from fraud, manipulation, misoperation, or breakdown.

(c) *Testing and approval*—(1) *Submission of each model.* Each model meter proposed for manufacture must be approved by the Finance and Administration Department, after being tested by the National Bureau of Standards, or the U.S. Postal Service Laboratory, at the expense of the manufacturer. A preliminary working model which meets the specifications in paragraph (b) of this section may be submitted for tentative approval. No meters of any model may be distributed or used for payment of

V 38-136 JUL 17 73 XUM

postage until a complete unit made to production drawings and specifications has been submitted, tested, and approved, except as may be specifically authorized for preliminary field testing.

(2) *Security examination.* Each model meter proposed for manufacturer will be examined to see that it incorporates all the mechanical features and safeguards required by paragraph (b) of this section and that it amply protects the U.S. Postal Service against loss of revenue.

(3) *Endurance test.* Each model of meter proposed for manufacture must pass without error or breakdown the following described printing cycle endurance test which includes operation of the printing mechanism with proper registration of the selected postage value in both the ascending and descending registers:

(i) For meters that operate at 100 or more printing cycles per minute—4 million cycles.—For meters that operate at less than 100 printing cycles per minute (and cannot be used interchangeably on power base machines that operate at 100 or more printing cycles per minute)—2 million cycles.

(ii) For multi- and omni-denomination meters, postage value selection elements shall be tested for one-half million operations. A complete operation includes selection of a value and return to zero.

(iii) Balance register lockout operation shall be performed at the start of, at intervals during, and at the end of the printing cycle test.

(4) *Approval.* The U.S. Postal Service reserves the right before approval to require additional examination and testing as necessary to resolve any areas of doubt regarding the security or endurance characteristics of any meter which is proposed for manufacture.

(5) *Deposit of specimen meter.* One production model of each meter approved must be deposited with the Finance and Administration Department, and no changes affecting the basic features or safeguards may be made thereafter without Postal Service approval.

(6) *Tests after approval.* Additional meters from current manufacture must be submitted to the National Bureau of Standards, or the U.S. Postal Service, for test, at the expense of the manufacturer, as may be requested by the Finance and Administration Department, U.S. Postal Service.

(d) *Safeguards*—(1) *Materials and workmanship.* All meters must closely adhere to the quality in materials and workmanship of the approved production model and must be manufactured with suitable jigs, dies, tools, etc., to assure proper maintenance and interchangeability of parts.

(2) *Breakdown tests.* At reasonably frequent intervals, the manufacturer must take meters at random from production and subject them to breakdown tests to make certain that quality and performance standards are maintained.

(3) *Protection of printing dies and keys.* During the process of fabricating parts and assembling postage meters, the manufacturer must exercise due care to prevent loss or theft of keys or of serially numbered postage printing dies or component parts, such as denomination printing dies, which might be used in some manner to defraud the Government of postal revenues. All serially numbered printing dies produced should be accounted for by assembly into meters or by evidence of mutilation or destruction. Postage printing dies removed from meters and not suitable for reassembly must also be mutilated beyond the possibility of use, or be completely destroyed.

(4) *Destruction of meter stamps.* All meter stamps printed in the process of testing dies or meters must be collected and destroyed daily.

(5) *Inspection of new and rebuilt meters.* All new and rebuilt meters must be carefully inspected before leaving the manufacturer's meter service station.

(6) *Keys and setting equipment.* The meter manufacturer must furnish keys and other essential equipment for setting his meters to all post offices under whose jurisdiction his meters are licensed for use. These items must be protected and shall not be furnished to persons not authorized by the U.S. Postal Service to have them.

(e) *Distribution.*—(1) *Facilities.* Authorized manufacturers must maintain adequate facilities for the distribution, control, and maintenance of postage meters. All such facilities are subject to inspection by representatives of the Finance and Administration Department.

(2) *Controls.* Each authorized manufacturer is required to:

(i) Retain title permanently to all meters of his manufacture except such as may be purchased by the U.S. Postal Service for use in post offices.

(ii) Lease his meters only to mailers to whom meter licenses have been issued by the post office.

(iii) Supply only those meter slogan or ad plates that meet the requirements of the U.S. Postal Service for suitable quality and content.

(iv) Deliver meters to post offices or postal stations only—never to mailers until set and sealed at a post office.

(v) Take reasonable precautions in the transportation and storage of his meters to prevent their reaching the hands of unauthorized individuals.

(vi) Report the loss or theft of any of his meters, or the recovery of any lost or stolen meters, immediately to the local postmaster, the local police, and the Regional Postmaster General for the region in which the meter is licensed for use.

(vii) Report to the appropriate postal data center of the U.S. Postal Service each time a meter is presented at a post office for initial setting or to be checked out of service—the report to include the name and address of the mailer, the post office or postal station through which it was handled, and the readings of both registers at the time the meter left or was returned to the manufacturer's possession.

(viii) Maintain at his headquarters a complete record by serial number of all meters manufactured, showing all movements of each from the time it is produced until it is scrapped, and the reading of the ascending register each time it is checked into or out of service through a post office. These records must be subject to inspection at any time during business hours by officials of the U.S. Postal Service. These records may be destroyed 3 years after the meter is scrapped.

(ix) Cancel his lease agreement with any mailer whose meter license is canceled by the U.S. Postal Service and remove his meter promptly.

(x) Maintain a permanent record by serial number of all meter keys issued to postmasters as well as those sections of the manufacturer's establishment in which their use is essential preferably in the form of signed receipt cards. Report the loss or theft of any of his meter setting keys, or the recovery of lost or stolen keys, to the Regional Postmaster General.

(xi) Examine each meter withdrawn from service for failure to record its operations correctly and accurately, and report to the U.S. Postal Service the mechanical condition or fault which caused the failure. See § 144.3(d).

(xii) Submit such other reports to the U.S. Postal Service as may be required from time to time.

(f) *Maintenance*—(1) *Replacement.* The manufacturer must maintain his meters in proper operating condition for mailers by replacing them when necessary or desirable to forestall mechanical breakdown.

(2) *Inspection of meters in use.* The manufacturer must have all of his meters in service with mailers inspected at least twice annually at approximate six-month intervals. Inspections must be sufficiently thorough to determine that each meter is clean, in proper operating condition, is recording its operations correctly and accurately, that neither the post office seal nor any seal placed by the manufacturer to prevent access to the mechanism has been removed or tampered with, and that there are no other indications of tampering. A specimen printing of .00¢ shall be run off and the ascending and descending registers checked to insure that they do not change. The meter register readings must be compared with the control figure last recorded by the postal setting employee in the meter user's Form 3602-A, Daily Record of Meter Register Readings, to confirm the accuracy of the registers. If the post office control figure has not been recorded, obtain such figure immediately from post office to confirm accuracy of registers. Any irregularities found in the operation of a meter at any time or any improper usage of a meter must be reported immediately to the mailer's postmaster, and appropriate steps must be taken to have the meter discontinued.

(3) *Repair of internal mechanism.* Repair or reconditioning of meters involving access to internal mechanisms must be performed only within a factory or suitable meter repair department under the direct control and supervision of the manufacturer. Meters must be checked out of service through the post office of setting before they are opened or any internal repairs are undertaken.

(g) *Notice of proposed changes in regulations.* So far as may be consistent with the public interest, before any changes are made in the regulations in this Part 144, the U.S. Postal Service will give notice of any proposed changes sufficiently far in advance of the proposed effective date to enable persons who manufacture or who may be interested in manufacturing postage meters, a reasonable opportunity to be heard and to adjust their operations to accord with the proposed changes if they are adopted.

ROGER P. CRAIG,
Deputy General Counsel.

PART 156—RURAL SERVICE

Custom Built Rural Mailboxes

Regulations dealing with approval by the Postal Service of the quality of rural mailboxes are amended to indicate the criteria for custom built boxes. Accordingly, paragraph (a) of § 156.5 *Rural boxes* is amended, effective July 17, 1973, by the addition of subparagraph (6) to read as follows:

§ 156.5 Rural boxes.

(a) • • •

(6) *Custom built rural mailboxes.* Postmasters are authorized to approve rural mailboxes constructed by individuals who for esthetic or other reasons do not wish to use an approved manufactured box. The custom built box must conform generally to the same requirements as approved manufactured boxes relative to the flag, size, strength and quality of construction.

• • • • •

(39 U.S.C. 401).

ROGER P. CRAIG,
Deputy General Counsel.

JULY 12, 1973.

[FR Doc.73-14526 Filed 7-16-73;8:45 am]

PART 164—INDEMNITY CLAIMS

previously designated "Payment for Losses," are now designated as "Indemnity Claims." The regulations have been rewritten to implement procedures to expedite the processing of insured mail (including c.o.d.) indemnity claims.

Publication of the revisions in the FEDERAL REGISTER is effective immediately.

Sec.
164.1 General instructions on filing an insured (including c.o.d.) mail claim.
164.2 Acceptance and preparation of insured mail claims.
164.3 Disposition of the damaged article.
164.4 Disposition of the claim.
164.5 Additional post office responsibilities (insured mail claims).
164.6 General instructions for filing registered mail claims.
164.7 Acceptance and initial preparation of registered mail claims.
164.8 Additional post office responsibilities (registered mail claims).

AUTHORITY: 39 U.S.C. 401.

§ 164.1 General instructions on filing an insured (including C.O.D.) mail claim.

(a) *Who may file.* A claim for loss or damage of insured (including c.o.d.) mail may be filed by either the mailer or the addressee.

(b) *How to file*—(1) *Domestic claims.* A customer may file a claim at any post office, classified branch, or station. Form 3812, *Request for Payment of Domestic Postal Insurance,* dated Nov. 1971 or later, is used to request payment for the loss or damage of insured mail. The form is a four-part snap-out set which includes two copies of Form 1510-A, *Inquiry for the Loss or Rifling of Mail Matter,* and one copy of Form 3841, *Post Office Record of Claim.* DO NOT COMPLETE A SEPARATE FORM 1510 or FORM 3841 FOR INSURED OR C.O.D. CLAIMS.

(2) *International claims.* Claims for international insured mail are to be handled in accordance with Parts 17–73 of this title.

(c) *When to file*—(1) *Loss claims.* Customers may not file a claim for loss until 30 days after the date of mailing.

(2) *Damage claims.* Customers may file damage claims immediately.

(3) *Insurance (including C.O.D.) claims.* Indemnity claims must be filed within one year from the date the article was mailed, unless the claimant can establish that the delay was not his fault. In case of doubt, accept the claim and outline the details for postal data center evaluation.

(d) *Information required*—(1) *Evidence of insurance.* The customer must submit evidence that the package was insured. Acceptable evidence includes either:

(i) The original insurance receipt issued at time of mailing. Business firms may annotate the appropriate line(s) in their firm mailing book *Claim filed on (date),* and submit a photocopy with the claim form.

(ii) The wrapper, if it has the name and address of both the mailer and the addressee and the appropriate insurance endorsement.

(2) *Evidence of value.* The customer (including Government agencies which have insured official mail) must submit evidence of value for claims of $50 or more. The Postal Service will not undertake to obtain estimates of value. Acceptable evidence may include any one of the following:

(i) Sales receipt.

(ii) Invoice.

(iii) Completion of item 13 of the claim form as to purchase price of the article, approximate year of purchase, indication of whether the article was new or used, or price of materials used and labor, if handmade.

(iv) Statement of value from a reputable dealer.

(v) Catalog value of a similar article.

(vi) Paid repair bills, estimates of repair costs, or appraisals.

(e) *Assignment of responsibilities.* (1) Post offices, classified stations and branches will:

(i) Accept claims when evidence of insurance, statement of value (if claim is for $50 or more), and required signatures are furnished.

(ii) Assist customers in preparation of Form 3812.

(iii) Complete post office portion of Forms 3812.

(iv) Route completed Forms 3812 in accordance with section 164.4.

(2) The St. Louis Postal Data Center will adjudicate and pay or disallow all domestic insured and c.o.d. mail claims.

§ 164.2 Acceptance and preparation of insured mail claims.

(a) *Filed by mailer.* (1) The accepting postal employee will complete items 1 through 10 on Form 3812. Type or print legibly with a ballpoint pen. Press hard.

Item 1. Check the appropriate block to indicate type of claim.

Item 2. Indicate use of airmail, if applicable.

Item 3. Check the appropriate block to indicate category of the claim.

Item 4. Indicate special delivery service, if applicable.

Item 5. Enter city, State and ZIP Code of *mailing post office* (not necessarily the post office where the claim is being filed). If the package was mailed at a station or branch, use the appropriate ZIP Code.

Item 6. Enter the date the package was mailed.

Item 7. Enter the date the claim is being filed.

Item 8. Enter city, State and ZIP Code of *post office of address.*

Item 9. Enter amount of postage paid, including special fees such as special delivery or special handling.

Item 10. Enter amount of insurance fee paid.

(2) Assist the customer in completing items 11 through 14 and items 17 and 18 of Form 3812 to the extent possible as follows:

Items 11 and 12. Names and addresses of mailer and addressee. The mailer should indicate the payee by checking the payee block in either item 11 or 12. If payee is a third party, do not check either block; complete the customer portion of the Identification Slip to indicate payee.

Item 13. Describe the articles lost or damaged; indicate the purchase price, the approximate year of purchase, whether the article was new or used, or the price of materials used and labor, if handmade. Describe the items in sufficient detail for the postal data center to determine that the value claimed is not excessive. Attach a supplementary sheet of paper to the claim form if necessary.

Item 14. Enter the total amount claimed excluding postage.

Item 15. Leave blank.

Item 16. Leave blank.

V 38 136 JUL 17 73 XUM

Item 17. Complete if package was commercially insured. Include policy number, name and address of insurance company and amount of deductible, if appropriate.

Item 18. Have the mailer sign and enter his telephone number in appropriate block. If the claim is being filed by a business firm, the firm name should be entered in the signature block and the firm's representative should sign the block labeled *By*.

Item 19. Leave blank.

(3) The accepting postal employee will complete items 20, 21 and 22 (if applicable) of Form 3812.

Item 20. Date stamp and initial.

Item 21. Check the appropriate block to indicate evidence of insurance. Endorse the insurance receipt and wrapper *Claim Filed*, date stamp and initial it. Return it to the customer and instruct him to keep it until the claim is settled.

Item 22. Location of the damaged article:

(i) If the mailer has possession of the damaged article, he must display it to the accepting postal employee to verify actual damage.

(ii) If the claim is for partial damage, check the appropriate block to indicate that the customer will retain possession of the article.

NOTE: Under no circumstances should the accepting postal employee arrange to have the article repaired.

(iii) If the claim is for total damage, disposition of the article will be at the option of the Postal Service. If the totally damaged article will have little or no salvage value, the article may be returned to the customer if he so desires. If the totally damaged article will have salvage value, dispose of it in accordance with §164.3 of this title.

(4) Enter the following information on lower portion of Form 3812, *Postal Insurance Claim Identification.*

Mailer's Name and Address.
Addressee's Name and Address.
Other Identification (at option of customer).
Name and Address of Payee as Designated by Mailer.

(5) Review the claim form before the mailer leaves the post office to assure that:

(i) The mailer has designated the payee; signed the claim form; and completed the postal insurance claim identification portion of the form; and

(ii) All necessary available supporting documents (bill of sale, invoice, repair bill or estimate of repairs) are attached to the back of claim form.

(b) *Filed by addressee*

(1) The accepting postal employee will complete items 1 through 10 on Form 3812, as appropriate. Type or print legibly with a ballpoint pen. Press hard.

Item 1. Check the appropriate block to indicate type of claim.

Item 2. Indicate use of airmail, if applicable.

Item 3. Check the appropriate block to indicate category of the claim.

Item 4. Indicate special delivery service, if applicable.

Item 5. Enter city, State and ZIP Code of *mailing post office*, if known.

Item 6. Enter the date the package was mailed, if known.

Item 7. Enter the date the claim is being filed.

Item 8. Enter city, State and ZIP Code of *post office of address.*

Item 9. Enter amount of postage paid.

Item 10. Enter amount of insurance fee paid, if possible.

(2) Assist the customer in completing the following items of Form 3812 to the extent possible:

Items 11 and 12. Names and addresses of mailer and addressee. Check the payee block in either item 11 or 12 *only if the claim is for repair of a partially damaged article.*

Item 13. Describe the articles lost or damaged; indicate the purchase price, the approximate year of purchase, whether the article was new or used, or the price of materials used and labor, if handmade. Describe the items in sufficient detail for the postal data center to determine that the value claimed is not excessive. Attach a supplementary sheet of paper to the claim form, if necessary.

Item 14. Enter the total amount claimed excluding postage.

Item 15. Complete for loss claims only.

Item 16. Complete for c.o.d. claims only.

Item 17. Complete if package was commercially insured. Include policy number, name and address of insurance company and amount of deductible, if appropriate.

Item 18. Leave blank.

Item 19. Have the addressee sign and enter his telephone number in appropriate block. If the claim is being filed by a business firm, the firm name should be entered in the signature block and the firm's representative should sign the block labeled "By".

(3) The accepting postal employee will complete items 20, 21 and 22 (if applicable) of Form 3812.

Item 20. Date stamp and initial.

Item 21. Check the appropriate block to indicate evidence of insurance. Endorse the insurance receipt and/or wrapper *Claim Filed*, date stamp and initial it. Return it to the customer and instruct him to keep it until the claim is settled.

Item 22. Location of the damaged article:

(i) If the customer has possession of the damaged article, he must display it to the accepting postal employee to verify actual damage.

(ii) If the claim is for partial damage, check the appropriate block to indicate that the customer will retain possession of the article.

NOTE: Under no circumstances should the accepting postal employee arrange to have the article repaired.

(iii) If the claim is for total damage, disposition of the article will be at the option of the Postal Service. If the totally damaged article will have little or no salvage value, the article may be returned to the customer if he so desires. If the totally damaged article will have salvage value, dispose of it in accordance with section 164.3.

(4) Enter the following information on lower portion of Form 3812, *Postal Insurance Claim Identification*, only if the claim is for repair of a partially damaged article:

Mailer's Name and Address.
Addressee's Name and Address.
Other Identification (at option of customer).
Name and Address of Payee.

(5) Review the claim form before the addressee leaves the post office to assure that:

(i) The addressee has signed the claim form and completed the *Postal Insurance Claim Identification* portion of the form, if applicable; and

(ii) All necessary available supporting documents (bill of sale, invoice, repair bill or estimate of repairs) are attached to the back of claim form.

§ 164.3 Disposition of the damaged article.

(a) For a totally damaged article that will have little or no salvage value such as smashed glassware, allow the customer to retain the article if he so desires, otherwise destroy it. If the totally damaged article will have salvage value retain it for 60 days then forward it to your dead parcel post branch on the next weekly dispatch. Use Form 3831 *Receipt for Article(s) Damaged in Mails.* If customer's claim is denied, article is to be returned upon request.

(b) For partially damaged articles, return the article to the customer.

§ 164.4 Disposition of the claim.

(a) The accepting clerk should forward the partially completed claim form, with the available supporting documentation attached, to:

(1) The claims and inquiry section, if one exists, or

(2) The employee within the post office who has been designated to handle insurance claims.

(b) Final preparation of the claim form at the accepting post office (except APO/FPO claims and Canal Zone claims—See paragraph (d) of this section)—is completed as follows:

(1) Assign a nine-digit number in the space provided at the top of Form 3812. The claim number is composed of the six digit post office finance number and a three digit sequential number beginning with 001 and continuing through 999. When the total of claims initiated reaches 999, begin again with 001.

(2) *Forward to* block: Check the appropriate box to indicate to whom the claim form will be forwarded.

(3) Detach and file copy 4 of the claim form set (Form 3841, *Post Office Record of Claim*) alphabetically by mailer's name.

(4) Leave copies 2 and 3, Form 1510–A, attached to the claim form set.

(5) Select the appropriate form letter of instructions and attach it to the front of the claim form set as follows:

(i) Loss Claim Filed by Mailer, Form Letter 3861.

(ii) Damage Claim Filed by Mailer, Form Letter 3862.

(iii) Damage Claim Filed by Addressee, Form Letter 3863.

(6) Prepare a pre-addressed, penalty reply envelope as follows:

Postal Data Center
P.O. Box 14677
St. Louis, Mo. 63180

Attach the envelope to the claim form set.

(c) Send the claim form set with the appropriate form letter and pre-addressed postal data center envelope as follows:

(1) Loss or c.o.d.—to the addressee.

(2) Damage claim—to the second customer (either mailer or addressee). See exceptions in paragraph (c) of this section.

(3) Exceptional damage claims.

(i) If the mailer has possession of the damaged article and submits proof that it was received by the addressee in a damaged condition, or that it was returned from the office of address as undeliverable, do not send the claim form to the addressee. Forward it directly to the St. Louis Postal Data Center for certification and payment.

(ii) If repairs to a partially damaged article have been paid for by the addressee, forward the claim directly to the St. Louis Postal Data Center without the statement or signature of the mailer, provided you can determine from the insurance endorsement on the wrapper that the insurance fee paid was sufficient to have purchased insurance to cover the cost of repairs. Otherwise forward to the mailer for his evidence of insurance in accordance with paragraph (b)(5)(iii) of this section and paragraph (c)(2) of this section.

(d) When preparing and forwarding APO/FPO and Canal Zone Claims:

(1) Determine whether or not the mailer is still in an overseas area. Frequently APO/FPO and Canal Zone claims can be settled locally without contacting the port post office and the claim form set can be forwarded directly to the St. Louis Postal Data Center.

(2) If the claim cannot be settled locally, prepare the claim form set as you would for ordinary domestic claims except do not enter a claim number and do not detach copy 4 (Form 3841).

(3) Select and attach the appropriate form letter and forward as follows:

(i) Overseas Military Mail—to the postmaster at the port post office identified in the mailer's or addressee's address.

(ii) Canal Zone Mail—to the Postmaster, New Orleans, LA 70113.

(e) Port post office responsibilities are:

(1) Upon receipt of an APO/FPO or Canal Zone claim initiated by another post office, take the following action:

(i) Enter your own claim number.

(ii) Detach and file copy 4 (Form 3841) of the claim form set.

(iii) Forward the claim form set on to the next contact point.

(2) When the claim form set is returned to your office:

(i) Annotate the Form 3841 appropriately.

(ii) Forward the claim form set to the St. Louis Postal Data Center for adjudication and payment.

§ 164.5 Additional Post Office responsibilities (insured mail claims).

(a) *General Assistance to Customers.*

(1) Completion of a claim form initiated at another post office.

If a customer comes into your office with any one of the form letters mentioned in § 164.4(b)(5) and a partially completed Form 3812, comply with the following procedures:

(i) Read carefully the form letter which transmitted directions to the customer.

(ii) Assist the customer in completing his portion of the Form 3812 in accordance with the directions in the form letter.

(iii) Place the completed Form 3812 and all other material which the customer has received into the pre-addressed postal data center envelope and mail.

(2) *Verification of insurance receipt.* When the addressee has filed a damage claim and the amount of indemnity claimed exceeds $50, the mailer must present his insurance receipt for verification at any post office, classified station, or branch. Accept the insurance receipt, the partially completed Form 3812, and the form letter of instructions from the mailer. Comply with the following procedures:

(i) Read carefully the form letter which transmitted directions to the customer.

(ii) Complete items 9 and 10 on Form 3812.

(iii) Assist the customer in completing his portion of the Form 3812 in accordance with the directions in the form letter.

(iv) Endorse the insurance receipt *Claim Filed*, date stamp and initial it. Return the receipt to the customer and instruct him to keep it until the claim is settled.

(v) Date stamp and initial item 24 of Form 3812.

(vi) Place the completed Form 3812 and all other material which the customer has received into the pre-addressed postal data center envelope and mail.

(b) *Follow up on the status of a claim.* (1) Provided at least 30 days (75 days for surface APO/FPO and Canal Zone mail) have elapsed since the claim was initiated, process the customer's inquiry as follows:

(i) Forward Form Letter 3864, *Insurance Claim Follow-up*, and a penalty, pre-addressed return envelope direct to the second customer involved in the claim.

(ii) Annotate Form 3841 to show the date on which the follow up letter was sent.

(2) Depending upon the response from the second customer, proceed as follows:

(i) *If the second customer indicates nonreceipt of the initial Form 3812*, prepare and process a duplicate Form 3812 in accordance with § 164.5(c).

(ii) *If the second customer indicates that the claim has been completed and forwarded to the postal data center*, annotate the Form 3841 appropriately and inform the customer who initiated the inquiry.

(iii) *If the second customer does not respond within 15 days*, send Form Letter 3865 *Inquiry on Status of Indemnity Claim*, to the St. Louis Postal Data Center and annotate Form 3841.

(3) Depending upon the response from the postal data center, proceed as follows:

(i) *If the postal data center indicates that the claim has been received*, annotate the Form 3841 appropriately and inform the customer who initiated the inquiry.

(ii) If the postal data center has no record of the claim, prepare and process a duplicate Form 3812 in accordance with § 164.5(c).

(c) *Duplicate claims.* (1) The initiating post office will prepare and process a duplicate claim as follows:

(i) Use the information on the original Form 3841 to complete as much of the duplicate Form 3812 as possible. Enter the same claim number that appeared on the original Form 3812. The signature of the customer who initiated the claim and the supporting documents are not necessary.

(ii) Mark the top of the Form 3812 *Duplicate.*

(iii) Annotate the original Form 3841 to indicate that a duplicate claim has been initiated. Do not detach the Form 3841 from the duplicate claim form set.

(iv) Select the appropriate form letter of instructions to the customer (see § 164.4(b)(5)) and attach it to the front of the claim form set.

(v) Prepare a pre-addressed, postage paid envelope as follows:

Postal Data Center
P.O. Box 14677
St. Louis, MO 63180

Attach the envelope to the claim form set.

(vi) Complete Form Letter 3866, *Duplicate Insurance Claim*, and attach it to the front of the claim form set.

(vii) Forward the entire package to the post office which serves the second customer.

(2) Upon receipt of a duplicate claim form set, the post office which serves the second customer should read carefully and comply with the instructions in Form Letter 3866.

§ 164.6 General instructions for filing registered mail claims.

(a) *Who may file.* A claim for loss of registered mail may be filed only by the mailer. Claims for damage may be filed by either the mailer or addressee.

(b) *How to file*—(1) *Domestic Claims.* A customer may file a claim at any post office, branch, or station. At a first and second-class post office, branch or station, use Form 565, *Application for Indemnity for Registered Mail*, to file a claim. At a third or fourth-class post office, the postmaster must send a memorandum to the local Postal Inspector-in-Charge. This memorandum must identify the nature of the loss, the registration number, the address of both mailer and addressee, and the date of mailing.

V 38 I 136 JUL 17 73 XUM

(2) *International claims.* Claims for international registered mail are to be handled in accordance with Parts 71–73 of this title.

(c) *When to file—(1) Loss claims.* Customers may not file a claim until a Form 1510, *Inquiry for the Loss or Rifling of Mail Matter*, has been processed.

(2) *Damage claims.* The sender or addressee may file claims for damage immediately.

(3) *Registered indemnity claims.* Must be filed within one year from the date the article was mailed, unless the claimant can establish that the delay was not his fault. In case of doubt, accept the claim and outline the details for postal data center evaluation.

(d) *Information required—(1) Evidence of registration.* The customer must submit evidence that the article was registered. Acceptable evidence includes either:

(i) The original registered mail receipt issued at the time of mailing.

(ii) The wrapper which must have the names and addresses of both the mailer and addressee and the appropriate registered mail endorsement.

(2) *Evidence of value.* The customer (including Government Agencies which have registered Official Mail) must submit evidence of value for registered claims. Acceptable evidence includes:

(i) Sales receipt.

(ii) Invoice.

(iii) Statement of value from a reputable dealer.

(iv) Paid repair bills, estimates of repair costs or appraisals.

(v) Statement of cost for duplication and premium for surety bond when claim is for loss of securities or certificates of stock.

(3) *Evidence of loss or damage.* (i) For loss claims, a Form 1510 must have been processed.

(ii) For damage claims, the article with the packaging must be presented either by the claimant or at the second post office.

(e) *Assignment of responsibilities.* (1) Post offices, stations and branches will accept and process claims upon presentation of the required information.

(2) The St. Louis Postal Data Center will adjudicate and pay or disallow all domestic registered mail claims.

§ 164.7 Acceptance and initial preparation of registered mail claims.

(a) *Filed by mailer.* (1) The accepting postal employee will complete items 2 through 23 and item 33 on Form 565. Type or print legibly with a ball point pen.

Item 2. Check appropriate block to indicate the type of claim.

Item 3. Indicate if the article was commercially insured. If yes, give the policy number, name and address of the insurance company and amount of deductible, if appropriate.

Item 4. Enter the name, address and ZIP Code of *the mailer.*

Item 5. Enter the name, address and ZIP Code of *the addressee.*

Item 6. List and describe the lost, missing or damaged articles. For damage claims, describe packing in detail.

Item 7. Fill in name and address of the payee.

Item 8. Enter the amount claimed.

Item 9 and 10. Have the mailer date and sign the claim form.

Item 11. Enter the name and ZIP Code of the post office where the claim is filed.

Item 12–20. Enter the required information. Use the mailer's copy of the registered mail receipt for this information. Verify this information against post office record. Endorse post office record *Claim Filed*, date and and initial.

Item 22. Enter date the claim is filed or the date the Form 1510 was initiated.

Item 23. Have the postmaster or his designated representative sign the form.

Item 33. Complete for damage claims.

(2) Complete lower portion of the form, *Registry Claim Identification.* (This information is to be identical to that contained in blocks 4, 5 and 7.)

(3) Record the claim on Form 3841 in duplicate. Show the amount of indemnity claimed. File the original by the name of the mailer and attach duplicate copy of the claim. Do not file with records of insurance claims.

(4) Send claim and accompanying Form 1510 (for loss claims) to the post office of address for completion of the claim form.

(b) *Filed by the addressee.* (1) The accepting employee will complete items 2 thru 6, if practicable and items 24 thru 28. Complete from your delivery records.

Item 29. Date signed by addressee.

Item 30. Obtain the necessary information from the customer. Make answer as complete as possible.

Item 31. Obtain signature of the addressee or owner.

Item 33. Complete for damage claims.

(2) Enter the following information on the lower portion of Form 565, *Registry Claim Identification:*

Mailer's Name and Address
Addressee's Name and Address
Other Identification (at option of customer)
Name and Address of Payee as designated by mailer.

(3) Record the claim on Form 3841 in duplicate. Show the amount of indemnity claimed. File the original by the name of the mailer and attach duplicate copy to the claim. Do not file with records of insurance claims.

(4) Send claim and accompanying Form 1510 (for loss claims) to the office of mailing for completion of the claim form.

§ 164.8 Additional Post Office responsibilities (registered mail claims).

(a) *Office of mailing.* (1) Request the mailer to appear with the necessary documentation. Do not release the claim form to the mailer.

(2) Complete claims for damaged registered articles received from the office of address. (See § 164.7(a).)

(3) Endorse registered mail receipt *Claim Filed*, date and initial. Return the receipt to the customer and instruct him to keep it until the claim is settled.

(4) Enter on Form 3841 the date and disposition of claim. File by name of the mailer.

(5) Send the completed claim form and the necessary documentation to the local Postal Inspector-in-Charge.

(b) *Office of address.* (1) Request the addressee to appear. If addressee has possession of the damaged article, it must be presented for inspection.

(2) Complete claim form received from the office of mailing. (See § 164.7(b).)

(3) Enter on Form 3841 the date and disposition of claim. File by the name of the mailer.

(4) Forward completed Form 565 and documentation to the local Postal Inspector-in-Charge.

(c) *Follow up on the status of a claim.* (1) Provided at least 90 days have elapsed since the claim was initiated, process the customer's inquiry by sending a memorandum requesting status to the:

Postal Data Center
P.O. Box 14677
St. Louis, MO 63180

The memorandum must identify the nature of loss, registration number, the address of both mailer and addressee, the date of mailing and date the claim was filed.

(2) Depending upon the response from the postal data center proceed as follows:

(i) If the postal data center indicates that the claim has been received, annotate the Form 3841, as appropriate, and inform the customer who initiated the inquiry.

(ii) If the postal data center has no record of the claim, they will provide further instructions.

(d) *Duplicate claims.* (1) Duplicate claims shall not be accepted or submitted unless requested by the St. Louis Postal Data Center or the Mail Classification Division, Finance Department, at Headquarters.

(2) When instructed, the initiating post office will prepare and process a duplicate claim as follows:

(i) Use the information on the original Form 3841 to complete as much of the duplicate Form 565 as possible. The signature of the customer who initiated the claim and the supporting documents are not necessary.

(ii) Mark the top of the Form 565 *Duplicate.*

(iii) Annotate the original Form 3841 to indicate that a duplicate claim has been initiated.

(iv) Process through normal channels.

§ 164.9 Recovery of articles after payment, overpayments, erroneous or improper indemnity claim payments, or indemnity refunds.

(a) *Disposition of article.* When a lost, registered, insured, or c.o.d. article is recovered, the payee may accept the article and reimburse the Postal Service for the full amount paid if the article is undamaged, or such amount as may be determined equitable by the Postal Service if the article is damaged or has depreciated in value or if the contents are not intact.

(b) *Handling reimbursement.* If reimbursement is tendered representing an overpayment, erroneous or improper payment, or a voluntary indemnity refund, accept it and issue a receipt. Send all reimbursements to the St. Louis Postal Data Center with the applicable certifying office claim number and date of certification. Personal checks, money orders, or other negotiable instruments should be made payable to the Postal Service. If the instrument is made payable to the postmaster, he should sign his name and restrictively endorse it *Pay to Postal Service* and remit as above. Do not mark an entry in the cashbook.

(c) *Control over recovery claims.* When an overpayment, erroneous, or improper indemnity claim payment is disclosed and repayment is not tendered, report it to the Director, St. Louis Postal Data Center, by memorandum, to be placed under accounts receivable control.

ROGER P. CRAIG,
Deputy General Counsel.

CHAPTER III—POSTAL RATE COMMISSION

[Order 36]

PART 3001—RULES OF PRACTICE AND PROCEDURE

Form and Number of Copies of Documents

JULY 12, 1973.

The Commission's rules of practice currently require persons filing documents to provide an original and 14 fully conformed copies to the Secretary (PRC rules of practice 10(c)). Our experience demonstrates that the filing of fourteen copies has proved to be insufficient to meet the needs of the Commission and its staff. Indeed, in the first postal rate proceeding and the pending mail case, the Chief Administrative Law Judge presiding at those proceedings found it necessary to order a greater number of copies to be filed (Postal Rate and Fee Increases, Tr. 4/508; Mail Classification Schedule, Tr. 1/135–36). The Commission Staff's need for 25 copies derives from two factors: (1) The size and complexity of rate increase and mail classification proposals submitted by the Postal Service and (2) each case is essentially a prototype regulatory proceeding. Accordingly, section 10 of the rules of practice is hereby amended to require the filing of 25 copies[1] as follows:

§ 3001.10 Form and number of copies of documents.

* * * * * *

(c) *Number of copies.* Except for correspondence or as otherwise required by the Commission, the Secretary, or the presiding officer in any proceeding, all persons shall file with the Secretary, an original and 24 fully conformed copies of each document required or permitted to be filed under this part. The copies need not be signed but shall show the full name of the person signing the original document and the certificate of service attached thereto.

By the Commission.

[SEAL] JOSEPH A. FISHER,
Secretary.

[FR Doc.73–14527 Filed 7–16–73;8:45 am]

[1] In appropriate cases, the requirement for filing 25 copies could be modified, pursuant to Rule 22.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER E—PESTICIDE PROGRAMS

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Subpart D—Exemptions From Tolerances

VIABLE SPORES OF MICROORGANISM *Bacillus Thuringiensis* BERLINER; SPECIFICATION

A notice was published by the Environmental Protection Agency in the FEDERAL REGISTER of April 30, 1973 (38 FR 10643), proposing that bacteriological and toxicological specifications set forth in § 180.1011 be amended to include a toxicity test to determine the presence of β-exotoxin to insure that *B. thuringiensis* products are free of this toxin.

One comment was received from Abbott Laboratories in favor of the proposal, noting that prior to the 1970's, U.S. manufacturers of *Bacillus thuringiensis* products used strains that did produce β-exotoxin and that such products did contain β-exotoxin. No requests for referrals to an advisory committee were received.

It is concluded that the proposal should be adopted.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(e), 68 Stat. 514; 21 U.S.C. 346a(e)), the authority transferred to the Administrator of the Environmental Protection Agency (35 FR 15623), and the authority delegated by the Administrator to the Deputy Assistant Administrator for Pesticide Programs (36 FR 9038), § 180.1011(a) is amended by adding a new subparagraph (4), as follows:

§ 180.1011 Viable spores of the microorganism *Bacillus thuringiensis* Berliner; exemption from the requirement of a tolerance.

(a) * * *

(4) Spore preparations shall be free of the *Bacillus thuringiensis* β-exotoxin when tested with the fly larvae toxicity test ("Microbial Control of Insects and Mites," R.P.M. Bond et al., p. 280 ff., 1971). This specification can be satisfied either by determining that each master seed lot brought into production is a *Bacillus thuringiensis* strain which does not produce β-exotoxin under standard manufacturing conditions or by periodically determining that β-exotoxin synthesized during spore production is eliminated by the subsequent spore-harvesting procedure.

* * * * * *

Any person who will be adversely affected by the foregoing order may at any time on or before August 16, 1973, file with the Hearing Clerk, Environmental Protection Agency, Room 3902A, 4th & M Streets, SW., Waterside Mall, Washington, D.C. 20460, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

Effective date. This order shall become effective on July 17, 1973.

(Sec. 408(e), 68 Stat. 514; 21 U.S.C. 346(e))

Dated: July 11, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[No. MC-C-258 (Sub-No. 3)]

PART 1048—COMMERCIAL ZONES

Kansas City, Mo.-Kansas City, Kans., Commercial Zone

Order. At a session of the Interstate Commerce Commission, Review Board Number 2, held at its office in Washington, D.C., on the 1st day of June 1973.

It appearing, that on August 28, 1970, Review Board Number 3 entered its report and order, 112 M.C.C. 103, in this proceeding specifically defining the zone adjacent to and commercially a part of Kansas City, Mo.-Kansas City, Kans.;

It further appearing, that by joint petition filed March 5, 1973, the Blue Springs Chamber of Commerce and Blue Springs Industry, Inc., seek redefinition and extension in certain respects of the Kansas City, Mo.-Kansas City, Kans., commercial zone limits;

And it further appearing, that investigation of the matters and things involved in said petition having been made, and said board having made and filed a report herein containing its findings of fact and conclusions thereon, which report is hereby made a part hereof;

It is ordered, That § 1048.8 as prescribed in this proceeding on August 28, 1970 (49 CFR 1048.8), be, and it is hereby, vacated and set aside, and the revision set forth in the findings in the attached report is hereby substituted in lieu thereof. (49 Stat. 543, as amended 544, as amended, 546, as amended, 49 U.S.C. 302, 303, and 304.)

It is further ordered, That this order shall become effective on August 1, 1973, and shall continue in effect until further order of the Commission.

And it is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the office of the secretary of the Commission by filing a copy thereof with the Director, Office of the Federal Register.

By the Commission, Review Board Number 2.

[SEAL] JOSEPH M. HARRINGTON,
Acting Secretary.

Title 6—Economic Stabilization

CHAPTER I—COST OF LIVING COUNCIL

PART 140—COST OF LIVING COUNCIL FREEZE REGULATIONS

Special Freeze Group Questions and Answers No. 18

These "Questions and Answers", which are issued by the Cost of Living Council's Freeze Group, are designed to provide immediate guidance in understanding and applying the new freeze regulations (Part 140 of Title 6 of the Code of Federal Regulations). To achieve the broadest publication, these are hereby added to Appendix A of Part 140. Since they provide guidance of general applicability and are subject to clarification, revision or revocation, they do not constitute legal rulings with respect to specific fact situations.

(Economic Stabilization Act of 1970, as amended, Pub. L. 92-210, 85 Stat. 743; Pub. L. 93-28, 87 Stat. 27; E.O. 11723, 38 FR 15765; Cost of Living Council Order No. 30, 38 FR 16267)

Issued in Washington, D.C., on July 14, 1973.

JAMES W. MCLANE,
Director,
Special Freeze Group.

Appendix A of Part 140 is amended by adding the following:

SPECIAL FREEZE GROUP QUESTIONS AND ANSWERS No. 18

1. Q. Are court costs covered by the freeze?

A. Yes. Court costs are considered fees or charges which state or local governments charge for services provided by them and may not be increased during the freeze. See Q & A No. 8, question 5.

2. Q. During the freeze may a dentist pass on the increased cost of gold used in fillings?

A. No. Under no circumstances may a dentist pass on increased costs of gold during the freeze period. Gold is subject to the freeze price rules. Therefore, the price of domestic gold may not increase. Furthermore, a dentist who purchases imported gold is considered to physically transform the gold when he uses it to make fillings. Consequently, any increases in the cost of imported gold may not be passed on.

3. Q. A law firm rents a suite of offices and five parking spaces in a commercial building. The landlord intends to increase the amount he charges for the use of the parking spaces. Is an increase in the amount charged for the use of a parking space subject to the freeze?

A. Generally the rental of a parking space is a sale of a service and is subject to the freeze. Thus, in instances where the rent of the parking space is determined separately from the rent for the commercial or residential property, the amount charged for the parking space is subject to the freeze. The separate determination may be made either by a distinct agreement or by a separate computation which is part of the lease for the commercial or residential property. However, when the parking space is rented as part of a residence or in conjunction with the rental of commercial space, it is exempt from the freeze as the rental of real property if the rent for the parking space is not determined separately from that for the commercial or residential space.

4. Q. An oil company owns gas stations and leases them to retail dealers. The historical practice has been to charge the dealers sent on the basis of the numbers of gallons of gasoline pumped by the dealer (e.g., 1.5¢ per gallon times number of gallons pumped equals the rent). May the oil companies raise the rent of the station to 2¢ per gallon?

A. Yes. Rentals of real property are not subject to the freeze.

5. Q. Company A acquires Company B and Company B becomes a division of Company A. The two companies had different prices for their products. What prices may be charged after the acquisition?

A. The price ceilings in force at the time of acquisition do not change. The ceilings that were applicable to the products of Company B continue to apply to sales made from that division of the merged Company.

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 917]

FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

Notice of Proposed Rule Making; Correction

In the notice of proposed rulemaking relative to the continuance of Pear Regulation 3 (§ 917.432; 38 FR 17182) the final date for the submission of data, views, or arguments pertaining to such action was omitted. Therefore, the following is added to said notice which appeared in the July 11, 1973 FEDERAL REGISTER (38 FR 18469):

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed amendment shall file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than July 23, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: July 12, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[7 CFR Part 926]

TOKAY GRAPES GROWN IN SAN JOAQUIN COUNTY, CALIF.

Notice of Proposed Rule Making Regarding Approval of Expenses and Fixing of Rate of Assessment for 1973-74 Fiscal Period

Consideration is being given to the following proposals submitted by the Industry Committee, established under the marketing agreement, as amended, and Order No. 926, as amended (7 CFR Part 926), regulating the handling of Tokay grapes grown in San Joaquin County, California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), as the agency to administer the terms and provisions thereof:

(a) That expenses which are reasonable and likely to be incurred by the Industry Committee, during the period April 1, 1973, through March 31, 1974, will amount to $55,215.

(b) That there be fixed, at five and one-half cents ($0.055) per standard package or equivalent quantity of Tokay grapes, the rate of assessment payable by each handler in accordance with § 926.46 of the aforesaid marketing agreement and order.

(c) Terms used in the marketing agreement and this part shall, when used herein have the same meaning as is given to the respective term in said marketing agreement and this part.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than July 27, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated July 12, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-14578 Filed 7-16-73;8:45 am]

[7 CFR Part 930]

CHERRIES GROWN IN CERTAIN STATES

Notice of Proposed Rulemaking Regarding Approval of Expenses and Fixing of Rate of Assessment for 1973-74 Fiscal Period and Carryover of Unexpended Funds

This notice invites written comments relative to proposed expenses of $107,200 for administration of the marketing order activities for the 1973-74 fiscal period. It also proposes a $1.00 per ton assessment rate to be paid by each handler as his pro rata share in support of the marketing program. Both amounts were recommended unanimously by the Cherry Administrative Board.

Consideration is being given to the following proposals submitted by the Cherry Administrative Board, establish under Order No. 930 (7 CFR Part 930), regulating the handling of cherries grown in Michigan, New York, Wisconsin, Pennsylvania, Ohio, Virginia, West Virginia, and Maryland, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), as the agency to administer the terms and provisions thereof.

(1) That expenses that are reasonable and likely to be incurred by the Cherry Administrative Board, during the 1973-74 fiscal period, May 1, 1973 through April 30, 1974, will amount to $107,200.

(2) The rate of assessment for such period, payable by each first handler in accordance with § 930.41 to be fixed at $1.00 per ton of cherries.

(3) Unexpended assessment funds in excess of expenses incurred during the fiscal period ended April 30, 1973, shall be carried over as a reserve in accordance with § 930.42(a) of said marketing order.

Terms used in the order shall, when used herein, have the same meaning as is given to the respective term in said order and "ton of cherries" shall mean 2,000 pounds of raw cherries.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than July 29, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: July 12, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[7 CFR Part 948]

IRISH POTATOES GROWN IN COLORADO IN AREA NO. 2

Proposed Expenses and Rate of Assessment

Consideration is being given to the approval of the expenses and rate of assessment, hereinafter set forth, which were recommended by the Area Committee for Area No. 2 established pursuant to Marketing Agreement No. 97 and Order No. 948, both as amended (7 CFR Part 948).

This marketing order program regulates the handling of Irish potatoes grown in the State of Colorado and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

All persons who desire to submit written data, views, or arguments in connection with these proposals may file the same, in quadruplicate, with the Hearing Clerk, Room 112-A, United States Department of Agriculture, Washington, D.C. 20250, before August 6, 1973. All

V 38 1 136 JUL 17 73 XUM

written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposals are as follows:

§ 948.269 Expenses and rate of assessment.

The proposals are as follows:

(a) The reasonable expenses that are likely to be incurred by the Area Committee for Area No. 2 to enable such committee to perform its functions, pursuant to the provisions of Marketing Agreement No. 97, as amended, and this part, during the fiscal period ending June 30, 1974, will amount to $14,780.

(b) The rate of assessment to be paid by each handler pursuant to Marketing Agreement No. 97, as amended, and this part, shall be $0.0025 per hundredweight of potatoes grown in Area No. 2 handled by him as the first handler thereof during said fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period ending June 30, 1974, may be carried over as a reserve.

(d) Terms used in this section shall have the same meaning as when used in Marketing Agreement No. 97, as amended, and this part.

Dated: July 12, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Airworthiness Docket No. 73-SW-28]

BELL MODEL 47 SERIES HELICOPTERS

Proposed Airworthiness Directives

The Federal Aviation Administration is considering amending Part 39 of the Federal Aviation Regulations by adding an airworthiness directive applicable to Bell Model 47 Series helicopters equipped with main rotor blade grips, P/N 47-120-135 or 47-120-252. There has been a fatigue failure of a grip where crack initiation was attributed to a sharp notch in the inboard thread relief groove and also a fatigue crack reported in the inboard threaded portion of the grip where crack initiation was attributed to a sharp notch in the thread root on Bell Model 47 Series helicopters. In addition, there has been a fatigue failure of a grip where a crack initiated from multiple sites along the root of a thread. Failure of the grip could result in loss of a main rotor blade. Since this condition is likely to exist or develop in other helicopters of the same type design that are equipped with main rotor grips, P/N 47-120-135 or 47-120-252, the proposed airworthiness directive would require a one-time inspection for sharp notches in the thread root and the thread relief groove on Bell Model 47 Series helicopters.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or comments as they may desire. Communications should identify the docket number and be submitted in triplicate to the Regional Counsel, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. All communications received on or before August 15, 1973 will be considered by the Director before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the office of Regional Counsel for examination by interested persons.

This amendment is proposed under the authority of sections 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, 1423) and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 of the Federal Aviation Regulations by adding the following new airworthiness directive:

BELL. Applies to Model 47 series helicopters certificated in all categories that are equipped with main rotor blade grips, P/N 47-120-135-1, -2, -3 or P/N 47-120-252-1, -3.

Compliance required within the next 100 hours' time in service after the effective date of this A.D., unless already accomplished.

To prevent possible fatigue cracks from developing, accomplish the following for each main rotor blade grip:

(a) Inspect the grip thread relief fillet. The inboard radius and bottom of the fillet must have a smooth finish and be free of nicks or sharp tool marks (Ref. Figure 1-22 of Bell 47D-1 47G and 47G-2 Maintenance and Overhaul Instructions).

(b) Inspect the root radius of the 4½ inch diameter threads for sharp notches. The root radius must be smooth and free of sharp notches or grooves.

(c) In the grip thread relief fillet is not as specified in subparagraph (a) or has nicks or sharp tool marks, or if the thread root radius has a sharp notch or groove, replace the affected grip prior to next flight, except the helicopter may be flown in accordance with FAR 21.197 to a base where the grip may be replaced.

Issued in Fort Worth, Tex., on June 8, 1973.

HENRY L. NEWMAN,
Director, Southwest Region.

[FR Doc.73-14503 Filed 7-16-73;8:45 am]

[14 CFR Parts 121, 123, 127, 135]

[Docket Nos. 10012, 10033; Reference Notice 70-14]

SMOKING ON AIRCRAFT OPERATED BY AIR CARRIERS, AIR TRAVEL CLUBS, AND COMMERCIAL OPERATORS

Withdrawal of Advance Notice of Proposed Rule Making

The purpose of this notice is to withdraw Notice 70-14, published in the FEDERAL REGISTER March 25, 1970 (35 FR 5045), in which the Federal Aviation Administrator solicited comments on the need to further regulate the smoking of cigarettes, cigars, and pipes by persons in the passenger compartments of aircraft operated by air carriers, air travel clubs, and commercial operators. This action would involve amending Parts 121, 123, 127, and 135 of the Federal Aviation Regulations.

Notice 70-14 was issued in response to a petition filed on December 12, 1969, requesting the FAA to adopt a rule that would ban the smoking of cigarettes, cigars, and pipes on all passenger carrying flights, and to another petition filed on December 17, 1969, requesting the adoption of a rule requiring all domestic air carriers to effectively segregate smoking passengers from nonsmoking passengers. With respect to the assertion made by the petitioners, that tobacco smoke is deleterious to the health of passengers, the notice stated that the FAA considered that the matter warranted an in-depth exploration of the health hazard question as related to nonsmoking passengers. All other assertions of the petitioners were disposed of in Notice 70-14. The FAA issued Notice 70-14 to obtain wider public participation before undertaking formal rule making, to gather other relevant arguments, data, and evidence, and to give other interested persons an opportunity to put forward alternatives to the courses of action urged by the petitioners.

During its examination of the material docketed in connection with Notice 70-14 and other material bearing on the issue involved, the FAA found no persuasive evidence that exposure to tobacco smoke, in concentrations likely to occur in transport aircraft (assuming normal ventilation rates), is injurious to the health of nonsmokers. The material examined included: the medical evidence submitted by the petitioners; the comments and medical evidence submitted in response to Notice 70-14; the joint study conducted by the FAA and the Department of Health, Education, and Welfare (referred to in Notice 70-14) to measure the amount of tobacco-smoke contaminants in typical transport aircraft; the Surgeon-General's 1972 report titled "The Health Consequences of Smoking"; and other pertinent material in medical literature.

The FAA received approximately 3,600 comments in response to the notice. A large number of comments were not directly responsive to the notice, but merely expressed views for or against smoking on passenger carrying aircraft, without presenting reasons for those views. Others simply agreed with, repeated or, in some cases, rejected the reasons submitted by the petitioners for banning smoking. A number of commentators described their own physical reactions when exposed to tobacco smoke on aircraft, that ranged from no adverse reaction to simple annoyance, through various degrees of physical discomfort, to acute illness, sometimes lasting several days.

Approximately 150 comments were received from physicians, dentists, medical associations, health organizations and the like. Almost all of these recommended that the FAA restrict smoking in aircraft, generally basing their recommendations on the view that since smoking has been clearly shown to be injurious to the health of smokers, exposure to tobacco smoke is probably injurious to the health of nonsmokers. However, a number of those commentators conceded that as yet there is no conclusive medical evidence to support their contention.

The medical evidence submitted by petitioners and by commentators on the notice rests primarily on experiments conducted in either unventilated or poorly ventilated enclosures, or on survey studies which did not identify the tobacco smoke concentrations that were involved. The FAA sees no positive correlation between the environmental conditions that apparently prevailed during these experiments and those that actually prevail on modern transport aircraft in which the air in the passenger compartment is replaced approximately every three minutes during flight. Furthermore, the ventilation systems of today's transport aircraft are unique in that fresh air enters the passenger cabin through numerous openings in the ceiling and is vented out directly through the walls and floors of the cabin. Unlike the ordinary ventilation system that creates a flow of air throughout the entire room, air entering the passenger cabin through a ceiling opening takes the most direct route to the floor and walls.

A number of commentators suggested that in view of the lack of medical evidence as to the effects of smoking on nonsmokers in a well ventilated environment similar to today's modern transport aircraft, a decision on whether to further regulate passenger smoking should await the outcome of the joint FAA/HEW study mentioned in the notice. That study was conducted during 1970 and 1971, and a report entitled "Health Aspects of Smoking in Transport Aircraft," was issued in December 1971. Cabin air measurements were made during 20 long-range flights in B-707, DC-8, and B-747 aircraft, and during 8 short-range flights in B-727, B-737, DC-9, and BAC-111 aircraft. Seat occupancy was 100 percent on the long-range flights and averaged 60 percent on the short-range flights. About 50 percent of the passengers smoked during the long-range flights; 32 percent during the short-range flights. Four air-sampling locations (distributed along the length of the cabin) were used on the long-range flights; three on the short-range flights.

The results of that environmental sampling revealed very low levels of each contaminant measured, much lower than those recommended in occupational and environmental air quality standards (Threshold Limit Values of Airborne Contaminants, adopted by the American Conference of Governmental Industrial Hygienists, 1971; Ambient Air Quality Standards of the Environmental Protection Agency, March, 1970; and the standard for ammonia adopted in Ontario, Canada—no standard for ammonia existing in the United States). The report observed that these low concentrations of tobacco smoke contaminants "result from the rapid exchange of air aboard the aircraft (the equivalent of one complete air change each 3-4 minutes) and the relative pollution-free air entering the aircraft at cruising altitudes of the test flights." On the basis of the low levels of contaminants measured, the report concluded that "inhalation of the by-products from tobacco smoke generated as a result of passenger smoking aboard commercial aircraft does not represent a significant health hazard to nonsmoking passengers".

A significant number of persons among the commentators to the notice and the passengers abroad the test flights of the FAA/HEW study complained of adverse physical reactions (beyond mere annoyance) from exposure to tobacco. However, the problem created by smoking on passenger-carrying aircraft for persons suffering from allergies or from diseases which may be aggravated by the possible irritating effect of tobacco smoke is no greater than that which they must face in places open to the public such as restaurants and stores.

A number of commentators referred to the Surgeon General's 1972 report entitled "The Health Consequences of Smoking." However, that report did not contain evidence of any hazard to the health of nonsmokers from tobacco smoke generated in a well-ventilated environment. In fact, the Surgeon General stated publicly that he could not say with certainty that exposure to tobacco smoke is causing serious illness in nonsmokers since the long term research necessary for such a finding has not yet been done.

By reason of the foregoing, the FAA has determined the further rule-making action with respect to the smoking of cigarettes, cigars, and pipes by persons in passenger compartments of aircraft operated by air carriers, air travel clubs, and commercial operators would not be appropriate at this time, and that Notice 70-14 should be withdrawn. The withdrawal of this notice, however, does not preclude the FAA from issuing similar notices in the future or commit the FAA to any course of action.

It should be noted that the Civil Aeronautics Board has recently amended its regulation (14 CFR Part 252; 38 FR 12207), to require domestic airlines to provide designated "no-smoking" areas aboard their aircraft. The Board justified its action on the grounds that exposure to tobacco smoke in airline aircraft annoys and discomforts nonsmoking passengers to an unacceptable degree.

In consideration of the foregoing, the advance notice of proposed rulemaking published in the FEDERAL REGISTER on March 25, 1970 (35 FR 5045) and circulated as Notice 70-14, entitled "Smoking on Aircraft Operated by Air Carriers, Air Travel Clubs, and Commercial Operators," is hereby withdrawn.

(Sec. 313(a), 601, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421; sec. 6(c), Department of Transportation Act; 49 U.S.C. 1655(c))

Issued in Washington, D.C., on July 9, 1973.

JAMES F. RUDOLPH,
Director, Flight Standards Service.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 69-7, Notice 28; Docket No. 2-6, Notice 7]

OCCUPANT CRASH PROTECTION

Postponement of Effective Date

This notice proposes the postponement of the effective date of the requirements of Standards Nos. 208, Occupant Crash Protection, and 216, Roof Crush Resistance, applicable to the upcoming model year, from August 15, 1973, to September 1, 1973, in response to a petition by Chrysler Corporation.

Standard No. 208, 49 CFR 571.208, Occupant Crash Protection, contains requirements for vehicle occupant restraint systems in several time phases. These requirements were last amended on June 20, 1973, 38 FR 16072 (Docket No. 69-7, Notice 27). The next phase of requirements, which includes an option requiring starter interlocks, is to begin on August 15, 1973, as the rule presently stands. Standard No. 216, Roof Crush Resistance, is also presently scheduled to go into effect on that date.

Chrysler Corporation has petitioned for a 17-day postponement of the August 15 effective date with respect to both standards, to September 1, 1973. Chrysler states that factors beyond its control have threatened to delay the build-out of their 1973 models beyond the August 15 date. These factors are said to include "slow delivery and shortages of parts from suppliers, unscheduled plant shutdowns due to excessively warm weather and unauthorized labor disputes, short supplies of gasoline for plants due to the energy shortage and new Canadian import restrictions, supplier labor disputes, and several other equally uncontrollable factors." Chrysler said that inability to complete the 1973 model run before the changeover date required by the standard would result in "economic loss to Chrysler workers, suppliers, and to Chrysler Corporation and its stockholders". Chrysler also notes that several other new standards or amendments go into effect on September 1, 1973 (No. 124, Accelerator Control Systems. No. 217, Bus Window Retention and Release, No. 101, Control Location, etc., and No. 215, Exterior Protection).

The NHTSA recognizes that the August 15 date was chosen as approximately the end of the normal changeover period for much of the industry, and did not originally intend to restrict these changeover practices. Except for allowing a slightly delayed build-out of the current year's production, this agency is unaware

V 38 136 JUL 17 73 XUM

of any substantial effect of the requested delay in the effective dates in question.

In light of the foregoing, it is proposed that Standard No. 208, Occupant Crash Protection, 49 CFR 571.208, be amended by changing the date of August 14, 1973, appearing in S4.1.1 to August 31, 1973, and by changing the date of August 15, 1973, appearing in S4.1.2 to September 1, 1973. It is further proposed that the effective date of Standard No. 216, 49 CFR 571.216, be changed from August 15, 1973, to September 1, 1973.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered by the Administration. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The Administration will continue to file relevant material, as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

Comment closing date: August 5, 1973.

Proposed effective date: Date of publication of the amendment.

(Secs. 103, 119, Pub. L. 89-563, 80 Stat. 718, 15 U.S.C. 1392, 1407; delegation of authority at 38 FR 12147).

Issued on July 13, 1973.

JAMES E. WILSON,
Associate Administrator,
Traffic Safety Programs.

[FR Doc.73-14725 Filed 7-16-73;9:55 am]

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 87]

CONTROL OF AIR POLLUTION FROM AIRCRAFT AND AIRCRAFT ENGINES

Proposed Emission Standards for In-Use Aircraft After January 1, 1983

Section 231 of the Clean Air Act, as amended by Public Law 91-604, directs the Administrator of the Environmental Protection Agency to "establish standards applicable to emissions of any air pollutant from any class or classes of aircraft or aircraft engines which in his judgment cause or contribute to or are likely to cause or contribute to air pollution which endangers the public health or welfare." Regulations ensuring compliance with these standards are required to be issued by the Secretary of Transportation in accordance with section 232 of the Act.

Section 231 also directs the Administrator to conduct a study of the extent to which aircraft emissions affect air quality in air quality control regions throughout the United States, and the technological feasibility of controlling such emissions. The report of such a study, "Aircraft Emissions: Impact on Air Quality and Feasibility of Control," was published on December 12, 1972, and copies are available upon request free of charge from the Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460.

Final standards, which are being published in the FEDERAL REGISTER concurrently with this notice of proposed rule making, have specified limits on emissions from a variety of new and in-use aircraft engines. These standards were derived following extensive analysis of the comments submitted in response to the December 12, 1972 proposal. One change from the proposal was to adjust the emissions limits required for newly manufactured engines in 1979 upwards to levels which match the goals of research projects presently planned and in progress within the National Aeronautics and Space Administration and the United States Air Force. It can be concluded that these levels, though somewhat less stringent than those first proposed by EPA, have the advantage of being achievable by design approaches which do not significantly increase the space requirements of the combustor sections of existing engines. In fact some of this research is being carried on through contracts with two of the major manufacturers of aircraft gas turbine engines, and the contractural requirements include demonstration testing in full scale test rigs based on current engine types produced by these manufacturers.

Therefore, it appears entirely feasible to apply this developing pool of technology to retrofit of existing aircraft gas turbine engines, following the introduction of the revised standards applicable to newly manufactured engines in 1979.

The technology necessary to meet these standards is still in an early development stage. EPA intends to monitor closely the development of this technology through the NASA, Air Force, and other related programs and to reassess by January 1, 1976 the standards finally promulgated. This reassessment may result in additional rulemaking action to ensure that the best technology then available can be reflected in the standards.

Through the proposed retrofit program, the nation will benefit from the reductions in emissions from large commercial aircraft on the earliest schedule that is both technically and economically practicable. This will contribute to the maintenance of acceptable ambient air quality levels in and around major air terminals along with the other measures being promulgated concurrently with this proposal.

Though the exact costs of this program cannot be estimated accurately, since the technology is still undergoing development, it is expected to fall between 1 and 5 percent of the cost of complete new engines. (The cost of the engine makes up only a small fraction of the total cost of an airline ticket). The standards contained in this notice are being proposed after consultation with the Secretary of Transportation in order to assure appropriate consideration of aircraft safety. However, the Department of Transportation has advised that it is impossible to make conclusive judgments as to the effects of an emission standard on aircraft safety until engines designed to meet that standard have been developed, constructed, and tested. Therefore, there will be continuing consultation on this issue between this Agency and that Department, both prior to and after promulgation of the standards. Should the Secretary of Transportation determine at any point that an emission standard cannot be met within the specified time without creating a safety hazard, appropriate modifications will be made to that standard or its effective date.

40 CFR Part 87 as modified by this amendment would be applicable to in-use aircraft gas turbine engines of Class T2 and of rated power of 29,000 pounds of thrust or greater beginning January 1, 1983.

Interested persons may submit written data, views, or arguments (in quadruplicate) in regard to the proposed regulations to the Administrator, Environmental Protection Agency, Attention: Mobile Source Air Pollution Control Program, Office of Air and Water Programs, Washington, D.C. 20460. All relevant material received on or before Sept. 17, 1973, will be considered.

Comments submitted shall be available for public inspection during normal business hours at the Office of Public Affairs, Environmental Protection Agency, Fourth and M Streets, SW., Washington, D.C. 20460.

This notice of proposed rule making is issued under the authority of Section 231 of the Clean Air Act, as amended (42 U.S.C. 1857f-9).

Date: July 6, 1973.

ROBERT W. FRI,
Acting Administrator.

Subpart D of Part 87 of Title 40 of the Code of Federal Regulations is proposed to be amended as follows:

Subpart D—Exhaust Emissions (In-Use Aircraft Gas Turbine Engines)

§ 87.31 Standards for exhaust emissions.

* * * * *

(d) Exhaust emissions from each in-use aircraft gas turbine engine of Class T2 and of rated power of 29,000 pounds of thrust or greater, beginning January 1, 1983, shall not exceed:

(1) Hydrocarbons—0.8 pound/1,000 pound-thrust-hours/cycle

(2) Carbon monoxide—4.3 pounds/1,000 pound-thrust-hours/cycle

(3) Oxides of nitrogen—3 pounds/1,000 pound-thrust-hours/cycle

(4) Smoke—Smoke number from Figure 1.

(e) The standards set forth in paragraphs (a), (b), (c), and (d) of this section refer to a composite gaseous emission sample representing the operating cycle set forth in the applicable sections of Subpart G of this part and exhaust smoke emissions emitted during operations of the engine as specified in the applicable sections of Subpart H of this part, and measured and calculated in accordance with the procedures set forth in those subparts.

[FR Doc.73-14492 Filed 7-16-73;8:45 am]

FEDERAL HOME LOAN BANK BOARD

[12 CFR Part 545]

[No. 93-921]

FEDERAL SAVINGS AND LOAN SYSTEM

Real Estate Loan Percentage-of-Assets Limitations

JULY 3, 1973.

The Federal Home Loan Bank Board considers it advisable to amend §§ 545.6-6 and 545.6-7 of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.6-6, 545.6-7) for the purposes described herein. By a companion document (Document No. 73-922; July 3, 1973) the Board proposes collateral amendments to §§ 561.22 and 563.9 of the rules and regulations for Insurance of Accounts (12 CFR 561.22, 563.9).

Section 5(c) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(c)) provides that Federal associations "shall lend their funds only * * * on the security of first liens on real property within 100 miles of their home office or within the State in which such home office is located * * * ." Pursuant to that language, the Board in § 545.6-6 has confined the "regular lending area" of a Federal association to the area within a radius of 100 miles from such an association's home office both within and without the State in which such home office is located and an additional area within a radius of 100 miles from each branch or agency of such an association to the extent that such additional area is also within the State in which the association's home office is located. (There is a further provision for additional lending area for Federal associations which have converted from State-chartered institutions). In so prescribing the regular lending area of Federal associations, the Board has not granted the full lending area available in section 5(c). This restriction on regular lending area is a basis for certain real estate loan percentage-of-assets restrictions in § 545.6-7.

Under paragraph (a) of § 545.6-7 a loan on the security of a single-family dwelling, a home or combination of home and business property is not subject to a percentage-of-assets limitation if such a loan, among other things, is made on the security of any such property located within the Federal association's "regular lending area". A loan on the security of such properties located beyond the association's regular lending area is subject to the "general" 20-percent-of-assets category of § 545.6-7(c)(1). As a result, a loan on the security of a single-family dwelling or on the security of a home or combination of home and business property which is located beyond the association's regular lending area but within the State in which the association's home office is located must be included within the general 20-percent-of-assets category. The Board proposes to increase "regular lending area" to include the entire State and the 100-mile radius from the home office whether within or without the State, and thereby remove loans on the security of such properties so located from the general 20-percent-of-assets category.

Under paragraph (c)(1)(i) of § 545.6-7 any loan on the security of other dwelling units (defined in § 541.10-3; generally multi-family apartment loans) falls within the general 20-percent-of-assets category without regard to the location of the security property. However, loans made on other dwelling units located within regular lending area also may be placed in the "special" 20-percent-of-assets category of § 545.6-7(c)(2) assuming that the other requirements of that category are met also. Again, a loan made on an apartment building located beyond regular lending area but within the State presently must be included within the general category and may not be included in the special category. If regular lending area included the entire State and the 100-mile radius from the home office whether within or without the State, then such an apartment loan could be included within the special category. The same result would apply to the type of security property described as "a combination of dwelling units, including homes, and business property involving only minor or incidental business use" (defined in § 541.11-1).

This same result would apply to certain participation loans. A participation interest in a loan on the security of a single-family dwelling, a home, or combination of home and business property located beyond regular lending area but within the State must be placed in either the general category or the "participation" 20-percent-of-assets category in § 545.6-7(c)(3). If regular lending area included the entire State and the 100-mile radius from the home office whether within or without the State, such participation loans could be made without percentage-of-assets limitations.

Section 545.6-7 provides an exception from the regular lending area requirement for insured loans secured by a single-family dwelling, a home, or combination of home and business property located more than 100 miles from an office of the Federal association but within the State in which the association's home office is located. These exceptions appear in § 545.6-7(a)(1)(i), (c)(1)(ii)(b), (c)(1)(iii)(b) and (c)(2)(i). If the Board adopts the proposed amendment increasing regular lending area, these insured loan exceptions would be unnecessary and would be deleted.

Section 545.6-7(c)(2)(iii) provides that otherwise qualifying loans secured by other dwelling units or a combination of dwelling units, including homes, and business property involving only minor or incidental business use may not be placed in the special category if, at the time the loan is allocated to that category, the Federal association's net worth is less than 5 percent of the average of the association's savings account balances as of the close of the three preceding calendar years. The Board proposes to amend § 545.6-7(c)(2)(iii) to provide that such loans may be placed in the special 20-percent-of-assets category if, at the time the loan is allocated to that category, the lending Federal association meets the net worth requirement set forth in Insurance Regulation 563.13.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend said §§ 545.6-6 and 545.6-7(c)(2)(iii) to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue, NW., Washington, D.C. 20552, by August 15, 1973, as to whether these proposals should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the general regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

§ 545.6-6 Lending area.

The regular lending area of a Federal association consists of the area: (a) Within the State in which such association's home office is located; (b) within any portion of a circle with a radius of 100 miles from such association's home office which is outside of the State in which such association's home office is located; and (c) in the case of a Federal association which is converted from a State-chartered institution, beyond the areas specified in paragraphs (a) and (b) of this section but within which area such association made loans while operating under State charter. Each converted association that desires to continue to make loans beyond the areas specified in paragraphs (a) and (b) of this section but in the areas in which it made loans while operating under State charter shall file with the Board a map showing the areas within which such association made loans while operating under State charter. For the purpose of this section, the term "State" shall include the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States; and a county, parish, or similar political subdivision of a State is the unit of "area" in which a converted association made loans beyond the areas specified in paragraphs (a) and (b) of this section while operating under State charter.

V 38 136 JUL 17 73 XUM

§ 545.6–7 Percentage limitations on real estate loan investments.

• • • • •

(c) *Percentage limitations for other loans.* Except as specified in paragraphs (a) and (b) of this section, no Federal association may make any investment in a real estate loan unless the amount of such investment can be allocated within one or more of the 3 percentage-limitation categories specified in this paragraph. In the case of a loan investment which is specified as allocable to more than one of the 3 categories, all or part of any allocation to any one of such categories may be reallocated at any time to another one of such categories, if applicable.

• • • • •

(2) *Special 20-percent-of-assets category.* The following investments, not to exceed at any one time an amount equal to 20 percent of the association's assets, are allocable to this category: any loan, or participation interest in a loan, on the security of other dwelling units or a combination of dwelling units, including homes, and business property involving only minor or incidental business use, if—

• • • • •

(iii) at the time of the allocation to this category, the association's net worth (as defined in § 561.13 of this chapter) meets the net worth requirement of § 563.13 of this chapter.

• • • • •

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1974, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

[12 CFR Parts 561, 563]

[No. 73–922]

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Normal Lending Territory

JULY 3, 1973.

The Federal Home Loan Bank Board considers it advisable to amend §§ 561.22 and 563.9 of the rules and regulations for Insurance of Accounts (12 CFR 561.22, 563.9) for the purposes described herein. By a companion document (Document No. 73–921; July 3, 1973) the Board proposes collateral amendments to §§ 545.6–6 and 545.6–7 of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.6–6, 545.6–7).

By said Document No. 73–921, the Board proposes to amend § 545.6–6 in order to expand "regular lending area" for Federal associations. The Board proposes to make a similar expa-nsion of "normal lending territory" for all insured institutions. Normal lending territory is defined by the Board in Insurance Regulation 561.22 and is the same area as regular lending area, except that the 100-mile radius from an insured institution's principal office, branch office or agency office is reduced to 50 miles if the insured institution has scheduled items (other than assets acquired in a merger instituted for supervisory reasons) in excess of 4 percent of its specified assets. Normal lending territory is used principally in § 563.9 (nationwide lending) and § 563.9–1 (participation loans). For example, an investment by an insured institution in a conventional whole loan secured by improved real estate located beyond normal lending territory but within the State in which the insured institution's principal office is located is a "nationwide loan" and is subject to the 15 percent-of-assets limitation of § 563.9 (e). The same is true under § 563.9–1(b) for the 40 percent-of-assets limitation on participation loan investments on the security of improved real estate located beyond normal lending territory but within the State.

The Board proposes to amend § 561.22 in order to expand normal lending territory to include the entire State in which an insured institution's principal office is located plus the territory within any portion of a circle with a radius of 100 miles which is outside of such State. The Board does not propose to change the provision for "grandfathered" normal lending territory or the reduction in normal lending territory caused by having a scheduled items ratio in excess of 4 percent.

Paragraph (b) of § 563.9 limits to 20 percent-of-assets the loans which an insured institution having a scheduled items ratio in excess of 4 percent may make on the security of real estate located between 50 and 100 miles from the principal, branch, agency or other approved office of the institution. In connection with expanding normal lending territory to include the entire State, the Board proposes to make a conforming change to § 563.9(b) to substitute the State-wide limitation for the 100-mile limitation.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend said §§ 561.22 and 563.9(b) to read as set forth below.

Interested persons are invited to submit written data, views, and arguments to the Office of the Secretary, Federal Home Loan Bank Board, 101 Indiana Avenue, NW., Washington, D.C. 20552, by August 15, 1973, as to whether these proposals should be adopted, rejected, or modified. Written material submitted will be available for public inspection at the above address unless confidential treatment is requested or the material would not be made available to the public or otherwise disclosed under § 505.6 of the general regulations of the Federal Home Loan Bank Board (12 CFR 505.6).

§ 561.22 Normal lending territory.

(a) *Scheduled items not in excess of 4 percent.* "Normal lending territory" for an insured institution which, at the close of its most recent semiannual period, had scheduled items (other than assets acquired in a merger instituted for supervisory reasons) not in excess of 4 percent of its specified assets means the territory: (1) Within the State in which such institution's principal office is located; (2) within any portion of a circle with a radius of 100 miles from such institution's principal office which is outside of the State in which such institution's principal office is located; and (3) beyond (1) and (2) of this paragraph (a) but within which territory the institution was operating on June 27, 1934.

(b) *Scheduled items in excess of 4 percent.* "Normal lending territory" for an insured institution which, at the close of its most recent semiannual period, had scheduled items (other than assets acquired in a merger instituted for supervisory reasons) in excess of 4 percent of its specified assets means the territory:

(1) Within the portion of the State in which the institution's principal office is located which is within a radius of 50 miles from such principal office or from each place of business which has been approved in writing by the institution's appropriate supervisory authority as a branch office, agency office, or similar place of business for such institution; (2) within any portion of a circle with a radius of 50 miles from such institution's principal office which is outside of the State in which such institution's principal office is located; and (3) beyond 50 miles from such institution's principal office but within which territory the institution was operating on June 27, 1934.

(c) *Definitions.* For the purpose of this section, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States; and a county, parish, or similar political subdivision of a State is the unit of "territory" in which the institution was operating on June 27, 1934.

§ 563.9 Nationwide lending.

• • • • •

(b) *Loans beyond normal lending territory when scheduled items exceed 4 percent.* Any insured institution may, to the extent that it has legal power to do so, make or purchase whole loans in an aggregate amount not exceeding 20 percent of its assets on the security of real estate located outside its normal lending territory but within the State in which its principal office is located.

• • • • •

(Secs. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p. 1071)

POLYPROPYLENE STRAPPING FROM JAPAN

Antidumping; Notice of Tentative Negative Determination

JULY 12, 1973.

Information was received on December 20, 1972, that polypropylene strapping from Japan was being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). This information was the subject of an "Antidumping Proceeding Notice" which was published in the FEDERAL REGISTER of January 19, 1973, on page 1945.

I hereby make a tentative determination that polypropylene strapping from Japan is not being, nor likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

Statement of reasons on which this tentative determination is based. Analysis of information from all sources revealed that the proper basis of comparison for fair value purposes is between purchase price and the adjusted home market price of such or similar merchandise.

Purchase price was calculated by deducting inland freight from the f.o.b. purchaser's warehouse price.

The adjusted home market price was based on the delivered customers' premises price, with a deduction for inland freight. Adjustments were made for differences in the merchandise and, where appropriate, for diffifferences in packing.

Using the above criteria, purchase price was found to be higher than the adjusted home market price of such or similar merchandise.

In accordance with §§ 153.33(a) and 153.37, Customs regulations (19 CFR 153.33(a), 153.37), interested parties may present written views or arguments, or request in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 2100 K Street, NW., Washington, D.C. 20229, in time to be received by his office not later than 10 calendar days from the date of publication of this notice in the FEDERAL REGISTER. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office on or before August 16, 1973.

This tentative determination and the statement of reasons therefor are published pursuant to § 153.33 of the Customs regulations (19 CFR 153.33).

[SEAL] EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

DEEPWATER PORTS

Availability of Draft Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, Public Law 91-190, the Department of the Interior has prepared a draft environmental statement for deepwater ports and invites written comments on or before August 16, 1973.

The statement was developed for proposed legislation to authorize the Secretary of the Interior to license the construction and operation of deepwater port facilities located on the Outer Continental Shelf.

Copies of the draft statement are available for inspection at the following locations:

Office of Communications, Room 7218, Department of the Interior, Washington, D.C. 20240, telephone (202) 343-3171;

Office of Public Affairs, Bureau of Land Management, Room 5643, Department of the Interior, Washington, D.C. 20240, telephone (202) 343-5717.

Single copies may be obtained by writing the Office of Public Affairs, Bureau of Land Management, Room 5643, Department of the Interior, Washington, D.C. 20240.

LAURENCE E. LYNN JR.,
Secretary of the Interior.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Marketing Agreement 146]

1973 PEANUT CROP

Incoming and Outgoing Quality Regulations and Indemnification

Pursuant to the provisions of sections 5, 31, 32, 34 and 36 of the marketing agreement regulating the quality of domestically produced peanuts heretofore entered into between the Secretary of Agriculture and various handlers of peanuts (30 FR 9402) and upon recommendation of the Peanut Administrative Committee established pursuant to such agreement and other information it is hereby found that the appended Incoming Quality Regulation—1973 Crop Peanuts, Outgoing Quality Regulation—1973 Crop Peanuts and the Terms and Conditions of Indemnification—1973 Crop Peanuts, which modify or are in addition to the provisions of sections 5, 31, 32 and 36 of said agreement will tend to effectuate the objectives of the Agricultural Marketing Agreement Act of 1937, as amended, and of such agreement and should be issued.

The Peanut Administrative Committee has recommended that the appended Incoming Quality Regulation—1973 Crop Peanuts, Outgoing Quality Regulation—1973 Crop Peanuts and the Terms and Conditions of Indemnification—1973 Crop Peanuts, be issued so as to implement and effectuate the provisions of the aforementioned sections of the marketing agreement. The 1973 peanut crop year begins July 1 and procedures and regulations for operations under the agreement should be established thereby affording handlers maximum time to plan their operations accordingly. The handlers of peanuts who will be affected hereby have signed the marketing agreement authorizing the issuance hereof, they are represented on the Committee which has prepared and recommended these quality regulations and terms and conditions of indemnification for approval.

Upon consideration of the Committee recommendation and other available information the appended Incoming Quality Regulation—1973 Crop Peanuts, Outgoing Quality Regulation—1973 Crop Peanuts, and the Terms and Conditions of Indemnification—1973 Crop Peanuts are hereby approved.

Dated: July 11, 1973.

CHARLES R. BRADER,
Acting Deputy Director,
Fruit and Vegetable Division.

INCOMING QUALITY REGULATION—1973 CROP PEANUTS

The following modify section 5 of the peanut marketing agreement and modify or are in addition to the restrictions of section 31 on handler receipts or acquisitions of 1973 crop peanuts:

(a) *Modification of section 5, paragraphs (b), (c), and (d).* Paragraphs (b), (c), and (d) of section 5 of the peanut marketing agreement are modified as to 1973 crop farmers stock peanuts to read respectively as follows:

(b) *Segregation 1.* "Segregation 1 peanuts" means farmers stock peanuts with not more than 2 percent damaged kernels nor more than 1.00 percent concealed damage caused by rancidity, mold or decay and which are free from visible *Aspergillus flavus.*

(c) *Segregation 2.* "Segregation 2 peanuts" means farmers stock peanuts with more than 2 percent damaged kernels or more than 1.00 percent concealed damage caused by rancidity, mold or decay and which are free from visible *Aspergillus flavus.*

(d) *Segregation 3.* "Segregation 3 peanuts" means farmers stock peanuts with visible *Aspergillus flavus.*

(b) *Moisture.* Except as provided under paragraph (e) *Seed peanuts,* no handler shall receive or acquire peanuts containing more than 10 percent moisture: *Provided,* That peanuts of a higher moisture content may be received and dried to not more than 10 percent moisture prior to storing or milling. On farmers stock, such moisture determinations shall be rounded to the nearest whole number; on shelled peanuts, the determinations shall be carried to the hundredths place and shall not be rounded to the nearest whole number.

(c) *Damage.* For the purpose of determining damage, other than concealed damage, on farmers stock peanuts, all percentage determinations shall be rounded to the nearest whole number.

(d) *Loose shelled kernels.* Handlers may separate from the loose shelled kernels received with farmers stock peanuts, those sizes of whole kernels which ride screens with the following slot openings: Runner—$^{16}/_{64}$ x $^{3}/_{4}$ inch; Spanish and Valencia—$^{15}/_{64}$ x $^{3}/_{4}$ inch; Virginia—$^{15}/_{64}$ x 1 inch. If so separated, those loose shelled kernels which do not ride such screens, shall be removed from the farmers stock peanuts and shall be held separate and apart from other peanuts and disposed of as oil stock. If the whole kernels are not separated, the entire amount of loose shelled kernels shall be removed from farmers stock peanuts and shall be so held and so delivered or disposed of. The whole kernels which ride the screens may be included with shelled peanuts prepared by the handler for inspection and sale for human consumption. For the purpose of this regulation, the tem "loose shelled kernels" means peanut kernels or portions of kernels completely free of their hulls and found in deliveries of farmers stock peanuts.

(e) *Seed peanuts.* A handler may acquire and deliver for seed purposes farmers stock peanuts which meet the requirements of Segregation 1 peanuts. If the seed peanuts are produced under the auspices of a State agency which regulates or controls the production of seed peanuts, they may contain up to 3 percent damaged kernels and have visible *Aspergillus flavus,* and, in addition, the following moisture content, as applicable.

(1) For seed peanuts produced in the Southeastern and Virginia-Carolina areas, they may contain up to 11 percent moisture except Virginia type peanuts which are not stacked at harvest time may contain up to 12 percent moisture; and (2) for seed peanuts produced in the Southwestern area, they may contain up to 10 percent moisture.

However, any such seed peanuts with visible *Aspergillus flavus* shall be stored and shelled separate from other peanuts, and any residual not used for seed shall not be used or disposed of for human consumption unless it is determined to be wholesome by chemical assay for aflatoxin. A handler whose operations may include custom seed shelling, may receive custom shell, and deliver for seed purposes farmers stock peanuts and such peanuts shall be exempt from the Incoming Quality Regulation requirements and therefore shall not be required to be inspected and certified as meeting the Incoming Quality Regulation requirements and the handler shall report to the Committee as requested the weight of each lot of farmers stock peanuts received on such basis on a form furnished by the Committee. However, handlers who may acquire seed peanut residuals from their custom seed shelling operations or from another seed sheller or producer who has or has not signed the marketing agreement shall hold and/or mill such residuals separate and apart from other receipts or acquisitions of the handler and such residuals which meet Outgoing Quality Regulation requirements may be disposed of by sale to human consumption outlets and any portion not meeting such requirements shall be disposed of by sale to oil stock or crushing.

(f) *Oil stock.* Handlers may acquire as oil stock, peanuts of a lower quality than Segregation 1 or grades or sizes of shelled peanuts or cleaned inshell peanuts which fail to meet the requirements for human consumption. The provision of section 31 of the marketing agreement restricting such acquisitions to handlers who are crushers is hereby modified to authorize all handlers to act as accumulators and acquire Segregation 2 or 3 farmers stock peanuts for the sole purpose of delivery to crushers: *Provided,* That all such acquisitions shall be bagged, red tagged and held separate and apart from Segregation 1 peanuts acquired for milling or from edible grades of shelled or milled peanuts and shall be disposed of only by crushing or by delivery to crushers and the consequent production of oil and meal.

(g) *Segregation 3 control.* To assure the removal from edible outlets of any lot of peanuts determined by the Federal or Federal-State Inspection Service to be Segregation 3, each handler shall inform each employee, country buyer, commission buyer or like person through whom he receives peanuts, of the need to receive and withhold all lots of Segregation 3 peanuts from milling for edible use. If any lot of Segregation 3 farmers stock peanuts is not withheld but returned to the producer, the handler shall cause the Inspection Service to forward immediately a copy of the inspection certificate on the lot to the designated office of the handler and a copy to the Committee which shall be used only for information purposes.

(h) *Warehouse storage facilities.* Handlers shall report to the Committee, on a form furnished by the Committee, all storage facilities or contract storage facilities which they will use to store acquisitions of 1973 crop Segregation 1 farmers stock peanuts and all such storage facilities must be reported prior to storing of any such handler acquisitions. All such storage facilities must be of sound construction, in good repair, built and equipped so as to provide suitable storage and sufficient ventilation to prevent moisture condensation and provide adequate protection for farmers stock peanuts. All breaks or openings in the walls, floors or roofs of the facilities shall have been repaired so as to keep out moisture. Elevator pits and wells must be kept dry and free of moisture at all times. Insect control procedures must be carried out in such a manner so as to prevent undesirable moisture in the storage facilities. The Committee may make periodic inspections of storage facilities and farmers stock peanuts stored in such facilities to determine if handlers are adhering to these requirements.

(i) *Shelled peanuts.* Handlers may acquire from other handlers shelled peanuts (which originated from "Segregation 1 peanuts") that fail to meet the requirements of the Outgoing Quality Regulation. Any lot of such peanuts must be accompanied by a valid inspection certificate for grade factors, an aflatoxin assay certificate and must be positive lot identified. Transactions made in this manner shall be reported to the Committee by both the buyer and seller on a form provided by the Committee. Peanuts acquired pursuant to this paragraph shall be held and milled separate and apart from other receipts or acquisitions of the receiving handler and further disposition shall be regulated by the Outgoing Quality Regulation.

OUTGOING QUALITY REGULATION—1973 CROP PEANUTS

The following modify or are in addition to the peanut marketing agreement restrictions of section 32 on handler disposition of 1973 crop peanuts for human consumption:

(a) *Shelled peanuts.* No handler shall ship or otherwise dispose of shelled peanuts for human consumption unless appropriate samples for pretesting have been drawn in accordance with subparagraph (c) of this regulation, or which if of a category not eligible for indemnification are not certified "negative" as to aflatoxin, or which contain more than (1) a total of 1.50 percent unshelled peanuts and damaged kernels; (2) a total of 3.00 percent unshelled peanuts and damaged kernels and minor defects; (3) 9.00 percent moisture in the Southeastern and Southwestern areas, or 10.00 percent moisture in the Virginia-Carolina area; or (4) 0.10 percent foreign material in peanuts "with splits" and peanuts of U.S. grade, other than U.S. splits, or 0.20 percent foreign material

V 38 136 JUL 17 73 XUM

in U.S. splits and other edible quality peanuts not of U.S. grade. Fall through in such peanuts shall not exceed 4 percent except that fall through consisting of either split and broken kernels or whole kernels shall not exceed 3 percent and fall through of whole kernels in Runners, Spanish or Virginia "with splits" shall not exceed 2 percent. The term "fall through" as used herein, shall mean sound split and broken kernels and whole kernels which pass through specified screens. Screens used for determining fall through in peanuts covered by this subparagraph (a) shall be as follows:

Type	Screen Openings	
	Split & broken kernels	Whole kernels
Virginia	17_{64} inch round	14_{64} x 1 inch slot.
Runners	17_{64} inch round	14_{64} x $^3/_4$ inch slot.
Spanish & Valencia	16_{64} inch round	13_{64} x $^3/_4$ inch slot.

(Runners, Spanish or Virginia "with splits" means shelled peanuts which do not contain more than (a) 15 percent splits, (b) for Runners or Spanish 2.00 percent whole kernels which will pass through 15/64 x 3/4 slot screen and for Virginias a 15/64 x 1 slot screen, and (c) otherwise meet the specifications of U.S. No. 1 grade).

(b) *Cleaned inshell peanuts.* No handler shall ship or otherwise dispose of cleaned inshell peanuts for human consumption: (1) With more than 1.00 percent kernels with mold present unless a sample of such peanuts, drawn by an inspector of the Federal or Federal-State Inspection Service, was analyzed chemically by laboratories approved by the Committee or by an Agricultural Marketing Service laboratory (hereinafter referred to as "AMS laboratory") and found to be wholesome relative to aflatoxin; (2) with more than 2.00 percent peanuts with damaged kernels; (3) with more than 10.00 percent moisture; or (4) with more than 0.50 percent foreign material.

(c) *Pretesting shelled peanuts.* Each handler shall cause appropriate samples of each lot of shelled peanuts to be drawn by an inspector of the Federal or Federal-State Inspection Service. The gross amount of peanuts drawn shall be large enough to provide for a grade analysis, for a grading check sample and for one 48-pound sample for aflatoxin assay. The 48-pound sample shall be ground by the Federal or Federal-State inspector, AMS or designated laboratories in a "sub-sampling mill" approved by Committee. Four sub-samples of a size specified by the Committee shall be drawn from the ground portion of the sample diverted by the "sub-sampling mill" during the grinding process. Two of the resulting sub-samples from the 48-pound sample shall be designated as "1–A" and "2–A". The two remaining sub-samples shall be designated as "1–B" and "2–B". The sub-samples designated "1–A" and "1–B" shall be sent as requested by the handler or buyer, for aflatoxin assay to an AMS laboratory or a laboratory listed on the most recent Committee list of approved laboratories that can provide analyses results on such samples in 36 hours. The sub-samples designated as "2–A" and "2–B" shall be held as aflatoxin check-samples by the Federal or Federal-State Inspection Service, AMS or designated laboratories and shall be analyzed only in AMS or designated laboratories.

Sub-samples "1–A" and "1–B" shall be accompanied by a notice of sampling, signed by the inspector, containing, at least, identifying information as to the handler (shipper), the buyer (receiver) if known, and the positive lot identification of the shelled peanuts. A copy of such notice on each lot shall be sent to the Committee office. All assay sub-samples shall be positive lot identified and sub-samples "2–A" and "2–B" held for 30 days, after delivery of sub-samples "1–A" and "1–B", and delivered for assay upon call of the laboratory or the Committee and at the Committee's expense. The cost of drawing the 48-pound sample and the preparation of the resultant sub-samples and postage for mailing the sub-samples "1–A" and "1–B" shall be borne by the handler. When the sub-samples "1–A" and "1–B" have not been analyzed within 30 days from date of delivery of the "1–A" and "1–B" sub-samples and a second set of "2–A" and "2–B" sub-samples must be drawn, the cost of drawing, grinding, preparation and mailing such sub-samples shall be for the account of the holder of the peanuts. Cost of the assay on the "1–A" and "1–B" sub-samples shall be for the account of the buyer of the lot and of the "2–A" and "2–B" sub-samples for the Committee's account. If the handler elects to pay for the assay of the "1–A" sub-sample, he shall charge the buyer when he invoices the peanuts, and if more than one buyer, on a pro rata basis. The results of each assay shall be reported to the buyer listed in the notice of sampling and, if the handler desires, to the handler.

If a buyer is not listed in the notice of sampling the results of the assay shall be reported to the handler who shall promptly cause notice to be given, to the buyer of the contents thereof and such handler shall not be required to furnish additional samples for assay.

(d) *Identification.* Each lot of shelled or cleaned inshell peanuts shipped or otherwise disposed of for human consumption shall be identified by positive lot identification procedures. For the purpose of this regulation, "positive lot identification" of a lot of shelled or inshell peanuts is a means of relating the inspection certificate to the lot covered so that there can be no doubt that the peanuts delivered are the same ones described on the inspection certificate. Such procedure on bagged peanuts shall consist of attaching a lot numbered tag bearing the official stamp of the Federal or Federal-State Inspection Service to each filled bag in the lot. The tag shall be sewed (machine sewed if shelled peanuts) into the closure of the bag except that in plastic bags the tag shall be inserted prior to sealing so that the official stamp is visible. Any peanuts moved in bulk or bulk bins shall have their lot identity maintained by sealing the conveyance and if in other containers by other means acceptable to the Federal or Federal-State inspectors and to the Committee. All lots of shelled or cleaned inshell peanuts shall be handled, stored, and shipped under positive lot identification procedures.

(e) *Reinspection.* Whenever the Committee has reason to believe that peanuts may have been damaged or deteriorated while in storage, the Committee may reject the then effective inspection certificate and may require the owner of the peanuts to have a re-inspection to establish whether or not such peanuts may be disposed of for human consumption.

(f) *Inter-plant transfer.* Until such time as procedures permitting all inter-plant and cold storage movements are established by the Committee, any handler may transfer peanuts from one plant owned by him to another of his plants or to commercial storage, without having such peanuts positive lot identified and certified as meeting quality requirements, but such transfer shall be only to points within the same production area and ownership shall have been retained by the handler. Upon any transferred peanuts being disposed of for human consumption, they shall meet all the requirements applicable to such peanuts.

(g) *Loose shelled kernels, fall through and pickouts.* (1) Loose shelled kernels which do not ride screens with the following slot openings: Runner—16_{64} x $^3/_4$ inch; Spanish and Valencia—15_{64} x $^3/_4$ inch; Virginia—15_{64} x 1 inch; shall be disposed of only by sale as domestic oil stock or by crushing. Fall through and pickouts shall also be sold as domestic oil stock or crushed. For the purpose of this regulation: the term "non-edible quality peanuts described in paragraph (g)(1)" means loose shelled kernels, fall through, and pickouts; the terms "loose shelled kernels" means peanut kernels or portions of kernels completely free of their hulls, either as found in deliveries of farmers stock peanuts or those which fail to ride the screens (U. S. No. 1 screens) in removing whole kernels; the term "fall through" has the same meaning as in paragraph (a) of this regulation; and the term "pickouts" means those peanuts removed at the picking table, by electronic equipment, or otherwise during the milling process.

(2) All loose shelled kernels, fall through and pickouts shall be kept separate and apart from other milled peanuts that are to be shipped into edible channels. Each such category of peanuts shall be bagged separately in suitable new or clean, sound, used bags or placed in bulk containers acceptable to the Committee. Such peanuts shall be inspected by Federal or Federal-State inspectors' in lots of not more than 100,000 pounds and a certification made as to moisture and foreign material content.

(3) Each category of non-edible quality peanuts described in paragraph (g)(1) shall be identified by positive lot identification procedures set forth in paragraph (d) but using a red tag. Such peanuts may be disposed of only by crushing into oil and meal or destroyed, unless other disposition is authorized by the Committee and all dispositions shall be reported to the Committee on such forms and at such times as it prescribes. Such peanuts shall be deemed to be "restricted" peanuts and the meal produced therefrom shall be used or disposed of as fertilizer or other non-feed use. To prevent use of restricted meal for feed, handlers shall either denature it or restrict its sale to licensed or registered U.S. fertilizer manufacturers or firms engaged in exporting who will export such meal for nonfeed use or sell it to the aforesaid fertilizer manufacturers. However, peanuts other than pickouts and meal from peanuts other than pick-outs in specifically identified lots of not more than 50 tons each, may be sampled by Federal or Federal-State inspectors, or by the Area association if authorized by the Committee, and tested for aflatoxin by laboratories approved by the Committee or operated by the Agricultural Marketing Service, at handler's or crusher's expense, and if such meet Committee standards, the meal may be disposed of for food use.

(4) Notwithstanding any other provision of this regulation or of the Incoming Quality Regulation applicable to 1973 crop peanuts, a handler may transfer such "restricted" peanuts to another plant within his own organization or transfer or sell such peanuts to a crusher for crushing. Sales or transfer of restricted peanuts to persons not handlers under the agreement shall be made only on the condition that they agree to comply with the terms of this paragraph (g) including the reporting requirements.

(h) *Peanuts failing quality requirements.* Handlers may sell to other handlers shelled peanuts (which originated from Segregation 1 peanuts) that fail to meet the Outgoing Quality Regulation requirements heretofore specified. Lots of peanuts disposed of in this manner must be accompanied by a valid grade inspection certificate, an aflatoxin assay certificate and must be positive lot identified. Transactions made in this manner shall be reported to the Committee by both the seller and buyer on a form provided by the Committee. Any such peanuts acquired by handlers pursuant to paragraph (i) of the incoming quality regulation shall be held and milled separate and apart from other receipts or acquisitions of the receiving handler and further disposition shall be regulated by the requirements specified heretofore.

Handlers may blanch or cause to have blanched peanuts failing to meet specifications of the outgoing quality regulation because of excessive damage or minor defects. To be eligible for disposal into human consumption outlets, such peanuts, after blanching, must meet specifications for unshelled peanuts, damaged kernels, and minor defects as listed in the outgoing quality regulation and be accompanied by an aflatoxin certificate determined to be negative by the Committee.

(i) *Residuals from seed peanuts.* Handlers who receive and custom shell for seed purposes farmers stock peanuts (which have not been inspected and certified as meeting the incoming quality regulation) shall hold and mill peanuts acquired as residuals from such operations separate and apart from peanuts acquired as Segregation 1 farmers stock. Likewise, any such residuals received or acquired from a handler or non-handler, shall be held and milled separate and apart in the same manner. Residuls that meet requirements of the outgoing quality regulation may be disposed of by sale to human consumption outlets or to another handler and any portion not meeting such requirements shall be disposed of by sale to an oil mill for crushing or by crushing.

Terms and Conditions of Indemnification—1973 Crop Peanuts

For the purpose of paying indemnities on a uniform basis pursuant to section 36 of the peanut marketing agreement effective July 12, 1965, each handler shall promptly notify or arrange for the buyer to notify the Manager, Peanut Administrative Committee of any lot of cleaned inshell or shelled peanuts, milled to the outgoing quality requirements and into one of the categories listed in the final paragraph of these terms and conditions, on which the handler has withheld shipment or storage or the buyer, including the user division of a handler, has withheld usage due to a finding as to aflatoxin content as shown by the results of chemical assay. To be eligible for indemnification, such a lot of peanuts shall have been inspected and certified as meeting the quality requirements of the agreement, shall have met all other applicable regulations issued pursuant thereto, including the pretesting requirements in (a) and (c) of the "Outgoing Quality Regulation—1973 Crop Peanuts", and the lot identification shall have been maintained. If the Committee concludes, based on assays to date or further assays, that the lot is so high in aflatoxin that it should be handled pursuant to these Terms and Conditions and such is concurred in by the Agricultural Marketing Service, the lot shall be accepted for indemnification. If the lot is covered by a sales contract, the lot may be rejected to the handler.

In an effort to make such eligible peanuts suitable for human consumption, and to minimize indemnification costs, the Committee and the Agricultural Marketing Service shall, prior to disposition for crushing cause all suitable lots to be remilled or custom blanched or both.

"Custom blanching" means the process which involves blanching peanuts, and the subsequent removal of damaged peanuts for the purpose of eliminating aflatoxin from the lot. The process may be applied to either an original lot or the new lot which results from remilling. Custom blanching shall be performed only by those firms determined by the Committee to have the capability to remove the aflatoxin and who agree to such terms, conditions and rates of payment as the Committee may find to be acceptable.

If the Committee and the Agricultural Marketing Service conclude that such lot is not suitable for remilling or custom blanching, the lot shall be declared to crushing and shall be disposed of by delivery to the Committee at such point as it may designate. The indemnification payment for peanuts in such a lot shall be the indemnification value of the peanuts, as hereinafter provided, plus actual costs of any necessary storage. Transportation expenses (excluding demurrage) from the handler's plant or storage to the point within the Continental United States where the rejection occurred and from such point to a delivery point specified by the Committee shall be included in the indemnification payment if the lot is found by the Committee to be unwholesome as to aflatoxin after such lot had been certified negative as to aflatoxin prior to being shipped or otherwise disposed of for human consumption by the handler pursuant to requirements of the "Outgoing Quality Regulation—1973 Crop Peanuts". Payment shall be made to the handler as soon as practicable after delivery of the peanuts to the Committee. The salvage value for peanuts declared for crushing shall be paid to, and retained by, the Committee to offset indemnification expenses.

If it is concluded that the lot should be remilled or custom blanched, expenses shall be paid by the Committee on those lots which, on the basis of the inspection occurring prior to shipment, contained not more than 1.00 percent damaged kernels other than minor defects. Lots with damage in excess of 1.00 percent on such inspection shall be remilled without reimbursement from the Committee for milling, freight, or temporary storage and handling but otherwise shall be indemnifiable the same as lots with not more than 1.00 percent damage.

The indemnification value of peanuts delivered to the Committee for indemnification shall be as listed in the final paragraph of these terms and conditions.

The indemnification payment on peanuts declared for remilling, and which contain not more than 1.00 percent damaged kernels other than minor defects, shall be the indemnification value referable to the weights of peanuts lost in the remilling process and not cleared for human consumption, plus temporary storage, except as hereinafter restricted, plus an allowance for remilling of one cent per pound on the original weight,

V 38-136 JUL 17 73 XUM

less 1½ percent of the indemnification value multiplied by the original weight. However, the 1½ percent deduction shall not apply to peanuts whose appropriate samples for pretesting, drawn and assayed in accordance with paragraph (c) of the "Outgoing Quality Regulation—1973 Crop Peanuts", were determined to be not indemnifiable as to aflatoxin. Transportation expenses (excluding demurrage) from the handler's plant or storage to the point within the Continental United States where the rejection occurred and from such point to a delivery point specified by the Committee shall be included in the indemnification payment if the lot is found by the Committee to be unwholesome as to aflatoxin after such lot had been certified negative as to aflatoxin prior to being shipped or otherwise disposed of for human consumption by the handler pursuant to requirement of the "Outgoing Quality Regulation—1973 Crop Peanuts". On lots on which the remilling is not successful in making the lot wholesome as a aflatoxin, the idemnification payment shall be reduced by an additional 4 percent of the indemnification value multiplied by the original weight if the lot is declared for custom blanching. If such peanuts are declared for custom blanching after remilling, the indemnification payment shall be the blanching cost, plus any temporary storage, the transportation costs from origin (whether handler or buyer premises) to point of blanching and on unsold lots from point of blanching to handler's premises and the indemnification value of the weight of reject peanuts removed from the lot. On lots which are custom blanched without remilling, the indemnification payment shall be determined in the same manner but it shall be reduced by 1½ percent of the indemnification value multiplied by the original weight. However, the 1½ percent deduction shall not apply to peanuts whose appropriate samples for pretesting, drawn and assayed in accordance with paragraph (c) of the "Outgoing Quality Regulation—1973 Crop Peanuts", were determined to be not indemnifiable as to aflatoxin. Moreover, no indemnification payments shall be paid on any lot of peanuts where the Committe determines that the custom blanched peanuts from such a lot has been sold at a price lower than the indemnification value on the original red skin lot at the time the indemnification claim was filed with the Committee.

Claims for indemnification on 1973 crop peanuts may be filed by any handler sustaining a loss as result of a buyer withholding from human consumption a portion or all the product made from a lot of peanuts which has been determined to be unwholesome due to aflatoxin. The Committee shall pay, to the extent of the raw peanut equivalent value of the peanuts used in the product so withheld, such claims as it determines to be valid.

Payment shall be made to the handler claiming indemification or receiving the rejected lot as soon as practicable after receipt by the Committee of such evidence of remilling or custom blanching and clearance of the lot for human consumption as the Committee may require and the delivery of the peanuts not cleared for human consumption to the delivery point designated by the Committee. If a suitable reduction in the aflatoxin content is not achieved on any lot which is remilled or custom blanched or both, the Committee shall declare the entire lot for indemnification. However, the Committee shall refuse to pay indemification on any lot(s) where it has reason to believe that the rejection of the peanuts arises from failure of the handler to use reasonable measures to receive and withhold from milling for edible use those Segregation 3 peanuts tendered to him either directly by a producer or by a country buyer, commission buyer or other like person.

Remilling may occur on the premises of any handler signatory to the marketing agreement or at such other plant as the Committee may determine. However, if the Committee orders remilling of a lot which has been found to contain aflatoxin prior to shipment from the locality of original milling, the Committee shall not pay freight costs should the handler move said lot to another locality for remilling.

Claims for indemnification on peanuts of the 1973 crop shall be filed with the Committee at least 60 days prior to December 31, 1974.

Each handler shall include, directly or by reference, in his sales contract the following provisions:

Should buyer find peanuts subject to indemnification under this contract to be so high in aflatoxin as to provide possible cause for rejection, he shall promptly notify the seller and the Manager, Peanut Administrative Committee, Atlanta, Georgia. Upon a determination of the Peanut Administrative Committee, confirmed by the Agricultural Marketing Service, authorizing rejection, such peanuts, and title thereto, if passed to the buyer, shall be returned to the seller. Seller shall not be precluded from replacing such peanuts if he so elects.

Seller shall, prior to shipment of a lot of shelled peanuts covered by this sales contract, cause appropriate samples to be drawn by the Federal or Federal-State Inspection Service from such lot, shall cause the sample(s) to be sent to an AMS laboratory or if designated by the buyer, a laboratory listed on the most recent Committee list of approved laboratories to conduct such assay, for an aflatoxin assay and cause the laboratory, if other than the buyer's to send one copy of the results of the assay to the buyer. The laboratory costs shall be for the account of the buyer and buyer agrees to pay them when invoiced by the laboratory or, in the event the seller has paid them, by the seller.

Any handler who fails to include such provisions in his sales contract shall be ineligible for indemnification payments with respect to any claim filed with the Committee on 1973 crop peanuts covered by the sales contract.

In addition, should any handler enter into any oral or written sales contract which fixes the level of aflatoxin at which rejection may be made and hence conflicts with these terms and conditions, the handler doing so will not be eligible for indemnification payments with respect to any claim filed with the Committee on 1973 crop peanuts on or after the filing date of a claim under such contract, except upon the Committee's finding that acceptance of such contract was inadvertent; and for purposes of this provision a claim shall be deemed to be filed when notice of possible rejection is first given to the Committee.

Any handler who fails to conform to the requirements of paragraph (h) of the "Incoming Quality Regulation—1973 Crop Peanuts" shall be ineligible for any indemnification payments until such condition or conditions are corrected to the satisfaction of the Committee.

Categories eligible for indemnification and values for each category are as follows:

Cleaned inshell peanuts—

(1) U.S. Jumbos, 24 cents per pound (shelled basis)
(2) U.S. Fancy Handpicks, 24 cents per pound (shelled basis)
(3) Valencia—Roasting Stock, 24 cents per pound (shelled basis) [1]

U.S. Grade shelled peanuts—

(1) U.S. No. 1, 24 cents per pound
(2) U.S. Splits, 24 cents per pound
(3) U.S. Virginia Extra-Large, 26 cents per pound
(4) U.S. Virginia Medium, 24 cents per pound

Shelled peanuts "with splits"—

(1) Runners with splits which do not contain more than 15 percent splits or 2 percent whole kernels which will pass through a 16/64 x 3/4 slot screen, 24 cents per pound.
(2) Spanish with splits which do not contain more than 15 percent splits or 2 percent whole kernels which will pass through a 15/64 x 3/4 slot screen, 24 cents per pound.
(3) Virginias with splits which do not contain more than 15 percent splits or 2 percent whole kernels which will pass through a 15/64 x 1 slot screen, 24 cents per pound.

However, peanuts in any of the above categories shall not be eligible for indemnification if such peanuts: (1) were milled from seed peanut residuals as referred to in the last sentence of paragraph (e) of the Incoming Quality Regulation and paragraph (1) of the Outgoing Quality Regulation for 1973 Crop Peanuts; (2) failed the Outgoing Quality Regulation for 1973 Crop Peanuts due to excessive damage and minor defects and such peanuts were subsequently blanched to remove such excess damage and minor defects pursuant to paragraph (h) of such regulation; and (3) when shipped for human consumption outlets contained more than a total of 1.25 percent unshelled peanuts and damaged kernels or a total of 2.00 percent unshelled peanuts, damaged kernels and minor defects.

Forest Service

NEBRASKA NATIONAL FOREST LIVESTOCK ADVISORY COMMITTEE

Notice of Meeting

The Nebraska National Forest Livestock Advisory Committee will meet at 8 P.M., CDT, July 26, 1973, at the Forest Service Office, Halsey, Nebraska.

The purpose of this annual meeting is to discuss various grazing resource management practices.

The meeting will be open to the public. Persons who wish to attend should notify the District Ranger, Bessey Ranger District, Halsey, Nebraska 69142, phone (308) 533-2257.

The Committee has established the following rules for public participation:

1. Members of the public may present oral statements at any time during discussions.

2. Any member of the public who wishes to do so should file a written statement with the committee, either before or after the meeting.

JAMES A. LEES,
Acting Forest Supervisor.

JULY 9, 1973.

[FR Doc.73-14521 Filed 7-16-73;8:45 am]

OKANOGAN NATIONAL FOREST MULTIPLE USE ADVISORY COMMITTEE

Notice of Meeting

The Okanogan National Forest Multiple Use Advisory Committee will meet at 8:00 p.m. on July 31, 1973, in the second floor Conference Room of the Forest Supervisor's Office at 219 Second Avenue South, Okanogan, Washington.

The purpose of this meeting is to discuss land use planning and proposed trial and area restrictions for 1974.

The meeting will be open to the public. The Committee will accept comment from the public during the meeting and public members are encouraged to speak up at any time to express their views on land use planning and proposed trail and area restrictions for 1974.

Written statements may be filed with the Committee until August 10, 1973. Send them to Okanogan National Forest Supervisor, Post Office Box 950, Okanogan, WA 98840.

GERHART H. NELSON,
Forest Supervisor.

JULY 6, 1973.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

[Order 46-2, Amdt. 1]

BUREAU OF EAST-WEST TRADE

Organization and Functions

JUNE 1, 1973.

This order effective June 1, 1973 amends the material appearing at 38 FR 9329 of April 13, 1973.

DIBA Organization and Function Order 46-2, dated December 4, 1972, is hereby amended as follows:

1. In Section 8., *Office of Export Control*, section 8.06 is amended to read:

.06 The product/licensing divisions as stated below:

CAPITAL GOODS AND PRODUCTION MATERIALS DIVISION SCIENTIFIC AND ELECTRONIC EQUIPMENT DIVISION

Each division shall, for the products under its jurisdiction, administer export controls in accordance with the Export Administration Act and the Equal Export Opportunity Act and the policies and procedures established by the Office of Export Control; determine and take appropriate action on export license applications; conduct technical analyses of products, including potential end-use applications, to determine and recommend the extent of controls to be applied; and render assistance to industry and other Government agencies on export control problems within its jurisdiction.

The organization chart for the Bureau of East-West Trade, referenced in Section 2, is amended as depicted in the attached organization chart. A copy of the chart is on file with the original of this document in the Office of the Federal Register.

STEVEN LAZARUS,
Director, Bureau of East-West Trade.

Approved:
JUDITH S. CHADWICK,
Director, Directorate of Administrative Management.

[FR Doc.73-14499 Filed 7-16-73;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. FDC-D-638; NADA No. 6-226V]

AMERICAN CYANAMID CO.

Led-O-San; Notice of Opportunity for a Hearing

In an announcement published in the FEDERAL REGISTER of September 5, 1970 (35 FR 14168, DESI 901V) the Commissioner of Food and Drugs announced the conclusions of the Food and Drug Administration following evaluation of reports received from the National Academy of Sciences—National Research Council, Drug Efficacy Study Group, on Led-O-San (a product which contains calcium polysulfide and hexachlorophene), new animal drug application (NADA) No. 6-226V; marketed by American Cyanamid Co., P.O. Box 400, Princeton, NJ 08540.

The announcement invited the holder of said NADA and any other interested person to submit pertinent data on the drug's effectiveness. American Cyanamid Co. responded to the announcement by submitting revised labeling and manufacturing data. By letters of August 29, 1972 and February 21, 1973, the Food and Drug Administration requested additional manufacturing data and revised labeling. Such data have not been submitted.

Therefore, notice is given to the holder of the NADA and to any other interested person that the Commissioner proposes to issue an order under section 512(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(e)) withdrawing approval of NADA No. 6-226V and all amendments and supplements thereto on the grounds that new information before him with respect to the drug evaluated together with the evidence available to him at the time of approval of the application shows there is a lack of substantial evidence that the drug will have all of the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products not the subject of an approved new animal drug application are covered by the NADA reviewed. Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the NADA not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Bureau of Veterinary Medicine, Division of Compliance, 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 512 of the act and the regulations promulgated thereunder (21 CFR Part 135), the Commissioner hereby gives the applicant and any other interested person an opportunity for a hearing to show why approval of the NADA should not be withdrawn.

The applicant and any interested person is required to file, on or before August 16, 1973, with the Hearing Clerk, Food and Drug Administration, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election by August 16, 1973 will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application.

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before August 16, 1973, a written appearance requesting the hearing, giving the reasons why approval of the NADA should not be withdrawn, together with a well organized and full factual analysis of the data he is prepared to prove in support to his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 135.15(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating efficacy of the product for the labeling claims involved, the Commis-

[1] Inshell peanuts with not more than 25 percent having shells damaged by discoloration, which are cracked or broken, or both.

V 38-136 JUL 17 73 XUM

sioner will rescind this notice of opportunity for a hearing.

If review of the data in the application and the data submitted by the applicant or any other interested person in a request for a hearing, together with the reasoning and factual analysis warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application, the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new animal drug applicant or any other interested person, a hearing is justified, the issues will be defined, an administrative law judge will be named, and he shall issue, as soon as practicable after August 16, 1973, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the NADA will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearings contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the office of the hearing clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 343–351; 21 U.S.C. 360b(e)) and under the authority delegated to the Commissioner (21 CFR 2.120).

Dated: July 9, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

MEDICAL DEVICE CLASSIFICATION PANELS

Request for Nominations for Members

In his message to the Congress on consumer affairs on October 30, 1969, the President requested the Secretary of Health, Education, and Welfare, to determine the scope and nature of additional legislative controls to protect the public against unreasonable risk of injury or illness from medical devices. The Secretary established a Study Group on Medical Devices for this purpose under the chairmanship of Theodore Cooper, M.D., Director of the National Heart and Lung Institute. The Study Group completed its report, entitled "Medical Devices: A Legislative Plan," in September 1970. (The report of the Study Group is available for public review at the office of the Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 6–88, 5600 Fishers Lane, Rockville, MD 20852, during regular working hours Monday through Friday, and may be purchased from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22151.)

The Cooper committee recommended an immediate, systematic review of existing medical devices, and classification of these devices into three categories: (1) Those requiring premarketing clearance, (2) those for which standards would be appropriate, and (3) those which should be exempt from premarketing review and standards. The Secretary requested that the Commissioner of Food and Drugs immediately undertake an industry-wide inventory of existing medical devices, and their classification into the above three categories, pending introduction and enactment of appropriate new medical device legislation.

In 1972, an inventory of existing medical devices was developed. Information for this inventory was obtained by sending questionnaires to over 4000 addressees in the United States. From the approximately 2000 replies received, 1100 manufacturers in the United States were identified as supplying medical devices. From these manufacturers a list of approximately 8000 devices was developed.

The classification of devices which was requested by the Secretary has been initiated by dividing all devices into 14 separate categories generally based on medical specialties. These are: Orthopedics; cardiovascular; dental; anesthesiology; obstetrical and gynecology; gastroenterology and urology; radiology; neurological disease; ear, nose and throat; ophthalmology; plastic and general surgery; physical medicine; clinical pathology; and general and personal use.

The Commissioner has established the first four panels to review and classify devices that fall within their respective medical specialty areas. These panels are:

Orthopedics:
- Victor H. Frankel, M.D., Ph.D.
- Charles H. Epps, Jr., M.D.
- Floyd J. Jergesen, M.D.
- Jacquelin Perry, M.D.
- Albert H. Burstein, Ph.D.
- Horace Grover, Ph.D.

Cardiovascular:
- John J. Collins, Jr., M.D.
- Nina Starr Braunwald, M.D.
- Clarence Dennis, M.D.
- Jerome Liebman, M.D.
- Arthur Miller, Sc.D.

Dental:
- John W. Stanford, Ph.D.
- Garrett V. Ridgley, D.D.S.
- Robert B. Wolcott, D.D.S., M.S.
- W. Arthur George, D.D.S.
- George E. Myers, D.D.S.
- David B. Mahler, Ph.D.

Anesthesiology:
- Leslie Randell-Baker, M.D.
- James A. Meyer, M.D., LTC, MC
- Eugene L. Nagel, M.D.
- Stanley W. Weltzner, M.D.
- Penelope Cave Smith, M.B.
- Arnold St. J. Lee, B.A.

The curriculum vitae of each panel member is available for public review at the office of the Hearing Clerk, Food and Drug Administration, Department of Health, Education, and Welfare, Rm. 6–88, 5600 Fishers Lane, Rockville, MD 20852.

The Commissioner is forming two additional panels, for obstetrical and gynecological devices and for gastrointestinal and urology devices.

Notice is hereby provided for all interested persons to nominate qualified physicians, engineers, or scientists to serve on each of these two panels. Nominations for these qualified experts are invited from individuals and from consumer, industry, and professional organizations, and should be sent to:

Dr. Carl W. Bruch,
Food and Drug Administration,
Office of Medical Devices (CM–120),
5600 Fishers Lane,
Rockville, MD 20852.

Nominations must state that the person nominated is aware of the nomination, is interested in becoming involved in this effort, and appears to have no conflict of interest. A complete curriculum vitae must be enclosed with each nomination. Nominees shall be qualified by training, education and experience in the field of medical devices and have particular expert knowledge in the specialty area concerned.

The Commissioner has concluded that each panel should also include one nonvoting representative of the consumer interests, and one non-voting representative of the regulated industry. Accordingly, any group or organization interested in participating in the selection of an appropriate representative of the consumer interests or of the regulated industry, for each of the six panels designated above, is requested to write to Dr. Bruch stating this interest. After receipt of all such letters, the Commissioner will request that the interested consumer groups and organizations and industry groups and organizations consult among themselves and each designate a single non-voting member for each panel. It will be the responsibility of the non-voting consumer and industry members of the panel to represent the consumer and industry interests in all deliberations.

To be considered, nominations of experts to serve on the two panels now being formed, and letters from consumer and industry groups and organizations expressing an interest in participating in the selection of a consumer and an industry non-voting member for each of the six panels, must be received on or before September 1, 1973.

The Commissioner has also determined that a procedure for the functioning of these panels should be published as a proposal for comment in the FEDERAL REGISTER. Such a procedure is now in preparation and will be published in the near future. Pursuant to this procedure, an opportunity will be provided for all interested persons to present information and views to the panels for their consideration in the classification process.

Dated: July 9, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. EX73-3; Notice 2]

CITROEN

Petition for Temporary Exemption from Motor Vehicle Safety Standards

The National Highway Traffic Safety Administration has decided to deny S. A. Automobiles Citroen an exemption of its SM model from compliance with the pendulum test requirements of Federal Motor Vehicle Safety Standard No. 215, *Exterior Protection*.

Notice of petition for the exemption was published in the FEDERAL REGISTER on May 14, 1973 (38 FR 12636), and an opportunity afforded for comment. Citroen applied for exemption pursuant to section 123(a)(1)(D) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1410(a)(1)(D)) which requires it to demonstrate that to mandate compliance with Standard No. 215 would prevent [it] from selling a motor vehicle whose overall level of safety is equivalent to or exceeds the overall level of safety of nonexempted motor vehicles.

In support of its petition Citroen listed several features of the SM vehicle for which exemption was sought. These were: (1) A self-leveling hydropneumatic suspension that provies constant vehicle height and exceptional dynamic stability (roadholding); (2) power steering with self-returning and self-centering capability; (3) high pressure power brakes with front-rear repartitioning; (4) very low center of gravity; and (5) a cruising speed in excess of 125 mi/h. Citroen also submitted figures intended to show that it exceeded the minimum requirements of several motor vehicle safety standards.

In order to achieve compliance, Citroen stated that the front and rear ends of the SM would have to be redesigned, at an estimated cost of $1,183,000. This figure does not include costs to redesign and retest the vehicle's cooling system. Because of the vehicle's low production, 19 units a day for all markets, Citroen stated that it had no plans to bring the SM into compliance with Standard No. 215. Failure to obtain an exemption would mean that Citroen would terminate its participation in the American market with respect to vehicles manufactured on or after September 1, 1973, since the SM is its only product currently offered for sale.

No comments were filed supporting the petition. Opposing the petition were the Center for Auto Safety and the State of Hawaii.

Section 123(e) of the Act and 49 CFR 555.6(d)(1) require a petitioner to provide a detailed analysis of how the vehicle provides an overall level of safety equivalent to or exceeding the overall level of safety of nonexempted motor vehicles, including (§ 555.6(d)(1)(iv)) the results of any tests conducted on the vehicle demonstrating that its overall level of safety exceeds that which is achieved by conformance to the standards. No such analysis or test was submitted by Citroen. In fact, the petition provided no information at all on the overall level of safety of either the Citroen SM or of any nonexempted vehicles. In the judgment of this agency, listing features such as power steering and hydropneumatic suspension does not begin to satisfy the requirement of establishing an objective measure of a vehicle's overall level of safety. Indicating the margin by which the performance levels of individual standards are exceeded also adds little to the picture. In practical terms, all conforming vehicles must exceed those levels. The two central concepts of this statutory basis are (1) overall levels of safety, and (2) comparison of the vehicle in question with other vehicles. It is true that these concepts may be novel and complex, but Citroen made no attempt whatever to deal with them in its petition.

Although for the above reasons the petition must be denied, and further issues need not be reached, there appears to be serious doubt as to whether Citroen has adequately shown that requiring compliance would prevent the sale of the SM within the meaning of section 123(a)(1)(D). Given the evident size and competence of the petitioner, there is no question that it is financially and technologically capable of bringing the SM into conformity with the standard in question. Its position is that the cost of doing so is out of proportion with the quantity of vehicles produced and would be impossible to depreciate. Considering the wide variety of vehicles in all price ranges whose manufacturers are assuming the burden of achieving conformity, the situation presented by Citroen does not appear to be a standard preventing the sale of the SM, within the intended meaning of the statute.

The Citroen petition is accordingly denied.

(Sec. 3, Public Law 92-548, 86 Stat. 1159, 15 U.S.C. 1410; delegation of authority at 38 FR 12147).

Dated: July 3, 1973.

JAMES E. WILSON,
Associate Administrator, Traffic Safety Programs.

ATOMIC ENERGY COMMISSION

[Docket No. 50-269A, etc.]

DUKE POWER CO.

Order on Motion To Amend, and Rescheduling of Prehearing Conference

In the matter of Duke Power Co. (Oconee Units 1, 2, and 3; McGuire Units 1 and 2); Dockets Nos. 50-269A, 50-270A, 50-287A, 50-369A, 50-370A.

In view of motion filed by Applicant dated July 10, 1973, to amend paragraph (1) of Board Order of June 15, 1973, and the telephone conference calls between the Parties and the Board on July 10 and 11, at which time the Parties indicated support of the motion, and since the Parties have demonstrated substantial progress toward voluntary compliance of discovery, the scheduled time for the filing of certain second round discovery requests, previously set for July 20, 1973, is hereby suspended, pending further discussion at a prehearing conference to be held on August 2, 1973.

Accordingly, the prehearing conference now scheduled for July 24, 1973, is hereby postponed and rescheduled for August 2, 1973, at 9:30 a.m., local time, at the U.S. Tax Court, Room 2142, 1111 Constitution Avenue, NW, Washington, D.C. 20044.

It is so ordered.

The Atomic Safety and Licensing Board.

Issued at Washington D.C. July 11, 1973.

DUQUESNE LIGHT CO. ET AL.

Establishment of Atomic Safety and Licensing Board

In the matter of Duquesne Light Co., Ohio Edison Co., Pennsylvania Power Co., The Cleveland Electric Illuminating Co., The Toledo Edison Co.

On July 11, 1973, the Commission published in the FEDERAL REGISTER, 38 FR 18481, a notice of hearing to consider the applications filed for construction permits for the Perry Nuclear Power Plant, Units 1 & 2. The notice indicated that the Safety and Licensing Board for this proceeding would be designated at a later date, and that notice of its membership would be published in the FEDERAL REGISTER.

Pursuant to the Atomic Energy Act of 1954, as amended, the regulations of Title 10, Code of Federal Regulations, Part 2 (Rules of Practice) and the notice of hearing referred to above, notice is hereby given that the Safety and Licensing Board in this proceeding will consist of Dr. Frank F. Hooper, Mr. Gustave A. Linenberger, and John B. Farmakides, Esq., Chairman. Dr. George A. Ferguson has been designated as a technically qualified alternate and John F. Wolf, Esq., has been designated as an alternate qualified in the conduct of administrative proceedings.

The positions and mailing addresses of the Board members are as follows:

1. John B. Farmakides, Esq., Chairman, an attorney member of the Atomic Safety and Licensing Board Panel, U.S. Atomic Energy Commission, Washington, D.C. 20545.
2. Dr. Frank F. Hooper, School of Natural Resources, University of Michigan, Ann Arbor, Michigan 48104.

Assignment of Members of Atomic Safety and Licensing Appeal Board

In the matter of Jersey Central Power & Light Co. (Forked River Nuclear Generating Station, Unit No. 1).

Notice is hereby given that, in accordance with the authority in 10 CFR § 2.787 (a), the Chairman of the Atomic Safety and Licensing Appeal Panel has assigned the following panel members to serve as the Atomic Safety and Licensing Appeal Board for this proceeding:

Alan S. Rosenthal, Chairman
Dr. John H. Buck, Member
Michael C. Farrar, Member

Dated: July 11, 1973.

MARGARET E. DU FLO,
Secretary to the Appeal Board.

[FR Doc.73-14530 Filed 7-16-73;8:45 am]

CIVIL AERONAUTICS BOARD

[Docket No. 23542; Order 73-7-41]

ATC BYLAWS INVESTIGATION AND AIR TRAFFIC CONFERENCE OF AMERICA

Order of Temporary Approval and Consolidation Regarding Non-member Participation in ATC Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 11th day of July 1973.

The Air Traffic Conference of America (ATC) has filed with the Board, pursuant to section 412(a) of the Federal Aviation Act (49 U.S.C. 1382(a)) and Part 261 of the Board's Economic Regulations (14 CFR Part 261), amendments to the bylaws of ATC and a resolution entitled "Participation by Non-Members in Air Traffic Conference Meetings." These amendments and this resolution have been designated Agreement CAB 16485–A2, and the Agreement is, by its terms, to become effective 30 days after its approval by the Board.

The Agreement, briefly, would permit non-members of ATC to obtain copies of the agenda and minutes of ATC and of its standing committees, by subscription; to submit proposals to ATC for its consideration; to submit written views on matters pending before ATC and its standing committees; and, in limited circumstances, to appear in person at ATC meetings to present views. The Agreement also would permit action on ATC mail votes to be stayed, in certain circumstances, if certain non-members of ATC object to specific mail vote proposals. Agreement CAB 16485–A2 in its entirety, as well as the explanatory comments filed by ATC with this agreement, are attached hereto as an Appendix.

No objections to approval of this Agreement have been received.

At the present time the bylaws of ATC (Agreement CAB 16485) are under review in the "ATC Bylaws Investigation," Docket 23542. Public hearings have recently been concluded, briefs have been submitted to the Administrative Law Judge, and supplemental briefs were recently filed on June 29, 1973. Among the issues in the "Investigation" is the question of whether ATC procedures afford non-members adequate notice of pending ATC proposals and adequate opportunity for non-members to participate in ATC deliberations.

By motion filed June 12, 1973, the Conference has requested that the Board consolidate the Agreement with the "Investigation" since the Agreement represents a fundamental amendment of the ATC bylaws with respect to third-party participation which should be examined as part of an orderly completion of the Board's decision-making process in the "Investigation." The Conference argues further that the basic issues regarding the Agreement are already part of the "Investigation," that the same parties are involved, and that consolidation will be conducive to the proper dispatch of the Board's business and will not unduly delay the proceeding. Answers to the motion have been filed by the American Society of Travel Agents (ASTA), the National Passenger Traffic Association, and the Bureau. They do not oppose consolidating the agreement for final decision in the "Investigation" in view of the identity of the issues, but request that the Board approve the agreement on an interim basis so that consolidation does not result in delay. The National Air Transportation Conference (NATC) opposes the motion on the ground that consolidation would lead to significant delay and that there are no public interest considerations sufficient to warrant the requested consolidation. NATC nonetheless argues that the agreement represents a "constructive step" and that there need be no conflict between routine Board action under a non-hearing procedure and ultimate disposition of the "Investigation" by the Administrative Law Judge and the Board, including the question of what conditions should be ordered with respect to any approval of the ATC bylaws.

Upon consideration of the matters presented, the Board has decided to grant the motion for consolidation and to approve the Agreement on an interim basis. We believe that this approach will provide the Board with the fullest evidentiary record, provide for maximum decisional flexibility, and permit a decision on all facets of the ATC bylaws at the same time. We note, in this connection, that there are no objections to approval of the Agreement; on the contrary, those parties addressing themselves to the Agreement suggest that it represents a step in the right direction. Under all the circumstances, we find that approval of the agreement on an interim basis would be in the public interest. Our pendente lite approval, however, should not be construed as a prejudgment of any of the issues in the "Investigation" (including the proper extent of non-member participation in ATC deliberations) and such approval is expressly conditioned upon the Board's right to disapprove or otherwise modify the agreement at the end of the "Investigation." As conditioned, it is found that temporary approval of Agreement CAB 16485–A2 is in the public interest.

Accordingly, it is ordered, That:

1. The motion of ATC for consolidation be and it hereby is granted;

2. Agreement CAB 16485–A2 be and it hereby is temporarily approved; [1]

3. The approval granted in ordering paragraph 2 may be amended or revoked in the discretion of the Board without hearing.

This order shall be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

APPENDIX

AIR TRAFFIC CONFERENCE RESOLUTION

NON-MEMBER PARTICIPATION IN ATC MATTERS

Resolved, that, Effective 30 days after approval by the Civil Aeronautics Board:

1. Subject to concurrence of the Board of Directors of the Air Transport Association, the By-Laws of the Air Traffic Conference are amended in the following respects:

A. Add the following language to the end of Article IX, paragraph A:

Provided, further, however, that if the Executive Secretary receives a timely written objection from any person who is permitted to appear in person before the Conference pursuant to regulations adopted by the Conference under the provisions of paragraph D of Article IX, stating in detail the reasons for such objection, the provisions of this paragraph allowing committee recommendations to become automatic Conference action shall be stayed until the Executive Committee reviews the objection. If in the opinion of the Executive Committee the objection should be discussed by the Conference, the resolution may be included on the Conference agenda for action, or discussion, at the discretion of the Executive Committee; otherwise the procedures allowing for automatic Conference action shall operate as if there had been no objection.

[1] Such approval shall continue only until 60 days after final Board action in the ATC Bylaws Investigation, Docket 23542.

B. Add the following new paragraph "D" to Article IX:

"D. *The Conference may establish by resolution procedures governing the conduct of its meetings including the method by which it will receive the views of persons outside of the Conference, and may, in accordance with Conference procedures, act upon matters presented by such persons during the course of Conference business.*"

2. The following resolution entitled "Participation by Non-Members in Air Traffic Conference Meetings" is adopted:

PARTICIPATION BY NON-MEMBERS IN AIR TRAFFIC CONFERENCE MEETINGS

The procedures contained in this resolution are in addition to and not in lieu of any existing resolutions which provide for participation by non-members in Air Traffic Conference meetings.

A. Any person shall have the right to receive copies of the agenda of any and all standing committees and the Conference, mail vote proposals and the decision reached, and the minutes of the standing working committees and the Conference. Provided, that documents requested under this paragraph shall be subject to those charges which may be promulgated and assessed by the Executive Secretary for the costs of production and distribution. The Executive Secretary shall send a reasonable number of copies of each and every document described in this paragraph to the Civil Aeronautics Board for its information and use.

B. Any person may submit a specific written proposal on any subject to the Executive Secretary who shall refer such proposal, where appropriate, to a standing working committee or the Conference within the terms of reference of such standing working committee or the Conference. A written response shall be provided to the proponent of the proposal upon request. Any person may submit written views on any matter pending before any standing working committee or the Conference. Provided, however, that any document submitted to the Executive Secretary for consideration by any standing working committee or the Conference shall become the property of the Members and may be used by any Member or Members in any manner desired.

C. Any air carrier having a Certificate of Public Convenience and Necessity from the Civil Aeronautics Board to perform scheduled route air transportation, any association composed substantially of carriers of passengers or cargo by air, any association representing travel agents on a national basis, or any association which previously demonstrates satisfactorily to the Executive Committee that it actually represents a substantial number of users of air transportation on a national basis shall have the right to appear in person subject to the approval of the Executive Committee, with or through counsel, at a Conference meeting for the express purpose:

(a) To present a proposal or proposals which could otherwise be properly before the Conference for action, and on subjects which could be discussed without the need for prior Civil Aeronautics Board approval to discuss, or,

(b) To present views on any pending matter which the Conference has on its agenda for action, *Provided, however,* Prior written showing is directed to the Executive Secretary of the Conference detailing how the matter in question will have a financial or property impact or will have an impact on the services rendered by or for such non-member.

The demonstration required above shall be made in part by a written statement containing the actual number of users such association represents, the names and addresses of its officers and directors and a showing of instances where it has represented users on aviation issues. With respect to the right to appear described in this paragraph, the following procedures shall be followed:

1. If an appearance is allowed under the terms of this paragraph for purposes of presenting a proposal or proposals, the non-member proponent of such proposal(s) must furnish the Executive Secretary with a written statement of his proposal(s) forty (40) days in advance of the Conference meeting at which such non-member is to appear.

2. If an appearance is allowed under the terms of this paragraph for the purpose of submitting views on a matter pending on the Conference agenda, the non-member submitting such views must furnish the Executive Secretary with a written statement outlining what such non-member intends to state in his appearance no later than fourteen (14) days in advance of the Conference meeting at which such non-member is to appear.

3. The written statements in 1 & 2 above must be in sufficient detail as to inform the Executive Committee and the Members of the substance of such proposal(s) or views.

4. The total time allotted to all appearances before a Regular Conference Meeting shall not exceed 25 percent of the aggregate time scheduled for such Conference or not to exceed four hours, whichever is less.

a. The apportionment of time for individual appearance shall be determined by the Executive Secretary: *Provided, however,* That no individual appearance shall exceed 30 minutes in any event, unless the Executive Committee extends such time upon a showing of need, or the Conference extends such time at its will.

b. The right to appear shall be limited to the representative(s) of the non-member in connection with and limited to his presentation or his statement of views. No other person shall have such a right.

Provided, however, That the Executive Committee of ATC, in its discretion, may schedule a Special Meeting of the Conference in lieu of above rights to appear at a Regular Conference Meeting in order to receive the proposal(s) or presentation of any non-member.

Adopted: Air Traffic Conference Meeting, May 3-4, 1973. By-law changes approved by ATA Board of Directors, May 16, 1973.

Effective: 30 days after approval of the Civil Aeronautics Board.

Filed with the Civil Aeronautics Board by letter dated May 29, 1973.

EXPLANATORY COMMENTS ATC RESOLUTION NON-MEMBER PARTICIPATION IN ATC MATTERS

These comments are offered in explanation of the provisions of the accompanying resolution of the Air Traffic Conference, adopted at the May 3-4, 1973 Conference meeting, which establishes formalized procedures for the participation by non-members in ATC matters. The resolution includes two amendments to the ATC By-laws, one of which provides procedures for the stay of effectiveness of unanimous recommendations of standing working committee upon the receipt of objection to such recommendations from certain parties. The other By-law amendment empowers the Conference to establish procedures for non-member participation in Conference matters. In addition, the resolution also includes the specific procedures for such non-member participation.

On May 16, 1973, the ATA Board of Directors approved the amendments to the Conference By-laws, as required by Article XIV of those By-laws. The entire resolution will become effective thirty (30) days after approval by the Civil Aeronautics Board.

As stated in the minutes of the November 16–17, 1972 meeting of the Air Traffic Conference, a special three man committee was appointed to consider non-member participation in Conference matters. The accompanying resolution emanates from recommendations of that committee.

Representatives of ARTA, ASTA, NATC and NPTA met separately with and presented their views to the committee during the developmental stage of the committee's recommendations. ABTB was invited to attend but its representative stated that their organization found the present means of coordination and input to be satisfactory. Representatives of AAA met separately with the ATC staff and their views were forwarded to the committee prior to the development of the committee's recommendations. In addition an appointment was made to meet with ACAP but its representative failed to keep the appointment.

Most of the parties wanted to be heard on matters affecting them, and wanted this to be done *before final Conference action.* The ATC adopted resolution on third party participation fulfills these desires, while still, hopefully, leaving the Conference with the flexibility it needs to carry on its work. In summary, the resolution, in addition to participation areas presently covered by other Conference resolutions including the travel agency dialogue meetings, provides for the following:

1. The agenda of the Conference and any of its standing working committees would be made available to the public prior to the meeting concerned on a subscription basis at a charge to cover the costs of production and distribution. The charge would be established by the Executive Secretary. Copies of these agenda would also be filed with the CAB for its use. (Copies of Conference agenda are presently sent to the CAB, but not prior to Conference meetings.)

2. The Conference and standing working committee minutes would be made available to the public also on a subscription basis. (Copies of Conference minutes are presently sent to the CAB.)

3. Written proposals could be made by any person to any standing working committee or to the Conference through a central point for decision as to where such proposals should be directed.

4. Written views could be made by any person on any matter pending before any standing working committee of the Conference also to a central point to allow for proper distribution.

5. Non-member representative bodies and air carriers, as specifically defined, may appear in person at Conference meetings to make proposals, or to comment on proposals pending before the Conference which would have a direct impact on such non-member. Procedural conditions on appearances were deemed essential and therefore written into the resolution so that on the one hand non-members having important contributions could be heard, while on the other hand the work of the Conference would not be unduly disrupted or unreasonably expanded.

We believe the action by the Conference adequately provides for appropriate input to the Conference from non-members.

[Docket No. 23333; Order 73-7-28]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Reduced Fares for Cargo Sales Agents

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 10th day of July 1973.

V 38-136 JUL 17 73 XUM

By Order 73-3-99, dated March 26, 1973 action was deferred on the subject portion of an agreement, adopted by the International Air Transport Association (IATA), dealing with revision of the basis upon which reduced-fare concessions for United States-based IATA cargo agents are allocated. The general effect of the revision is to establish an incentive program geared to agents' productivity in place of the present allocation of a fixed number of tickets for each agency location. Presently, each IATA-approved agency location receives two tickets annually, at a 75-percent discount from the otherwise applicable air fare. The new proposal entitles each agency registered in a particular country to two 75-percent discount tickets regardless of the number of locations it operates. The new productivity feature would allot two additional tickets at a 50-percent discount of the applicable first-class or normal economy fare for each 100 percent (or fraction thereof) by which an agent's total international sales exceed the annual average for the country of registration.[1] The maximum annual allowance of these tickets would be set at 40.

Action on the resolution was deferred for a 30-day period[2] in order to allow time for the carrier parties to submit data relating to the numbers of reduced-fare tickets issued under the existing system in 1972 and estimates of issuance had the proposed system been in effect, and to grant interested persons and parties an opportunity to comment on the resultant effect of the resolution on the number of reduced-fare tickets available to individual agents or on the cargo agency industry as a whole.

Data and/or comments have been received from Compagnie Nationale Air France (Air France); American Airlines, Inc. (American); Delta Air Lines, Inc. (Delta); Eastern Air Lines, Inc. (Eastern); The Flying Tiger Line Inc. (Flying Tiger); Lufthansa German Airlines (Lufthansa); Northwest Orient Airlines, Inc. (Northwest); Pan American World Airways, Inc. (Pan American); Trans World Airlines, Inc. (TWA); Seaboard World Airlines, Inc. (Seaboard); Air Express International Corporation (AEI); Air Freight Forwarders Association (AFFA); Emery Air Freight Corporation (Emery); International Air Freight Agents Association (IAAA); and the National Customs Brokers and Forwarders Association of America, Inc. (NCBFAA).

Pan American and TWA urge approval of the proposed agreement.[3] TWA claims the new program represents significant improvement over the present system, alleges that allocation of reduced-fare tickets by agency location is obsolete since IATA now registers its agents by country rather than by individual location and that in any event the number of locations is not a reliable index of growth and progress in air cargo sales. Both carriers contend that sales volume is more clearly related to the agent's actual travel requirements since it is a reliable index of productivity and that the instant agreement, since it is geared to cargo sales productivity, is an equitable system of allocating reduced-rate authorizations.

Pan American maintains that the amount of actual reduced-fare travel by cargo agents would not materially increase or decrease under the new agreement, since many multi-location agents are also among the most productive single location agents; that opportunities for such travel would increase somewhat for productive single location agents; and that the reduced discount available would not adversely affect the cargo agent's business travel plans, since business itineraries are generally brief and tightly scheduled thus preventing cargo sales agent use of discount fares available to tourists.

Seaboard opposes the agreement. While indicating that reduced-fare travel for cargo agents is an effective market development tool, Seaboard feels that the proposed agreement is inherently discriminatory and will penalize IATA agents selling for Seaboard since these sales will not be included in the productivity base for ticket allotment thus reducing Seaboard's sales and increasing sales of Seaboard's IATA competitors, and that its overall competitive position will be impaired. Seaboard also claims that the existing reduced-fare system is discriminatory since, as a non-IATA all-cargo carrier, it cannot itself provide reduced-fare passenger transportation for its sales agents and carriers able to perform such service are generally IATA members and will not honor Seaboard's requests for reduced-fare carriage, and alleges that past Board refusal to condition a reduced-fare resolution for transportation of foreign-based cargo agents to require IATA carriers to honor Seaboard requests for such carriage has hurt its westbound business.[4] The carrier, therefore, requests the Board to impose conditions requiring IATA carriers to honor reduced travel requests for transportation of its cargo sales agents and to prohibit basing reduced-fare ticket eligibility solely upon agent sales for IATA carriers.

AFFA opposes adoption of the proposed agreements as filed, and maintains in general that past Board policy towards foreign-based agents discriminates against U.S.-based cargo agents and forwarders and acts to promote imports and discourage exports contrary to national policy. AFFA asserts that a complete reversal of past Board decisions is needed to eliminate the competitive advantage accorded foreign-based cargo agents and forwarders and that U.S. and foreign-based cargo agents and forwarders should be put on an equal basis. Specifically, AFFA contends that the instant agreement is not prompted by a real need for change; that the changes proposed result from problems associated with IATA's internal administrative changes; that IATA carriers have arbitrarily reduced the discount to 50 percent for tickets awarded under the productivity feature; that the burden falls upon IATA to justify these changes; that the current system satisfied Board requirements that such fares for agents be related to their need for business travel and the likelihood of promoting air cargo traffic; that the new formula unjustly discriminates against cargo agents and forwarders in favor of passenger agents who receive more reduced-fare tickets under a different formula; and that the proposed formula would wreak great hardship on U.S. forwarder/agents due to decreased tickets received and discounts offered.

AFFA urges, at a minimum, retention of the status quo but recommends adoption of similar allocation procedures as afforded foreign cargo agents (except reduced-fare tickets for spouses). Alternatively, AFFA suggests two 75 percent discount tickets plus additional 75-percent discount tickets per each additional $500,000 gross billings; or two 75-percent discount tickets per qualified employee.

AEI, Emery, IAAA, and NCBFAA likewise express opposition to the instant agreement, citing objections and recommendations similar to those expressed by AFFA. Additionally, AEI and Emery especially advocate equal treatment for air freight forwarders vis-a-vis U.S. cargo agents. Specifically, Emery states that sales generated as an air freight forwarder will not count in their productivity base with consequent reduction in their reduced-fare tickets. Finally, NCBFAA alleges the proposed agreement discriminates against the small-volume agent in favor of the large-volume agent and will reduce the small agent's travel opportunity to expand cargo traffic; and therefore recommends that all U.S. cargo agents be given equal travel rights.

Upon consideration of the comments and data received, the Board reiterates its view that continuation of a program granting reduced-fare concessions to cargo agents is warranted. The productivity feature incorporated in the instant agreement seems to conform sufficiently with previously-stated Board policy that

[1] Country averages, as well as each agent's allotment, are to be determined by the IATA Agency Administrator on the basis of annual reports already required of each agent under terms of the IATA Cargo Agency Agreement. $1,000,000 would be used as the average for any country whose actual average exceeds that amount. Reports submitted for a given year would be used to calculate quotas for the following year.

[2] We shall also herein act upon an IATA resolution dealing with reduced-fare concessions for foreign-based IATA cargo agents. This resolution allows each agent registered for a specific country to be issued two 75-percent discount tickets by each carrier per year; a maximum of 40 75-percent discount tickets under the productivity feature, based upon commissionable sales; 20 additional 50-percent discount tickets; and includes reduced-fare travel provisions for spouses of IATA-approved cargo agents.

[3] American has filed comments in support of TWA's position.

[4] See Order 72-8-99, dated August 23, 1972 in which the Board disposed of Seaboard's petition to reconsider Order 72-5-59 approving reduced-fare transportation for foreign-based cargo agents.

a system of reduced-fare concessions should be closely related to actual business requirements of each agent in the promotion of air cargo transportation.

Turning first to claims by various parties that approval of the differing resolutions pertaining to U.S.-based cargo agents and to foreign-based cargo agents would discriminate against the former in favor of the latter, the Board has historically declined to exercise jurisdiction over foreign-based cargo agents noting that they operate under differing laws and that their activities are more appropriately the concern of their respective governments. The Board has also noted, to a lesser degree, the practical difficulties of enforcement. Moreover, to require more restrictive standards, with respect to travel into the United States, in order to achieve uniformity among agents moving in "air transportation" as defined by the Act could serve to create a greater incentive for the sale of cargo transportation between other countries and thus negatively affect U.S. interests. Therefore, we shall herein approve that portion of the agreement dealing solely with IATA cargo agents based outside the U.S., subject to standard conditions.

Nor are we persuaded that differences in the allocation of reduced-fare tickets between cargo sales and passenger sales agents constitute a discrimination. It would appear to us that such differences stem from variations between the two activities, in the nature of customers, businesses, and employees. We do not perceive any basis at this time on which to require identical allocation systems for IATA cargo sales and passenger sales agents.

As to the contention of NCBFAA that the agreement would discriminate against small agents, we believe that evaluation of data submitted by the airlines indicates that the reverse is more likely to occur. According to data submitted by the IATA carriers, the location allocation would afford approximately 355 agents two 75-percent tickets and 76 agents more than two tickets. Under the productivity concept 343 agents would receive two tickets while 88 agents would receive more than two. Moreover, the total number of tickets accorded agents registered by country is expected to increase from 1406 to 1484. We also note that of a total 1706 tickets authorized in 1972 (including 320 tickets for 160 agents still registered under the location concept) only 34.5 percent or 590 were actually used, indicating that U.S.-based IATA cargo sales agents are not utilizing all the tickets available to them under the present system.

Although TWA indicates that sales generated by an agent in his capacity as an air freight forwarder, which are not commissionable, would be included in the productivity base for purposes of allocating reduced-fare tickets, our examination of the agreement suggests otherwise. The agreement specifically states that determination of average sales must be in accordance with the provisions of IATA Resolution 821, Subparagraph (5) (e), which refers only to commissionable sales; therefore, air freight forwarder consolidations (under their own tariffs and waybills) would appear not eligible for inclusion in the productivity base. It has long been the Board's opinion that those acting in their own behalf as an air freight forwarder should not be granted free or reduced-rate transportation since such transportation would constitute an unlawful refund or remittance of valuable consideration to a special class of shipper.[5] We believe it consistent with this position that sales generated by an agent acting in this capacity should be excluded from the productivity base upon which reduced-fare tickets would be extended.

Seaboard urges that the Board require extension of the reduced-fare privileges granted IATA agents to agents acting on behalf of non-IATA carriers; specifically, we are requested to condition our approval of the resolution so as to require IATA carriers to honor Seaboard's requests for reduced-fare carriage for agents acting in its behalf and to require inclusion of sales by these agents in the productivity base for ticket allocation. We can perceive no basis from the comments received to go beyond the issue here before us, that is the issue of whether or not the IATA carriers' program for agents acting on their behalf is a reasonable one. Seaboard has not demonstrated injury and, in view of past usage of reduced-fare tickets, it does not appear that these privileges are of such significance as to create an unfair competitive situation vis-a-vis IATA carriers. In the last analysis, the agents' reward stems from commissions on their sales and profits from their activities. Moreover, we would think it irrational for IATA carriers to deny IATA-approved agents reduced-fare transportation because those agents also act in behalf of non-IATA carriers. Such practice would constitute a patent demonstration that the basic reduced-fare program is manipulated for purposes having nothing to do with the development of the air transportation cargo market, but instead represent a manipulable reward system contrary to Board policy. Nevertheless, in order to make explicit our understanding that an IATA agent who also holds appointments from non-IATA carriers shall not be excluded or limited from obtaining reduced-fare transportation on IATA carriers because of such appointment, we will attach appropriate conditions to our approval of the resolutions.

Finally we come to the question of the percentage discount to be offered. As indicated, the two regular tickets allocated annually to each agent on a country-of-registration basis are to be discounted 75 percent from the otherwise applicable fare. However, the tickets granted in proportion to an agent's productivity would be discounted only 50 percent, and that only from the full normal fare. Several objections specifically directed at this issue have been raised, and no U.S. carrier party to the agreement has provided rationale as to why the discounts and the fares upon which they would be based should vary.

Historically, all reduced-rate tickets have been authorized at a 75-percent discount from the otherwise applicable air fare. While it appears that the total allocation of reduced-fare tickets would not materially change under the new concept, the agents receiving reduced-rate tickets under the productivity aspect of the program would be required to pay more for their transportation than previously. In the absence of information from the carriers, we are unable to discern any circumstances which would warrant such an increase in total cost to the agent for what is essentially the same amount of reduced-rate travel. Accordingly we will condition our approval of the agreement to require that all tickets granted under the resolution shall be based on the same discount; *i.e*, 75 percent of the otherwise applicable fare.

The Board, acting pursuant to sections 102, 204(a) and 412 of the Act, does not find that the following resolutions, which are incorporated in the agreement as indicated, are adverse to the public interest or in violation of the Act: *Provided*, That approval is subject to the conditions stated herein:

Agreement C.A.B.	IATA No.	Title	Application
23516			
R-3	203a...	Reduced Fares for Cargo Agents (U.S.A. Only).	1; 2; 3; 1/2; 2/3; 3/1; 1/2/3.

Provided that with respect to Resolution 203a:

(1) Free or reduced-rate transportation for United States-based agents shall be limited to the extent permitted by the provisions of Resolution 203a and shall not be provided under entertainment or instruction provisions of other cargo agency resolutions, e.g., Resolution 810b—Section J, and Resolution 811b—Paragraph (1) (e);

(2) All reduced-rate transportation authorized under the provisions of the resolution shall be provided at a discount of 75 percent of the otherwise applicable fare; and

(3) Notwithstanding any provision or interpretation of said resolution, IATA-approved agents shall not be precluded or limited in obtaining reduced-fare transportation on IATA carriers because such agents act pursuant to appointments received from non-IATA carriers.

Agreement C.A.B.	IATA No.	Title	Application
23516			
R-4.....	203c...	Reduced Fares for Cargo Agents (Except U.S.A.).	1; 2; 3; 1/2; 2/3; 3/1; 1/2/3.

Provided, That with respect to Resolution 203c:

(1) Approval of the provisions embodied in said agreements, insofar as they

[5] International Airfreight Forwarder Investigation, 27 C.A.B. 658, 663–667, decided November 6, 1958.

V 38-136 JUL 17 73 XUM

are applicable in air transportation as defined by the Federal Aviation Act of 1958, shall not be construed as:

(a) An exemption from the requirements of filing tariff provisions as a condition precedent under section 403 of the Federal Aviation Act of 1958 to the issuance of passes to any person described in said agreements;

(b) A determination as to whether a violation of Section 404 of the Federal Aviation Act of 1958 would result from the issuance of passes pursuant to such agreements whether or not tariff provisions applicable thereto have previously been filed with the Board; and

(c) An exemption from the provisions of the Board's Economic Regulations relating to tariffs for free or reduced-rate transportation; and

(2) Notwithstanding any provision or interpretation of said resolution, IATA-approved agents shall not be precluded or limited in their obtaining reduced-fare transportation on IATA carriers because such agents act pursuant to appointments received from non-IATA carriers.

Accordingly, it is ordered, That:

Agreement C.A.B. 23516, R–3 and R–4, be and hereby is approved subject to the conditions stated herein.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] EDWIN Z. HOLLAND,
Secretary.

Forest Service

Draft *Date*
Northern Region's Slash Disposal Program 07/05
The statement discusses the Northern Region's Slash Disposal Program. Slash treatment options include: treatment with prescribed fire; mechanical treatment; isolation and or limited treatments; and no treatment. Adverse impact may occur to air quality and soil stability. (ELR ORDER # 31110) (NTIS ORDER # EIS 73 1110D)

Winter Park Management, Arapaho National Forest 07/05
Colorado
County: Grand
The statement refers to the management of the Winter Park Management Unit of the Arapaho National Forest, in order to protect its suitability for winter sports activities, and to expand its capacity. (44 pages)
(ELR ORDER # 31118) (NTIS ORDER # EIS 73 1118D)

Little Slate Creek, Nezperce National Forest 07/05
Idaho
Proposed is the implementation of the Little Slate Creek Unit Plan, which calls for multiple use management of 43,690 acres of the Little Slate Creek Drainage District, Nezperce National Forest. Recommended in the plan is development beginning with the harvest of 193 million board feet of mature timber over a 15 year period and the construction of a mid-elevation main access route through the drainage. Adverse impact will include the loss of roadless qualities, increases in soil disturbance, and increased hazard to water quality. (80 pages)
(ELR ORDER # 31121) (NTIS ORDER # EIS 73 1121D)

Multiple Use, North Bridger Mountains, Gallatin N.F. 07/05
Montana
County: Gallatin
Proposed is the implementation of a Multiple Use Management Plan for the North Bridger Mountains, Bozeman Ranger District, Gallatin National Forest. Total area is 60,000 acres, of which 42,000 acres is National Forest lands. Included will be construction of a new road and improvement of others, harvesting of timber, and maintaining roadless areas. Five thousand acres of roadless area will be lost; there will be a loss of game cover and increases in soil disturbance. (40 pages)
(ELR ORDER # 31116) (NTIS ORDER # EIS 73 1116D)

Final
Bitterroot National Forest 07/06
Montana
County: Ravalli
The statement considers the implementation of a revised Multiple Use Plan for the Moose Creek Planning Unit of the Forest. The plan considers the construction of roads and the cutting (including clearcutting) of timber in selected sections of 20,000 acres of Forest, and management for recreation in others. The plan will affect water and air quality (the latter due to the burning of log slash), natural landscapes, and wildlife habitat. (177 pages)

Yamhill County Bridge 07/03
Oregon
County: Yamhill
Proposed is the construction of a bridge and connecting approaches across the Willamette River at Mile 62.8. Approximately 84 acres of land will be committed to the project. (225 pages)
(ELR ORDER # 31108) (NTIS ORDER # EIS 73 1106D)

Final *Date*
Air Installations Compatible Use Zones 07/02
The proposal is the publishing of a policy which would recognize the characteristics of air installations operations as incompatible with certain possible land uses in the vicinity of the installation. The policy would define the methods by which compatible use zones may be determined and delineated, and require that the Military Departments develop programs to establish compatible use zones. Methods would range from local zoning, through state legislation, and acquisition of restrictive easements or fee title by the Federal Government. The establishment of compatible use zones would promote the development of non-noise sensitive activities in the high noise area. (140 pages)

Draft *Date*
Pottstown Flood Protection Project 07/03
Pennsylvania
The proposed project consist of 2 miles of channel improvements in the Schuykill River and removal of a construction in Manatawny Creek which exists under High Street Bridge. Loss of aquatic life will occur. (24 pages)
(ELR ORDER # 31105) (NTIS ORDER # EIS 73 1105D)

Hay Creek, Birdsboro 07/05
Pennsylvania
County: Berks
The proposed project is the construction of levees and floodwalls along portions of Hay Creek. East Main and First Street Bridges will be raised by 9 and 7 feet respectively, to accommodate the levees and floodwalls. An increase in water turbidity will occur. (32 pages)
(ELR ORDER # 31114) (NTIS ORDER # EIS 73 1114D)

Final
Tred Avon River, Maryland 07/05
Maryland
County: Talbot
The proposed project is the hydraulic dredging of a channel in the Tred Avon River for navigation purposes. The project will disturb or remove benthic organisms, such as oysters and clams; temporarily increase turbidity and silt load of the rivers; and remove 57 acres of agricultural land for spoil, thus destroying the wildlife habitat. Increases in noise will occur. (62 pages)
COMMENTS MADE BY: USDA USCG USN DOC EPA (ELR ORDER # 31122) (NTIS ORDER # EIS 73 1122F)

Willamette and Columbia Rivers 07/05
Washington Oregon
The statement refers to the proposed construction of a 40' deep navigation channel, (1600' wide), at Slaughters Bar; and a 40' x 1200' turning basin at Longview Bridge. Dredged spoil will be deposited at Lord Island, Slaughters Bar, and Howard Island (at 3.1 million cu. yds. initially and 450,000 cu. yds. annually thereafter). Approximately 509 acres of wildlife habitat will be lost to the project.

Sewage Treatment Plant, Fulton and Cobb Counties 07/06
Georgia
Counties: Fulton, Cobb
The statement refers to projects which have been funded or are proposed for funding. Included are interceptor sewers, pumping stations and force mains, and expansions to the existing Bay Creek sewage treatment plant. Sanitary sewage will be treated prior to discharge to the Chattahochee River. The primary adverse impact of the action is the stimulation of secondary effects caused by urban development, including a reduction of the aesthetic values of the Chattahochee River corridor. (105 pages)
(ELR ORDER # 31135) (NTIS ORDER # EIS 73 1135D)

Marion Sewage System 07/06
North Carolina
County: McDowell
The statement refers to the proposed construction of wastewater pumping stations, force mains, interceptor sewers, and a wastewater treatment plant with discharge to the Catawba River. Adverse impact will include construction disruption, the loss of flora, and soil erosion. (78 pages)
(ELR ORDER # 31133) (NTIS ORDER # EIS 73 1133D)

Final *Date*
Sewage System, Fort Lauderdale 07/02
Florida
County: Broward
The proposed action is the construction of a larger and more advanced sewage collection and treatment system. Total capacity will be expanded from 19.5 MGD to 38 MGD. Among the project measures are: multi-media filtration, nitrification, and breakpoint chlorination at the Port Everglades and Coral Ridge Plants; redirection of the flow from the Executive Airport Plant to north Broward; interconnection among several plants; and related work. Completion of the project will allow continued area population growth. (The statement "Ocean Outfalls and Other Methods of Treated Wastewater Disposal in Southeast Florida," NTIS # EIS 73 0491F, 3/22/73, should be considered part of the statement by reference.)

FEDERAL HIGHWAY ADMINISTRATION

Draft *Date*
County Highway 30 and Ala. Route 229 07/05
Alabama
County: Macon Elmore
Proposed is the continuation of Macon County Highway 30 to Milstead and the reconstruction of Alabama Route 229 from Milstead to Tallasee. Total length of the project is approximately 9.47 miles. Approximately 195 acres of agricultural land will be committed to the project; one tenant family will be displaced. (15 pages)
(ELR ORDER # 31120) (NTIS ORDER # EIS 73 1120D)

U.S. Highway 30, Nebraska 07/02
Nebraska
County: Dawson
The project involves the reconstruction of 1.84 miles of US 30 through the City of Lexington. The reconstruction involves substituting a storm sewer for existing open drainage ditches; constructing a 4-lane divided and undivided roadway section in place of the 2-lane rural roadway section; and providing a sidewalk, lighting and signalization. Two properties will be served to acquire additional right-of-way. Water and air pollution will occur during construction; the ambient noise level will increase. (12 pages)
(ELR ORDER # 31101) (NTIS ORDER # EIS 73 1101D)

Draft *Date*
U.S. Route 4, Vermont 07 03
Vermont
County: Rutland
Proposed is the construction of approximately 4.3 miles of US Route 4 on new location. The project will be a 4-lane divided, controlled-access facility and involves structures at five locations. Three hundred and nine acres are required for right-of-way. One residence, one vacant house and one wood products business will be displaced; two farm operations will be affected. (123 pages)

ENVIRONMENTAL PROTECTION AGENCY

ENVIRONMENTAL IMPACT STATEMENTS AND OTHER ACTIONS IMPACTING THE ENVIRONMENT

Availability of EPA Comments

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 and section 309 of the Clean Air Act, as amended, the Environmental Protection Agency (EPA) has reviewed and commented in writing on Federal agency actions impacting the environment contained in the following appendices during the period of June 1, 1973, and June 15, 1973.

Appendix I contains a listing of draft environmental impact statements reviewed and commented upon in writing during this review period. The list includes the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix II contains the definitions of the classifications of EPA's comments on the draft environmental impact statements as set forth in Appendix I.

Appendix III contains a listing of final environmental impact statements reviewed and commented upon in writing during this reviewing period. The listing will include the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix IV contains a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing includes the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix V contains a listing of the names and addresses of the sources for copies of EPA comments listed in Appendices I, III, and IV.

Copies of the EPA Order 1640.1, setting forth the policies and procedures for EPA's review of agency actions, may be obtained by writing the Public Inquiries Branch, Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460. Copies of the draft and final environmental impact statements referenced herein are available from the originating Federal department or agency or from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

Dated: July 5, 1973.

SHELDON MEYERS,
Director, Office of Federal Activities.

The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

APPENDIX III

FINAL ENVIRONMENTAL IMPACT STATEMENTS FOR WHICH COMMENTS WERE ISSUED BETWEEN JUNE 1, 1973 AND JUNE 15, 1973

Identifying No.	Title	General nature of comments	Source for copies of comments
F-COE-36032-VA	Four mile run local flood protection project, city of Alexandria and Arlington County, Virginia.	EPA concluded that the project as proposed not entail an unacceptable effect on aspects of environmental quality subject to its regulatory authority. However, the project fails to incorporate adequate measures which would minimize its positive contribution to environmental quality. These measures relate particularly to comprehensive planning of flood control in relation to future development and to preservation of wetlands.	D
F-COE-36014-PA	Covanesque lake project, Tioga County, Pennsylvania.	EPA has reservations concerning the environmental effects of the project as proposed in the draft statement. The draft statement does not clearly set forth the significance of the proposed reservoir is like. The proect plan incorporates use of chemical control alien growths; EPA believes mechanical methods should be used where possible. Water released from the dam may contain a reduced concentration of dissolved oxygen. There is no provision in the project plan to require downstream aeration facilities as a mitigation measure. EPA believes that the issues raised in our comments on the final statement be resolved before construction of the project is initiated.	D
F-COE-36001-HI:	Nawiliwili Small Boat Harbor, Kauai, Hawaii.	EPA found that the final statement adequately resolved the environmental concerns raised on the draft statement.	J
Tennessee Valley Authority			
F-TVA-36011-TN:	Dayton Ferry Nuclear Plant, units 1, 2, and 3, Tennessee.	EPA expressed environmental reservations with respect to the proposed project. The major concern centers on the environmental effects that could arise from the operations of the reactor cooling towers. EPA recommended that recommendations which will minimize the environmental effects created during operation.	A
Department of Transportation			
F-FHW-41760-TN:	SR-29 (Project F-031-1) Morgan County, Tennessee	The draft statement was not submitted to EPA for review. However, EPA has no objections to the proposed project as reflected in the final statement.	E
F-FHW-41702-KY:	Multi-Agency Open Cut, Pikeville, Pike County, Kentucky	EPA generally agrees with the proposed project. However, the final statement did not provide sufficient details needed for the evaluation of the control of seeps and springs which daylight in the proposed cut. Information was also absent on maintenance and inspection.	E
F-FHW-41859-WV:	West Virginia Route 56, Ravenswood connector to I-77, Jackson County, West Virginia	The final statement adequately resolves the issues raised by EPA on the draft statement.	D

APPENDIX II

DEFINITION OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

LO—Lack of Objection

EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental Reservations

EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these aspects.

EU—Environmentally Unsatisfactory

EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1—Adequate

The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient Information

EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

V 38 136 JUL 17 73 XUM

APPENDIX IV

REGULATIONS, LEGISLATION AND OTHER FEDERAL AGENCY ACTIONS FOR WHICH COMMENTS WERE ISSUED BETWEEN JUNE 1, 1973 AND JUNE 15, 1973

Agency	Title	General Nature of Comments	Source for copies of comments
Interstate Commerce Commission			
I. ICC-33(21-00:	Federal-aid Railroad Act of 1973.	EPA supports the intent of the proposed act. However, EPA is concerned over the exclusion from the act of environmental considerations beyond the general statement expressed under the congressional findings and declaration of purpose in title I.	A

EFFLUENT STANDARDS AND WATER QUALITY INFORMATION ADVISORY COMMITTEE

Agenda and Notice of Public Hearings

Notice is hereby given of three public hearings to be held by the Effluent Standards and Water Quality Information Advisory Committee ("the Committee") established pursuant to section 515 of the Federal Water Pollution Control Act, as amended, 33 U.S.C. section 1251 et seq. ("the Act"). The first hearing will be held on July 30, 1973 at 9:30 a.m. in Room D-23, O'Hare Inn, 6600 N. Mannheim Road, Rosemont, Illinois. The second hearing will be held on August 1, 1973 at 9:30 a.m. in Room 1750, Environmental Protection Agency, 26 Federal Plaza, New York, New York. The third hearing will be held on August 3, 1973 at 9:30 a.m. in Room 218, Environmental Protection Agency, 100 California Street, San Francisco, California. The hearings will be open to the public.

On Friday, July 8, 1973, the Acting Administrator of the Environmental Protection Agency published a proposed list of toxic pollutants in the FEDERAL REGISTER at pages 18044-45 in accordance with section 307(a)(1) of the Act. The proposed list consisted of the following pollutants:

LIST OF TOXIC POLLUTANTS

1. Aldrin (1, 2, 3, 4, 10, 10-hexachloro- 1, 4, 4a, 5, 8, 8a hexahydro- 1, 4, 5, 8 - endo-exodimethanonaphthalene) Dieldrin (1, 2, 3, 4, 10, 10-hexachloro- 6, 7- epoxy-1, 4, 4a, 5, 6, 7, 8, 8a-octahydro-1, 4-endo, exo-5, 8-dimethanonaphthalene)
2. Benzidine and its salts (para-para'-diaminobiphenyl)
3. Cadmium and all cadmium compounds
4. Cyanide and all cyanide compounds
5. DDD(TDE) 1, 1- dichloro-2, 2-bis (para-chlorophenyl)-ethane DDE (dichlorodiphenyldichloroethylene) 1, 1- dichloro-2, 2-bis (para-chlorophenyl)- ethylene DDT (dichlorodiphenyltrichloroethane) 1, 1, 1-trichloro-2, 2-bis (para-chlorophenyl)- ethane
6. Endrin (1, 2, 3, 4, 10, 10-hexachloro-6, 7-epoxy-1, 4, 4a, 5, 6, 7, 8, 8a-octahydro-1, 4-endo-endo-1,8-dimethanonaphthalene)
7. Mercury and all mercury compounds
8. Polychlorinated biphenyls (PCB's)
9. Toxaphene (chlorinated camphene)

Pollutants chosen for inclusion on this initial list meet the following criteria:

1. There is evidence that, either directly or through transformation or bioaccumulation, they are toxic, as defined by section 502(13), at extremely low concentrations in water, and
2. They are discharged in significant amounts from point sources, and
3. Point source discharges are known to have resulted in incidents involving the types of adverse effects cited in section 502(13), and/or
4. There is a significant potential for the occurrence or recurrence of such incidents as a result of point source discharges, and
5. Standard setting under section 307(a) is necessary because the prospective timing and effectiveness of abatement action under other provisions of the Act are not commensurate with the nature and seriousness of the problems identified by the above criteria, and
6. Adequate data are available to establish an effluent standard meeting the requirements of the Act.

The purpose of the hearings noticed hereby will be to consider such scientific and technical information as is pertinent to the determinations required to be made by the Administrator when proposing effluent standards for toxic pollutants.

The hearings may be adjourned to subsequent dates in order to obtain further information.

Additional information concerning the hearings may be obtained by writing Dr. Martha Sager, Chairman, Effluent Standards and Water Quality Information Advisory Committee, Environmental Protection Agency, Room 821, Crystal Mall, Building 2, Washington, D.C. 20460. The hearings will be held pursuant to the direction of the Chairman and in accordance with hearing procedures published in the FEDERAL REGISTER on Wednesday, April 11, 1973, at pages 9179-80. Certain persons or organizations may be invited by the Committee to appear and give oral testimony. Others desiring to appear and give oral testimony should contact the Committee at 703/557-7390 or may request the opportunity to appear by telegraphic notice or letter to Dr. Sager at the address listed above. Due to limitations of time, it may be necessary to limit the number of witnesses who may appear and give oral testimony. Witnesses will ordinarily be limited to 15-minute presentations to be followed by 15-minute periods of questions from the Committee.

Although the opportunity to appear and give oral testimony must necessarily be limited because of the short time available to the Committee to hold public hearings and obtain additional information pursuant to the provisions of section 515 of the Act, all persons desiring to submit written statements or testimony to the Committee are encouraged to do so. Such statements or testimony should clearly indicate the pollutant or pollutants concerned and should be addressed to the "Effluent Standards and Water Quality Information Advisory Committee" at the address listed above.

Statements presented at the hearings or otherwise submitted to the Committee will be available to the public pursuant to section 10(b) of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), subject to the assessment of reasonable reproduction charges. Requests for such information should be directed to Dr. Martha Sager, Chairman, Effluent Standards and Water Quality Information Advisory Committee, Environmental Protection Agency, Room 821, Crystal Mall, Building 2, Washington, D.C. 20460.

Dated July 11, 1973.

ROBERT L. SANSOM,
Assistant Administrator for Air and Water Programs.

HEARING ON COMPLIANCE SCHEDULES FOR THE STATE OF KENTUCKY

Cancellation Notice

The public hearing scheduled for Thursday, July 26, 1973, in Frankfort, Kentucky (38 FR 16187), is hereby cancelled. This hearing was to be held for the purpose of permitting public participation in the development of compliance schedules for certain air pollution sources subject to Kentucky's plan for implementing national ambient air quality standards. Cancellation is necessitated by the recent court decision in "East Kentucky Rural Electric Cooperative Corp., et. al. v. EPA," Case No. 72-1629 (6th Cir., June 28, 1973), and a related case (72-1632) which vacated the Administrator's approval of the Kentucky implementation plan. A hearing on proposed compliance schedules for Kentucky will be held at a future time which will be announced in the FEDERAL REGISTER.

ALAN G. KIRK II,
Acting Assistant Administrator for Enforcement and General Counsel.

JULY 12, 1973.

UNIROYAL CHEMICAL

Notice of Filing of Petition Regarding Pesticide Chemical

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 408(d)(1), 68 Stat. 512; 21 U.S.C. 346a(d)(1)), notice is given that a petition (PP 3F1408) has been filed by Uniroyal Chemical, Division of Uniroyal, Inc., Bethany, CT 06525, proposing establishment of tolerances (40 CFR Part 180) for residues of the plant regulator succinic acid 2,2-dimethyl hydrazide in or on the raw agricultural commodities tomatoes at 40 parts per million and cranberries and pears at 20 parts per million.

The analytical method proposed in the petition for determining residues of the plant regulator is a colorimetric procedure in which the residue is hydrolyzed with 50 percent sodium hydroxide. The resulting unsymmetrical dimethyl hydrazine is distilled and reacted with trisodium pentacyanoamine ferrate to form a specific red color at pH 5. The color is measured spectrophotometrically at 490 and 600 nanometers.

Dated: July 11, 1973.

HENRY J. KORP,
Deputy Assistant Administrator for Pesticide Programs.

ARIZONA PUBLIC SERVICE CO.

Notice of Extension of Agreement

JULY 10, 1973.

Take notice that Arizona Public Service Company (Arizona) on June 11, 1973, tendered for filing an extension of Arizona Public Service Company, Rate Schedule FPC No. 10 to an expiration date of July 31, 1974. Arizona states that the extension is necessary to prepare the physical plant necessary to effectuate the agreement contained in the rate schedule. Arizona also says that all parties to the agreement concur in the extension.

Any person desiring to be heard or protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's rules of practice and procedure. All such petitions or protests should be filed on or before July 24, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. E-8057]

COMISION FEDERAL DE ELECTRICIDAD

Application for Permit To Export Electric Energy

JULY 5, 1973.

Take notice that on February 28, 1973, Comision Federal de Electricidad (Applicant) filed with the Federal Power Commission, pursuant to Executive Order No. 10485, dated September 3, 1953, and the Commission's regulations thereunder, an application for a Presidential Permit authorizing the construction, operation, maintenance and connection of certain electric transmission facilities at the international border between the United States and Mexico. The facilities for which authorization is sought include one 3-phase electric power line operating nominally at 138,000 volts, 60 Hertz, and extending across the international border from a point near Laredo, Texas to Nuevo Laredo, Tampico, Mexico. Applicant has indicated to the Commission that the line will be used in the interchange of electric energy with an electric system in Mexico and that any transmission to Mexico will be in accordance with an authorization

V 38 136 JUL 17 73 XUM

from the Commission, pursuant to Section 202(e) of the Federal Power Act, for transmission of electric power and energy across the international border for use in Mexico.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 20, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to the proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

[Project No. 2681]

DUKE POWER CO.

Application for Withdrawal

JULY 6, 1973.

Public notice is hereby given that an application was filed July 3, 1972, under the Federal Power Act (16 U.S.C. 791a–825r) by the Duke Power Company (Correspondence to: Mr. Carl Horn, Jr., President, Duke Power Company, P.O. Box 2178, Charlotte, North Carolina 28201), for approval of withdrawal of application for minor license for Walnut Cove Project No. 2681, located on the Dan River in Stokes County, North Carolina. The cities of Greensboro, High Point, Reidsville, Thomasville, and Winston-Salem are within a radius of approximately 30 miles.

The project is comprised of a 427-foot long, 26-foot high concrete dam, with integral powerhouse, in the following sections: (a) A 60-foot long west bulkhead, (b) a 38-foot long powerhouse, (c) a 36-foot long sluice gate section with three 5-foot square sluiceways, (d) a 141-foot long spillway with 4-foot flashboards to elevation 638.33 feet, and (e) a 71-foot long spillway section at elevation 638.33 feet, and (f) an 81-foot long east abutment; a reservoir at elevation 638.33 feet covering approximately 44 acres; a concrete and brick powerhouse containing two generating units, each rated at 272 kw; and appurtenant facilities.

Any person desiring to be heard or to make protest with reference to said application should on or before August 27, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

[Project 1494]

GRAND RIVER DAM AUTHORITY

Application for Change in Land Rights

JULY 6, 1973.

Public notice is hereby given that application for change in land rights was filed February 16, 1967, supplemented April 12, 1973, and April 19, 1973, under the Federal Power Act (16 U.S.C. 791a–825r) by the Grand River Dam Authority (Correspondence to: Mr. Richard W. Lock, General Manager, Grand River Dam Authority, P.O. Drawer G, Vinita, Oklahoma 74301) for constructed Project No. 1494, known as the Pensacola Project, located on the Grand River a navigable waterway of the United States, in Craig, Delaware, Mayes, Muskogee, Ottawa, Rogers, Tulsa, and Wagoner Counties, Oklahoma, and McDonald County, Missouri.

Applicant requests Commission approval of its proposal to sell 1.93 acres of land within the project boundary and of its revised project boundary to exclude this land from the Project. The tract involved would be used by the Town of Disney, Mayes County, Oklahoma as a public park. The tract is located 800 feet east of the end of Pensacola Dam and adjacent to lands previously conveyed to the Town of Disney on which a community recreation building has been constructed.

Any person desiring to be heard or to make protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Project 1494]

GRAND RIVER DAM AUTHORITY

Application for Change in Land Rights

JULY 6, 1973.

Public notice is hereby given that application for change in land rights was filed June 1, 1970, under the Federal Power Act (16 U.S.C. 791a–825r) by the Grand River Dam Authority (Correspondence to: Mr. Richard W. Lock, General Manager, Grand River Dam Authority, P.O. Drawer G., Vinita, Oklahoma 74301) for constructed Project No. 1494, known as the Pensacola Project, located on the Grand River, a navigable waterway of the United States, in Craig, Deleware, Mayes, Muskogee, Ottawa, Rogers, Tulsa and Wagoner Counties, Oklahoma, and McDonald County, Missouri.

Applicant requests Commission approval of its proposal to sell approximately 1.5 acres of land within the project boundary to Shangri-La Lodge. The proposed sale involved property on which Shangri-La Lodge has previously constructed an effluent holding basin. The holding basin is presently formed by a dike which would be elevated slightly above an elevation of 755.0 feet m.s.l. to prevent the treated effluent from running directly into Grand Lake the Project reservoir. The land involved is in Delaware County, southwest of Grove, Oklahoma.

Any person desiring to be heard or to make protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-14545 Filed 7-16-73;8:45 am]

[Project 2183]

GRAND RIVER DAM AUTHORITY

Application for Change in Land Rights

JULY 6, 1973.

Public notice is hereby given that application for approval of change in land rights has been filed under the Federal Power Act (16 U.S.C. 791a–825r) by Grand River Dam Authority (Correspondence to: Mr. L. M. Packard, General Manager, Grand River Dam Authority, P.O. Drawer G, Vinita, Oklahoma 74301) within the boundaries of Project No. 2183, known as the Markham Ferry Project, located in Mayes and Craig Counties, Oklahoma.

Grand River Dam Authority, Licensee for the Markham Ferry Project No. 2183, requests Commission approval for the sale of two parcels of land (totalling 10.96 acres) within the project boundary.

The first tract, comprising 2.46 acres, is located in the following described subdivision: Indian Meridian, T. 21 N., R. 20 E., Section 22 N½NE¼SW¼NE¼ Mayes County, Oklahoma. The owner has constructed on this tract a public use and recreational facility consisting of a marina, camping and picnic area, and trailer facilities for permanent and transient use.

The second tract, comprising 8.5 acres, is located in subdivision Indian Meridian, T. 21 N., R. 20 E., Section 22, S½NE¼SW¼NE¼ and that part of the S½NW¼SW¼NE¼ lying east of the K.O. & G. Railroad and above the 625 feet countour in Mayes County, Oklahoma. The transferee has constructed on a portion of the tract a water and septic system, a trailer court and has allowed placement of public utilities services.

Any person desiring to be heard or to make protests with reference to said application should on or before August 10, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

[Docket No. E-8256]

NEW YORK STATE ELECTRIC AND GAS CORP.

Amendment to Filing

JULY 5, 1973.

Take notice that on June 28, 1973, New York State Electric and Gas Corporation (New York) tendered for filing a letter agreement dated June 19, 1973, which constitutes an amendment to the agreement dated May 25, 1973, between New York and Central Hudson Gas and Electric Corporation (Central Hudson). New York states that the earlier agreement provides for the sale by New York to Central Hudson of 42,000 kilowatts of firm capability and associated energy for the period commencing on June 1, 1973, and terminating on June 30, 1973.

New York submits that the later agreement filed herewith extends the term of the earlier agreement to August 1, 1973, and also amends to provide for the sale of 45,000 kilowatts of firm capability and associated energy from July 1, 1973, through July 31, 1973, and 7,000 kilowatts of firm capability and energy from August 1, 1973, to August 31, 1973. Estimated revenues to be derived over the two month period from this amendment total $289,151. An effective date of July 1, 1973, is requested.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with § 1.8 and § 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before July 23, 1973. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Project 309]

PENNSYLVANIA ELECTRIC CO.

Application for Renewal

JULY 6, 1973.

Public notice is hereby given that application for approval to grant a renewal of a lease for 2.5 acres of project lands for recreational use to the Commonwealth of Pennsylvania on behalf of the Pennsylvania Fish Commission, has been filed under the Federal Power Act (16 U.S.C. 791a–825r) by Pennsylvania Electric Company (Correspondence to: Mr. W. R. Thomas, Secretary and Treasurer, Pennsylvania Electric Company, 1001 Broad Street, Johnstown, Pennsylvania 15907) in Piney Project No. 309, located on the Clarion River in Clarion County, Pennsylvania.

The Licensee is currently operating the project under an annual license and will continue in that status until the Commission acts on the Licensee's application for a new license under section 15 of the Federal Power Act.

The application seeks approval of a proposed amendment to the original ten years lease agreement which expired June 1, 1972. The proposed amendment to the lease would reactivate the original lease on a year to year basis, with the period running from October 14, to October 13.

The present recreational site includes a picnic area, fishing access, and a boat ramp. The Pennsylvania Fish Commission intends to expand its present dock facilities and to sublease to a third party the right to operate a concession stand and boat livery. The License further

V 38 I 136
JUL 17 73
XUM

states that the rights proposed to be granted will have no adverse affect on the operation of the project.

Any person desiring to be heard or to make protest with reference to said application should on or before August 13, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to a proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CI73-762]

RICHARD H. FLEISCHAKER

Amendment to Application

JULY 6, 1973.

Take notice that on June 22, 1973, Richard H. Fleischaker (Applicant), Singer-Fleischaker Oil Company, P.O. Box 663, Oklahoma City, Oklahoma 73101, filed in Docket No. CI73-762 an amendment to the application filed on May 7, 1973, in said docket pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce to Panhandle Eastern Pipe Line Company from acreage in Beaver County, Oklahoma, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

In his application of May 7, 1973, Applicant stated that he intends to sell up to 2,000 Mcf of gas for one year at 50.0 cents per Mcf at 14.65 psia, subject to upward and downward Btu adjustment, within the contemplation of § 2.70 of the Commission's General Policy and Interpretations (18 CFR 2.70). Applicant now proposes to sell gas at 45.0 cents per Mcf of gas at 14.65 psia subject to upward and downward Btu adjustment.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before July 23, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules. Persons who have heretofore filed protests and petitions to intervene need not file again.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-14550 Filed 7-16-73;8:45 am]

[Docket No. RI73-313]

SKELLY OIL CO.

Notice of Petition

JULY 6, 1973.

Take notice that on May 29, 1973, Skelly Oil Company (Petitioner), P.O. Box 1650, Tulsa, Oklahoma 74102, filed, pursuant to section 4 of the Natural Gas Act and section 1.7(b) of the Commission's rules of practice and procedure, a petition for a clarification of the terms "dedication" or "commitment" to the interstate market or, in the alternative, for special relief in Docket No. RI73-313 pursuant to Commission Order No. 481, issued April 12, 1973. Petitioner requests the Commission to issue an order for a waiver of the January 1, 1976, moratorium date for filing for a rate increase in excess of the applicable area rate prescribed in Opinion No. 595, Area Rate Proceeding, et al. (Texas Gulf Coast Area), Docket Nos. AR64-2, *et al.*, 45 F.P.C. 674 (1971), appeal pending *subnom.* Public Service Commission for the State of New York, et al. v. F.P.C., No. 71-1828, (D.C. Cir.).

Petitioner, and other interested parties, drilled a well in 1969 which resulted in discovery of a substantial reserve of natural gas. On September 1, 1970, Petitioner entered into a contract for the sale of natural gas with Transcontinental Gas Pipe Line Corporation (Transco). Sales to Transco described in the application are made from Block A-76, Brazos Area, Federal Domain, Offshore Matagorda County, Texas.

On March 1, 1971, Petitioner requested and was granted a Temporary Certificate. Petitioner's acceptance of the temporary certificate was filed with the Commission on April 1, 1971. Deliveries of natural gas to Transco under the temporary certificate commenced on June 23, 1972, from the well drilled in 1969, in accordance with the contract dated September 1, 1970.

Commission Opinion No. 595, Texas Gulf Coast Area Rate, was issued May 6, 1971. Therefore, the date of issuance of Opinion No. 595 was prior to the initial delivery date of the natural gas, but subsequent to the dates of the contract between Petitioner and Transco, and to the issuance and acceptance of the temporary certificate.

In Ordering Paragraph (G) of Opinion No. 595, the Commission promulgated § 154.111 of the regulations under the Natural Gas Act and not § 154.107(d) as Petitioner states in its application. This regulation provides that subject to certain conditions, the applicable area rate may be exceeded or producer's refund obligation be discharged if, from May 6, 1971 to January 1, 1976, producers "dedicate" or "commit" reserves in Texas Gulf Coast Area to jurisdictional sales.

Petitioner requests that the reserve related to the contract between Petitioner and Transco be declared by the Commission as "dedicated" or "committed" as of the date of initial delivery and not as of the dates of either the contract between Petitioner and Transco or the issuance and acceptance of the temporary certificate under which it commenced deliveries.

In the alternative, Petitioner requests that the Commission grant special relief pursuant to § 2.76 of the Commission's general rules of practice and procedure promulgated in Commission Order No. 481, issued April 12, 1973. To support its request for special relief, Petitioner states that: "Skelly should not be penalized for signing the contract at an early date or seeking Commission approval both of which were far in advance of anticipated production * * *".

Any person desiring to be heard or to make any protest with reference to said petition should on or before July 23, 1973, file with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

SOUTHWESTERN ELECTRIC POWER CO.

Order Providing for Hearing: Correction

MARCH 21, 1973.

In the Order Providing for Hearing, Issued March 20, 1973 and published in the FEDERAL REGISTER March 26, 1973 FR 38(7849): Add Footnote [1]:

Tex-La has formally waived its right to such increase in a telegram to the Commission dated July 1, 1972. Under the circumstances, it is evident that waiver was conditioned upon cancellation of the Company's prior rate schedule being rejected, so Tex-La will not be precluded by this waiver from increasing its rates to the Company.

KENNETH F. PLUMB,
Secretary.

[Rate Schedule No. 9, etc.]

SUN OIL CO., ET AL.

Rate Change Filings

JULY 6, 1973.

Take notice that the producers listed in the Appendix attached hereto have filed proposed increased rates to the applicable area new gas ceiling based on the interpretation of vintaging concepts set forth by the Commission in its Opinion No. 639, issued December 12, 1972.

The information relevant to each of these sales is listed in the Appendix.

Any person desiring to be heard or to make any protest with reference to said filings should on or before July 16, 1973, filed with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-339]

TENNESSEE GAS PIPELINE CO.

Notice of Application

JULY 10, 1973.

Take notice that on June 21, 1973, Tennessee Gas Pipeline Company, a division of Tenneco Inc. (Applicant), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP73-339 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of pipeline facilities in the East Cameron Block 33 Area, offshore Louisiana, and the transportation of natural gas for Continental Oil Company (Continental) and Cities Service Oil Company (Cities Service), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to construct approximately 0.4 mile of 16-inch pipeline extending from a Continental-Cities Service production platform to the end of Applicant's existing 16-inch pipeline in the said area of offshore Louisiana and approximately 14.42 miles of 16-inch pipeline extending from Applicant's pipeline in East Cameron Block 16 to a point of interconnection on Applicant's 26-inch line near the Grand Chenier Processing Plant in Cameron Parish. The total cost of the proposed facilities is $4,779,500 and will be financed from general funds and/or borrowings under the Applicant's revolving credit agreements.

It is stated that on November 14, 1972, Applicant signed gas purchase contracts with Continental and Cities Service dedicating one-half of the natural gas produced from their respective interests in Block 33 to it for 20 years or until the gas is depleted. On the same data, Applicant contracted with Continental and Cities Service to transport the other half of the natural gas produced from said area to a point onshore adjacent to Applicant's Sabine-Kinder pipeline. After very limited development of the area, Applicant presently estimates that 70 million Mcf of recoverable natural gas are available to it and plans to take into its own system through the proposed facilities approximately 50,000 Mcf of gas per day. Applicant also proposes to transport an estimated 25,000 Mcf of gas per day for Continental and an estimated 25,000 Mcf of gas per day for Cities Service through the proposed facilities at 4.39 cents per Mcf for 20 years or until the gas is depleted. It is stated that Continental and Cities Service have filed applications seeking Commission authorization for the proposed sale to Applicant in Docket Nos. CI73-744 and CI73-728, respectively.

Applicant states that it needs the deliverability and supply that the new gas source will provide in order to assure an uninterrupted supply of gas to itself and its customers and to offset declines in gas supplies from other sources.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 6, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

MARY B. KIDD,
Acting Secretary.

[FR Doc.73-14553 Filed 7-16-73;8:45 am]

[Docket No. CP70-185]

TENNESSEE GAS PIPELINE CO.

Notice of Petition To Amend

JULY 6, 1973.

Take notice that on June 25, 1973, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP70-185 a petition to amend the Commission's order issued pursuant to section 7(c) of the Natural Gas Act on June 22, 1970 (43 FPC 937) in said docket so as to authorize Petitioner to sell gas to the Springfield Gas Light Company (Springfield) under Petitioner's CD-6 rate schedule, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

The Commission by order of May 31, 1973, in the subject docket, denied Petitioner's tender, pursuant to section 4 of the Natural Gas Act, of the gas purchase agreement of January 10, 1973, between Petitioner and Springfield, which changed the service previously authorized from that under Petitioner's G-6 rate schedule to that under Petitioner's CD-6 rate schedule. The Commission's order did not preclude Petitioner from seeking separate authority to change its service to Springfield pursuant to section 7 of the Natural Gas Act.

Petitioner requests herein that the Commission's order be amended to permit it to sell gas to Springfield under its CD-6 Rate Schedule in lieu of the G-6 rate schedule. It is stated that although the total annual volume of gas supplied

V 38 I 136 JUL 17 73 XUM

to Springfield and the daily volume of 40,725 Mcf will not change, Petitioner does propose to increase the daily volume limit for delivery at the Agawam delivery point to 34,875 Mcf from the maximum daily quantity of 29,322 Mcf and the daily volume limit for delivery at the East Longmeadow delivery point to 16,875 Mcf from the maximum daily quantity of 11,403 Mcf, pursuant to the gas purchase agreement of June 1, 1973, between Petitioner and Springfield.

The purpose of the proposed service change is to enable Springfield, which is building a natural gas liquefaction, storage and vaporization facility at East Longmeadow, Massachusetts, to divert an estimated 1,000,000 Mcf of gas purchased from Petitioner during the summer months and store it for vaporization and sale during the winter to Springfield's high priority customers.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 3, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-14554 Filed 7-16-73;8:45 am]

[Docket No. RP72-64]

TEXAS GAS TRANSMISSION CORP.

Order Establishing Hearing and Conference Procedures

JULY 9, 1973.

By order issued June 15, 1973, in this proceeding, the Commission suspended until June 18, 1973, certain proposed revised tariff sheets[1] to Texas Gas Transmission Corporation's (Texas Gas) FPC Gas Tariff, Third Revised Volume No. 1.[2] These revisions to Texas Gas' tariff pertain, among other things, to curtailment procedures, applicability of force majeure provisions to all failures of gas supply, recovery of demand charge adjustments resulting from curtailment, imposition of an overrun penalty, and extension of the presently effective Quantity Entitlements.

In our order of June 15, 1973, we found that the proposed tariff filing, except for future Quantity Entitlements by Texas Gas, should be suspended for one day and the use thereof deferred. A public hearing should now be held to test the validity of the objections raised to implementation of the priority-of-service categories for curtailment purposes set forth in Texas Gas' proposed curtailment procedure as well as to determine the reasonableness of Texas Gas' other revised tariff provisions under the Natural Gas Act. We will also set forth the procedures for that hearing.

Since Texas Gas' proposed curtailment procedures conform to the procedures set forth in our Statement of Policy, Order No. 467-B, issued March 2, 1973, in Docket No. R-469, we are of the view that interveners opposing the proposed procedures should be required to submit testimony and exhibits in support of any deviations therefrom, in Texas Gas' proposed curtailment plan, as well as in support of their objections to other tariff provisions contained in Texas Gas' filing of May 17, 1973. Texas Gas, on the other hand, should submit evidence supporting its revised tariff provisions other than those relating to priority of service during curtailed deliveries.

After distribution of the aforesaid evidence, we believe that a conference should be scheduled to endeavor to settle the issues raised in this proceeding. If the conference does not result in a settlement, we will hereinafter set forth the procedures to be followed for the trial of this proceeding.

The Commission finds.

It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the proposed changes in Texas Gas' FPC Gas Tariff and that the issues in this proceeding be scheduled for hearing in accordance with the procedures hereinafter set forth.

The Commission orders.

(A) On or before August 13, 1973, Texas Gas and interveners shall file their cases-in-chief providing evidentiary support for their respective positions in regard to the issues herein which have been described heretofore in the recital above.

(B) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR, Chapter I), a public hearing shall be held in this proceeding on September 5, 1973, at 10 a.m. (e.d.t.) in a hearing room of the Federal Power Commission, Washington, D.C., for the purpose of incorporating into the record the testimony and exhibits previously distributed. Immediately thereafter the Presiding Administrative Law Judge will convene a conference for the purpose of endeavoring to settle the issues involved in this proceeding.

(C) In the event that a settlement of the issues does not result from said conference, the Presiding Administrative Law Judge will reconvene the hearing for the purpose of ruling on all data requests or any other relevant matters presented. Thereafter the hearing will be recessed, and on or before October 4, 1973, the parties shall file answering testimony and exhibits, if any. The hearing will then convene on October 24, 1973, at 10 a.m. (e.d.t.) in a hearing room of the Federal Power Commission, Washington, D.C., for the purposes of incorporating into the record the testimony and exhibits heretofore filed in this proceeding and of commencing cross-examination.

(D) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge—See Delegation of Authority, 18 CFR 3.5(d)—shall preside at, and control these proceedings in accordance with the policies expressed in the Commission's Rules of Practice and Procedure and the purposes expressed in this order.

By the Commission.

[SEAL] MARY B. KIDD,
Acting Secretary.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

Notice of Public Meeting

Notice is hereby given, PL 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held at 1:00 p.m. July 26, 1973 through July 27, 1973 at 3:00 p.m. The location of the meeting will vary according to subcommittees.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Education Act (20 U.S.C. 2411) to advise the President and the Congress of the effectiveness of compensatory education to improve the educational attainment of disadvantaged Children.

The gathering is called to facilitate subcommittee sessions. The 6 individual subcommittees will have separate assignments and will meet in separate locations.

Because of limited space for the public meeting of subcommittees July 26 and 27, all persons wishing to attend should call for reservations at Area Code 202/632-5221 by July 23, 1973.

Further information regarding subcommittee sessions can be obtained from this office at the above number.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children, located in Room 202, 1717 H Street, NW., Washington, D.C. 20006.

Signed at Washington, D.C. on July 11, 1973.

ROBERTA LOVEHEIM,
Executive Director.

[Ex Parte 241; Rule 19, 3rd Rev. Exemption 43]

ATCHISON, TOPEKA, AND SANTA FE RAILWAY CO., ET AL.

Exemption Under Mandatory Car Service Rules

To: The Atchison, Topeka and Santa Fe Railway Company, Burlington Northern Inc., Chicago and North Western Transportation Company, Chicago, Rock Island and Pacific Railroad Company, Missouri-Kansas-Texas Railroad Company, Missouri Pacific Railroad Company, St. Louis-San Francisco Railway Company, Union Pacific Railroad Company.

It appearing, that there is a massive harvest of wheat in progress in the states of Kansas, Nebraska, and Oklahoma; that presents supplies of plain boxcars owned by the railroads serving these states are inadequate to move the newly harvested grain to terminal elevators for safe storage; that use of available plain boxcars owned by other carriers for movements of this grain will substantially augment the car supplies of the railroads named herein.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, the railroads named herein, and their short line connections, are hereby authorized to use and to accept from shippers shipments of grain originating at stations located to Kansas, Nebraska, and Oklahoma when loaded into plain 40-ft. narrow-door boxcars of various ownerships without regard to the requirements of Car Service Rule 2.

Exception. This exemption shall not apply to plain boxcars subject to Association of American Railroads Car Relocation Directive No. 44.

Effective 11:59 p.m., July 7, 1973.

Expires 11:59 p.m., July 18, 1973.

Issued at Washington, D.C., July 3, 1973.

FOURTH SECTION APPLICATION FOR RELIEF

JULY 12, 1973.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 1100.40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 42713—*Brewers' Grains and Malt Sprouts from, to and Between Points in IFA, Southwestern and WTL Territories.* Filed by Western Trunk Line Committee, Agent, (No. A-2686), for interested rail carriers. Rates on brewers' grains, dried, in bulk; also malt sprouts, in bulk or in bags, in carloads, as described in the application, from, to and between points in Illinois Freight Association, southwestern, and western trunk-line territories.

Grounds for relief—Revision in carload minimum weights.

Tariffs—Supplement 30 to Western Trunk Line Committee, Agent, tariff 120-L, I.C.C. No. A-4868, and other schedules named in the application. Rates are published to become effective on August 12, 1973, and later.

By the Commission

[Rev. S.O. 994, I.C.C. Order 104]

GREEN MOUNTAIN RAILROAD CORP.

Rerouting or Diversion of Traffic

In the opinion of R. D. Pfahler, Agent, the Green Mountain Railroad Corporation is unable to transport traffic over its line between Gassetts, Vermont, and Rutland, Vermont, because of track damage from flooding.

It is ordered, That:

(a) The Green Mountain Railroad Corporation, being unable to transport traffic over its line between Gassetts, Vermont, and Rutland, Vermont, because of track damage from flooding, that carrier is hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained. The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) Notification to shippers. Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the division of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 11:30 a.m. July 2, 1973.

(g) *Expiration date.* This order shall expire at 11:59 p.m., September 30, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., July 2, 1973.

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's Special Rules of Practice any interested person may file a petition seeking reconsideration of the following numbered proceeding on or before August 6, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

Finance Docket No. 27297. By order entered July 5, 1973, the Motor Carrier Board approved the transfer to C-Line Forwarding Co., Inc., Warwick, Rhode Island, of that portion of Fourth Amended Permit and Order No. FF-96, issued September 6, 1972, to New England Forwarding Company, Inc., North Bergen, N.J., authorizing operations, in interstate commerce, as a freight forwarder of commodities generally, between New York, N.Y., points in Nassau, Westchester, and Rockland Counties, N.Y., and Passaic, Essex, Union, Hudson, Middlesex, and Bergen Counties, N.J., on the one hand, and, points in Philadelphia, Delaware, and Montgomery Counties, Pa., Camden and Gloucester Counties, N.J., Baltimore, Md., points in Baltimore, Anne Arundel, Prince George's, Montgomery, and Howard Counties, Md., Alexandria, Va., Arlington and Fairfax Counties, Va., and the District of Columbia, on the other; and between points in the areas above described, on the one hand, and, points in Rhode Island, and Bristol, Suffolk, Middlesex, Norfolk, Plymouth, Essex, and Worcester Counties, Mass., on the other, restricted against the transportation of traffic having a prior or subsequent movement in foreign commerce. Ronald N. Cobert, 1730 M St., N.W., Washington, D.C. 20036 and William J. Lippman, 1819 H St., N.W., Washington, D.C., attorneys for transferee and transferor, respectively.

No. MC-FC-74512. By order of July 5, 1973, Motor Carrier Board approved the transfer to H. and H. Hauling, Inc., 469 Main St., Brookville, Pa., 15825, of the operating rights in Certificate No. MC-128047 (Sub-No. 1), issued December 4, 1970, to Clark R. Ingram, R.D. #1, Weedville, Pa., 15868, authorizing the transportation of coal, from points in Huston Township (Clearfield County), Pa., and points in Elk County, Pa., to points in Erie, Chautauqua, and Niagara Counties, N.Y. Arthur J. Diskin, 806 Frick Building, Pittsburgh, Pa. 15219 attorney for applicants.

No. MC-FC-74521. By order of July 11, 1973, the Motor Carrier Board approved the transfer to OC Transportation Co., Inc., Beverly, N.J., of the operating rights in Permits Nos. MC-114332, MC-114332 (Sub-No. 4), MC-114332 (Sub-No. 5), and MC-114332 (Sub-No. 6) issued January 12, 1968, May 19, 1971, December 23, 1969, and August 30, 1972, respectively, to Rayburn Trucking, Inc., Elizabeth, N.J., authorizing the transportation of (1) such merchandise as is dealt in by wholesale, retail, and chain grocery and food business houses, and in connection therewith, equipment, material, and supplies used in the conduct of such business, between points in a defined area of New Jersey, Delaware, and Pennsylvania; (2) fruits, vegetables, farm products, poultry, and sea food, from points in Delaware, New Jersey, and Pennsylvania, to points in the territory indicated above; (3) groceries and grocery store supplies, from Philadelphia, Pa., to Baltimore, Md., and points in New Jersey; (4) sugar, from Edgewater and Linden, N.J., to points in New York and New Jersey within 40 miles of Edgewater, and sugar and sugar products, in containers, from New York, N.Y., and Linden, N.J., to points in New Jersey (except Linden) and New York within 40 miles of Columbus Circle, New York, N.Y., and (5) wearing apparel and component parts used in the manufacture thereof, between New York, N.Y., and Elizabeth and Middlesex, N.J., on the one hand, and, on the other, Miami, Fla., restricted to the transportation of traffic in foreign commerce having a prior or subsequent movement by water or air, and limited to a transportation service performed under a continuing contract, or contracts, with Trade Wind Fashions, Ltd., of New York, N.Y. Charles J. Williams, 47 Lincoln Park, Newark, N.J. 07102 Attorney for applicants.

No. MC-FC-74522. By order of July 3, 1973, the Motor Carrier Board approved the transfer to Harry Charles Freeman, D/B/A New Basin Homing Pigeon Training, Brooklyn, N.Y. 11234, of Certificate No. MC-114556 issued May 18, 1971, to Walter Dittenheimer, Howard Beach, N.Y. 11414, authorizing the transportation of Homing pigeons, from Brooklyn and Queens Boroughs, N.Y., to Wilmington, Del., Aberdeen, Md., Charlottesville and Danville, Va., Washington, D.C., points in New Jersey, and those in that part of Pennsylvania east of the Susquehanna River. Morris Honig, 150 Broadway, New York, N.Y. 10038, attorney for applicant.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice 91]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JULY 6, 1973.

The following are notices of filing of application, except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application, for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the new rules of Ex Parte No. MC-67, (49 CFR Part 1131) published in the FEDERAL REGISTER, issue of April 27, 1965, effective July 1, 1965. These rules provide that protests to the granting of an application must be filed with the field official named in the FEDERAL REGISTER publication, within 15 calendar days after the date of notice of the filing of the application is published in the FEDERAL REGISTER. One copy of such protests must be served on the applicant, or its authorized representative, if any, and the protests must certify that such service has been made. The protests must be specific as to the service which such protestant can and will offer, and must consist of a signed original and six (6) copies.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in field office to which protests are to be transmitted.

[Rev. S.O. 994; Rev. I.C.C. Order 79, Amdt. 3]

ST. JOHNSBURY AND LAMOILLE COUNTY RAILROAD

Rerouting or Diversion of Traffic

Upon further consideration of Revised I.C.C. Order No. 79 (St. Johnsbury & Lamoille County Railroad) and good cause appearing therefor:

It is ordered, That:

Revised I.C.C. Order No. 79 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., September 3, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this amendment shall become effective at 11:59 p.m., July 15, 1973, and that this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., July 6, 1973.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER, *Agent.*

[Rev. S.O. 994, I.C.C. Order 103]

VERMONT RAILWAY, INC.

Rerouting or Diversion of Traffic

In the opinion of R. D. Pfahler, Agent, the Vermont Railway, Inc., is unable to transport traffic over its line between Rutland, Vermont, and White Creek, New York, because of bridge damage.

It is ordered, That:

(a) The Vermont Railway, Inc., being unable to transport traffic over its line between Rutland, Vermont, and White Creek, New York, because of bridge damage, that carrier is hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the division of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 9:00 a.m., July 2, 1973.

(g) *Expiration date.* This order shall expire at 11:59 p.m., July 31, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., July 2, 1973.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER, *Agent.*

CONTROL OF AIR POLLUTION FROM AIRCRAFT AND AIRCRAFT ENGINES

Emission Standards and Test Procedures for Aircraft

V 38 - 136 JUL 17 73 XUM

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

PART 87—CONTROL OF AIR POLLUTION FROM AIRCRAFT AND AIRCRAFT ENGINES

Emission Standards and Test Procedures for Aircraft

Section 231 of the Clean Air Act, as amended by Public Law 91-604, directs the Administrator of the Environmental Protection Agency to "establish standards applicable to emissions of any air pollutant from any class or classes of aircraft or aircraft engines which in his judgment cause or contribute to or are likely to cause or contribute to air pollution which endangers the public health or welfare." Regulations ensuring compliance with these standards are required to be issued by the Secretary of Transportation in accordance with section 232 of the Act.

Section 231 also directs the Administrator to conduct a study of the extent to which aircraft emissions affect air quality throughout the United States, and the technological feasibility of controlling such emissions. The report of such a study, "Aircraft Emissions: Impact on Air Quality and Feasibility of Control," has been published and copies of the report are available upon request free of charge from the Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460.

On December 12, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (Volume 37, Number 239) which described standards limiting emissions from aircraft and aircraft engines. As required by section 231 of the Act, the Administrator held public hearings with respect to the proposed aircraft emission standards. One was held in Boston, Massachusetts, on January 29, 1973, and another in Los Angeles, California on February 6, 1973. Testimony was presented at these hearings by twenty-two representatives of domestic and foreign manufacturers and operators of aircraft and aircraft engines and other interested parties. Additional detailed comments were provided subsequent to the hearings by thirty-one organizations.

Consideration has been given to all relevant material presented and a number of amendments have been made to the regulations as proposed.

Changes have been made in the engine classification system. A separate class was created for turboprop engines because, after considering the comments, the proposed equivalency between shaft horsepower and jet thrust was not considered acceptable for all operating conditions over the landing/take off (LTO) cycle. Except for the creation of special classes for the JT3d and JT8D engines, which was done in order to require smoke retrofits on separate schedules, turbine engines over 8,000 lbs. thrust which power subsonic aircraft have been put into one class. This over-8,000 lbs. thrust class represents essentially all turbines used in commercial air transportation, except for the supersonic aircraft to be introduced during the next few years.

Based on testimony and comments during the public hearings, the engines which power supersonic transport aircraft are not technically capable of achieving as low emissions levels as other large turbine engines by using equivalent combustor design technology. The reasons for this include the following:

(1) Some such engines employ afterburners for thrust augmentation during take off and acceleration at cruising speeds. This type of device involves combustion at relatively low pressures in the engine tailpipe and consequent greater loss of hydrocarbons and carbon monoxide to the atmosphere.

(2) All such engines known to EPA operate at compressor ratios much lower than engines designed for subsonic aircraft. This means that at low speed, low altitude conditions, where the "ram" pressure rise is small, these engines burn more fuel, and hence emit greater total quantities of hydrocarbons and carbon monoxide than do the high pressure ratio subsonic engines. Comments demonstrated that this is a necessary design tradeoff to ensure that these engines achieve maximum efficiency (best possible fuel consumption) throughout a complete flight.

(3) In addition, the supersonic engines do not employ the high bypass ratio turbofan principle which contributes to the excellent fuel economy and low pollutant emission capability of the engines which power most large subsonic engines, since the relatively large diameter (or frontal areas) of this type of engine would cause excessive aerodynamic drag in aircraft flying at mach 2-3 flight speeds.

A separate class has been established for engines which power supersonic aircraft. Exhaust emission standards for this class will be based on the best available combustor design technology expected in 1979 and later, but with due consideration for the inherently higher emission characteristics of supersonic aircraft engines under landing/takeoff cycle conditions, as discussed above. These standards will represent the same level of emissions reduction from current supersonic aircraft, through application of the same types of combustor design technology, as will be required of subsonic aircraft, though the absolute hydrocarbon and carbon monoxide levels will be several times higher. Standards will be proposed for this class of engines within 60 days.

Consideration will also be given to development of ground handling procedures specifically applicable to supersonic aircraft which would further reduce their inherently greater pollution characteristics during operations at large metropolitan airports.

It is recognized by the EPA that potential problems have been identified relating to upper atmosphere effects of supersonic aircraft and to a lesser extent subsonic aircraft operations. The work in progress under the Department of Transportation Climatic Impact Assessment Program will be closely monitored by the EPA, in order that the present regulations can be adjusted if necessary. The present regulations are based on the need to control emissions occurring under 3,000 feet, to protect ambient air quality in urban areas.

The effective date for the completion of the JT3D smoke control retrofit has been delayed until 1978 to allow time for the development of the necessary new combustor components. This deferral is based upon the manufacturers' comments that the additional time is necessary to solve problems relating to component durability.

The proposed 1976 standards applicable to carbon monoxide and hydrocarbon emissions from newly manufactured turbine engines have been deleted. Deletion of the 1976 standards is based upon the manufacturers' comments that insufficient lead time is available to allow introduction of changes in all newly manufactured engines to achieve these levels by that date. To relax the standards to levels which could be achieved this quickly would eliminate any useful impact which they might have on ambient air quality. It was concluded that efforts could be more effectively directed toward achieving substantially greater emissions reductions than those proposed at a later point in time, i.e., 1979.

Following a detailed study of the comments plus consultation with the National Aeronautics and Space Administration and the Air Force, the originally proposed 1979 standards applicable to gas turbine engines have been revised to become essentially equivalent to emission levels being used as design goals by these two agencies in planned and current research and development projects. A new set of standards, applicable to newly certified large engines only, has been set for January 1, 1981, to reflect the introduction of the same types of advanced combustor design technology originally expected in 1979. The technology necessary to meet these 1981 standards is in an early development stage. EPA intends to monitor closely the development of this technology through programs sponsored both by other federal agencies and by industry. If it should become evident that the standards as promulgated cannot be achieved by the technology approaches explored in these programs, additional rule making action will be considered to ensure that the best technology available is reflected in the standards. These two changes respond to the many comments received which stated that the emissions reductions originally proposed for 1979 could not be achieved this quickly using currently known technology. It is estimated that approximately 6 years are needed to translate combustion research findings into production engines which are fully certified and flight tested for safe usage in aircraft.

The method for specifying smoke limits has been changed to reflect a sliding scale of values chosen to be proportional to thrust for engines to be produced after 1979. It now represents a more flexible approach than specifying an absolute number for an entire class of engines and is fundamentally sounder for application to future engine designs whose

thrust characteristics are not known now. This change will better ensure that the actual visibility characteristics of the exhaust plumes from newly designed engines are within limits consistent with protection of the public welfare, i.e., protection of visibility and personal well-being.

The proposed standards controlling crankcase emissions from piston engine aircraft have been deleted because it has been concluded based on comments received that introduction of these systems could induce safety hazards and in any case would provide relatively little reduction in emissions. The exhaust emissions standards applicable to piston engines have been retained as proposed, effective for engines produced after December 31, 1979, to allow needed additional time for development. In addition, comments expressed concern over the safety of the measures expected to be used by the manufacturers of such engines to achieve the standards. Therefore, the EPA will monitor closely the development of the technology necessary to meet these 1980 standards. If it should become evident that the standards as promulgated cannot be achieved at that time by design techniques which are safe and in other respects airworthy, additional rule making action will be considered to ensure that the best technology available is reflected in the standards.

Many comments were received asking that EPA develop suitable correction factors for differences in ambient temperatures, pressures and humidity levels at locations where emissions testing would be carried out. The EPA is in agreement with the need to develop such factors, so as to allow for these influences, as is done in other EPA standards applicable to highway vehicles. Projects are being started to define these relationships so as to allow introduction of suitable correction factors as soon as possible.

In addition, the final rules contain other technical amendments and clarifying modifications to the testing and measurement procedures.

A number of additional basic criticisms of the proposed regulations were considered in the analysis which led to the revised standards, but were rejected for the reasons identified below:

Some commenters pointed out that the timing of the initially proposed standards was too late to be of any value to the states in their implementation plans aimed at meeting ambient air quality standards by 1975. However, consideration of other comments presented at the hearings plus information on the availability of emission reduction technology in the study accompanying the proposal, and consideration of the lead time necessary to introduce such technology into manufactured products and certify them for safety considerations, made it impossible to design standards to achieve meaningful air quality reductions which would be implemented any sooner than the regulations now specify.

Several commenters recommended that the Ringleman visual system for evaluating aircraft gas turbine smoke behavior should be substituted for the indirect filtration system described in the regulations, to facilitate direct correlation of the method used to certify engines with a technique which could be employed for enforcement purposes. Unfortunately, the Ringleman system is not suited to the precise evaluation of engine smoking characteristics. Moreover, during test cell operation, the plume cannot be viewed directly and its appearance is not the same as it would be under the conditions of altitude and visual contrast which exist in flight. Therefore the prescribed filter reflectance method and associated sampling systems have been retained.

Some commenters felt that the simulated landing/take-off cycle used as a basis for the numbers derived in the standards should be altered to make it more representative of an average LTO operation instead of reflecting peak traffic times at metropolitan air terminals. This comment was rejected, since the justification for the aircraft standards is largely based on protecting air quality in and around large metropolitan air terminals during adverse conditions. The short term National Ambient Air Quality Standards (40 CFR Part 50) are not written to be exceeded more than once per year. Thus the LTO cycle is based on typical adverse conditions.

Several commenters recommended that standards not be set at all for the 1979 and later period, pending the development of technology capable of achieving significant known emission reductions. EPA considers that the published standards will have a significant effect on stimulating the rate of progress of technological development and spur its rapid introduction into flight applications. The standards are based on NASA and Air Force-sponsored research already in progress, as well as engineering evaluations sponsored by EPA. The standards reflect reductions from present emission levels resulting from modified designs to existing engine components based on the application of known control technology. It should be emphasized that the standards set by EPA may reflect technology which may reasonably be obtained within a given time frame but which is not yet available. Section 231(b) of the Act expressly contemplates "*development* and application of the requisite technology" (emphasis added).

Commenters representing general aviation interests opposed the introduction of emission standards applicable to piston engine aircraft, on the grounds that compliance would require introductions of exhaust system reactors which would have drastic and costly effects on the configuration of the entire aircraft. The Agency has concluded that sufficient evidence is already available in the form of measured emissions data on current aircraft to indicate that the proposed standards can be met by improved fuel management and will not require exhaust system reactors.

A number of commenters felt that the report cited in the preamble to the proposed regulations had not adequately demonstrated a compelling need for emission standards applicable to aircraft. EPA does not feel that the minimal evidence offered by these commenters in support of their claim represents a valid basis for deciding that aircraft emissions do not contribute to air pollution endangering health or welfare in areas surrounding airports.

A new Part 87 of Title 40, Code of Federal Regulations, is hereby adopted and establishes:

(a) Fuel venting emission standards for new and in-use aircraft gas turbine engines.

(b) Exhaust emission standards for new and in-use aircraft gas turbine engines.

(c) Exhaust emission standards for new aircraft piston engines.

(d) Exhaust emission standards for new aircraft.

(e) Test procedures applicable to aircraft gas turbine engines and aircraft.

(f) A test procedure applicable to aircraft piston engines.

In judging the need for the regulations, the Administrator has determined (1) that the public health and welfare is endangered in several air quality control regions by violation of one or more of the national ambient air quality standards for carbon monoxide, hydrocarbons, nitrogen oxides, and photochemical oxidants, and that the public welfare is likely to be endangered by smoke emissions; (2) that airports and aircraft are now, or are projected to be, significant sources of emissions of carbon monoxide, hydrocarbons, and nitrogen oxides in some of the air quality control regions in which the national ambient air quality standards are being violated, as well as being significant sources of smoke; and therefore (3) that maintenance of the national ambient air quality standards and reduced impact of smoke emissions requires that aircraft and aircraft engines be subject to a program of control compatible with their significance as pollution sources. Accordingly, the Administrator has determined that emissions from aircraft and aircraft engines should be reduced to the extent practicable with present and developing technology. The standards proposed herein are not quantitatively derived from the air quality considerations discussed in the study report cited above but, instead, reflect EPA's judgment as to what reduced emission levels are or will be practicable to achieve for turbine and piston engines.

In general, the influence of the regulations, will be to contribute to the maintenance of the quality of the air in and around major air terminals throughout the post-1975 era in which air traffic is undergoing expansion. The timing of these standards is such that they will not make contributions to achievement of the ambient air pollution levels required by 1975 through the state implementation programs, although they will influence attainment of those levels where extensions until 1977 are granted for the ambient standards.

V 38-136 JUL 17 73 XUM

The total cost of these requirements to the airline industry is estimated at 141 million dollars over a ten year period. This represents for newly designated commercial engines an increase in cost of at most 3 percent. All equipment costs (including engines) used in commercial air transport account for only 13 percent of the airline ticket dollar. Thus, it is believed that imposition of the schedule of standards set forth in this regulation is too small to have any impact on the continued growth of air transportation in a fashion healthy and beneficial to the economy.

The standards promulgated for piston type aircraft are expected to result in significant fuel savings. (29 million dollars over ten years). The technology expected to be used to achieve 1979 and 1981 standards for turbines is not expected to result in fuel consumption penalties. Similarly, there is no inconsistency or conflict presently envisioned between the imposition of the above standards and the compliance of aircraft with noise control regulations during the same period.

It is intended that the attainment of any standards proposed herein not result in the increased emission of any substance for which a standard is not proposed if such emission could endanger public health or welfare. The Administrator intends to remain informed throughout engine and aircraft development and certification programs to permit him to determine at the earliest possible time if the emissions of a substance are likely to endanger the public health or welfare. Therefore, the Administrator may subsequently publish in the FEDERAL REGISTER a list of those substances whose emissions are liable to increase as a result of the installation or incorporation of any system or component, including fuel additives, designed to enable an aircraft or aircraft engine to conform to any prescribed standard. In the event such a list of substances is so published, appropriate testing and sampling methods and/or analytical techniques will be proposed under the normal rule making procedures after consultation with the Department of Transportation.

The standards contained in this notice are being promulgated after consultation with the Secretary of Transportation in order to assure appropriate consideration of aircraft safety. However, the Department of Transportation has advised that it is impossible to make conclusive judgments as to the effects of an emission standard on aircraft safety until engines designed to meet that standard have been developed, constructed, and tested. Therefore, there will be continuing consultation on this issue between this agency and that Department, both prior to and after promulgation of the standards. Should the Secretary of Transportation determine at any point that an emission standard cannot be met within the specified time without creating a safety hazard, appropriate modifications will be made to that standard or to its effective date.

(Section 231 of the Clean Air Act, as amended (42 U.S.C. 1857f-9))

Dated: July 6, 1973.

ROBERT W. FRI,
Acting Administrator.

In Title 40 of the Code of Federal Regulations, a new part, Part 87, is to be added as follows:

Subpart A—General Provisions

Sec.
87.1 Definitions.
87.2 Abbreviations.
87.3 General requirements.
87.4 Test conditions.
87.5 Special test procedures.
87.6 Aircraft safety.

Subpart B—Engine Fuel Venting Emissions (New and In-Use Aircraft Gas Turbine Engines)

87.10 Applicability.
87.11 Standard for fuel venting emissions.

Subpart C—Exhaust Emissions (New Aircraft Gas Turbine Engines)

87.20 Applicability.
87.21 Standards for exhaust emissions.

Subpart D—Exhaust Emissions (In-Use Aircraft Gas Turbine Engines)

87.30 Applicability.
87.31 Standards for exhaust emissions.

Subpart E—Exhaust Emissions (New and In-Use Aircraft Piston Engines)

87.40 Applicability.
87.41 Standards for exhaust emissions (new aircraft piston engines).
87.42 Standards for exhaust emissions (in-use aircraft piston engines).

Subpart F—Exhaust Emissions (New and In-Use Aircraft)

87.50 Applicability.
87.51 Standards for exhaust emissions (new aircraft).
87.52 Standards for exhaust emissions (in-use aircraft).

Subpart G—Test Procedures for Engine Exhaust Gaseous Emissions (Aircraft and Aircraft Gas Turbine Engines)

87.60 Introduction.
87.61 Turbine fuel specifications.
87.62 Test procedure (propulsion engines).
87.63 Test procedure (auxiliary power units).
87.64 Sampling and analytical system for measuring exhaust emissions.
87.65 Information to be recorded.
87.66 Calibration and instrument checks.
87.67 Sampling procedures.
87.68 Test run.
87.69 Chart reading.
87.70 Calculations.
87.71 Compliance with emission standards.

Subpart H—Test Procedures for Engine Smoke Emissions (Aircraft Gas Turbine Engines)

87.80 Introduction.
87.81 Fuel specifications.
87.82 Sampling and analytical system for measuring smoke exhaust emissions.
87.83 Information to be recorded.
87.84 Calibration and instrument checks.
87.85 Test procedures.
87.86 Test run.
87.87 Determination of SN.
87.88 Calculations.
87.89 Compliance with emission standards.

Subpart I—Test Procedures for Engine Exhaust Gaseous Emissions (Aircraft Piston Engines)

87.90 Introduction.
87.91 Gasoline fuel specifications.
87.92 Test procedure.
87.93 Sampling and analytical system for measuring exhaust emissions.
87.94 Information to be recorded.
87.95 Calibration and instrument checks.
87.96 Sampling procedures.
87.97 Test run.
87.98 Chart reading.
87.99 Calculations.
87.100 Compliance with emission standards.

Appendix A—Instrumentation (Aircraft Gas Turbine Engine Measurements).
Appendix B—Instrumentation (Aircraft Piston Engine Measurements).

AUTHORITY: Sec. 231 of the Clean Air Act, as amended (42 U.S.C. 1857f-9).

Subpart A—General Provisions

§ 87.1 Definitions.

(a) As used in this part, all terms not defined herein shall have meaning given them in the Act:

(1) "Act" means the Clean Air Act, as amended by Public Law 91-604.

(2) "Administrator" means the Administrator of the Environmental Protection Agency to whom the authority involved may be delegated.

(3) "Aircraft" means any airplane for which a U.S. standard airworthiness certificate or equivalent foreign airworthiness certificate is issued.

(4) "Aircraft engine" means a propulsion engine which is installed in or which is manufactured for installation in an aircraft.

(5) "Aircraft gas turbine engine" means a turboprop, turbofan, or turbojet aircraft engine.

(6) "New aircraft gas turbine engine" means an aircraft gas turbine engine which has never been in service.

(7) "New aircraft piston engine" means an aircraft piston engine which has never been in service.

(8) "In-use aircraft gas turbine engine" and "in-use aircraft piston engine" mean an aircraft gas turbine engine or aircraft piston engine (as appropriate) which is in service.

(9) "Newly certified aircraft gas turbine engine" means an aircraft gas turbine engine which is originally type certified on or after the effective date of the applicable emission standard.

(10) "Rated power" means the maximum power/thrust available for takeoff at standard day conditions as approved for the engine by the Federal Aviation Administration.

(11) "Standard day conditions" means standard ambient conditions as described in the United States Standard Atmosphere, 1962, (i.e., temperature = 59 F, relative humidity = 0%, and pressure = 29.92 inches Hg).

(12) "Power setting" means the power output of an engine in terms of pounds thrust for turbojet and turbofan engines and shaft horsepower for turboprop and piston engines.

(13) "Pound-thrust/hr." means pounds of thrust for 1 hour.

(14) "Shaft horsepower" means only the measured shaft power output of an auxiliary power unit, turboprop, or piston engine.

(15) "Auxiliary power unit" means any engine installed in or on an aircraft exclusive of the propulsion engines.

(16) "Class T1" means all aircraft turbofan or turbojet engines except engines of Class T5 of rated power less than 8,000 pounds thrust.

(17) "Class T2" means all turbofan or turbojet aircraft engines except engines of Class T3, T4, and T5 of rated power of 8,000 pounds thrust or greater.

(18) "Class T3" means all aircraft gas turbine engines of the JT3D model family.

(19) "Class T4" means all aircraft gas turbine engines of the JT8D model family.

(20) "Class T5" means all aircraft gas turbine engines employed for propulsion of aircraft designed to operate at supersonic flight speeds.

(21) "Class P1" means all aircraft piston engines, except radial engines.

(22) "Class P2" means all aircraft turboprop engines.

(23) "Taxi/idle (in)" means those aircraft operations involving taxi and idle between the time of landing roll-out and final shutdown of all propulsion engines.

(24) "Taxi/idle (out)" means those aircraft operations involving taxi and idle between the time of initial starting of the propulsion engine(s) used for the taxi and turn onto duty runway.

(25) "Exhaust emissions" means substances emitted to the atmosphere from the exhaust discharge nozzle of an aircraft or aircraft engine.

(26) "Fuel venting emissions" means all raw fuel, exclusive of hydrocarbons in the exhaust emissions, discharged from aircraft gas turbine engines during all normal ground and flight operations.

(27) "Smoke" means the matter in exhaust emissions which obscures the transmission of light.

(28) "Smoke number (SN)" means the dimensionless term quantifying smoke emissions.

(29) "Oxides of nitrogen" means the sum of the amounts of the nitric oxide and nitrogen dioxide contained in a gas sample as if the nitric oxide were in the form of nitrogen dioxide.

(30) "Calibration gas" means a gas of known concentration which is used to establish the response curve of an analyzer.

(31) "Span gas" means a gas of known concentration which is used routinely to set the output level of an analyzer.

§ 87.2 Abbreviations.

The abbreviations used in this part have the following meanings in both upper and lower case:

abs.	Absolute.
APU	Auxiliary power unit.
ASA	American Standards Association.
ASTM	American Society for Testing and Materials.
b.hp.	Brake horsepower.
c.f.h.	Cubic feet per hour.
c.f.m.	Cubic feet per minute.
C.	Centigrade.
cc.	Cubic centimeter.
CO_2	Carbon dioxide.
CO	Carbon monoxide.
EPR	Engine pressure ratio.
F.	Fahrenheit.
FAA	Federal Aviation Administration, Department of Transportation.
FID	Flame ionization detector.
H/C	Hydrogen to carbon atomic ratio.
HC	Hydrocarbon(s).
Hg	Mercury.
hp.	Horsepower.
hp.-hr.	Horsepower-hr.
hr.	Hour(s).
in.HgV.	Inches of mercury, vacuum.
I.D.	Inside diameter.
lb.	Pound(s).
LTO	Landing takeoff.
min.	Minute(s).
mm.	Millimeter(s).
N_1	First-stage rotor speed.
N_2	Second-stage rotor speed or nitrogen (as applicable).
N_3	Third-stage rotor speed.
NO	Nitric oxide.
NO_2	Nitrogen dioxide.
NO_x	Oxides of nitrogen, NO and NO_2.
NDIR	Nondispersive infrared analyzer.
O_2	Oxygen.
O_3	Ozone.
p.p.m	Parts per million by volume.
p.p.m.C	Parts per million carbon.
PT_7	Total pressure at station 7.
R.	Rankine.
r.p.m.	Revolutions per minute.
s.c.f.h.	Standard cubic feet per hour.
s.c.f.m.	Standard cubic feet per minute.
sec.	Second(s).
SHP	Shaft horsepower
SN	Smoke number.
TIM	Time in mode.
TT	Total temperature at station 7.
°	Degree.
%	Percent.

§ 87.3 General requirements.

(a) This part provides for the approval or acceptance by the Administrator or his agents of testing and sampling methods, analytical techniques, and related equipment not identical to those specified in this part. Before he approves or accepts any such alternate, equivalent, or otherwise nonidentical procedures or equipment, the Administrator shall consult with the Secretary of Transportation in determining whether or not the action requires rule making under sections 231 and 232 of the Clean Air Act, as amended, consistent with the Secretary's responsibilities under section 232 of the Act.

(b) Under section 232 of the Act, the Secretary of Transportation issues regulations to insure compliance with this part and all amendments thereof.

(c) With respect to aircraft of foreign registry, these regulations shall apply in a manner consistent with any obligation assumed by the United States in any treaty, convention or agreement between the United States and any foreign country or foreign countries.

§ 87.4 Test conditions.

The complete engine as configured for final acceptance testing, including all accessories which might reasonably be expected to influence emissions to the atmosphere excluding auxiliary gearbox-mounted components required to drive aircraft systems and service air bleed, shall be functional for all testing in this part.

§ 87.5 Special test procedures.

The Administrator may, upon written application by a manufacturer or operator of aircraft or aircraft engines, prescribe test procedures for any aircraft or aircraft engine that is not susceptible to satisfactory testing by the procedures set forth herein. Prior to taking action on any such application, the Administrator shall consult with the Secretary of Transportation.

§ 87.6 Aircraft safety.

The provisions of this part will be revised if at any time the Secretary of Transportation determines that an emission standard cannot be met within the specified time without creating a safety hazard.

Subpart B—Engine Fuel Venting Emissions (New and In-Use Aircraft Gas Turbine Engines)

§ 87.10 Applicability.

The provisions of this subpart are applicable to each new aircraft gas turbine engine of classes T2, T3, T4, and T5 manufactured on or after January 1, 1974, and all in-use aircraft gas turbine engines of classes T2, T3, T4, and T5 beginning January 1, 1974, and each new aircraft gas turbine engine of Classes T1 and P2 manufactured on or after January 1, 1975 and all in-use aircraft gas turbine engines of classes T1 and P2 beginning January 1, 1975.

§ 87.11 Standard for fuel venting emissions.

(a) No fuel venting emissions shall be discharged into the atmosphere from any new or in-use gas turbine engine subject to the subpart.

(b) Conformity with the standard set forth in paragraph (a) shall be determined by inspection of the method designed to eliminate these emissions.

Subpart C—Exhaust Emissions (New Aircraft Gas Turbine Engines)

§ 87.20 Applicability.

The provisions of this subpart are applicable to all aircraft gas turbine engines of the classes specified beginning on the dates specified.

§ 87.21 Standards for exhaust emissions.

(a) Exhaust emissions of smoke from each new aircraft gas turbine engine of class T4 manufactured on or after January 1, 1974, shall not exceed: Smoke number of 30.

(b) Exhaust emissions of smoke from each new aircraft gas turbine engine of class T2 and of rated power of 29,000 pounds thrust or greater, manufactured on or after January 1, 1976 shall not exceed: Applicable smoke number from Figure 1.

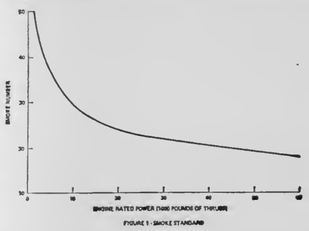

FIGURE 1—SMOKE STANDARD

V 38 136 JUL 17 73 XUM

plicable to all in-use aircraft gas turbine engines certified for operation within the United States of the classes specified below and during the time periods specified:

(ii) Carbon monoxide	3 pounds/1,000 pound-thrust hours/cycle
(iii) Oxides of nitrogen	3 pounds/1,000 pound-thrust hours/cycle
(iv) Smoke	Smoke number from Figure 1.

§ 87.31 Standards for exhaust emissions.

(a) Exhaust emissions of smoke from each in-use aircraft gas turbine engine of Class T4, beginning January 1, 1974, shall not exceed: Smoke number of 30.

(b) Exhaust emissions of smoke from each in-use aircraft gas turbine engine of class T2 and of rated power of 29,000 pounds thrust or greater, beginning January 1, 1976, shall not exceed: Applicable Smoke number from Figure 1.

(c) Exhaust emissions of smoke from each in-use aircraft gas turbine engine of class T3, beginning January 1, 1978 shall not exceed: Smoke number of 25.

(d) The standards set forth in paragraphs (a), (b), and (c) of this section refer to exhaust smoke emissions emitted during operations of the engine as specified in the applicable sections of Subpart H of this part, and measured and calculated in accordance with the procedures set forth in this subpart.

(e) In addition to the requirements imposed by paragraphs (a), (b), and (c) of this section, each in-use aircraft gas turbine engine shall not exceed the level of the emissions applicable to such engine when it was new.

Subpart E—Exhaust Emissions (New and In-Use Aircraft Piston Engines)

§ 87.40 Applicability.

The provisions of this subpart are applicable to all aircraft piston engines of class P1 beginning on the date specified.

§ 87.41 Standards for exhaust emissions (new aircraft piston engines).

(a) Exhaust emissions from each new aircraft piston engine manufactured on or after December 31, 1979, shall not exceed:

(1) Hydrocarbons	0.0190 pound/rated power/cycle
(ii) Carbon monoxide	0.042 pound/rated power/cycle
(iii) Oxides of nitrogen	0.0015 pound/rated power/cycle.

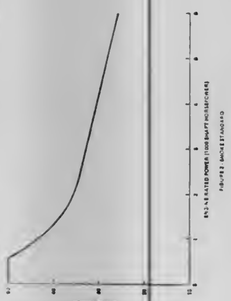
(b) The standards set forth in paragraph (a) of this section refer to a composite gaseous exhaust emission sample representing the operating cycle set forth in the application sections of Subpart I of this part and measured and calculated in accordance with the procedures set forth in that subpart.

§ 87.42 Standards for exhaust emissions (in-use aircraft piston engines).

Exhaust emissions from each in-use aircraft piston engine manufactured on or after January 1, 1979, shall not exceed

(1) Hydrocarbons	0.4 pound/1,000 hp.-hr. of power output
(ii) Carbon monoxide	5 pounds 1,000 hp.-hr. of power output
(iii) Oxides of nitrogen	3 pounds/1,000 hp.-hr. of power output.

(b) The standards set forth in paragraph (a) of this section refer to exhaust emissions from new aircraft exclusive of the exhaust, crankcase, and fuel venting emissions from the propulsion engines mounted on such aircraft.



(c) Exhaust emissions of smoke from each new aircraft gas turbine engine of class T3 manufactured on or after January 1, 1978 shall not exceed: smoke number of 25.

(1) Class T1:

(i) Hydrocarbons	1.6 pounds 1,000 pound-thrust hours cycle
(ii) Carbon monoxide	9.4 pounds 1,000 pound-thrust hours cycle
(iii) Oxides of nitrogen	3.7 pounds 1,000 pound-thrust-hours cycle
(iv) Smoke	Smoke number from Figure 1.

(2) Class T2, T3, or T4:

(i) Hydrocarbons	0.8 pound 1,000 pound-thrust-hours cycle
(ii) Carbon monoxide	4.3 pounds 1,000 pound-thrust hours cycle
(iii) Oxides of nitrogen	3 pounds 1,000 pound-thrust hours cycle
(iv) Smoke	Smoke number from Figure 1.

(3) Class P2:

(i) Hydrocarbons	4.9 pounds/1,000 horsepower-hours/cycle
(ii) Carbon monoxide	26.8 pounds/1,000 horsepower-hours cycle
(iii) Oxides of nitrogen	12.9 pounds/1,000 horsepower-hours cycle
(iv) Smoke	Smoke number from Figure 2.

(4) The smoke number for each engine shall be determined by obtaining the smoke number corresponding to the engine rated power from Figure 1 for turbofan or turbojet engines and Figure 2 for turboprop engines.

(d) Exhaust emissions from each aircraft gas turbine engine of the classes specified below manufactured on or after January 1, 1979, shall not exceed:

(1) Hydrocarbons	0.4 pound/1,000 pound-thrust hours/cycle

(f) The standards set forth in paragraphs (a), (b), (c), (d), and (e) of this section refer to a composite gaseous emission sample representing the operating cycles set forth in the applicable sections of Subpart G of this part, and exhaust smoke emissions emitted during operations of the engine as specified in the applicable sections of subpart H of this part, and measured and calculated in accordance with the procedures set forth in those subparts.

Subpart D—Exhaust Emissions (In-Use Aircraft Gas Turbine Engines)

§ 87.30 Applicability.

The provisions of this subpart are applicable to all aircraft beginning on the date specified.

§ 87.31 Standards for exhaust emissions (new aircraft).

(a) Exhaust emissions resulting from the generation of onboard power from each new aircraft manufactured on or after January 1, 1979, shall not exceed:

(1) Hydrocarbons	0.4 pound/1,000 hp.-hr. of power output
(ii) Carbon monoxide	5 pounds 1,000 hp.-hr. of power output
(iii) Oxides of nitrogen	3 pounds/1,000 hp.-hr. of power output.

(b) The standards set forth in paragraph (a) of this section refer to exhaust emissions from new aircraft exclusive of the exhaust, crankcase, and fuel venting emissions from the propulsion engines mounted on such aircraft.

(c) In determining conformity of aircraft with the standards set forth in paragraph (a) of this section, all auxiliary power units shall be operated under the conditions set forth in the applicable sections of Subpart G of this part and emissions measured and calculated in accordance with those procedures.

§ 87.52 Standards for exhaust emissions (in-use aircraft).

Exhaust emissions from each in-use aircraft manufactured on or after January 1, 1979, resulting from generation of onboard power shall not exceed the level of the emission standards applicable to such aircraft when it was new.

Subpart G—Test Procedures for Engine Exhaust Gaseous Emissions (Aircraft and Aircraft Gas Turbine Engines)

§ 87.60 Introduction.

Except as provided under § 87.5, the procedures described in this subpart shall be the test program to determine the conformity of new and in-use aircraft gas turbine engines with the applicable standards set forth in this part. The procedures shall also be used to determine emissions from auxiliary power units in determining conformity of new and in-use aircraft with the applicable standards set forth in this part.

(a) The test consists of operating the engine at prescribed power settings on an engine dynamometer (for engines producing primarily shaft horsepower) or thrust measuring test stand (for engines producing primarily thrust). The exhaust gases generated during engine operation are sampled continuously for specific component analysis through the analytical train.

(b) The exhaust emission test is designed to measure hydrocarbons, carbon monoxide, carbon dioxide, and oxides of nitrogen concentrations and determine mass emissions and engine work output through calculations during a simulated aircraft landing-takeoff cycle (LTO). The LTO cycle is based on time in mode data during high activity periods at major airports. The test for propulsion engines consists of at least the following five modes of engine operation: Taxi/idle (out), takeoff, climbout, approach, and taxi/idle (in). The mass emission and work output for the modes are combined to yield the reported values. The test for auxiliary power units consists of one mode: Full load.

(c) When an engine is tested for exhaust emissions on an engine dynamometer or test stand, the complete engine shall be used with all accessories which might reasonably be expected to influence emissions to the atmosphere installed and functioning but excluding auxiliary gearbox-mounted components required to drive aircraft systems and service air bleed.

§ 87.61 Turbine fuel specifications.

For exhaust emission testing, fuel meeting the specifications, ASTM D1655-latest version-Jet A. shall be used. Nonmetallic additives as specified in ASTM D1655-latest version-Jet A. may be present. Additives used for the purpose of smoke suppression (such as organometallic compounds) shall not be present.

§ 87.62 Test procedure (propulsion engines).

(a) (1) The engine shall be tested in each of the following five engine operating modes which simulate aircraft operation to determine its mass emission rates and work output.

Actual power setting, that when corrected to standard day conditions, corresponds to the following percentage of rated power.

Mode	Class T1 or P2	Class T2, T3, or T4
Taxi/idle (out)	See subparagraph (2) of this paragraph.	
Takeoff	100	100
Climbout	90	85
Approach	30	30
Taxi/idle (in)	See subparagraph (2) of this paragraph.	

(2) The taxi/idle operating modes shall be carried out at a power setting in accordance with applicable Federal Aviation Administration regulations, at the manufacturer's recommended power setting for idle.

(b) Emission testing shall be conducted on warmed-up engines which have achieved a steady operating temperature.

§ 87.63 Test procedure (auxiliary power units)

(a) In determining compliance with the aircraft emission standards under Subpart F of this part, each auxiliary power unit shall be tested at its maximum load condition as indicated by its power output, exhaust gas temperature, or turbine inlet temperature to determine its mass emission rate and work output. The work output shall be determined as a combination of shaft energy output and actual bleed air energy content. The bleed air equivalent horsepower for APU's shall be determined as follows:

Work Output = $0.341W\ (T_{bleed} - T_{in})$, where W = bleed airflow in lbs/sec, T_{bleed} = measured bleed air temperature in °F, and T = compressor inlet temperature in °F.

(b) Emission testing shall be conducted on warmed-up auxiliary power units which have achieved a steady operating temperature.

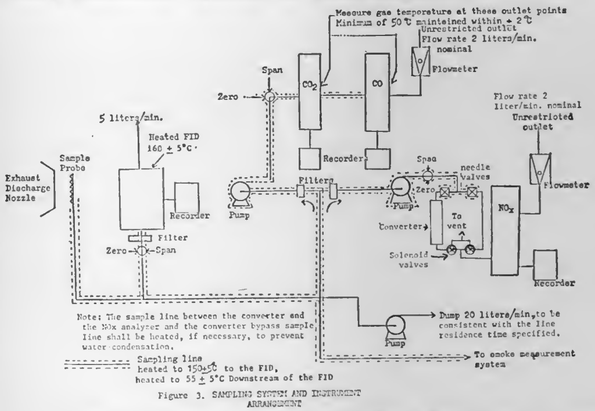


Figure 3. SAMPLING SYSTEM AND INSTRUMENT ARRANGEMENT

(c) In determining compliance with the aircraft emission standards under Subpart F of this part, auxiliary power units shall be tested prior to installation in aircraft.

§ 87.64 Sampling and analytical system for measuring exhaust emissions.

(a) *Schematic drawing.* Figure 3 is a schematic drawing of the exhaust gas sampling and analytical system which shall be used for testing under the regulations in this subpart. Additional components such as instruments, valves, solenoids, pumps, and switches may be used to provide additional information and coordinate the functions of the component systems. Parallel installation of CO and CO_2 instruments are an acceptable alternate configuration of Figure 3.

(b) *Water removal devices.* No desiccants, dryers, water traps, or related equipment may be used to treat the exhaust sample flowing to the oxides of nitrogen measurement instrumentation. NO_x instrument configuration must be such that condensation is avoided through the instrument. The extent of water vapor and carbon dioxide interference on the carbon monoxide analyzer shall be determined by passing a range of known concentrations of carbon dioxide and water vapor through the instrument and observing the response. If the effect is greater than 2 percent of measured CO levels, all subsequent measurements shall be corrected for these interferences.

(c) *Component description (exhaust gas sampling system).* The following components shall be used in the exhaust

V 381136 JUL 17 73 XUM

gas sampling system for testing under the regulations in this subpart.

(1) *Sampling probe.* (i) Probe design concept: The probe shall be made of stainless steel. If a mixing probe is used, all sampling holes shall be of equal diameter. Total probe orifice area shall be such that the principal pressure drop (at least 80 percent) through the probe assembly shall be taken at the orifice (or orifices).

(ii) Probe orientation and sampling location:

(*a*) A minimum of 12 sampling points shall be used. Either mixing or individual probes are acceptable.

(*b*) A minimum of three different radial positions shall be used in each of four sampling quadrants.

(*c*) If the minimum of 12 sampling points are used, the points in circumferentially adjacent sampling areas shall be separated in any direction by a distance less than 0.1 tailpipe radius or 0.1 annular height, as applicable. If the number of sampling points (n) is greater than 12, they shall be equal in number in each quadrant or sector and the minimum separations specified above shall be reduced by a factor = 12/n.

(*d*) The axial sampling plane shall be as close to the plane of the exit nozzle as engine performance parameters permit but in any case, shall be within one exit nozzle diameter of the exit plane.

(*e*) In all cases, the probe shall be designed to obtain a representative sample over the area of the entire exhaust nozzle, on both mixed fan engines and nonmixed fan engines as well as turbojets, turboprops and auxiliary power engines.

(*f*) The multipoint probe shall be designed to minimize the errors due to pollutant stratification, whether the stratification is due to combustor design, mixing or lack of mixing, or engine design such as mixing of fan and core air.

(2) *Sample transfer.* The sample shall be transferred from the probe to the analytical instruments through a heated sample line of either stainless steel or Teflon of 0.18- to 0.32-in. I.D. The sample lines shall be maintained at a temperature of 150°±5° C. Sample flow rate from the engine to the instruments is 2 sec. or less. The sample line length from the probe exit to the instruments shall be of minimum length, but in no case greater than 80 feet.

(d) *Component description (exhaust gas analytical system).* The following components shall be used in the exhaust gas analytical system for testing under the regulations in this subpart. The analytical system provides for the determination of hydrocarbon concentrations by flame ionization detector analysis, the determination of carbon monoxide and carbon dioxide concentrations by nondispersive infrared analysis and the determination of oxides of nitrogen concentrations by chemiluminescence analysis of exhaust samples. The chemiluminescence method of analysis requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator. See Appendix A of this part.

§ 87.65 Information to be recorded.

The following information, as applicable, shall be recorded with respect to each test.

(a) *General.* (1) Facility performing test.

(2) Description of test equipment including the probe and sampling and analytical train.

(3) Instrument operator.

(4) Test stand operator.

(5) Fuel identification, including H/C ratio and additives, if any.

(b) *Aircraft (in which engine will be installed) description.* (1) Manufacturer.

(2) Model number.

(3) Serial number (if known).

(4) User.

(5) Engine installation position.

(c) *Engine description.* (1) Manufacturer.

(2) Model number.

(3) Serial number.

(4) Time since overhaul and other pertinent maintenance information.

(d) *Test data.* (1) Test number.

(2) Date.

(3) Time.

(4) Ambient temperature and engine inlet temperature.

(5) Barometric pressure.

(6) Relative humidity.

(7) Sample line temperature. Line temperature shall be taken at a minimum of three locations, two of which shall be the probe outlet and instrumentation inlet.

(8) Sample line residence time.

(9) All pertinent instrument information such as tuning, gain, full scale range.

(10) Recorder charts: Identify zero, span, exhaust gas sample traces, and operating mode.

(11) Date of most recent analytical assembly calibration and identification number, if any.

(e) *Operating mode data.* (1) Nominal power setting.

(2) Actual power setting (pounds, thrust, horsepower, etc.).

(3) N_1 speed, revolutions per minute.

(4) N_2 speed and N_3, if applicable, revolutions per minute.

(5) Measured fuel flow, pounds/hour.

(6) Air flow, pounds/second and method of determination.

(7) Bleed air flow, pounds/second and pressure (APU's only).

(8) PT_7.

(9) EPR.

(10) TT_7.

(11) Pollutant concentration, from recorders, in percent or parts per million by volume, and parts per million carbon for hydrocarbons.

§ 87.66 Calibration and instrument checks.

(a) Calibrate the analytical assembly at least once every 30 days. Use the same flow rate as when analyzing samples.

(1) Adjust analyzers to optimize performance.

(2) Zero the hydrocarbon analyzer with zero grade air and the carbon monoxide, carbon dioxide, and oxides of nitrogen analyzers with zero grade nitrogen. The allowable zero gas impurity concentrations should not exceed 0.1 p.p.m. equivalent carbon response, 1 p.p.m. carbon monoxide, 350 p.p.m. carbon dioxide, and 0.1 p.p.m. nitric oxide.

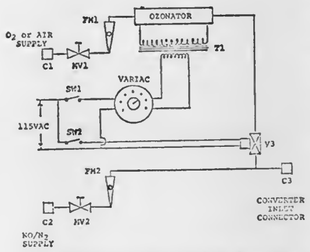
(3) Set the CO and CO_2 analyzer gains to give the desired range. Select desired attenuation scale of the HC analyzer and adjust the electronic gain control to give the desired full scale range. Select the desired scale of the NO_x analyzer and adjust the phototube high voltage supply or amplifier gain to give the desired range.

(4) Calibrate the HC analyzer with propane (air diluent) gases having nominal concentrations equal to 50 and 95 percent of full scale of each range used. Calibrate the CO analyzer with carbon monoxide (nitrogen diluent) gases and the CO_2 analyzer with carbon dioxide (nitrogen diluent) gases having nominal concentrations equal to 30, 60, and 90 percent of full scale of each range used. Calibrate the NO_x analyzer with nitric oxide (nitrogen diluent) gases having nominal concentrations equal to 50 and 95 percent of full scale of each range used. The actual concentrations should be known to within ±2 percent of the true values.

(5) Compare values obtained on the the CO and CO_2 analyzers with previous calibration curves. Any significant change reflects some problem in the system. Locate and correct problem, and recalibrate. Use best judgment in selecting curves for data reduction. Log gain reading.

(6) Check the NO_x to NO converter efficiency by the following procedure. Use the apparatus described and illustrated in Figure 4.

(i) Attach the NO/N_2 supply (150–250 p.p.m.) at C_2, the O_2 supply at C_1 and the analyzer inlet connection to the efficiency detector at C_3. If lower concentrations of NO are used, air may be used in place of O_2 to facilitate better control of the NO_2 generated during step (iv).



(ii) With the efficiency detector variac off, place the NO_x converter in bypass mode and close valve V3. Open valve MV2 until sufficient flow and stable readings are obtained at the analyzer. Zero and span the analyzer output to indicate the value of the NO concentration being used. Record this concentration.

(iii) Open valve V3 (on/off flow control solenoid valve for O_2) and adjust valve MV1 (O_2 supply metering valve) to blend enough O_2 to lower the NO concentration (ii) about 10%. Record this concentration.

(iv) Turn on the ozonator and increase its supply voltage until the NO concentration of (iii) is reduced to about 20% of (ii). NO_2 is now being formed from the NO+O_3 reaction. There must always

be at least 10% unreacted NO at this point. Record this concentration.

Figure 4 — NO_x CONVERTER EFFICIENCY DETECTOR

(v) When a stable reading has been obtained from (iv), place the NOx converter in the convert mode. The analyzer will now indicate the total NOx concentration. Record this concentration.

(vi) Turn off the ozonator and allow the analyzer reading to stabilize. The mixture NO+02 is still passing through the converter. This reading is the total NOx concentration of the dilute NO span gas used at step (iii). Record this concentration.

(vii) Close valve V3. The NO concentration should be equal to or greater than the reading of (ii) indicating whether the NO contains any NO_2.

Calculate the efficiency of the NOx converter by substituting the concentrations obtained during the test into the following equation.

$$\% \text{ Eff.} = \frac{(v)-(iv)}{(vi)-(iv)} \times 100\%$$

The efficiency of the conventer should be greater than 90 percent. Adjusting the converter temperature may be needed to maximize the efficiency. Efficiency checks should be made on each analyzer range using an NO span gas concentration appropriate to the instrument range.

(viii) If the converter efficiency is not greater than 90 percent, the cause of the inefficiency shall be determined and corrected before the instrument is used.

(ix) The converter efficiency shall be checked at least once weekly and preferably once daily.

(b) Verifications and instrument checks shall be performed in accordance with § 87.67 on in-use systems. Verification and instrument checks shall be performed before and after each test, but not less than once per hour.

(c) For the purposes of this section, the term "zero grade air" includes artificial "air" consisting of a blend of nitrogen and oxygen with oxygen concentrations between 18- and 21-mole percent.

§ 87.67 Sampling procedures.

(a) *HC, CO, CO_2, and NOx measurements.* Allow a minimum of 2 hours warmup for the CO, CO_2, HC, and NOx analyzers. (Power is normally left on infrared and chemiluminescence analyzers; but when not in use, the chopper motors of the infrared analyzers are turned off and the phototube high voltage supply of the chemiluminescence analyzer is placed in the standby position.) The following sequence of operations shall be performed in conjunction with each series of measurements:

(1) Check the sampling system for any leaks that could dilute the exhaust gas and replace or clean sample line filters.

(2) Introduce the zero grade gas at the same flow rates used to analyze the test samples and zero the analyzers. Obtain a stable zero on each amplifier meter and recorder. Recheck after tests.

(3) Introduce span gases and set the CO and CO_2 analyzer gains, the HC analyzer sample capillary flow rate and electronic gain control, if provided, and the NOx analyzer high voltage supply or amplifier gain to match the calibration curves. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test samples. Span gases should have concentrations equal to approximately 80 percent of each range used. If gain has shifted significantly on the CO or CO_2 analyzers, check tuning. If necessary, check calibration. Respan at least at end of test but not less than once per hour. Show actual concentrations on chart. Log gain readings.

(4) Check zeros; repeat the procedure in subparagraphs (1) and (2) of this paragraph, if required.

(5) Check sample line temperature and sample residence time. To check sample residence time:

(i) Introduce HC span gas into sampling system at sample inlet and simultaneously start timer.

(ii) When HC instrument indication is 15 percent of span concentration, stop timer.

(iii) If elapsed time is more than 2.0 seconds, make necessary adjustments.

(iv) Repeat (i) through (iii) with CO, CO_2, and NO instruments and span gases.

(6) Check instrument flow rates and pressures.

(7) The engine shall be operated in each operating mode until emission levels have stabilized as indicated by a constant instrument reading or recorder output. This stabilized reading shall be recorded and used in calculating mass emission rates as called for in Section 87.70.

(8) Measure, HC, CO, CO_2, and NOx concentrations of the exhaust sample at the various modes called for in §§ 87.62 or 87.63, as appropriate.

(9) If individual probes are used, the number to be reported (for each component) shall be the arithmetic average of the values obtained at each sampling point. If mixing probes are used, the number to be reported shall be the average of the values of the several probes, giving each probe a weighting factor equal to the number of sample points in that particular probe.

(10) Recheck zero and span points at the end of the test and also at approximately one hour intervals during the test. If either has changed by ±2 percent of full scale, the test shall be rerun after instrument maintenance: *Provided*, That if it is impractical to repeat the test, a correction based on an interpolation which is linear with time is acceptable for corrections within ±4 percent.

(b) *Sample system contamination.* (1) Care shall be taken to avoid loading of the sampling system with raw fuel discharge during engine starting.

(2) When the sample probe is in the exhaust stream and sampling is not in process, a back purge with air or an inert gas may be necessary to protect the probe and sample line from particulate buildup which could affect smoke and hydrocarbon readings. Check sample line for contamination each time the instrument zero and span points are checked. Use the following procedure to check the sample line:

(i) Immediately after instrument zero and span measurements and necessary adjustments are complete, introduce hydrocarbon zero gas near the sample probe. If the instrument zero reading increases by more than 5 percent of the scale in use, the sample line shall be purged or cleaned as required, to bring the zero within limits.

(ii) When the requirements of (i) have been met, introduce hydrocarbon span gas into the inlet of the sampling system. If the instrument span reading is different by more than ±5 percent from the correct setting for the scale in use, the sample line shall be purged or cleaned, as required, to bring the span within limits.

§ 87.68 Test run.

A test run shall consist of operating the engine in accordance with §§ 87.62 or 87.63, as applicable. During the test run the engine shall not be operate at a power setting above normal idle power before beginning the test sequence of § 87.62. The engine shall be operated in the sequence called for under these sections, unless an alternate procedure is agreed to in writing by the Administrator before such testing is conducted. If repeat runs at full takeoff power are necessary, they may be conducted after the last idle run in the test sequence.

§ 87.69 Chart reading.

Determine the HC, CO, CO_2, and NOx concentrations of the exhaust sample during the various modes from the instrument deflections or recordings, making use of appropriate calibration charts.

§ 87.70 Calculations.

(a) The final reported test results shall be computed by use of the following formulas:

(1) Hydrocarbon:

$$\text{HC pounds/1,000 pound-thrust-hrs. or 1,000 hp.-hr., as appropriate/cycle} = \frac{\text{Sum of the HC mass/mode of ea. mode}}{\text{Sum of the work output of ea. mode}}$$

V 38-136
JUL 17 73
XUM

(3)

(i) M_{HC} = Molecular weight of methane, $M_{HC} = 16.04$.

(ii) M_{CO} = Molecular weight of carbon monoxide.

(iii) M_{NOx} = Molecular weight of nitrogen dioxide.

(iv) M_C = Atomic weight of carbon.

(v) M_H = Atomic weight of hydrogen, $M_H = 1.008$.

(vi) a = Atomic hydrogen-carbon ratio of fuel.

(4) For each operating mode:

(i) (HC) = Concentration of hydrocarbons in the exhaust sample in parts per million carbon equivalent, i.e., equivalent propane x 3.

(ii) (CO) = Concentration of carbon monoxide in the exhaust sample in parts per million by volume.

(iii) (CO_2) = Concentration of CO in the exhaust sample in volume percent.

(iv) (NO_x) = Concentration of oxides of nitrogen in the exhaust sample in parts per million by volume, $NO + NO_2$.

(v) F = Mass rate of fuel flow in pounds per hour.

(vi) TIM = Time in mode as specified in paragraph (d) of this section, divided by 60 to yield time in mode in hours.

§ 87.71 Compliance with emission standards.

Compliance with each emission standard by any aircraft or aircraft engine shall be determined by comparing the pollutant level in pounds/1,000 pound-thrust hours/cycle or pounds/1,000 hp.-hr./cycle as calculated in § 87.70(a) with the applicable emission standard under this part. The pollutant level for the cycle shall not exceed the standard.

Subpart H—Test Procedures for Engine Smoke Emission (Aircraft Gas Turbine Engines)

§ 87.80 Introduction.

Except as provided under § 87.5, the procedures described in this subpart shall be the test program to determine the conformity of new and in-use gas turbine engines with the applicable standards set forth in this part. The test is essentially the same as that described in §§ 87.60-87.62, except that the test is designed to determine the smoke emission level at various operating points representative of engine usage in aircraft. Other smoke measurement systems may be used if shown to yield equivalent results and if approved in advance by the Administrator.

§ 87.81 Fuel specifications.

Fuel having specifications as provided in Section 87.61 shall be used in smoke emission testing.

§ 87.82 Sampling and analytical system for measuring smoke exhaust emissions.

(a) *Schematic drawing.* Figure 5 is a schematic drawing of the exhaust smoke sampling and analytical system which shall be used in testing under the regulation in this subpart.

(b) *Component description.* The following components shall be used in the sampling and analytical system for testing under the regulations in this subpart.

(1) *Sample size measurement.* A wet or dry positive displacement meter shall be used to measure sample size to an accuracy of ±0.01 standard cubic foot. Pressure and temperature shall be measured immediately upstream of the meter. Accuracy shall be no less than ±0.10 in. Hg and ±4° F., respectively. If a dry type meter is used, it may be located between the filter holder and the vacuum pump.

(2) *Sample flow rate measurement.* Sample flow rate shall be measured with a rotameter with accuracy of no less than ±0.02 cubic foot per minute.

(3) *Filter holder.* The filter holder shall firmly clamp the filter material so that overall system leakage does not exceed that provided in § 87.84(c). The holder internal geometry shall be such that the variation of SN over the sample spot surface is not greater than two. Required elements of the filter holder design are given in Figure 6. The filter holder shall be made of corrosion resistant material.

(4) *Sampling probe.* The sample probe and procedure shall be the same as used to show compliance with § 87.64(c).

(5) *Sampling lines.* The sampling lines shall be straight through with no kinks or loops, and no bends having a radius of less than 10 line diameters. Sampling line inside diameter shall be within 0.18 to 0.32 inch. The sampling line section from the probe exit to valve A entrance shall be of minimum length, not greater than 75 feet, with a minimum of fittings or other breaks. Line material shall be such as to not encourage build-up of either particulate matter or static electric charge, such as stainless steel or copper.

(c) The emission rates for each mode shall be computed by use of the following formulas:

(1) HC emission rate = $\frac{(HC)_F}{Mac\left(\frac{10^6}{10^6}\right)}$

(2) CO emission rate = $\frac{(CO)_F}{Mco\left(\frac{(CO)}{10^6}+(CO_2)+\frac{(HC)}{10^4}\right)}$

(3) NO_x emission rate = $\frac{(NO_x)_F}{M_{NOx}\left(\frac{(CO)}{10^6}+(CO_2)+\frac{(HC)}{10^4}\right)}$

(d) The times in mode (TIM) shall be as specified below:

Time in mod (minutes)	Class T1 or T2	Class T2, T3 or T4
(1) Taxi/idle (out)	19	19
(2) Takeoff	0.5	0.7
(3) Climbout	2.5	1.0
(4) Approach	4.0	1.0
(5) Taxi/idle (in)	7.0	7.0

(e) Meaning of symbols:

(1) (i) HC mass/mode = Total mass of hydrocarbon emissions in pounds emitted during an operational mode as specified in Section 87.62 and paragraph (d) of this section.

(ii) CO mass/mode = Total mass carbon monoxide emissions in pounds emitted during an operational mode as specified in Section 87.62 and paragraph (d) of this section.

(iii) NO_x emission rate = Pounds/hour of nitrogen oxides emitted during an operational mode.

(2) (i) HC emission rate = Pounds/hour of exhaust hydrocarbons emitted during an operational mode.

(ii) CO emission rate = Pounds/hour of exhaust carbon monoxide emitted during an operational mode.

(iii) NO_x emission rate = Pounds/hour of exhaust oxides of nitrogen emitted during an operational mode.

(3) (i) M_{HC} = Sum of the (HC) mass/mode of eq. mode / Sum of the work output of eq. mode

(ii) M_{CO} = Sum of the (CO) mass/mode of eq. mode / Sum of the work output of eq. mode

(iii) M_{NOx} = Sum of the NO_x mass/mode of eq. mode / Sum of the work output of eq. mode

(b) The pollutant mass and work output per mode shall be computed by use of the following formulas:

(1) HC mass mode = HC emission rate x TIM.

(2) CO mass mode = CO emission rate x TIM.

(3) NO_x mass mode = NO_x emission rate x TIM.

(4) Work output of each mode = power (in 1000 pounds thrust or 1000 horsepower) x TIM.

(c) The emission rates for each mode shall be computed by use of the following formulas:

(1) HC emission rate = $\frac{(HC)_F}{Mac\left(\frac{10^6}{10^6}\right)}$

(2) CO emission rate = $\frac{(CO)_F}{Mco\left(\frac{(CO)}{10^6}+(CO_2)+\frac{(HC)}{10^4}\right)}$

(3) NO_x emission rate = $\frac{(NO_x)_F}{M_{NOx}\left(\frac{(CO)}{10^6}+(CO_2)+\frac{(HC)}{10^4}\right)}$

(d) The times in mode (TIM) shall be as specified below:

Time in mod (minutes)	Class T1 or T2	Class T2, T3 or T4
(1) Taxi/idle (out)	19	19
(2) Takeoff	0.5	0.7
(3) Climbout	2.5	1.0
(4) Approach	4.0	1.0
(5) Taxi/idle (in)	7.0	7.0

(e) Meaning of symbols:

(1) (i) HC mass/mode = Total mass of hydrocarbon emissions in pounds emitted during an operational mode as specified in Section 87.62 and paragraph (d) of this section.

(ii) CO mass/mode = Total mass carbon monoxide emissions in pounds

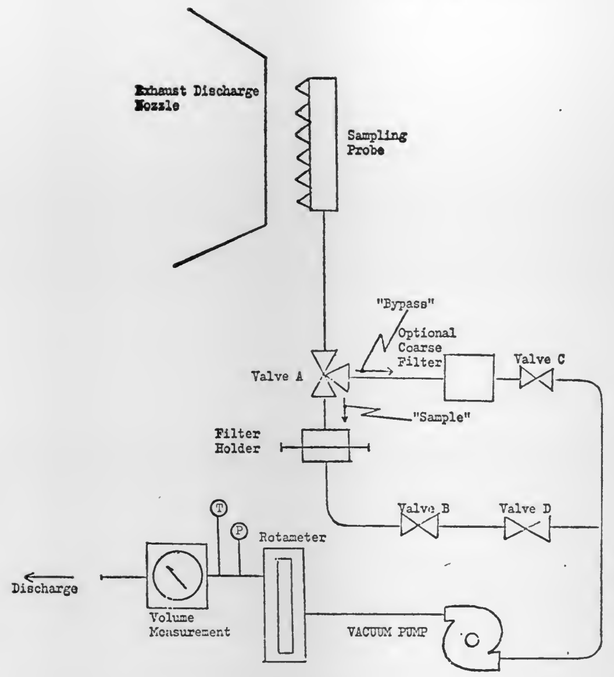


Figure 5 - SAMPLING SYSTEM SCHEMATIC DIAGRAM

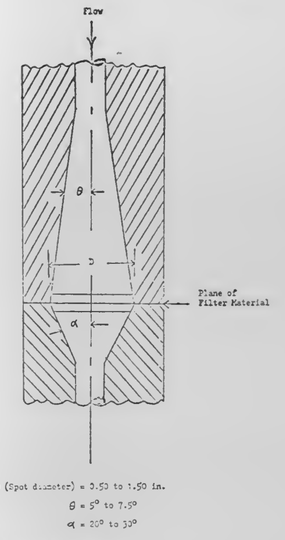

Figure 6 - FILTER HOLDER SCHEMATIC DIAGRAM

V 38 I 136 J 17 73 XUM

(6) *Valving.* Four valve elements shall be provided. Valve A shall be a quick acting, full-flow, flow diverter with "closed," "sample," and "bypass" positions. Valve A may consist of two valves, provided that they are interlocked so that one of the pair cannot act independently of the other. Valves B and C shall be throttling valves used to establish a system flow rate. Valve D shall be a shutoff valve used in isolating the filter holder. All valves shall be made of corrosion resistant material.

(7) *Vacuum pump.* The vacuum pump shall have a no-flow vacuum capability of at least 22 in. Hg. V., and full-flow capacity of 1 s.c.f.m. minimum.

(8) *Reflectometer.* A reflectometer conforming to ASA standard for diffuse reflection density, number Ph2.17–1958, shall be used. The diameter of the reflectometer light beam on the filter paper shall be no more than one-half of "D," the diameter of the filter spot. The allowable range of "D" is given in Figure 6.

(9) *Filter material.* The filter material shall be Whatman No. 4 filter paper or equivalent approved by the Administrator.

§ 87.83 Information to be recorded.

The following information shall be recorded with respect to each test in addition to that information called for in § 87.65 (a) through (c).

(a) Sample temperature.

(b) Sample pressure.

(c) Actual sample volume at sampling conditions.

(d) Actual sample flow rate at sampling conditions.

(e) Leak and cleanliness checks substantiation as required by § 87.84 (b) and (c).

§ 87.84 Calibration and instrument checks.

(a) *Reflectometer calibration.* The reflectometer required by § 87.82(b)(8) shall be calibrated in accordance with manufacturer's specifications.

(b) *System maintenance.* The need for cleaning or replacement shall be determined by conducting the following cleanliness check:

(1) Full open valves B, C, and D.

(2) Use the vacuum pump and alternately set valve A to "bypass" and "sample" to purge the entire system with clean air for at least 5 minutes.

(3) Set valve A to "bypass."

(4) Close valve D and clamp clean filter material into the holder. Open valve D.

(5) Set valve A to "sample," reset back to "bypass" after 1 standard cubic foot of air per square inch of filter area has passed through the filter material.

If the filter spot exhibits SN greater than 3, the system lines must be cleaned or replaced. The system shall not be used until this cleanliness requirement has been met.

(c) *Leak check.* The following procedure shall be used to leak check the system.

(1) Clamp clean filter material into the holder.

(2) Close valve A, full open valves B, C, and D.

(3) Run the vacuum pump for 5 minutes.

The system shall be satisfactory if no more than 0.20 standard cubic foot passed through the volume meter during 5 minutes. The system shall not be used until this requirement has been met.

§ 87.85 Test procedures.

(a) The engine shall be operated as provided in § 87.62. The leak check and cleanliness check requirements of § 87.84 shall be confirmed before and after each engine test. The test shall be repeated if the requirements of § 87.84 are not confirmed.

(b) Precautions: The material being measured is composed of low-micron and/or submicron size agglomerated particles. Precautions should be taken to assure that steady state conditions have been achieved prior to taking a sample. To prevent material accumulation, the system shall not be left in a no-flow condition when exhaust gas is contained.

(c) Sampling: Not less than 1 minute shall be allowed to assure that the system is fully charged with a representative gas sample. The sampling flow rate shall be maintained at 0.50±0.02 c.f.m. At least four sample sizes shall be taken within the range of 0.00765 to 0.115 lb. of exhaust gas per square inch of filter. Samples shall be taken both above and below 0.0230 lb. of exhaust gas per square inch of filter.

(d) Temperature control: The gas temperature from the sampling probe entrance to the filter material shall be above the dew point temperature. All lines and valves shall be lagged and/or heated as necessary to meet this requirement.

(e) Preparation for each power setting: The following shall be done to prepare the system at each power setting:

(1) Set valve A to "bypass," close valve D.

(2) Draw exhaust gas for 5 minutes minimum, then use valve C to set flow rate at 0.50±0.02 c.f.m.

(3) Clamp clean filter material into the holder.

(4) Open valve D.

(5) Set valve A to "sample" and use valve B to again set the flow rate to 0.50±0.02 c.f.m. This shall be done quickly before particulate buildup on the filter causes excessive pressure drop.

(6) Set valve A to "bypass" and close valve D.

(7) Clamp clean filter material into the holder.

(f) Sampling procedure: The procedure for smoke sampling at each power setting shall be as follows:

(1) With valve D closed and valve A set at the "bypass" position, charge the lines with exhaust gas for 1 minute minimum. Reestablish flow rate at 0.50±0.02 c.f.m. as required, using valve C.

(2) Open valve D.

(3) Set valve A to "sample," allow the chosen sample volume to pass, then set valve A to "bypass."

(4) Close valve D and clamp clean filter material into the holder.

(5) Repeat subparagraphs (2) through (4) of this paragraph for at least three more sample sizes in accordance with paragraph (c) of this section.

§ 87.86 Test run.

With respect to engine operation, the test run shall be conducted in accordance with § 87.68.

§ 87.87 Determination of SN.

Smoke spot analysis shall be made with a reflectometer as specified in § 87.82(b)(8). The backing material shall be black with a maximum absolute reflectance of 3 percent. The reflectance reading of each spot shall be used to calculate SN by: $SN = 100\left(1 - \frac{Rs}{Rw}\right)$, where Rs=absolute reflectance of the sample spot. Rw=absolute reflectance of clean filter material.

§ 87.88 Calculations.

(a) *Calculation of W.* The sample weight (W) shall be calculated by: $W\ (lb.) = 1.326\frac{PV}{T}$, where P and T are sample pressure and temperature in units of inches of mercury absolute and degrees Rankine, respectively, measured immediately upstream of the volume meter. V is measured sample volume in cubic feet.

(b) *Calculation of W/A.* The sample weight in pounds per square inch of filter spot area (W/A) shall be calculated for each sample size taken.

(c) *Plotting SN versus W/A.* All SN shall be plotted versus W/A on semilog coordinates, with W/A as the logarithmic abscissa. A straight line shall be fitted to these points using the method of least squares. Such a line shall be produced for each power setting specified.

(d) *Plotting reporting values of SN versus power setting.* Values of SN shall be read from the straight line functions of paragraph (c) of this section for W/A=0.0230 lb/sq. in. These SN are the values to be reported and shall be presented by plotting them as ordinate versus power setting as abscissa on rectangular coordinates.

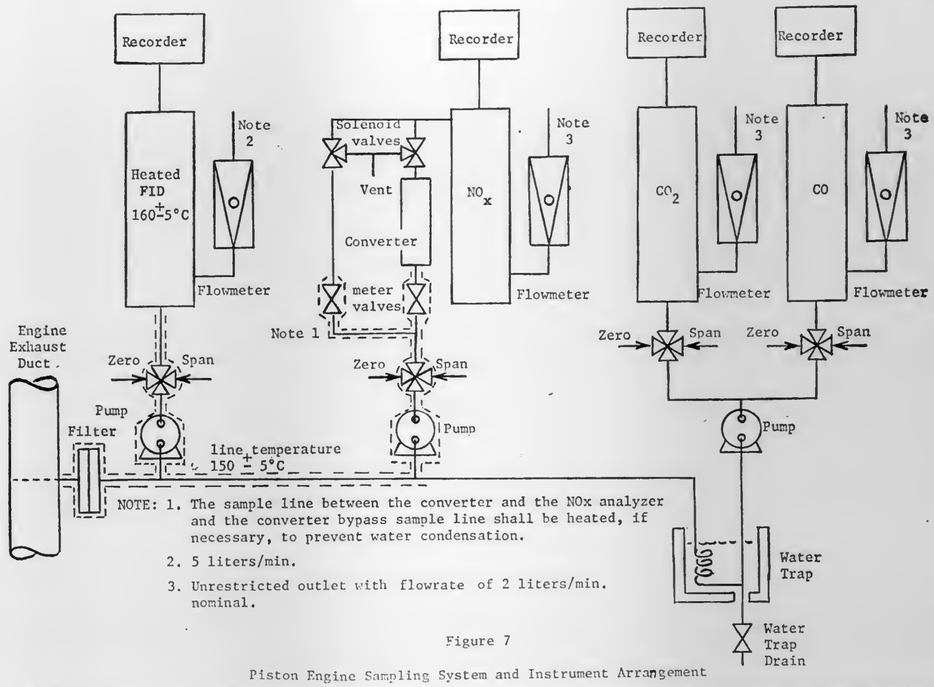

Figure 7

Piston Engine Sampling System and Instrument Arrangement

§ 87.89 Compliance with emission standards.

Compliance with each emission standard shall be determined by comparing the plot of SN versus power setting from § 87.88 with the applicable emission standard under this part. The SN at every power setting shall not exceed the standard.

Subpart I—Test Procedures for Engine Exhaust Gaseous Emissions (Aircraft Piston Engines)

§ 87.90 Introduction.

Except as provided under § 87.5, the procedures described in this subpart shall be the test program to determine the conformity of new and in-use aircraft piston engines with the applicable standards set forth in this part.

(a) The test consists of operating the engine at prescribed power settings on an engine dynamometer or test stand. The exhaust gases generated during engine operation are sampled continuously for specific component analysis through the analytical train.

(b) The exhaust emission test is designed to measure hydrocarbon, carbon monoxide, and oxides of nitrogen concentrations and determine mass emissions through calculations during a simulated aircraft landing-takeoff cycle (LTO). The LTO cycle is based on time in mode data during high activity periods at major airports. The test consists of five modes of engine operation: Taxi/idle (out), takeoff, climbout, approach, and taxi/idle (in). The mass emissions for the modes and engine rated power are combined to yield the reported values.

(c) When an engine is tested for exhaust emissions on an engine dynamometer or test stand, the complete engine shall be used with all accessories, which might reasonably be expected to influence emissions to the atmosphere, installed and functioning.

§ 87.91 Gasoline fuel specifications.

For exhaust emission testing, fuel meeting the specifications of ASTM D910 latest version for grades 80/87 or 100/130 (as applicable) shall be used. The lead content and octane rating of the fuel shall be in the range recommended by the engine manufacturer.

§ 87.92 Test procedure.

(a) (1) The engine shall be tested in each of the following five engine operating modes which simulate aircraft operation to determine its mass emission rates:

Mode	Power setting (percent of rated power)
Taxi/idle (out)	See subparagraph (2) of this paragraph
Takeoff	100 percent
Climbout	See subparagraph (3) of this paragraph
Approach	40 percent
Taxi/idle (in)	See subparagraph (2) of this paragraph

(2) The taxi/idle operating modes shall be conducted in accordance with the manufacturer's recommended power setting.

(3) The climbout operating mode shall be conducted in accordance with the manufacturer's recommended power setting: *Provided,* That the power setting shall be between 75 and 100 percent of rated power.

(b) Emission testing shall be conducted on warmed-up engines which have achieved a steady operating temperature.

§ 87.93 Sampling and analytical system for measuring exhaust emissions.

(a) *Schematic drawing.* Figure 7 is a schematic drawing of the exhaust gas sampling and analytical system which shall be used for testing under the regulations in this subpart. Additional com-

V 38 1 136 JUL 17 73 XUM

ponents such as instruments, valves, solenoids, pumps, and switches may be used to provide additional information and coordinate the functions of the component systems.

(b) *Water removal devices.* No desiccants, dryers, water traps, or related equipment may be used to treat the exhaust sample flowing to the oxides of nitrogen measurement instrumentation. Temperature control shall be provided for NOx sample lines, hardware and instrument to prevent water condensation.

(c) *Component description (exhaust gas sampling system).* The following components shall be used in the exhaust gas sampling system for testing under the regulations in this subpart:

(1) *Sampling probe.* The probe will be made of stainless steel of at least one-fourth inch outside diameter extending across the diameter of the engine exhaust duct. The gas sample will be drawn through a minimum of 5 holes in the sample probe distributed uniformly across the inside diameter of the engine exhaust duct. Where the engine has two or more exhaust pipes, the pipes shall be combined into a common exhaust pipe of sufficient length to provide for good mixing.

(2) *Sample transfer.* The sample shall be transferred from the probe to the analytical instruments through a stainless steel or Teflon sample line. Sample flow rate from the engine to the instruments shall be such that the transport time from exhaust pipe to instruments is 2 seconds or less.

(d) *Component description (exhaust gas analytical system).* The analytical system provides for the determination of hydrocarbon concentrations by flame ionization detector analysis, the determination of carbon monoxide and carbon dioxide concentrations by nondispersive infrared analysis and the determination of oxides of nitrogen concentrations by chemiluminescence analysis of exhaust samples. The chemiluminescence method of analysis requires that the nitrogen dioxide present in the sample be converted to nitric oxide before analysis. Other types of analyzers may be used if shown to yield equivalent results and if approved in advance by the Administrator. See appendix B of this part.

§ 87.94 Information to be recorded.

The following information, as applicable, shall be recorded with respect to each test:

(a) *General.* (1) Facility performing test.

(2) Description of test equipment including the probe and sampling and analytical train.

(3) Instrument operator.

(4) Test stand operator.

(5) Fuel identification including H/C ratio and additives, if any.

(b) *Aircraft (in which engine will be installed) description.* (1) Manufacturer.

(2) Model number.

(3) Serial number (if known).

(4) User.

(c) *Engine description.*—(1) Manufacturer.

(2) Model number.

(3) Serial number.

(4) Displacement.

(5) Type, manufacturer, and model of carburetion.

(6) Cylinder configuration.

(7) Turbocharger manufacturer and model, if applicable.

(d) *Test data.*—(1) Test number.

(2) Date.

(3) Time.

(4) Ambient temperature and engine inlet temperature.

(5) Barometric pressure.

(6) Relative humidity.

(7) Sample line temperature.

(8) Sample line residence time.

(9) All pertinent instrument information such as tuning, gain, full scale range.

(10) Recorder charts: Identify zero, span and exhaust gas sample traces.

(e) *Operating mode data.*—(1) Nominal power setting.

(2) Actual power setting, horsepower.

(3) Speed, revolutions per minute.

(4) Absolute manifold pressure, inches mercury.

(5) Measured fuel flow, pounds per minute.

(6) Air flow, pounds per minute and method of determination.

(7) Pollutant concentration, from recorders, in percent or parts per million by volume, and parts per million carbon for hydrocarbons.

§ 87.95 Calibration and instrument checks.

Calibration and instrument checks shall be performed in accordance with § 87.66 except that daily calibration and instrument checks shall be performed in accordance with § 87.96.

§ 87.96 Sampling procedures.

(a) *HC, CO, CO², and NOx measurements.* Allow a minimum of 2 hours warmup for the CO, CO_2, HC and NOx analyzers. (Power is normally left on infrared and chemiluminescence analyzers; but when not in use, the chopper motors of the infrared analyzers are turned off and the phototube high voltage supply of the chemiluminescence analyzer is placed in the standby position.) The following sequence of operations shall be performed in conjunction with each series of measurements:

(1) Check the sampling system for any leaks that could dilute the exhaust gas.

(2) Introduce the zero grade gas at the same flow rates used to analyze the test samples and zero the analyzers. Obtain a stable zero on each amplifier meter and recorder. Recheck after tests.

(3) Introduce span gases and set the CO and CO_2 analyzer gains, the HC analyzer sample capillary flow rate and electronic gain control, if provided, and the NO, anaylzer high voltage supply or amplifier gain to match the calibration curves. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test samples. Span gases should have concentrations equal to approximately 80 percent of each range used. If gain has shifted significantly on the CO or CO_2 analyzers, check tuning. If necessary, check calibration. Respan at least at end of test but not less than once per hour. Show actual concentrations on chart. Log gain readings.

(4) Check zeros; repeat the procedure in subparagraphs (1) and (2) of this paragraph if required.

(5) Check sample line temperature and sample residence time. To check sample residence time:

(i) Introduce HC span gas into sampling system at sample inlet and simultaneously start timer.

(ii) When HC instrument indication is 15 percent of span concentration, stop timer.

(iii) If elapsed time is more than 2.0 seconds, make necessary adjustments.

(iv) Repeat (i) through (iii) with CO, CO_2, and NO instruments and span gases.

(6) Check instrument flow rates and pressures.

(7) The engine shall be operated in each operating mode until emission levels have stabilized as indicated by a constant instrument reading or recorder ouput. This stabilized reading shall be recorded and used in calculating mass emission rates as called for in § 87.99.

(8) Measure HC, CO, CO_2, and NOx concentrations of the exhaust sample at the various modes called for in § 87.92.

(9) Recheck zero and span points at the end of the test and also at approximately one hour intervals during the test. If either has changed by ±2 percent of full scale, the test shall be rerun after instrument maintenance: *Provided*, That if it is impractical to repeat the test, a correction based on interpolation linear with time is acceptable for corrections within ±4 percent.

(b) *Carbon balance.* As a test of representative sample collection, a carbon balance shall be calculated from air and fuel flow data. This balance shall be within ±5 percent of that calculated from exhaust gas constituents or the test will be invalidated. Fuel flow data shall be derived by measurement during the test for which emissions are to be calculated. Air flow data preferably is from direct measurement but if such measurement is impractical, the data shall be taken from air consumption curves generated for the particular model of engine under test.

(c) *Sample system contamination.* (1) Care shall be taken to avoid loading of the sampling system with raw fuel discharge during engine starting.

(2) When the sample probe is in the exhaust stream and sampling is not in process, a back purge with air or an inert gas may be necessary to protect the probe and sample line from hydrocarbon buildup.

Check sample line for contamination each time the instrument zero and span points are checked. Use the following procedure to check the sample line:

(i) Immediately after instrument zero and span measurements and necessary adjustments are complete, introduce hydrocarbon zero gas near the sample probe. If the instrument zero reading increases by more than 5 percent of the scale in use the sample line shall be purged or cleaned as required, to bring the zero within limits.

(ii) When the requirements of paragraph (c)(2)(i) of this section have been met, introduce hydrocarbon span gas near the sample probe. If the instrument span reading is different by more than ±5 percent from the correct setting for the scale in use, the sample line shall be purged or cleaned, as required to bring the span within limits.

§ 87.97 Test run.

A test run shall consist of operating the engine in accordance with § 81.92. The engine shall be operated in the sequence called for under that section without intervening operating points unless an alternate procedure is agreed to in writing by the Administrator before such testing is conducted.

§ 87.98 Chart reading.

Determine the HC CO, CO_2, and NOx concentrations of the exhaust sample during the various modes from the instrument deflections or recordings making use of appropriate calibration charts. CO and CO_2 measurements shall be converted to a wet basis by multiplying the recorded concentrations by a conversion factor calculated in accordance with good engineering practices for rich or lean mixtures as appropriate from actual air and fuel flow measurements or from air consumption curves generated for the particular model of engine under test.

§ 87.99 Calculations.

(a) The final reported test results shall be computed by use of the following formulas:

(1) Hydrocarbon:

$$\text{HC pounds/rated power/cycle} = \frac{\text{Sum of the HC mass/mode of ea. of the modes}}{\text{Engine rated power (horsepower)}}$$

(2) Carbon monoxide:

$$\text{CO pounds/rated power/cycle} = \frac{\text{Sum of the CO mass/mode of each of the modes}}{\text{Engine rated power (horsepower)}}$$

(3) Oxides of nitrogen:

$$\text{NO}_x \text{ pounds/rated power/cycle} = \frac{\text{Sum of the NO}_x \text{ mass/mode of ea. of the modes}}{\text{Engine rated power (horsepower)}}$$

(b) The pollutant mass per mode shall be computed by use of the following formulas:

(1) HC mass/mode=HC emission rate x TIM.

(2) CO mass/mode=CO emission rate x TIM.

(3) NOx mass/mode=NOx emission rate x TIM.

(c) The emission rates shall be computed by use of the following formulas:

(1) HC emission rate $= \dot{v}$ exhaust × density HC × $\frac{\text{HC conc}}{1{,}000{,}000}$

(2) CO emission rate $= \dot{v}$ exhaust × density CO × $\frac{\text{CO conc}}{1{,}000{,}000}$

(3) NO_x emission rate $= \dot{v}$ exhaust × density NO_x × $\frac{NO_x \text{ conc}}{1{,}000{,}000}$

(d) The time-in-mode (TIM) shall be as specified below (in minutes):

(1) Taxi/idle (out)	12.0
(2) Takeoff	0.3
(3) Climbout	5.0
(4) Approach	6.0
(5) Taxi/idle (in)	4.0

(e) Meaning of symbols:

(1)(i) HC mass/mode=Total mass of hydrocarbons emissions in pounds emitted during an operational mode as specified in § 87.92 and paragraph (d) of this section.

(ii) CO mass/mode=total mass of carbon monoxide emissions in pounds emitted during an operational mode as specified in § 87.92 and paragraph (d) of this section.

(iii) NOx mass/mode=total mass of oxides of nitrogen emissions in pounds emitted during an operational mode as specified in § 87.92 and paragraph (d) of this section.

(2)(i) HC emission rate=pounds/hour of exhaust hydrocarbons emitted in an operational mode.

(ii) CO emission rate=pounds/hour of exhaust hydrocarbons emitted in an operational mode.

(iii) NOx emission rate=pounds/hour of exhaust oxides of nitrogen emitted in an operational mode.

(3) V exhaust=Total engine exhaust volume flow rate in terms of cubic feet per hour at 68°F. and 760 mm. Hg pressure. V exhaust shall be calculated in accordance with good engineering practices from actual air and fuel flow measurements or from air consumption curves generated for the particular model of engine under test.

(4)(i) Density HC=Density of hydrocarbons in the exhaust gas, assuming an average carbon to hydrogen ratio of 1:1.85, in pounds per cubic foot at 68°F. and 760 mm. Hg pressure (0.0359 lb./cu. ft).

(ii) Density CO=Density of carbon monoxide in the exhaust gas in pounds per cubic foot at 68°F. and 760 mm. Hg pressure (0.0726 lb./cu. ft.).

(iii) Density NOx=Density of oxides of nitrogen in the exhaust gas, assuming they are in the form of nitrogen dioxide, in pounds per cubic foot at 68°F. and 760 mm. Hg pressure (0.119 lb./cu. ft.).

(5)(i) HC conc.=hydrocarbon concentration of the exhaust sample in pounds per minute carbon equivalent, i.e., equivalent propaneX3.

(ii) CO conc.=Carbon monoxide concentration of the exhaust sample in parts per million by volume.

(iii) NOx conc.=Oxides of nitrogen concentration of the exhaust sample in parts per million by volume.

(6) TIM=Time in mode as specified in paragraph (d) of this section divided by 60 to yield time in mode in hours.

§ 87.100 Compliance with emission standards.

Compliance with each emission standard shall be determined by comparing the pollutant level to pounds/rated power/cycle as calculated in accordance with § 87.99, with the applicable emission standard under this part. The pollutant level for the cycle shall not exceed the standard.

Appendix A—Instrumentation (Aircraft Gas Turbine Engine Measurements)

(a) *NDIR instruments.* Nondispersive infrared (NDIR) analyzers shall be used for the continuous monitoring of carbon monoxide and carbon dioxide.

The NDIR instruments operate on the principle of differential energy absorption from parallel beams of infrared energy. The energy is transmitted to a differential detector through parallel cells, one containing a reference gas, and the other, sample gas. The detector, changed with the component to be measured, transduces the optical signal to an electrical signal. The electrical signal thus generated is amplified and continuously recorded. The NDIR analyzer used in accordance with Subpart H of this part shall meet the following specifications:

(1) *Response time (electrical).* 90 percent full scale response in 0.5 second or less. Zero drift—Less than ±1 percent of full scale in 2 hours on most sensitive range. Span drift—Less than ±1 percent of full scale in 2 hours on most sensitive range. Repeatability—±1 percent of full scale. Noise—Less than 1 percent of full scale on most sensitive range. Cell temperature—Minimum 50° C. maintained within ±2° C.

(2) *Range and accuracy.*

Range	Accuracy excluding interferences
Carbon monoxide:	
0 to 100 p.p.m.	±2 percent of full scale
0 to 500 p.p.m.	±1 percent of full scale
0 to 2500 p.p.m.	±1 percent of full scale
Carbon dioxide:	
0 to 2 percent	±1 percent of full scale
0 to 5 percent	±1 percent of full scale

(3) All NDIR instruments shall be equipped with cells of suitable length to measure exhaust concentrations within the ranges encountered to the indicated accuracy. Range changes shall be accomplished either by the use of stacked sample cells or changes in the electronic circuitry, or both.

(b) *Total hydrocarbon analyzer* (1) General design specifications. The measurement of total hydrocarbon is made by an analyzer using a flame ionization detector (FID). With this type detector an ionization current, proportional to the mass rate of hydrocarbon entering a hydrogen flame, is established between two electrodes; the small current is

V 38 136 JUL 17 73 XUM

measured by an electrometer amplifier and continuously recorded.

The analyzer shall be fitted with a constant-temperature oven housing the detector and sample-handling components. It shall maintain temperature within ±2°C. of the set point, which shall be within 155° to 165°C.

The detector and sample handling components shall be suitable for continuous operation at temperatures to 200°C.

(2) The FID analyzer used in accordance with Subpart G of this part shall meet the following specifications:

Response time (electrical)—90 percent of full scale in 0.5 seconds or less.

Noise—±1 percent of full scale on most sensitive range.

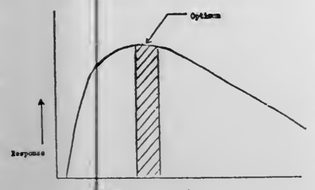
Repeatability—±1 percent of full scale.

Zero drift—Less than ±1 percent of full scale in 2 hours on all ranges.

Span drift—Less than ±1 percent of full scale in 2 hours.

Linearity—Response with propane in air shall be linear with ±2 percent over the range of 0 to 2,000 p.p.m C.

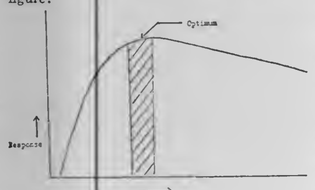
Accuracy:



0 to 10 p.p.m.C--	±5 percent of full scale with propane calibration gas.
0 to 100 p.p.m.C-	±2 percent of full scale with propane calibration gas.
0 to 1,000 p.p.m.C ------	±1 percent of full scale with propane calibration gas.
0 to 2,000 p.p.m.C ------	±1 percent of full scale with propane calibration gas.

(3) Total hydrocarbon analyzer shall have an initial alignment as follows:

(i) *Optimization of detector response.* (*a*) Follow manufacturer's instructions for instrument startup and basic operating adjustment. Fuel shall be 60 percent helium, 40 percent hydrogen containing less than 2 p.p.m.C. hydrocarbon. Air shall be "hydrocarbon-free" grade containing less than 2 p.p.m.C.



(*b*) Set oven temperature at 160°±5°C. and allow at least one-half hour after oven reaches temperature for the system to equilibrate. The temperature is to be maintained at set point ±2°C.

(*c*) Introduce a mixture of propane in air at a propane concentration of about 500 p.p.m.C. Vary the fuel flow to burner and determine the peak response. A change in zero may result from a change in fuel flow; therefore, the instrument zero should be checked at each fuel-flow rate. Select an operating flow rate that will give near maximum response and least variation in response with minor fuel-flow variations. A typical curve for response versus fuel flow is shown in the following figure.

RESPONSE VS. FUEL FLOW

(*d*) To determine the optimum air flow, use fuel flow setting determined above and vary air flow. A typical curve for response versus air flow is shown in the following figure:

RESPONSE VS. AIR FLOW

After the optimum flow settings have been determined these flows are to be measured and recorded for future reference.

(ii) *Oxygen effect.* Check the response of the detector with varied concentrations of oxygen in the sample following the steps outlined below; this test shall be made with oven temperature at the set point and with gas flow to the detector at optimum conditions, as determined in paragraph (b)(3)(i) of this section.

(*a*) Introduce nitrogen (N_2) zero gas and zero analyzer; check zero using hydrocarbon-free air; the zero should be the same.

(*b*) The following blends of propane shall be used to determine the effect of oxygen (O_2) in the sample.

Propane in N_2.

Propane in 10%±0.5% O_2 and balance N_2.

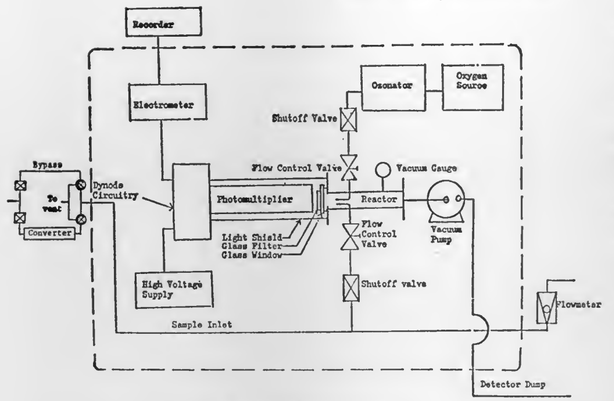
Propane in zero grade air (refer to 87.66 (c)).

The volume concentration of propane in the mixture reaching the detector should be about 500 p.p.m.C, and the concentration of both the O_2 and hydrocarbon should be known within ±1 percent of the absolute value. The zero shall be checked after each mixture is measured. If the zero has changed then the test shall be repeated.

The response to propane in air shall not differ by more than 3 percent from the response to propane in the 10 percent-O_2/90 percent-N_2 mixture, nor differ by more than 5 percent from the response to propane in nitrogen.

The difference between the response to propane in nitrogen and response to propane in diluent containing 10 percent O_2 shall not exceed 2 percent. If the 2 percent specification cannot be met by changing the sample flow rate or burner parameters, such as air and/or fuel-flow rate, the detector shall be modified or replaced.

(iii) Linearity and relative response.



(*a*) With analyzer optimized in accordance with paragraph (b)(3)(i) of this section, the instrument linearity shall be checked for the ranges covering the range of analysis using propane in air at nominal concentrations of 30, 60, and 90 percent full scale of each range. The deviation of a best-fit curve from a least-squares best-fit straight line should not exceed 2 percent of the value at any point. If this specification is met, concentration values may be calculated by use of a single calibration factor. If the deviation exceeds 2 percent at any point, concentration values shall be read from a calibration curve prepared during this alignment procedure.

(*b*) A comparison of response to the different classes of compounds shall be made using (individually) propylene, toluene, n-hexane, and propane, each at 20 to 50 p.p.m.C concentration in air. If the response to propylene, toluene or n-hexane differs by more than 5 percent from the response to propane, check instrument operating parameters. Reducing sample flow rate improves uniformity of response.

(*c*) *Oxides of nitrogen analytical system.* The chemiluminescence method utilizes the principle that nitric oxide (NO) reacts with ozone (O_3) to give nitrogen dioxide (NO_2) and oxygen (O_2). Approximately 10 percent of the NO_2 is electronically excited. The transition of excited NO_2 to the ground state yields a light emission (600–2600 nanometer region) at low pressures. The detectable region of this emission depends on the PM-tube/optical filter being used in the detector. The intensity of this emission is proportional to the mass flow rate of NO into the reactor. The light emission can be measured utilizing a photomultiplier tube and associated electronics.

(1) The method also utilizes the principle that the thermal decomposition of NO_2 i.e., ($2NO_2 \rightarrow 2NO + O_2$), is complete at about 600°C. The rate constant for the dissociation of NO_2 at 600°C. is approximately 10^6 (liters/mole-second). A 6-foot length of one-eighth inch outside diameter, 0.028 inch wall thickness, flawless stainless steel tubing resistance heated using a low voltage, high current power supply to a temperature of 650°C. provides sufficient residence time at a sample flow rate of 700 cc. per minute (1.5 c.f.h.) for essentially complete conversion of nitrogen dioxide to nitric oxide. Other converter designs may be used if shown to yield equivalent results.

(2) The method permits continuous monitoring of NOx concentrations over a wide range. Response time (2 to 4 sec. is typical) is primarily dependent on the mechanical pumping rate at the operating pressure of the reactor. The following figure is a flow schematic illustrating one configuration of the major components required for the oxides of nitrogen analytical system.

OXIDES OF NITROGEN ANALYTICAL SYSTEM

(3) The oxides of nitrogen analyzer used in accordance with Subpart G of this part shall meet the following specifications:

Response time (electrical)—90 percent of full scale in 0.5 seconds or less.

Noise—Less than 1 percent of full scale.

Repeatability—±1 percent of full scale.

Zero drift—Less than ±1 percent of full scale in 2 hours.

Span drift—Less than ±1 percent of full scale in 2 hours.

Linearity—Linear to within ±2 percent of full scale on all ranges.

Accuracy—±1 percent of full scale on all scales.

(d) The dynamometer test stand and other instruments for measurement of power output and the fuel flow measurement instrumentation in accordance with Subpart G of this part shall be accurate to within ±2 percent at all power settings.

APPENDIX B—INSTRUMENTATION (AIRCRAFT PISTON ENGINE MEASUREMENTS)

(a) The NDIR analyzers used for continuous monitoring of carbon monoxide and carbon dioxide in accordance with Subpart I of this part shall meet the following specifications:

(1) Response time (electrical—90 percent full scale response in 0.5 second or less. Zero drift—Less than ±1 percent full scale in 2 hours on most sensitive range. Span drift—Less than ±1 percent of full scale in 2 hours on most sensitive range. Noise—Less than 1 percent of full scale on most sensitive range.

(2) Range and accuracy:

Range	*Accuracy excluding interferences*
Carbon monoxide, 0–12 percent----	±1 percent of full scale.
Carbon dioxide, 0–15 percent------	±1 percent of full scale.

(b) The FID analyzer used for measurement of hydrocarbons in accordance with Subpart I of this part shall meet the following specifications:

Response time (electrical)—90 percent of full scale in 0.5 seconds or less.

Noise—±1 percent of full scale on most sensitive range.

Repeatability—±1 percent of full scale.

Zero drift—Less than ±1 percent of full scale in 2 hours on all ranges.

Span drift—Less than plus or minus of full scale in 2 hours.

Linearity—Response with propane in air shall be linear with ±2 percent over the range of 0 to 20,000 p.p.m.C.

Accuracy:

0 to 100 p.p.m.C----	±5 percent of full scale with propane calibration gas.
0 to 1,000 p.p.m.C--	±2 percent of full scale with propane calibration gas.
0 to 10,000 p.p.m.C-	±1 percent of full scale with propane calibration gas.

(c) The oxides of nitrogen analyzer used for measurement of oxides of nitrogen in accordance with Subpart I of this part shall meet the following specifications:

Response time (electrical)—90 percent of full scale in 0.5 second or less.

Noise—Less than 1 percent of full scale.

Repeatability—±1 percent of full scale.

Zero drift—Less than ±1 percent of full scale in 2 hours.

Span drift—Less than ±1 percent of full scale in 2 hours.

Linearity—Linear to within ±2 percent of full scale on all ranges.

Accuracy—±1 percent of full scale on all scales.

(d) The dynamometer, test stand, and other instruments for measurement of power output and air and fuel flow measurement instrumentation in accordance with Subpart I of this part shall be accurate to within ±2 percent at all power settings.

FEDERAL REGISTER
Area Code 202 Phone 962-8626

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., Ch. 15), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended (44 U.S.C. 1510). The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Atomic Energy Commission, appropriation authorization (July 6, 1973; 87 Stat. 143)

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Agriculture

Correction

In F.R. Doc. 73–13518, appearing at page 17827 in the issue of Thursday, July 5, 1973, in the first line of the second paragraph the letter "(e)" in parenthesis in the section designation should read "(c)."

PART 213—EXCEPTED SERVICE

Department of Justice

Section 213.3110 is amended to show that 154 positions of Special Agent for undercover work in the Bureau of Narcotics and Dangerous Drugs, excepted under Schedule A, are absorbed by the Drug Enforcement Administration.

Effective on July 18, 1973, the headnote of § 213.3110(c) is amended as set out below.

§ 213.3110 Department of Justice.

* * * * * * *

(c) *Drug Enforcement Administration.* * * *

(5 U.S.C. secs. 3301, 3302; E.O. 10577; 3 CFR 1954–58 Comp. p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] JAMES C. SPRY,
Executive Assistant to the Commissioners.

PART 213—EXCEPTED SERVICE

Executive Office of the President

Section 213.3303 is amended to reflect the following title change: from Private Secretary to an Assistant Director, Office of Management and Budget, to Private Secretary to an Associate Director, Office of Management and Budget.

Effective on July 18, 1973, paragraphs (a) (6) and (8) of § 213.3303 are amended as set out below.

§ 213.3303 Executive Office of the President.

(a) *Office of Management and Budget.* * * *

* * * * * * *

(6) One Secretary to each of four Associate Directors.

* * * * * * *

(8) One Private Secretary to each of three Assistant Directors.

* * * * * * *

(5 U.S.C. secs. 3301, 3302; E.O. 10577, 3 CFR 1954–58 Comp. p. 218)

Title 7—Agriculture

CHAPTER VIII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (SUGAR), DEPARTMENT OF AGRICULTURE

SUBCHAPER G—DETERMINATION OF PROPORTIONATE SHARES

[Docket No. SH–313]

PART 855—MAINLAND CANE SUGAR AREA

Proportionate Shares for Farms for 1974-Crop Sugarcane Not Required

The Sugar Act of 1948, as amended, requires the Secretary of Agriculture to determine for each crop year whether the production of sugar from any crop of sugarcane or sugarbeets will, in the absence of proportionate shares (acreage allotments), be greater than the quantity needed to enable the area to meet its quota and provide a normal carryover inventory for the calendar year during which the larger part of the sugar from such crop will be marketed. Such determination shall be made only after investigation and opportunity for interested persons to testify regarding the need for proportionate shares. A public hearing was held in Atlanta, Georgia, on April 13, 1973. The following determination is issued pursuant to section 302 of the Sugar Act of 1948, as amended.

§ 855.99 Proportionate shares for the 1974 crop of Mainland sugarcane not required.

It is determined for the 1974 crop of sugarcane in the Mainland Cane Sugar Area that, in the absence of proportionate shares, the production of sugar from such crop will not be greater than the quantity needed to enable the area to meet its quota for 1975, the calendar year during which the larger part of the sugar from such crop normally will be marketed, and provide a normal carryover inventory. Consequently, proportionate shares will not be in effect in the Mainland Cane Sugar Producing Area for the 1974 crop.

(Sec. 301, 302, 403, 61 Stat. 929, 930, as amended, 932; 7 U.S.C. 1131, 1132, 1153).

STATEMENT OF BASES AND CONSIDERATIONS

Sugar Act requirements. Section 302 of the Sugar Act of 1948, as amended (7 U.S.C. 1132), provides, in part, that the Secretary shall determine for each crop year whether the production of sugar from any crop of sugarcane will, in the absence of proportionate shares, be greater than the quantity needed to enable the area to meet its quota and provide a normal carryover inventory, as estimated by the Secretary for such area for the calendar year during which the larger part of the sugar from such crop normally would be marketed. Such determination may be made only after due notice and opportunity for an informal public hearing.

General. Acreage restrictions have been in effect in the Mainland Cane Sugar Area each year since the 1965 crop, and are presently in effect for the 1973 crop. The desire of farmers to produce sugarcane up through the 1971 crop was so strong as to require acreage controls to prevent over-production. The 1971 amendments to the Sugar Act increased the quota of the Mainland Cane Sugar Area by 300,000 tons beginning in 1972, and the demand for cane acreage has largely been satisfied, especially in Louisiana where producers failed to plant all of the acreage available to them for the 1972 crop, and where 1973 acreage allotments have been underplanted by at least 60,000 acres. Indications are that Florida growers planted all of their 1972 and 1973 shares.

V 38 - 137 JUL 18 73 XUM

Production from the just-completed 1972 harvest was considerably improved over the disappointing 1971 crop. About 1,620,000 tons of raw sugar were produced. Florida produced 960,562 tons of raw sugar (a record), as compared to 659,713 tons in Louisiana where the crop was plagued with heavy rains and power shortages. The processing season in Florida was extended two months to achieve its record production. As a result of the excellent Florida crop, output from the 1972 harvest will approximately equal the area's calendar 1973 quota, thus preventing a further draw down of stocks which are already at a low level. Effective inventory on January 1, 1973 was estimated at 860,000 tons or 54 percent of the area's 1973 marketing opportunity, thus requiring the Area to fill almost half its 1973 annual quota from new crop production in the last two months of the year.

Despite a 15 percent increase in proportionate shares for the year, the 1973 crop is growing on only about 6.7 percent more acreage and can be expected to produce about 1,650,000 tons of sugar based on 5-year average yields. If that estimate is achieved, production would again be roughly equal to the Area's probable 1974 marketing opportunity, again preventing any appreciable increase in working stocks.

Public hearing. An informal public hearing was held in Atlanta, Georgia on April 13 to obtain the views and recommendations of interested persons on matters relating to the establishment of 1974-crop proportionate shares. A spokesman, representing the American Sugar Cane League, the Florida Sugar Cane League, the Louisiana Farm Bureau Federation, the Florida Farm Bureal Federation, the Talisman Sugar Corporation, and the Glades Association of Independent Sugar Cane Growers, recommended that acreage controls remain in effect and that proportionate shares be increased about five percent over the shares presently in effect for the 1973 crop. His testimony and recommendations were supported and endorsed by all who appeared. The witnesses took the position that the appropriate level of effective inventory as indicated by legislative history in connection with the 1965 amendments to the Sugar Act—60 to 70 percent of the annual quota—is no longer appropriate or applicable; and that in the absence of acreage controls there would be serious over-production, resulting ultimately in hardship on both growers and processors if shares are reinstated for a subsequent crop. The witness acknowledged that actual plantings in Louisiana would be about 72,000 acres less than the total of shares resulting from his recommendation. The industry witness estimated that 1,683,000 tons of sugar would be produced from the 1973 crop of sugarcane. He further estimated that the Area would have an effective inventory on January 1, 1974 of 942,000 tons of sugar, or 57.9 percent of the Area's 1974 marketing opportunity. With respect to the 1974 crop, the witness estimated production (based on a five percent increase in proportionate shares) of 1,751,000 tons of sugar and effective inventory on January 1, 1975 of 1,076,000 tons of sugar, or 63 percent of the Area's likely marketing opportunity.

Determination. Legislative history of the Sugar Act in connection with the 1965 amendments indicates that an effective inventory (sugar on hand on January 1 plus sugar to be produced after that date from the prior year's crop) of 60 to 70 percent of the area's annual quota is desirable. The Mainland Cane Sugar Area's calendar 1974 quota will be on the order of 1,626,000 tons, raw value. If the Department's estimate of 1973-crop production is achieved—1,650,000 tons based on 5-year average yields—effective inventory on January 1, 1974 will be about 919,000 tons, or only 56.5 percent of the likely 1974 marketing opportunity. While the industry contends that the 60 to 70 percent standard no longer applies, more than 40 percent of the annual quota would have to be marketed during the last two months of the year (new crop sugar won't be available in Louisiana until about December 1), which could have the effect of depressing prices. The Department does not believe that such a situation is either a good business practice or in the best interest of sugarcane producers and processors. It would take 1973-crop production of nearly 1,710,000 tons in order to raise the Area's effective inventory on January 1, 1974 to 60 percent of their marketing opportunity, and a crop of 1,870,000 tons to raise the effective inventory to 70 percent. Production of 1,710,000 tons in 1973 is possible but unlikely; production of 1,870,000 tons is improbable.

In the absence of restrictions, acreage in Florida is likely to increase by about 10 percent to upwards of 300,000 acres. However, before this can take place existing processing facilities will have to be enlarged. Because of the very limited capacities of existing factories and a lack of suitable land, acreage in Louisiana will not likely increase to any significant degree (probably not more than 370,000 acres will be planted). A crop of that size would be expected to produce a combined total of about 1,740,000 tons of raw sugar, based on 5-year average yields, or only about 40,000 tons more than the Area's estimated marketing opportunity for 1975 (assuming no increase in quota under new legislation), keeping effective inventory as of January 1, 1975 at just over the 50 percent level. Therefore, in the absence of proportionate shares production of sugar from the 1974 crop of sugarcane in the Mainland Cane Sugar Area is not likely to exceed the Area's quota plus a normal carryover inventory.

Accordingly, I hereby find and conclude that the foregoing determination will effectuate the applicable provisions of the Sugar Act of 1948, as amended.

Effective date: July 18, 1973.

Signed in Washington, D.C. on July 10, 1973.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

[No. 73-954]

PART 545—OPERATIONS

Loans on Other Dwelling Units; Correction

JULY 11, 1973.

The Federal Home Loan Bank Board hereby corrects FEDERAL REGISTER Document No. 73-812, which amended § 545.6-1 of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.6-1), published in the issue dated June 20, 1973, at 38 FR 16029-16030, by changing the phrase "issuing or guaranteeing agency" in paragraph (b)(2)(i) of said § 545.6-1 to read "insuring or guaranteeing agency".

By the Federal Home Loan Bank Board.

[SEAL] EUGENE M. HERRIN,
Assistant Secretary.

[FR Doc.73-14691 Filed 7-17-73;8:45 am]

SUBCHAPTER F—REGULATIONS FOR SAVINGS AND LOAN HOLDING COMPANIES

[No. 73-952]

PART 584—REGULATED ACTIVITIES

Excepted Acquisitions

JULY 11, 1973.

The Federal Home Loan Bank Board, by Document No. 73-436, dated March 20, 1973, proposed to amend Part 584 of the Regulations for Savings and Loan Holding Companies (12 CFR Part 584) governing acquisitions of insured institutions under section 408(e)(1)(B)(ii) of the National Housing Act. Notice of such proposed rulemaking was duly published in the FEDERAL REGISTER on March 27, 1973, with an invitation for interested persons to submit written comments by April 30, 1973.

On the basis of its consideration of all relevant material presented by interested persons and otherwise available, the Board hereby amends said Part 584 by adding, immediately after § 584.4 thereof, a new section, § 584.4-1, to read as set forth below, effective August 17, 1973.

Under the amendment set forth below a company which proposes to acquire an insured institution without the prior written approval generally required under section 408(e) of the National Housing Act, because the company considers its acquisition to fall within the exception of section 408(e)(1)(B)(ii), is required prior to such acquisition to submit, on a form specified by the Corporation, satisfactory information pertaining to the acquisition. The acquisition may go forward without the prior written approval of the Corporation 60 days after receipt by the Director of the initial filing under § 584.4-1 unless the Corporation issues a ruling that the company has not shown that the acquisition falls within the exception. During this 60-day period the Corporation may find that a satisfactory showing has been made by an applicant or the Director or Supervisory Agent may request additional information. In this latter case the Corporation need not consider information received more than 45 days after the initial filing.

§ 584.4-1 Information filing required prior to excepted acquisition.

Any company, other than a savings and loan holding company, which proposes to acquire an insured institution without the prior written approval of the Corporation pursuant to paragraph (b)(2) of § 584.4 may do so only upon a showing as provided in this section that the acquisition falls within the exception to such prior written approval contained in that paragraph. This showing shall be made by satisfactory filing of information on a form prescribed by the Corporation. One original and one copy of all filings under this section shall be made with the Director, Holding Companies Section, Office of Examinations and Supervision, Federal Home Loan Bank Board, Washington, D.C. 20552, and concurrently two copies of all such filings shall be sent to the Supervisory Agent. The acquisition may be effected without the prior written approval of the Corporation pursuant to said exception, unless within 60 days after receipt by the Director of the initial filing the Corporation issues a ruling that the company has not shown that the acquisition falls within said exception. The Director or Supervisory Agent may request additional information from the company after receipt of the initial filing, but the Corporation need not consider additional information received by the Director more than 45 days after the initial filing.

(Sec. 402, 48 Stat. 1256, as amended, § 408, 48 Stat. 1261, as added by 73 Stat. 691, as amended, 12 U.S.C. 1725, 1730a, Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943-48 Comp., p. 1071)

By the Federal Home Loan Bank Board.

[SEAL] HENRY A. CARRINGTON,
Secretary.

[FR Doc.73-14692 Filed 7-17-73;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-EA-48; Amdt. 39-1689]

PART 39—AIRWORTHINESS DIRECTIVES

Lycoming Aircraft Engines

The Federal Aviation Administration is amending section 39.13 of Part 39 of the Federal Aviation regulations so as to issue an airworthiness directive applicable to Lycoming HIO-360-D1A type aircraft engines installed on Hughes type 269C and 300C helicopters.

There have been reports that a component of the cushioned drive coupling for Bendix magneto part number 10349235-3 and -4 has, from service experience, a limited life of 300 hours. The loss of the component, the rubber drive plate grommet, could result in failure of the magneto. Since the foregoing deficiency can exist or develop in all engines of similar type design, an airworthiness directive is being issued which will require replacement of the grommet.

In view of the foregoing, a situation exists which requires expeditious adoption of this amendment. Thus notice and public procedure hereon are impractical and cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator, 14 CFR 11.89 [31 FR 13697] § 39.13 of Part 39 of the Federal Aviation Regulations is amended by adding the following new Airworthiness Directive:

AVCO LYCOMING. Applies to HIO-360-D1A model engines installed on Hughes Models 269C and 300C helicopters.

Compliance required within 300 hours time in service after the effective date of this AD and every 300 hours in service thereafter.

To prevent possible failures of the Bendix part numbers 10-349235-3 and 10-349235-4 magnetos, replace the part number 10-391315 rubber drive plate grommet in accordance with Lycoming Service Bulletin No. 364 or equivalent procedure approved by Chief, Engineering and Manufacturing Branch, FAA, Eastern Region.

This amendment is effective July 23, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on July 11, 1973.

ROBERT H. STANTON,
Acting Director, Eastern Region.

[FR Doc.73-14606 Filed 7-17-73;8:45 am]

[Airspace Docket No. 73-SO-27]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area

On May 25, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 13748), stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation regulations that would designate the Dickson, Tenn., transition area.

Interested persons were afforded an opportunity to participate in the rule making through the submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., September 13, 1973, as hereinafter set forth.

In § 71.181 (38 FR 435), the following transition area is added.

DICKSON, TENN.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Dickson Municipal Airport (Lat. 36°07'47" N, Long. 87°25'48" W).

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on July 6, 1973.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.73-14609 Filed 7-17-73;8:45 am]

[Airspace Docket No. 73-SO-50]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Redesignation and Revocation of Control Zone

The purpose of this amendment to Part 71 of the Federal Aviation regulations is to redesignate and revoke the Aguadilla, Puerto Rico, control zone.

The Aguadilla control zone is described in § 71.171 (38 FR 351) and is currently designated 24 hours daily. The USAF has reduced the hours of operation of the airport traffic control tower from 0600 to 2200 hours, local time, daily, and will decommission the control tower and discontinue weather observation and reporting service, effective July 31, 1973. It is necessary to alter the description to reflect the effective hours of the control zone to July 31, 1973, and to amend Federal Aviation Regulations Part 71 by revoking the Aguadilla control zone, effective July 31, 1973. Since these amendments lessen the burden on the public, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended as hereinafter set forth.

Effective immediately, the Aguadilla, Puerto Rico, control zone, described in § 71.171 (38 FR 351) is amended as follows: "This control zone is effective from 0600 to 2200 hours, local time, daily." is added to the description.

Effective 0901 G.m.t., July 31, 1973, the Aguadilla, Puerto Rico control zone, described in § 71.171 (38 FR 351) is revoked.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act 49 U.S.C. 1655(c))

Issued in East Point, Ga., on July 10, 1973.

PHILIP M. SWATEK,
Director, Southern Region.

[FR Doc.73-14610 Filed 7-17-73;8:45 am]

V 38 I 137 JUL 18 73 XUM

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Reg. Docket No. 12989; Amdt. 95-235]

PART 95—IFR ALTITUDES

Miscellaneous Amendments

The purpose of this amendment to Part 95 of the Federal Aviation Regulations is to make changes in the IFR altitudes at which all aircraft shall be flown over a specified route or portion thereof. These altitudes, when used in conjunction with the current changeover points for the routes or portions thereof, also assure navigational coverage that is adequate and free of frequency interference for that route or portion thereof.

As a situation exists which demands immediate action in the interest of safety, I find that compliance with the notice and procedure provisions of the Administrative Procedure Act is impracticable and that good cause exists for making this amendment effective within less than 30 days from publication.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator (24 FR 5662), Part 95 of The Federal Aviation Regulations is amended, effective August 16, 1973 as follows:

1. By amending Subpart C as follows:

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 8737]

PART 13—PROHIBITED TRADE PRACTICES

Golden Grain Macaroni Co. and Paskey DeDominico

Subpart—Acquiring corporate stock or assets: § 13.5 *Acquiring corporate stock or assets;* 13.5–20 Federal Trade Commission Act.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Modified cease and desist order, Golden Grain Macaroni Company, et al., San Leandro, Calif., Docket No. 8737, June 26, 1973]

In the matter of Golden Grain Macaroni Company, a Corporation, and Paskey DeDominico, Individually and as an Officer of said Corporation.

Order modifying an earlier order dated January 18, 1971, 36 F.R. 5212, 78 F.T.C. 63, pursuant to order of December 20, 1972, of the United States Court of Appeals for the Ninth Circuit (Cert. denied on May 29, 1973), by deleting that part of the order requiring divestiture of Oregon Macaroni Company.

The modified order is as follows:

Modified order. Respondent Golden Grain Macaroni Company having filed in the United States Court of Appeals for the Ninth Circuit a petition to review and set aside the order issued herein on January 18, 1971; and the court on December 20, 1972, having rendered its decision and entered its judgment affirming and enforcing said order except for that part of the order requiring divestiture of Oregon Macaroni Company; and the United States Supreme Court having denied a petition filed by respondent for writ of certiorari to the court of appeals for review of said decision and judgment.

Now therefore, it is hereby ordered, That the order of January 18, 1971, be, and it hereby is, modified in accordance with the judgment of the court to read as follows:

It is ordered, That respondent, Golden Grain Macaroni Company, a corporation, and its officers, directors, agents, representatives, employees, subsidiaries, affiliates, successors and assigns, within one (1) year from the date this order becomes final, divest, absolutely and in good faith, subject to the approval of the Federal Trade Commission, all stock, assets, or other interests acquired by Golden Grain Macaroni Company, or its subsidiaries, in Porter-Scarpelli Macaroni Company, as a result of Golden Grain Macaroni Company's acquisition of Mission Macaroni Company.

It is further ordered, That respondent Golden Grain Macaroni Company, a corporation, and its officers, directors, agents, representatives, employees, subsidiaries, affiliates, successors and assigns, within one (1) year from the date this order becomes final, divest, absolutely and in good faith, subject to the approval of the Federal Trade Commission, all stock, assets, or other interests, including the option to purchase additional stock or other interests, in Major Italian Foods Company, Inc., as a result of Golden Grain Macaroni Company's acquisition of stock of Major Italian Foods Company, Inc.

It is further ordered, That none of the stock, assets, properties, rights or privileges to be divested be sold or transferred, directly or indirectly, to any person who is at the time of the divestiture an officer, director, employee or agent of, or under the control or direction of, Golden Grain Macaroni Company or any of its subsidiaries or affiliates, or who owns or controls, directly or indirectly, more than one (1) percent of the outstanding shares of voting stock of Golden Grain Macaroni Company, or any of its subsidiaries or affiliates.

It is further ordered, That for a period of ten (10) years respondent Golden Grain Macaroni Company shall cease and desist from acquiring, directly or indirectly, without prior approval of the Federal Trade Commission, the whole or any part of the share capital or other assets of any corporation engaged in the manufacture of dry paste products within the Pacific Northwest.

It is further ordered, That respondents shall, within sixty (60) days from the date of service of this order and every sixty (60) days thereafter until divestiture is fully effected, submit to the Commission a detailed report of their actions, plans, and progress in complying with the divestiture provisions of this order, and fulfilling their objectives. All reports shall include, among other things that will be from time to time required, a summary of all contacts and negotiations with potential purchasers of the stock, assets, properties, rights or privileges to be divested under this order, the identity of all such potential purchasers, and copies of all written communications to and from such potential purchasers.

By the Commission.

Issued: June 26, 1973.

[SEAL] VIRGINIA M. HARDING,
Acting Secretary.

[Docket No. C-2419]

PART 13—PROHIBITED TRADE PRACTICES

Radioear Corp.

Subpart—Dealing on exclusive and tying basis: § 13.670 *Dealing on exclusive and tying basis;* 13.670–20 Federal Trade Commission Act; Subpart—Delaying or withholding corrections, adjustments or action owed: § 13.675 *Delaying or withholding corrections, adjustments or action owed;* § 13.677 *Delaying or failing to deliver goods; Subpart*—Enforcing dealings or payments wrongfully; § 13.1045 Enforcing dealings or payments wrongfully; Subpart—Maintaining resale prices: § 13.1130 *Contracts and agreements;* § 13.115 *Price schedules and announcements;* § 13.1160 *Refusal to sell.*

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies Sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45) [Ceased and desist order, Radioear Corporation, Canonsburg, Penn., Docket C-2419, June 26, 1973]

In the Matter of Radioear Corporation, a Corporation.

Consent order requiring a Canonsburg, Penn., manufacturer, distributor and repairer of hearing aids, among other things to cease imposing customer and territorial restrictions and exclusive dealing requirements on its dealers; price-fixing activities; requiring its dealers to furnish names and addresses of customers; and failing to include and deliver any express product warranty.

The order to cease and desist, including further order requiring report of compliance therewith, as well as Appendix A, is as follows:

It is ordered, That respondent Radioear Corporation, and its subsidiaries, divisions, affiliates, successors, assigns, officers, directors, agents, representatives and employees, directly or indirectly, or through any corporate or other device, in connection with the manufacturing, distribution, advertising, offering for sale, sale or repair of its own brand name or trademark hearing aids, or related products, in commerce as "commerce" is defined in the Federal Trade Commission Act, shall forthwith cease and desist from:

1. Entering into, maintaining, preserving, or enforcing, by refusal to sell or repair, setting of sales quota or equivalent thereof, termination or threat thereof, communicated expectation or request, or in any other manner, any arrangement or method of doing business with a dealer of hearing aids and/or accessories which has the purpose or effect of precluding or preventing a dealer from selling the product of one or more other hearing aid manufacturers;

2. Refusing to make available promptly upon request:

(a) a hearing aid, accessory or any written materials necessary to fit and sell such hearing aid or accessory, to any dealer engaged in the sale of hearing aids, if respondent makes such products available to any other dealer located within 100 miles of the requesting dealer, or

(b) a repair or replacement part or any written materials necessary to repair or replace such hearing aid, to any person engaged in the repair of hearing aids when requested for such purpose, if respondent makes repair or replacement parts available to any dealer for such purpose; *provided, however,* That if no other provision of this Order is violated thereby:

(1) respondent may require as a condition to the availability directly from it of any of its products that the dealer or person referred to in 2(a) or (b) above has received instruction or met standards necessary for the fitting, servicing

V 38 I 137 JUL 18 73
XUM

and/or repairing of respondent's hearing aids which are required at that time of all then existing dealers of respondent's products or all persons then engaged in the repair of respondent's products, so long as such instruction, if made available to any dealer or person, is made available by respondent on reasonable terms and conditions to all dealers or persons wanting to deal in or repair respondent's product,

(2) respondent may refuse to make available directly from it any of its products to any dealer or person if such requesting dealer or person is able promptly to obtain the product from another dealer or distributor at respondent's price to dealers for a single unit plus a reasonable handling charge, and

(3) respondent may refuse to make available directly from it any of its products to any dealer or person on other grounds related to that dealer's or person's professional competence or ethical conduct, so long as such refusals are uniformly made where such grounds exist:

3. Entering into, maintaining, preserving, or enforcing, by refusal to sell or repair, setting of sales quota or equivalent thereof, termination or threat thereof, communicated expectation or request, report of sale, warranty limitation, use of names or addresses of a dealer's customers, or in any other manner, any arrangement or method of doing business which has the purpose or effect of restricting or limiting.

(a) the territory or area in which a dealer of respondent's hearing aids advertises, offers for sale, sells or repairs such products, or

(b) the persons with whom a dealer of respondent's hearing aids deals;

4. Failing to return any hearing aid submitted to respondent for repair directly to the person who submitted such product for repair, unless otherwise instructed in writing by such person;

5. Fixing, establishing, stabilizing, maintaining or suggesting the prices at which a dealer of respondent's hearing aids may or shall advertise, offer for sale, or sell to the public, or a person repairing respondent's hearing aid may repair, such products; *provided, however,* That nothing in this Order shall prohibit respondent after ten years from the date of entry of this Order from exercising any lawful rights it may then have under the Miller-Tydings Act, 50 Stat., 693 (1937) and the McGuire Act, 66 Stat. 632 (1952) with respect to hearing aids;

6. Requiring that a dealer participating in respondent's cooperative advertising program must not state or imply, in such cooperative adveristments, that the dealer also deals in other brands of hearing aids; *provided, however,* That respondent may continue to prohibit in such cooperative advertisement the stating of other brand names of hearing aids;

7. Requiring that a dealer of the respondent's hearing aids submit to respondent any name or address of any customer of such dealer, or maintaining, using, publishing or disseminating for any purpose any name or address of any customer of a dealer of the respondent's hearing aids obtained from such dealer after the date of this Order without securing a prior written consent of such dealer for such purpose;

8. Preventing any dealer from using respondent's product (brand) name in connection with the advertising, offering for sale, sale or repair of any of respondent's products, except that respondent may protect its rights in such name recognized at law;

9. Failing to include and deliver with any of respondent's hearing aids sold by respondent any express product warranty for such product provided by respondent to the user.

II.

It is further ordered, That respondent shall:

(a) Forthwith distribute a copy of this Order to each of its operating divisions, to its present corporate officers and to its present sales and repair personnel, and shall secure from each such officer, employee or other person, a signed statement acknowledging receipt of said Order;

(b) Within thirty (30) days after service upon it of this Order, distribute a copy of the letter appended to this Order and made a part hereof as Appendix A to each of its existing hearing aid dealers and to every person known to be engaged in the repair of respondent's products;

(c) Within sixty (60) days after service upon it of this Order, place a full-page advertisement in a trade journal or publication with circulation among hearing aid dealers, which advertisement shall clearly and conspicuously disclose the provisions of Part I of this Order;

(d) Within one hundred and twenty (120) days after service upon it of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order, including a list of all dealers and other persons on whom it has served a copy of Appendix A, and a copy of the publication which includes respondent's advertisement required by this Order;

(e) For a period of ten (10) years from the date hereof establish and maintain a file of all records referring or relating to respondent's refusal to sell to any hearing aid dealer, or person engaged in the business of repairing hearing aids, which file must contain a record of a communication to such dealers or persons explaining respondent's refusal to sell, and which file will be made available for Commission inspection on reasonable notice and annually, for a period of five (5) years from the date hereof, submit a report to the Commission listing the names of all dealers or persons with whom respondent has refused to deal over the preceding year, a description of the reason for the refusal, and the date of the refusal;

(f) Notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of this Order.

Issued: June 26, 1973.

By the Commission.

[SEAL] VIRGINIA M. HARDING,
Acting Secretary.

APPENDIX A—LETTER TO HEARING AID DEALERS

(OFFICIAL STATIONERY OF RADIOEAR CORPORATION)

Dear _____

Radioear Corporation has entered into a consent order agreement with the Federal Trade Commission which obligates the company not to impose various restrictions upon dealers or to engage in certain other practices. This agreement is for settlement purposes only and does not constitute an admission by the company that it has engaged in any unlawful conduct.

A copy of the pertinent provisions of the consent order is enclosed for your careful examination. If in the future you believe that any of its terms have been violated, the details may be reported in writing to:

Federal Trade Commission,
Bureau of Competition,
Washington, D.C. 20580

The entry of this consent order does not affect Radioear's method of consignment selling, so long as no provision of this order is violated, and we may continue to rely on our group of existing dealers as primarily responsible for the effective distribution and service of Radioear products. We look forward to continuing such an association with you consistent with the letter and spirit of our consent order agreement.

Sincerely yours,

(Name),
President,
Radioear Corporation.

COMPLAINT

Pursuant to the provisions of the Federal Trade Commission Act (Title 15, U.S.C. Section 41, et seq.) and by virtue of the authority vested in it by said Act, the Federal Trade Commission, having reason to believe that the party identified in the caption hereof, and more particularly described and referred to hereinafter as respondent, has violated the provisions of Section 5 of the Federal Trade Commission Act, and it appearing to the Commission that a proceeding by it in respect thereof would be in the interest of the public, hereby issues its complaint stating its charges as follows:

Paragraph one. Respondent Radioear Corporation (hereinafter sometimes referred to as "Radioear") is a corporation organized under the laws of the State of Delaware, with its principal office and place of business at 375 Valley Brook Road, Canonsburg, Pennsylvania 15317. Radioear Corporation is a subsidiary of the Esterline Corporation, New York, New York.

Paragraph two. Respondent is engaged in the business of manufacturing, distributing, selling and repairing of Radioear brand hearing aids. It distributes and sells to selected retail dealers located throughout the United States, who then resell to the general public.

Paragraph three. In the course and conduct of its business, respondent ships or causes to be shipped hearing aids from its facilities in the State of Pennsylvania to selected retail dealers throughout the United States. There is now and has been for several years a constant and substantial flow of respondent's hearing aids in commerce, as "commerce" is defined in the Federal Trade Commission Act.

Paragraph four. Except to the extent that competition has been restrained by reason of the practices hereinafter alleged, respondent's selected retail dealers, in the course and conduct of their business of offering for sale and selling Radioear hearing aids, are in substantial competition in commerce with one another and with dealers engaged in the offering for sale and selling of other brands of hearing aids; and respondent is in substantial competition in commerce with others engaged in the manufacturing, distributing, selling and repairing of hearing aids.

Paragraph five. Trade and commerce in the United States in hearing aids is substantial. In 1970, the total value of shipments amounted to $50 million at the manufacturers' prices, and is estimated to have exceeded $175 million at retail prices. In 1970, about fifty domestic manufacturers, domestic subsidiaries of foreign manufacturers and domestic distributors of foreign manufacturers sold approximately 510,000 hearing aids through 5,000 retail dealers who employed over 10,000 salesmen.

Paragraph six. In 1970, the top four companies in the hearing aid industry accounted for approximately 50% of the dollar value of shipments; the top eight companies, including respondent Radioear, accounted for approximately 70% of such shipments; and the top twenty companies accounted for over 90% of the industry's shipments.

Paragraph seven. In 1970, respondent Radioear, which has manufactured hearing aids since 1924, had sales in excess of two million dollars, making it the seventh largest hearing aid manufacturer in the United States market.

Paragraph eight. Hearing aids are sold by the manufacturers directly to the retail dealers, who resell the hearing aids to members of the general public. Wholesalers are rarely used in the distribution process. The success of the established manufacturers in selling their products has been based primarily on their ability to secure the services of retaile dealers to sell their products to the hearing handicapped. Similarly, to be successful, new entrants into the market must secure distribution through established dealers.

Approximately 60% of the retail sales of hearing aids occur as a result of initial, direct contact between the hearing aid dealer and the hearing handicapped, while most of the remaining sales are made after the hearing handicapped are referred to dealers by medical doctors or hearing clinics. It is the practice among medical doctors and hearing clinics, after having determined that an individual may benefit from use of a hearing aid, to recommend a hearing aid to the patient by the brand name and model, rather than by its general performance characteristics. This is done on the basis of actual tests with hearing aids which have been placed with such doctors or clinics by either the manufacturers or dealers. Then, because the doctors and clinics do not sell hearing aids, the patient is referred to the hearing aid dealer in his locale who deals in the brand of hearing aid recommended. While the average price of a hearing aid to a dealer is about $100, the average retail price to the hearing handicapped is about $350. More than 50% of the persons with hearing impairment who purchase hearing aids are over 65 years of age.

Paragraph nine. In the distribution and sale of their hearing aids, a number of the manufacturers of hearing aids for many years have used and pursued parallel courses of business behavior.

Among such courses of business behavior are the following:

(1) distributing and selling their hearing aids directly to selected retail dealers, refusing to deal with all other dealers;

(2) entering into agreements or understandings with their dealers, which agreements:

(a) establish territories within which the dealers may advertise and sell their products;

(b) require exclusive dealing in the manufacturers' products;

(c) assign sale or purchase quotas to be met by their dealers;

(d) encourage or require the use of the manufacturers' brand name in the dealers' trade styles;

(e) restrict the classes of customers with whom their dealers may deal;

(f) require their dealers to submit the names and addresses of their customers to the manufacturers;

(g) permit the manufacturer to terminate such agreements without cause upon thirty days notice; and

(h) in the event of such termination permit the manufacturers to repurchase the terminated dealers' products purchased from such manufacturers;

(3) refusing to issue the express product warranties to consumers unless and until their dealers have reported the names and addresses of their customers to the manufacturers;

(4) encouraging or requiring their dealers to participate in cooperative advertising programs which preclude mention that the dealers offer competing brands of hearing aids for sale;

(5) engaging in extensive national brand advertising of their hearing aids;

(6) suggesting to their dealers retail prices for hearing aids which are often more than 300% above the manufacturers' prices to the dealers, with such dealers generally selling at such suggested retail prices; and

(7) selling repair parts and offering repair service only to their selected dealers, refusing to sell such parts to all others, including independent repairmen or repair centers, and refusing to offer repair service to all other dealers.

The effect of the aforesaid parallel courses of business behavior has been to eliminate intra-brand and to hinder or suppress inter-brand competition in the hearing aid industry, and, further, to aggravate the unfair and anticompetitive effect of the acts and practices of the respondent as alleged in paragraphs ten and eleven.

Paragraph ten. In the course and conduct of its business of manufacturing, distributing, selling and repairing Radioear hearing aids in commence, respondent Radioear pursues the following course of action:

A. It requires its selected dealers to sell Radioear hearing aids within assigned geographic territories;

B. It requires its selected dealers to deal exclusively in Radioear hearing aids;

C. It fixes, establishes, controls and maintains the retail prices at which its dealers sell Radioear hearing aids;

D. It prohibits its dealers from dealing with certain potential customers;

E. It prohibits others, not its dealers, from dealing in, or repairing Radioear hearing aids; and

F. It appropriates and uses for its own purposes the names and addresses of its dealers' customers.

Paragraph eleven. In furtherance of this course of action, respondent has been and now is engaged in the following acts and practices, among others:

(1) Respondent uses agreements or understandings which

(a) require a dealer to sell Radioear hearing aids within an assigned territory on penalty of forfeiting his sales profit to another Radioear dealer in whose territory sales would be made;

(b) require a dealer to deal exclusively in Radioear hearing aids within that assigned territory upon penalty of appointment of additional dealers in such territory;

(c) require a dealer to sell Radioear hearing aids only to customers found within the assigned territory;

(d) require a dealer to sell Radioear hearing aids at prices established by respondent;

(e) require a dealer to submit to the respondent the names and addresses of each customer who purchases Radioear hearing aids;

(f) condition the express product warranty on the submission of the names and addresses of each such customer to the respondent;

(g) prohibit a dealer from dealing with the United States Government, State Governments or agencies thereof; and

(h) allow for immediate termination of contract upon dealer's violation of any provision thereof;

(2) Respondent encourages or permits its dealers to use the Radioear brand name, in conjunction with a geographic identification of the dealers' locations, or otherwise, in the dealers' trade styles;

(3) Respondent issues to its dealers price lists in which the retail prices for Radioear hearing aids are set forth;

(4) Respondent offers to its dealers a cooperative advertising plan which provides that Radioear will not share the cost of any dealer advertisement which mentions in any way that the dealer also offers for sale other brands of hearing aids;

(5) Respondent refuses to ship additional merchandise to a dealer unless or until the dealer submits to Radioear the names and addresses of the purchasers of hearings aids previously shipped to the dealer;

(6) Respondent refuses to sell to all but a few dealers, selected in such a manner that each of such selected dealers enjoys territorial exclusivity so that he is not in competition with any other dealer selling Radioear hearing aids;

(7) Respondent refuses to sell Radioear repair parts or to provide schematics to all dealers, or to persons engaged in the business of repairing or servicing hearing aids;

(8) Respondent refuses to supply Radioear promotional and advertising materials, price lists, hearing aid specifications or performance information to all dealers;

(9) Respondent prohibits its selected dealers from selling Radioear hearing aids to other dealers of hearing aids;

(10) Respondent provides in its standard-form contract that Radioear has the right to terminate the contract, at any time, upon thirty days notice to the dealer; and

(11) Respondent provides in said contract that in the event of termination:

(a) a dealer is required to discontinue the use of Radioear brand name in his name, sign or advertising in connection with hearing aid business;

(b) a dealer is prohibited from receiving any mail addressed to him in a manner including the name Radioear in it, and he is to instruct the postmaster to forward such mail either to the respondent or to a person of respondent's choice;

V 38 I 137 JUL 18 73 XUM

(c) a dealer is prohibited from using Radioear advertising material and must either destroy it or return it to respondent; and

(d) Radioear has the right to reacquire the terminated dealer's inventory of Radioear hearing aids.

Paragraph twelve. The acts and practices of respondent enumerated hereinabove in paragraphs ten and eleven, taken either individually or collectively, are oppressive, coercive, unfair and anticompetitive, and have the tendency and capacity of hindering, suppressing or eliminating competition, or constitute unfair methods of competition, or unfair acts or practices, with the following effects, among others:

(1) Competition between respondent and other manufacturers of hearing aids has been hindered and suppressed;

(2) Competition among dealers dealing in Radioear hearing aids has been eliminated;

(3) Such dealers have been deprived of their freedom to select their customers and otherwise to function as free and independent businessmen;

(4) Such dealers have been deprived of their ownership of, and freedom to maintain, confidential lists of their customers;

(5) Competition among dealers dealing in Radioear hearing aids and dealers dealing in other brands of hearing aids has been hindered and suppressed;

(6) Retail dealers of hearing aids have been deprived of their freedom to act in the best interests of the hearing-impaired public;

(7) Consumers have been deprived of their right to fair and impartial recommendations from dealers in the selection of hearing aids for the alleviation of their hearing impairment;

(8) Consumers have been deprived of the benefits of free competition; and

(9) Those engaged in the repairing or servicing of hearing aids in competition with respondent have been deprived of their right to repair or service Radioear hearing aids.

Paragraph thirteen. The aforesaid acts and practices of respondent have the tendency unduly to restrict and restrain competition and have injured, hindered, suppressed, lessened or eliminated actual or potential competition, are to the prejudice and injury of the public, and constitute unfair methods of competition in commerce and unfair acts and practices in commerce, in violation of Section 5 of the Federal Trade Commission Act.

Wherefore, the premises considered, the Federal Trade Commission on this 26th day of June, A.D. 1973, issues this, its complaint, against said respondent.

By the Commission.

[SEAL] VIRGINIA M. HARDING,
Acting Secretary.

[FR Doc.73-14616 Filed 7-17-73;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Subpart D—Food Additives Permitted in Food for Human Consumption

BOILER WATER ADDITIVES

The Commissioner of Food and Drugs, having evaluated data in a petition (FAP 2A2743) filed by Betz Laboratories, Inc., Somerton Road, Trevose, PA 19047, and other relevant material, concludes that the food additive regulations should be amended, as set forth below, to provide for the safe use of sodium carboxymethylcellulose in the preparation of steam that will contact food. The additive is a grade of sodium carboxymethylcellulose which does not comply with food grade specifications. It is not violatile but minor amounts may be carried over with steam by entrainment in boiler operations and come in contact with steam-treated food.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 2.120), § 121.1088(c) is amended by alphabetically inserting a new item in the list of substances as follows:

§ 121.1088 Boiler water additives.

* * * * *

(c) List of substances:

	Limitations
* * *	* * *
Sodium carboxymethylcellulose	Contains not less than 95 percent sodium carboxymethylcellulose on a dry-weight basis, with maximum substitution of 0.9 carboxymethyl groups per anhydroglucose unit, and with a minimum viscosity of 15 centipoises for 2 percent by weight aqueous solution at 25° C.; such determinations to be made by methods prescribed in Food Chemicals Codex (Second Edition)[1] monograph for sodium carboxymethylcellulose.
* * *	* * *

* * * * *

[1] Copies may be obtained from: National Academy of Sciences, 2101 Constitution Avenue, NW., Washington, D.C. 20037.

Any person who will be adversely affected by the foregoing order may at any time on or before August 17, 1973 file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective on July 18, 1973.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: July 11, 1973.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register July 10, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Title 24—Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT-FEDERAL HOUSING COMMISSIONER [FEDERAL HOUSING ADMINISTRATION], DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-73-232]

DEBENTURE INTEREST RATES

The following amendments have been made to this chapter to change the debenture interest rate. The Secretary has determined that advance publication and notice and public procedure are unnecessary since the debenture interest rate is set by the Secretary of the Treasury in accordance with a procedure established by statute and that said cause exists for making this amendment effective July 1, 1973.

Accordingly, Chapter II is amended as follows:

SUBCHAPTER C—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

PART 203—MUTUAL MORTGAGE INSURANCE AND INSURED HOME IMPROVEMENT LOANS

Subpart B—Contract Rights and Obligations

1. Section 203.405 is amended to read as follows:

§ 203.405 Debenture interest rate.

Debentures shall bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued or as of the date the mortgage was endorsed for insurance, whichever rate is higher. The following interest rates are effective for the dates listed:

Effective rate (percent)	On or after—	Prior to—
5¾	July 1, 1971	January 1, 1972.
5⅞	January 1, 1972	July 1, 1972.
5⅞	July 1, 1972	January 1, 1973.
5¼	January 1, 1973	July 1, 1973.
6	July 1, 1973	

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709)

2. Section 203.479 is amended to read as follows:

§ 203.479 Debenture interest rate.

Debentures shall bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date the loan was endorsed for insurance, whichever rate is the higher. The following interest rates are effective for the dates listed:

Effective rate (percent)	On or after—	Prior to—
5¾	July 1, 1971	January 1, 1972
5⅞	January 1, 1972	July 1, 1972
5⅞	July 1, 1972	January 1, 1973
5¼	January 1, 1973	July 1, 1973
6	July 1, 1973	

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 203, 52 Stat. 10, as amended; 12 U.S.C. 1709)

SUBCHAPTER D—RENTAL HOUSING INSURANCE

PART 207—MULTIFAMILY HOUSING MORTGAGE INSURANCE

Subpart B—Contract Rights and Obligations

In 207.259 paragraph (e)(6) is amended to read as follows:,

§ 207.259 Insurance benefits.

* * * * *

(e) *Issuance of debentures.* * * *

(6) Bear interest from the date of issue, payable semiannually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued, or as of the date of initial insurance endorsement of the mortgage, whichever rate is the higher. The following interest rates are effective for the dates listed:

Effective rate (percent)	On or after—	Prior to—
5¾	July 1, 1971	January 1, 1972.
5⅞	January 1, 1972	July 1, 1972.
5⅞	July 1, 1972	January 1, 1973.
5¼	January 1, 1973	July 1, 1973.
6	July 1, 1973	

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 207, 52 Stat. 16, as amended; 12 U.S.C. 1713)

SUBCHAPTER F—URBAN RENEWAL HOUSING INSURANCE AND INSURED IMPROVEMENT LOANS

PART 220—URBAN RENEWAL MORTGAGE INSURANCE AND INSURED IMPROVEMENT LOANS

Subpart D—Contract Rights and Obligations—Projects

Section 220.830 is amended to read as follows:

§ 220.830 Debenture interest rate.

Debentures shall bear interest from the date of issue, payable semi-annually on the first day of January and the first day of July of each year at the rate in effect as of the date the commitment was issued or as of the date the loan was endorsed for insurance, whichever rate is higher. The following interest rates are effective for the dates listed:

Effective rate (percent)	On or after—	Prior to—
5¾	July 1, 1971	January 1, 1972
5⅞	January 1, 1972	July 1, 1972
5⅞	July 1, 1972	January 1, 1973
5¼	January 1, 1973	July 1, 1973
6	July 1, 1973	

(Sec. 211, 52 Stat. 23; 12 U.S.C. 1715b. Interprets or applies sec. 220, 68 Stat. 596, as amended; 12 U.S.C. 1715k)

Effective date. These amendments are effective as of July 1, 1973.

WOODWARD KINGMAN,
Acting Assistant Secretary-Commissioner for Housing Production and Mortgage Credit.

VINCENT HEARING,
Acting Assistant Secretary for Administration.

[FR Doc.73-14511 Filed 7-17-73;8:45 am]

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

PART 50—STATEMENTS OF POLICY

[Order No. 530-73]

Policies With Regard to the Defense of Civil Actions Under the Freedom of Information Act and the Functions of the Freedom of Information Committee

Under and by virtue of the authority vested in me by section 509 of Title 28 of the United States Code, Part 50 of Title 28 of the Code of Federal Regulations is amended by adding at the end thereof the following new section:

§ 50.9 Policies with regard to the defense of civil actions under the Freedom of Information Act and the functions of the Freedom of Information Committee.

(a) No civil action against a federal agency under the Freedom of Information Act, 5 U.S.C. 552, shall be defended by the Civil Division, the Tax Division or any other part of the Department of Justice unless the Department's Freedom of Information Committee has been consulted by the agency. This does not preclude the defense of a premature suit, brought before the agency's final denial of the materials at issue, provided that the agency as promptly as possible upon the filing of the suit brings the matter before the Committee.

(b) The Freedom of Information Committee referred to in this section is the committee of lawyers in the Office of Legal Counsel and in the Civil Division which was first established December 8, 1969. The functions and current membership of the Committee are noted in a memorandum from the Attorney General to the heads of all agencies issued at the time of the adoption of this section.

(c) The Committee is instructed to make every possible effort to advance the objective of the fullest responsible disclosure. To this end, in connection with its consultations with agencies that propose to issue final denials under the Act, the Committee shall, in addition to advising the agency with respect to the legal issues, invite the attention of the agency to the range of public policies reflected in the Act, including the central policy of the fullest responsible disclosure. The Committee may also request assistance and make studies and recommendations to carry out the intent of this paragraph.

Dated: July 11, 1973.

ELLIOT L. RICHARDSON,
Attorney General.

Title 39—Postal Service

CHAPTER I—U.S. POSTAL SERVICE

PART 124—MATTER MAILABLE UNDER SPECIAL RULES

Mailing of Switchblade Knives

Regulations dealing with the mailing of switchblade knives are amended to delete a requirement for special markings on the parcels containing such knives. Accordingly, § 124.6 *Switchblade knives* is amended as follows as of July 18, 1973.

1. Paragraph (b) *Marking of Parcels* is deleted from § 124.6.

2. Paragraph (c) *Identification of Addressee* of § 124.6 is redesignated as paragraph (b).

3. Paragraph (d) *Explanation of Mailing* of § 124.6 is redesignated as paragraph (c).

(39 U.S.C. 401, 3001).

ROGER P. CRAIG,
Deputy General Counsel.

[FR Doc.73-14660 Filed 7-17-73;8:45 am]

V 38-137 JUL 18 73 XUM

PART 232—POSTAL LOSSES AND OFFENSES

Arrest and Subpoena Powers of Postal Inspectors

Regulations regarding arrest and subpoena powers of the Postal Inspectors are amended to conform to the language of 18 U.S.C. 3061, as amended by section 6(j)(38)(A) of the Postal Reorganization Act (P.L. 91-375, 84 Stat. 719). Section 6(j)(38) took effect on July 1, 1971. Inasmuch as the arrest and subpoena powers of the Postal Inspectors are statutory in nature, the current amendment to the Code of Federal Regulations should not be construed as affecting the exercise of such powers before publication of this amendment in the FEDERAL REGISTER.

Accordingly, paragraph (b) of § 232.5 is amended to read as follows:

§ 232.5 Arrest and subpena powers of postal inspectors.

* * * * *

(b) *Limitations.* The powers granted by paragraph (a) of this section shall be exercised only in the enforcement of laws regarding property of the United States in the custody of the Postal Service, including property of the Postal Service, the use of the mails, and other postal offenses.

(39 U.S.C. 401; 18 U.S.C. 3061)

ROGER P. CRAIG,
Deputy General Counsel.

Title 41—Public Contracts and Property Management

CHAPTER 5A—FEDERAL SUPPLY SERVICE, GENERAL SERVICES ADMINISTRATION

Products or Services Presented for Procurement Consideration

A new subpart is added which contains applicable detailed procedures governing additions of new items (commodities and nonpersonal services) into Federal procurement programs.

PART 5A-1—GENERAL

Part 5A-1 is amended by the addition of new Subpart 5A-1.54, as follows:

Subpart 5A-1.54—Products or Services Presented for Procurement Consideration

Sec.
5A-1.5401 Policy.
5A-1.5402 [Reserved]
5A-1.5403 Initial referral of inquiries.
5A-1.5404 Processing of inquiries.
5A-1.5405 Processing of completed application forms.

Subpart 5A-1.54—Products or Services Presented for Procurement Consideration

§ 5A-1.5401 Policy.

(a) Consistent with the Government's general policy on being responsive to technological advances in industry by adopting, when appropriate, new and improved methods for performing services or new and improved articles into its system, the following policies, responsibilities, and procedures are prescribed.

(b) Generally, a person or concern wishing to present a new or improved article or new method of service to the Federal Supply Service will do so, or should be advised to do so, by presenting his case to any GSA Business Service Center (BSC). The presentation shall be in the form of an application. (See § 5A-1.5403.)

(c) The BSC will transmit the application to the Data Management Branch (FMSD), Standardization Division, Office of Standards and Quality Control, for initial processing. (See §§ 5A-1.5404 and 5A-1.5405.)

(d) If FMS finds the new or improved article or service adaptable for a try-out in the Federal Supply system, it will forward the application to the National Buying Center Division (FPN). (See § 5A-1.5405.)

(e) FPN will then take any one of the following actions, if the item is found suitable for introduction (see § 5A-1.5405(c)):

(1) Include the item in an existing Federal Supply Schedule;

(2) Include the item in the stock program;

(3) Include the item in a special New Item Introductory Schedule;

(4) Use one or more self-service stores for the test; or

(5) Use any other action to test the suitability of the new improved article or service for introduction into the system.

§ 5A-1.5402 [Reserved]

§ 5A-1.5403 Initial referral of inquiries.

Unsolicited written offers presented for procurement consideration by persons or firms to any Federal Supply Service activity and involving new or improved articles or services shall be transmitted promptly to the Business Service Center (BSC) serving the organizational element which received the offer. The original receiving activity shall acknowledge receipt of the offer and advise that the offer has been referred to the BSC for further action and that any further inquiries should be directed to the BSC (give full address and telephone number). If the presentation is made orally, the person making the presentation shall be referred to the BSC.

§ 5A-1.5404 Processing of inquiries.

(a) Upon receipt of an unsolicited offer for procurement consideration involving new or improved articles or services by the Business Service Center (BSC), the BSC will determine whether or not there is any possibility that the type of article or service would lend itself for procurement by GSA. If it is clear that the article or service would not in any way fit into the GSA procurement program, the BSC will advise the offeror accordingly and provide him with appropriate counseling with respect to the possibility that other agencies may have a procurement interest in the offer.

(b) When there is a possibility that the offered new or improved item or service would fit into the GSA procurement program, the BSC will provide the offeror with a minimum of four copies of GSA Form 1171, Application for Presenting New or Improved Articles, which the offeror is to complete and return to the BSC in triplicate. (For illustration of GSA Form 1171 and the applicable instructions for submitting GSA Form 1171, see § 5A-16.950-1171.) A copy of GSA Form 1171, Instructions for Submitting Applications for Presenting New or Improved Articles, will also be provided to the applicant.

§ 5A-1.5405 Processing of completed application forms.

(a) The Business Service Center (BSC) will (i) when completed GSA Form 1171 is received as a result of the consultation mentioned in § 5A-1.5404(b), above, review the application for completeness, or (ii) if the GSA Form 1171 is received without the above-mentioned consultation, review the application for completeness and from the aspects of acceptability of the products, as set forth in § 5A-1.5404(a), above, and (iii) promptly forward two copies of the acceptable application to Data Management Branch (FMSD), Standardization Division, Office of Standards and Quality Control. If the application is not acceptable, the BSC will advise the applicant accordingly (i) in accordance with § 5A-1.5404(a), above, or (ii) what corrective actions he needs to take to make the application acceptable.

(b) FMS shall evaluate each application and record its findings on GSA Form 6477, New Item Application Summary. (For illustration of GSA Form 6477, see § 5A-16.950-6477.)

(1) When FMS determines that the products or services presented in the application are not acceptable for inclusion in the GSA system, FMS will notify the applicant accordingly and furnish a copy of this notification to the BSC in (a), above. Procuring activities will normally not be consulted concerning these notifications.

(2) When the FMS evaluation recommends including certain products or services in the GSA system, or when it identifies applicant's products as being similar to GSA-managed items (items already carried in stock or on Federal Supply Schedules), FMSD shall forward one copy of GSA Form 1171, one copy of GSA Form 6477, and any related material to the National Buying Center Division (FPN) which will have final responsibility for edtermining the acceptability of the offered products or services.

(c) The National Buying Center Division (FPN) shall, upon receipt from FMSD of GSA Forms 1171 and 6477 and any related material, if the products are similar to GSA-managed items, advise applicant to apply for a Bidders Mailing List listing (see § 5A-76.306), or in all other cases:

(1) Establish a New Item case file;

(2) Prepare GSA Form 6220, Introductory Contractor's Record (for illustration see § 5A-16.950-6220), and include this form in the case file;

(3) Review the FMS recommendation to determine whether the offered new or improved article or service is still suitable for introduction into the procurement program or whether certain factors were uncovered during this review which indicate that an introduction would not be in the Government's best interest.

(i) If the review calls for rejecting the introduction into the system, FPN should contact FMS to obtain agreement on the rejection. (FPN is not required to make this contact since FPN has final responsibility for determining acceptability of the application, but may wish to do so to corroborate the decision to reject.)

(ii) The rejection shall be recorded on GSA Form 6477, mentioning FMS agreement, when appropriate. The New Item case file shall be closed out after including completed GSA Form 6477 and a copy of a letter from FPN to the applicant explaining why the application was rejected. A copy of this letter to the applicant shall be forwarded to FMSD and to the BSC in (a), above.

(4) If FPN finds the new or improved article or service suitable, a determination shall be made about the most appropriate method of procurement. This determination shall be entered on GSA Form 6477, including the reasons for the selection. The applicant shall be notified in writing (with copy to the BSC) when it has been determined to accept his product or service. Following is a guide for making selections for the method of procurement:

(i) *Use of existing Federal Supply Schedules.* If a new or improved item (commodity or service) is related to and is suitable for inclusion in an existing Schedule, it will be so assigned. If the item is to be procured competitively, a request for specification shall be initiated immediately.

(ii) *Use of stock system.* While, as a general rule, the New Item Introductory Schedule method is preferred for the initial introduction of a new item, there are circumstances which may justify its introduction directly into the stock system, if there is evidence of existing demand. Such demand must be sufficiently large to meet the criteria for inclusion in the stock program. Evidence of existing demand must be filed in the case file and may be in the form of statements from any Federal agency or FSS region. However, before an item can be placed into the stock system a specification must be developed in order to permit competitive procurement.

(iii) *New Item Schedule.* If the item is not suitable to warrant its inclusion in the stock program or in an existing Schedule, it may be considered for assignment to a "New Item Introductory Schedule" as described below.

(A) The New Item Introductory Schedule is to provide an economical and expeditious method for testing the demand for new items for which demand is unknown or uncertain. Procurement of items on the New Item Introductory Schedule will be on a proprietary brand name basis during the period of the testing of demand. (Authority: Section 302(c)(10) Federal Property and Administrative Services Act, as amended.)

(B) Noncompetitive procurement of these items will avoid the delay of preparing specifications and developing a list of bidders for items which may not result in sufficient demand to warrant their inclusion in a regular supply program. The New Item Introductory Schedule has the following characteristics:

(I) Covers all FSC classes;

(II) Mandatory for use by GSA and optional for use by all other Federal agencies;

(III) Remains continuously in effect with items added or deleted by subsequent cumulative issuances, representing a conglomerate of individual annual indefinite quantity negotiated contracts of brand name items with provision for annual renewals not to exceed a total period of 3 years;

(IV) Contains a provision for evaluation by the contracting officer with respect to demand at the end of 1 year to determine whether to (a) drop the item from further consideration, (b) incorporate the item in one of the regular supply programs on a competitive basis, or (c) continue under New Item Introductory Schedule for renewal but not to exceed a total of 3 years to obtain additional data.

(iv) *Pilot testing in self-service store.* As a supplementary method of establishing demand, a new item may be designated for demand testing in the self-service store system. In this event, necessary arrangements will be made with the Chief, Special Programs Branch (FSDP), Office of Supply Distribution, including the provision for a report of sales on the item from the self-service store.

(v) *Other actions.* Other actions may be taken to include an accepted item into the system as necessary. For example, this may be by the use of GSA Form 1303, Request for Federal Cataloging Action, procedure to obtain a Federal Stock Number, by registering the item and assigning an item status code, etc.

(d) For properly monitoring the new item program and as a management tool, organizational elements within the Federal Supply Service which are parties to any actions dealing with this program shall establish periodic monitoring and reporting procedures.

PART 5A-16—PROCUREMENT FORMS

The table of contents for Part 5A-16 is amended to add the following new entries:

5A-16.950-1171	GSA Form 1171, Application for Presenting New or Improved Articles, and Instructions for Submitting the Form.
5A-16.950-6220	GSA Form 6220, Introductory Contractor's Record.
5A-16.950-6477	GSA Form 6477, New Item Application Summary.

NOTE: Copies of the forms illustrated in Part 5A-16 are filed with the original documents.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); 41 CFR 5-1.101(c))

Effective date. This regulation is effective on August 1, 1973.

Dated: July 2, 1973.

M. J. TIMBERS,
Commissioner,
Federal Supply Service.

Title 49—Transportation

CHAPTER I—DEPARTMENT OF TRANSPORTATION

[Docket No. HM-22; Amdt. No. 171-19]

SUBCHAPTER A—HAZARDOUS MATERIALS REGULATIONS BOARD

PART 171—GENERAL INFORMATION AND REGULATIONS

Matter Incorporated by Reference

The purpose of this amendment to the Hazardous Materials Regulations is to update the reference to the addenda to sections VIII (division I) and IX of the "American Society of Mechanical Engineers Boiler and Pressure Vessel Code."

On April 23, 1973, the Board published a notice of proposed rule making, Docket No. HM-22; Notice No. 73-3 (38 F.R. 10014) proposing to make the above change. One comment was received which was in agreement with the proposal.

In consideration of the foregoing, Title 49, Part 171, is amended as follows:

In § 171.7, paragraph (d)(1) is amended to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(d) * * *

(1) ASME Code means sections VIII (Division I) and IX of the 1971 edition of the "American Society of Mechanical Engineers Boiler and Pressure Vessel Code," and addenda thereto through December 31, 1972.

* * * * *

This amendment is effective Sept. 30, 1973. However, immediate compliance with the regulations, as amended herein, is authorized.

(Sec. 831-835, Title 18, United States Code; sec. 9, Department of Transportation Act, 49 U.S.C. 1657; Title VI, sec. 902(h), Federal Aviation Act of 1958, 49 U.S.C. 1421-1430, 1472, 1655(c))

Issued in Washington, D.C. on July 12, 1973.

JAMES F. RUDOLPH,
Board Member for the
Federal Aviation Administration.

KENNETH L. PIERSON,
Alternate Board Member for the
Federal Highway Administration.

MAC E. ROGERS,
Board Member for the
Federal Railroad Administration.

W. F. REA, III,
Rear Admiral, Board Member for
the United States Coast Guard.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1083; Amdt. 4]

PART 1033—CAR SERVICE

Southern Pacific Transportation Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 12th day of July 1973.

Upon further consideration of Service Order No. 1083 (36 FR 21203, 23803; 37 FR 12726; and 38 FR 876), and good cause appearing therefor:

It is ordered, That:

§ 1033.1083 *Service Order No. 1083* (Southern Pacific Transportation Company authorized to operate over tracks of the Texas and Pacific Railway Company) be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* This order shall expire at 11:59 p.m., October 31, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., July 31, 1973.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Second Rev. S. O. 1117, Amdt. 1]

PART 1033—CAR SERVICE

Substitution of Hopper Cars for Covered Hopper Cars or Boxcars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 12th day of July 1973.

Upon further consideration of Second Revised Service Order No. 1117 (38 FR 7332), and good cause appearing therefor:

It is ordered, That:

§ 1033.117 *Service Order No. 1117* (Substitution of hopper cars for covered hopper cars or boxcars) be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., November 15, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., July 31, 1973.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10–17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

Title 50—Wildlife and Fisheries

CHAPTER I—BUREAU OF SPORT FISHERIES AND WILDLIFE, FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Kirwin National Wildlife Refuge, Kans.

The following special regulation is issued and is effective on July 18, 1973.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

KANSAS

KIRWIN NATIONAL WILDLIFE REFUGE

Public hunting of deer with bow and arrow on the Kirwin National Wildlife Refuge, Kansas, is permitted from October 1, through November 25, 1973, inclusive, and from December 16, through December 31, 1973, inclusive, but only on the area designated by signs as open to hunting. This open area, comprising 3,300 acres, is delineated on maps available at refuge headquarters, 5 miles west of Kirwin, Kansas, and from the office of the Regional Director, Bureau of Sports Fisheries and Wildlife, 10597 W 6th Ave, Denver, Colorado 80215.

Hunting shall be in accordance with all applicable State regulations governing the archery hunting of deer.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1973.

KEITH S. HANSEN,
Refuge Manager, Kirwin National Wildlife Refuge, Kirwin, Kans.

JULY 6, 1973.

[FR Doc.73-14647 Filed 7-17-73;8:45 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 29]

NONQUOTA MARYLAND BROADLEAF TOBACCO, U.S. TYPE 32

Identification and Certification

Notice is hereby given that the U.S. Department of Agriculture has under consideration the issuance of regulations governing the identification and certification of nonquota Maryland Broadleaf tobacco, U.S. type 32, produced and marketed in quota areas, pursuant to the authority contained in The Tobacco Inspection Act (49 Stat. 731; 7 U.S.C. 511 et seq.).

Statement of consideration. Historically, Maryland Broadleaf tobacco, U.S. type 32, was generally produced under marketing quotas. This limited its production and sales without penalty to those growers issued acreage allotments under the quota system. Penalty assessments were made for all production outside quota allocation. Referendums are held in tobacco-growing areas to determine whether growers favor or disfavor marketing quotas. Beginning with the 1966 crop, growers of type 32 tobacco have consistently disapproved use of the quota system. The lifting of controls and penalties governing the production of type 32 tobacco resulted in increased production of this tobacco in the burley and flue-cured quota areas.

Official standard grades are in effect for the inspection and grading of all major tobacco types produced in the United States and Puerto Rico. About 95 percent of this production is sold at auction where inspection is mandatory. The tobacco is displayed for sale in warehouses in individual lots, piles, baskets, or sheets for inspection and grading. The remaining percentage is largely cigar leaf, most of which is purchased at the farm and the rest is marketed through tobacco cooperatives. Inspection service is provided upon request on a permissive basis.

Past certifications of nonquota Maryland tobacco produced and marketed in quota areas show the need for establishing procedures to follow in certifying such tobacco as to type. The proposed regulations would establish procedures to accomplish this purpose. They would apply to mandatory and permissive inspection as authorized or required under Sections 5 and 6 of The Tobacco Inspection Act.

All persons who desire to submit written data, views, or arguments in connection with the proposed revision should file the same, in duplicate, with the Hearing Clerk, U.S. Department of Agriculture, Room 122 Administration Building, Washington, D.C. 20250, on or before August 17, 1973. All written submissions pursuant to the notice will be made available for public inspection at the office of the Hearing Clerk during official hours of business (7 CFR 1.27 (b)).

The proposed regulations are as follows:

1. Part 29 is revised by designating §§ 29.9201 through 29.9400 as Subpart F—Policy Statement and Regulations Governing the Identification and Certification of Nonquota Maryland Broadleaf Tobacco, U.S. Type 32, Produced and Marketed in a Quota Area.

2. The proposed Subpart F would read as follows:

Subpart F—Policy Statement and Regulations Governing the Identification and Certification of Nonquota Maryland Broadleaf Tobacco, U.S. Type 32, Produced and Marketed in a Quota Area

DEFINITIONS

Sec.
29.9201 Terms defined.
29.9202 Certification.

AUTHORITY: Tobacco Inspection Act (49 Stat. 731; 7 U.S.C. 511 et seq.)

DEFINITIONS

§ 29.9201 Terms defined.

As used in this subpart and in all instructions, forms, and documents in connection therewith, the words and phrases hereinafter defined shall have the indicated meanings so assigned.

§ 29.9202 Certification.

The documentation of type, grade, class, weight, or other tobacco characteristics as required in § 29.9263.

§ 29.9203 Crop-lot.

The collective individual lots comprising the season's production of each kind or type of nonquota tobacco produced on an individual farm.

§ 29.9204 Identification number (farm serial number).

The serial number assigned to an individual farm by the appropriate office of the Agricultural Stabilization and Conservation Service.

§ 29.9205 Inspection.

The examination by an inspector of a lot or crop-lot of tobacco to make determinations necessary for proper certification.

§ 29.9206 Mandatory inspection.

Mandatory inspection consists of inspecting and certifying tobacco under the act on designated markets before it is offered for sale at auction.

§ 29.9207 Nonquota tobacco.

Any kind or type of tobacco not subject to production and/or marketing limitations or restrictions under regulations issued by the Agricultural Stabilization and Conservation Service.

§ 29.9208 Permissive inspection.

Permissive inspection consists of inspecting and certificating tobacco, upon the request of an interested party, on a cost basis as set forth in §§ 29.9251 and 29.9252.

V 38 I 137 JUL 18 73 XUM

§ 29.9209 **Receiving stations.**

Approved tobacco auction warehouses on designated markets.

§ 29.9210 **Symbol "M–32".**

The designation used to identify Maryland Broadleaf tobacco, U.S. Type 32.

POLICY STATEMENT

§ 29.9221 **Policy statement.**

Nonquota Maryland tobacco, U.S. Type 32, is being produced and marketed in the burley and flue-cured areas. Both burley and flue-cured tobaccos are produced under the quota system. The official standard grades developed for all major tobacco types produced in the United States and Puerto Rico are adequate for inspection and grading at the market centers. However, these standards do not provide adequate procedure for certifying nonquota tobacco produced and marketed in quota areas. Accordingly, the regulations in this subpart contain a procedure to follow in the certification of nonquota Maryland tobacco, type 32, grown and marketed outside of the State of Maryland. Certification services shall be made available to an interested party or his authorized agent following receipt of appropriate application. These services will be provided at approved receiving stations during a 90-day period beginning April 15 of each calendar year. This will allow producers of such tobacco in a quota area adequate time to bring the tobacco to the normal stage of cure and moisture content before certification. Determinations with respect to certifications on nonquota type 32 tobacco shall be based on the Official Standard Grades for Maryland Broadleaf Tobacco, U.S. Type 32.

ADMINISTRATION

§ 29.9231 **Administration.**

The Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, is charged with the supervision of the Division and the performance of all duties assigned thereto in the administration of the act. The conduct of all services and the licensing or employment of inspection/grading/sampling personnel under these regulations shall be accomplished without discrimination as to race, color, creed, sex, or national origin. Information concerning such administration may be obtained from the Director.

§ 29.9232 **Where inspection and certification are available.**

Nonquota tobacco may be inspected and certified by class or type, upon request of an interested party, when the tobacco is displayed at approved receiving stations under conditions that permit of its proper examination and where there is a sufficient volume of work to justify the stationing of an inspector.

§ 29.9233 **When certification will be made.**

Certification services for the nonquota tobacco shall be made available during a 90-day period beginning April 15 of each calendar year. This section shall not affect provisions of existing cooperative agreements with the various tobacco producing states or state agencies.

§ 29.9234 **Who may obtain inspection and certification.**

Inspection and certification of nonquota tobacco may be requested by an interested party, or his authorized agent, by filing an application in accordance with §§ 29.9236 and 29.9237.

§ 29.9235 **Responsibilities of interested parties.**

Any interested party requesting type certification of nonquota tobacco produced in a quota area, shall obtain from the appropriate county office of the Agricultural Stabilization and Conservation Service a certificate showing the acreage of nonquota tobacco grown on each affected farm and the identification number. It shall also be the responsibility of the person or persons or agents desiring type certification of this tobacco to: (a) Make available to the official inspector any or all information required by the inspector for completion of the Tobacco Classification Certificate, (b) display the tobacco in crop-lot arrangement on an approved tobacco auction floor, and (c) surrender to the inspector at time of certification a copy of the ASCS certificate.

§ 29.9236 **How to make application.**

Application for inspection and certification by class or type of nonquota tobacco shall be made to the Division the office of inspection, or as the case may be, to an official inspector, not less than 14 days before the date of certification. The application shall be in writing and signed by the applicant or applicants.

§ 29.9237 **Form of application.**

Application for inspection and certification of class or type of nonquota tobacco shall include the following information: (a) The date of the application; (b) the designation of the tobacco and the crop year of its production; (c) the name and post-office address of the applicant and of the person, if any, making the application as agent; (d) the financial interest of the applicant in the tobacco; (e) the exact nature of the service desired as (1) inspection and grading, and/or (2) inspection and certification by class or type; (f) a statement that the tobacco (1) is in commerce, as defined in the act, or (2) is to be inspected and certified in connection with its entering such commerce; and (g) such other necessary information as the Director may require.

§ 29.9238 **When application deemed filed.**

An application shall be deemed filed when delivered to the Division, the office of inspection, or according to the nature of the service requested, to an official inspector. When an application is filed, the date and time of filing shall be recorded by the official receiving it.

§ 29.9239 **When application may be rejected.**

An application may be rejected (a) for noncompliance with the act or the regulations in this subpart, or (b) when it is not practicable to provide the service. All expenses incurred in connection with an application rejected for noncompliance with the act or the regulations in this subpart shall be paid by the applicant as provided in § 29.124 of Subpart B of this part.

§ 29.9240 **When application may be withdrawn.**

An application may be withdrawn at any time before the requested service is rendered upon payment of expenses incurred in connection therewith as provided in § 29.124 of Subpart B of this part.

§ 29.9241 **Accessibility of tobacco.**

All tobacco to be inspected and certified by class or type upon application shall be made accessible by the applicant for proper examination, including any necessary display in proper light for determination of grade, class, type, or other characteristics or for drawing of samples. The tobacco shall be displayed on baskets or sheets in crop-lot arrangement at an approved receiving station. The baskets or sheets shall be arranged in rows 18 inches apart with the leaves of adjacent baskets or sheets not touching within the rows. Coverings shall be removed by the applicant in such manner as may be prescribed by the inspector.

FEES AND CHARGES

§ 29.9251 **Fees for inspection and certification services performed under agreement.**

The fees to be charged and collected for service performed under an agreement shall be those provided for by such agreement.

§ 29.9252 **Fees and charges for inspection and certification services other than under an agreement.**

Fees and charges for inspection and certification services at receiving points shall comprise the cost of travel expenses, per diem allowances, and salaries. Charges as computed in accordance with this part shall be increased by 8 percent to cover administrative expenses.

INSPECTING AND CERTIFYING PROCEDURES

§ 29.9261 **Procedure to be followed.**

In permissive or mandatory inspections and certifications of nonquota Maryland tobacco the inspector shall use the Official Standard Grades for Maryland Broadleaf Tobacco, U.S. Type 32, to determine whether the crop-lot can or cannot be classified as and certified to be type 32. When the inspector determines that each individual pile, basket, or sheet in the crop-lot can be graded in one of the standard grades for type 32, he shall certificate the entire crop-lot to be that type. If the inspector determines that each individual pile, basket, or sheet in the crop-lot cannot be graded in one of the standard grades for type 32, he shall then establish which official standard grades are applicable and certify each pile, basket, or sheet to show the appropriate class and type.

§ 29.9262 **Kinds of certificates.**

A "Tobacco Classification Certificate" will be issued upon request of an interested party for the nonquota tobacco certified under mandatory or permissive inspection. The Tobacco Classification Certificate will be supplied by the inspection office. In addition to this certificate a basket ticket shall be provided by the interested party, or his agent or warehouseman, for each individual pile, basket, or sheet of tobacco in the crop-lot.

§ 29.9263 **Tobacco Classification Certificate.**

Each tobacco classification certificate shall show (a) the caption "Tobacco Classification Certificate"; (b) whether it is an original, first second, or other copy; (c) the number of the certificate; (d) the identification number; (e) the location of the tobacco at the time of inspection and certification; (f) the date of inspection and certification; (g) the class or type of the tobacco; (h) the number of baskets, piles, or sheets in the crop-lot; (i) the weight of the crop-lot; (j) the signature of the official inspector; also such additional information as may be required by the Director.

§ 29.9264 **Basket ticket.**

A basket ticket shall consist of a Tobacco Inspection Certificate made and issued in combination with an auction warehouse ticket in a form approved by the Director. The commissioned agent or warehouseman shall show (a) the producer's name; (b) the identification number; (c) the weight of the individual lot; also such additional information as may be required by the Director. The tobacco inspector shall then complete the basket ticket by entering the special symbol "M–32" for all tobacco determined to be Maryland Broadleaf, U.S. Type 32. If the inspector determines the lot cannot be graded in one of the official type 32 grades, he shall enter the appropriate grade or type designation, then initial and date.

§ 29.9265 **Forms.**

Each certificate issued under this regulation shall (a) show that it was issued under The Tobacco Inspection Act; (b) be in a form approved for the purpose by the Director, and (c) embody within its written or printed terms, with respect to the particular kind of service, all applicable information required by § 29.9263. Each certificate may also contain any information, not inconsistent with the act and the regulations in this subpart, as may be approved or required by the Director. The Director may, in his discretion, specify or limit the period in which a certificate shall be valid.

§ 29.9266 **Disposition of certificate.**

Distribution of the Tobacco Classification Certificate shall be limited to the provisions of this section. The original certificate and one copy shall be delivered or mailed to the applicant or his agent. One copy and the copy of the ASCS certificate shall be forwarded by the inspector to the Division or office of inspection.

§ 29.9267 **Disposition of ticket.**

One copy of the basket ticket shall be attached to, or placed on, the individual lot and all copies of such ticket shall become null and void when such identifying copy is removed from the lot. When and as requested by the Director, one copy of such ticket, showing (a) the certification of class, type, or grade; (b) the weight and other identification; and (c) the details of the sale at auction, shall be delivered by the interested party, or his agent or warehouseman, to the Division or the head inspector of the market.

§ 29.9268 **Changes or alterations.**

No change or alteration shall be made, in the weight or other identification of the lot, on a basket ticket or the Tobacco Classification Certificate after the certification of class, type, or grade by an official inspector, and any such change or alteration shall constitute and be construed as a change or alteration in the certificate issued or authorized under the act.

PRECLUSION

§ 29.9281 **Preclusion.**

The provisions of this subpart shall not preclude the application of other administrative remedies or the institution of criminal proceedings in appropriate cases as provided by the act.

(49 Stat. 734; 7 U.S.C. 511m)

[7 CFR Part 925]

FRESH PRUNES GROWN IN DESIGNATED COUNTIES IN IDAHO AND IN MALHEUR COUNTY, OREGON

Limitation of Handling

This notice sets forth the proposed grade, size and container requirements on the handling of fresh Idaho-Oregon prunes during the period August 1, 1973, through August 31, 1974. These proposed requirements are that the prunes grade at least U.S. 1, have a minimum size of 1¼ inches and prunes in containers other than the ½ bushel basket weigh less than 20 pounds or over 30 pounds.

Notice is hereby given that the Department is considering the following proposals of the Idaho-Malheur County, Oregon Fresh Prune Marketing Committee, established under the marketing agreement and Order No. 925 (7 CFR Part 925), regulating the handling of fresh prunes grown in designated counties in Idaho and in Malheur County, Oregon, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Idaho-Oregon's 1973 prune crop is estimated at 600 cars. Fresh shipments are expected to start in early August, 1973, and total 565 cars. It is expected that ample supplies of desirable sizes and grades of fresh prunes will be available to fill fresh market needs. Such proposed regulation, with its grade and size requirements is desirable to prevent the handling on and after August 1, 1973, of lower quality and smaller size fresh prunes which do not provide consumer satisfaction and to provide orderly marketing in the interests of consumers and producers, consistant with the objectives of the act. The proposed container requirements would prevent deceptive packing practices.

§ 925.312 **Prune Regulation 11.**

(a) *Order.* During the period August 1, 1973, through August 31, 1974, no handler shall handle any lot of Italian prunes except Moyer Perfecto and Empress varieties, unless such prunes meet the following applicable requirements, or are handled in accordance with subparagraph (3) of this paragraph:

(1) *Minimum grade and size requirements.* Such prunes grade at least U.S. No. 1 and are a minimum size of 1¼ inches in diameter: *Provided,* That prunes which are affected by healed hail marks may be shipped if they otherwise grade at least U.S. No. 1.

(2) *Containers.* The net weight of prunes in any container, other than the one-half (½) bushel basket shall be either (i) less than 20 pounds, or (ii) more than 30 pounds.

(3) Notwithstanding any other provision of this regulation, any individual shipment of prunes which, in the aggregate, does not exceed 1,000 pounds net weight may be handled without regard to the restrictions specified in this paragraph (a) or in § 925.41 *Assessment* and § 925.55 *Inspection and certification.*

(4) The terms "U.S. No. 1", "diameter," and "hail marks" shall have the same meaning as when used in the United States Standards for Fresh Plums and Prunes (7 CFR 51.1520–51.1538); and terms used in the marketing agreement and order, shall when used herein, have the same meaning as is given to the respective term in the marketing agreement and order.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposals should file the same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112–A, Administration Building, Washington, D.C. 20250, not later than July 24, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: July 13, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division Agricultural Marketing Service.

V 38 I 137 JUL 18 73 XUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Parts 130, 146, 164]

REQUIREMENTS OF RESIDENCE OR PLACE OF BUSINESS OF AUTHORIZED AGENTS OF FOREIGN NEW DRUG APPLICANTS OR MANUFACTURERS

Proposed Definition of the Term "United States"

Sections 130.4(a) and 130.5(a)(6) (21 CFR 130.4, 130.5), require that an application, in order to be considered complete and to be filed as a new-drug application (NDA) within the meaning of section 505(b) of the Federal Food, Drug, and Cosmetic Act, must be countersigned by an attorney, agent, or other representative of the applicant, if the applicant does not reside or maintain a place of business within the United States. In such a case, the attorney, agent, or other representative of the applicant must reside or maintain a place of business within the United States and must be duly authorized to act on behalf of the applicant and to receive communications on matters pertaining to the application. In addition, §§ 146.2(a) and 164.2(a) (21 CFR 146.2, 164.2) require that a request for certification of a batch of an antibiotic or insulin, respectively, from a foreign manufacturer shall be signed by such manufacturer and by an agent of such manufacturer who resides in the United States.

The purpose of these requirements is to assure that there is a person residing or maintaining a place of business within the United States who is legally responsible for assuring that all of the conditions upon which approval of the new-drug application or antibiotic or insulin certification is based are met.

The Commissioner has recently received an inquiry as to whether an NDA from an applicant located in a United States territory or possession may be filed without being countersigned by an authorized agent who resides or maintains a place of business within the United States.

The term, "United States", as given in the Tariff Act of 1930 (19 U.S.C. 1401), includes all Territories and possessions of the United States except the Virgin Islands, American Samoa, Wake Island, Midway Islands, Kingman Reef, Johnston Island, and the island of Guam. The term, "Customs Territory of the United States", as used in the revised tariff schedules (19 U.S.C. 1202), includes only the 50 States, the District of Columbia and Puerto Rico.

To clarify policy and to preclude further inquiry of the kind related above, the Commissioner is proposing to amend Part 130, as well as Parts 146 and 164 of the regulations, to define the term "United States", as used in 21 CFR Parts 130, 146, and 164. The definition includes the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico, but excludes the territories and possessions of the United States; namely, the Virgin Islands, Panama Canal Zone, Pacific Trust Territories, Guam, Wake Island, Midway Island, Kingman Reef, Johnston Island, and American Samoa. It is in agreement with the term "Customs Territory of the United States."

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 505(b), 506(b), 507(b), 701(a), 52 Stat. 1052–1053, 1055, as amended, 55 Stat. 851, 59 Stat. 463, as amended; 21 U.S.C. 355(b), 356(b), 357(b), 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed that Parts 130, 146, and 164 be amended as follows:

PART 130—NEW DRUGS

1. In Part 130, by adding a new paragraph (n) to § 130.1 as follows:

§ 130.1 Definitions and interpretations.

* * * * *

(n) The term "United States" means the Customs Territory of the United States and is defined as including the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico, and excluding the territories and possessions of the United States; namely, the Virgin Islands, Panama Canal Zone, Pacific Trust Territories, Guam, Wake Island, Midway Island, Kingman Reef, Johnston Island, and American Samoa.

* * * * *

PART 146—ANTIBIOTIC DRUGS; PROCEDURAL AND INTERPRETATIVE REGULATIONS

2. In Part 146, by revsing § 146.2(a) to read as follows:

§ 146.2 Requests for certification, check tests and assays, and working standards; information and samples required.

(a) A request for certification of a batch shall be addressed to the Commissioner and shall be in a form specified by him. A request from a foreign manufacturer shall be signed by such manufacturer and by an agent of such manufacturer who resides or maintains a place of business in the United States. The United States includes the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico, and excludes the territories and possessions of the United States, namely, the Virgin Islands, Panama Canal Zone, Pacific Trust Territories, Guam, Wake Island, Midway Island, Kingman Reef, Johnston Island, and American Samoa.

* * * * *

PART 164—CERTIFICATION OF BATCHES OF DRUGS COMPOSED WHOLLY OR PARTLY OF INSULIN

3. Part 164, by revising § 164.2(a) to read as follows:

§ 164.2 Requests for certification; samples; storage; approvals preliminary to certification.

(a) A request for certification of a batch shall be addressed to the Commissioner. A request from a foreign manufacturer shall be signed by such manufacturer and by an agent of such manufacturer who resides or maintains a place of business in the United States. The United States includes the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico, and excludes the territories and possessions of the United States, namely, the Virgin Islands, Panama Canal Zone, Pacific Trust Territories, Guam, Wake Island, Midway Island, Kingman Reef, Johnston Island, and American Samoa.

* * * * *

Interested persons are invited to submit written comments (preferably in quintuplicate) regarding this proposal. All such comments shall be filed on or before September 17, 1973, with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: July 11, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 73–CE–13]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Trenton, Missouri.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received on or before August 17, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

Since designation of controlled airspace at Trenton, Missouri, a new public-use instrument approach procedure is being developed for the Trenton Municipal Airport, Trenton, Missouri. Accordingly, it is necessary to alter the transition area at Trenton to adequately protect aircraft executing this new approach procedure. The present instrument approach procedure from the south is not affected by this alteration.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is amended to read:

TRENTON, MISSOURI

That airspace extending upward from 700' above the surface within a 5 mile radius of the Trenton Municipal Airport (latitude 40°05'03" N., longitude 93°35'26" W.); and within 3 miles either side of the 172° bearing from the MHW facility extending from the 5 mile radius to 8 miles south, and 3 miles either side of the 007° bearing from the MHW facility extending from the 5-mile radius to 8.5 miles north, and that airspace extending upwards from 1200 feet above the surface 5 miles west of and 9.5 miles east of the 007° bearing from the Trenton MHW facility extending to 18.5 miles north of the MHW facility and 5 miles west of and 9.5 miles east of the 172° bearing from the Trenton MHW facility extending to 18.5 miles south of the MHW facility.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Kansas City, Mo., on June 25, 1973.

JOHN M. CYROCKI,
Director, Central Region.

[FR Doc.73–14612 Filed 7–17–73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 73–SO–19]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would designate the Sebring, Fla., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before August 17, 1973, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 724, 3400 Whipple Street, East Point, Ga.

The Sebring transition area would be designated as:

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Sebring Air Terminal (Latitude 27°27'20" N, Longitude 81°20'30" W); within 3 miles each side of the 164° bearing from Sebring RBN (Latitude 27°27'37" N, Longitude 81°21'00" W), extending from the 6.5-mile radius area to 8.5 miles south of the RBN.

The proposed designation is required to provide controlled airspace protection for IFR operations at Sebring Air Terminal. A prescribed instrument approach procedure to this airport, utilizing the Sebring (private) Nondirectional Radio Beacon, is proposed in conjunction with the designation of this transition area.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on July 6, 1973.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.73–14611 Filed 7–17–73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 73–SO–48]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the Clemson, S.C., transition area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Federal Aviation Administration, Southern Region, Air Traffic Division, PO. Box 20636, Atlanta, Ga. 30320. All communications received on or before August 17, 1973, will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, Texas. An informal docket will also be available for examination by interested persons at the Federal Aviation Administration, Southern Region, Room 724, 3400 Whippie Street, East Point, Ga.

The Clemson transition area described in § 71.181 (38 F.R. 435) would be amended as follows:

"* * * east of the RBN * * *" would be deleted and "east of the RBN; within a 6.5-mile radius of Pickens County Airport (Latitude 34°48'55" N, Longitude 82°41'55" W); within 3 miles each side of the 219° bearing from Pickens RBN (Latitude 34°48'46" N, Longitude 82°-42'53" W), extending from the 6.5-mile radius area to 8.5 miles southwest of the RBN * * *" would be substituted therefor.

The proposed alteration is required to provide controlled airspace protection for IFR operations at Pickens County Airport, Pickens, S.C. A prescribed instrument approach procedure to this airport, utilizing the Pickens (private) Nondirectional Radio Beacon, is proposed in conjunction with the alteration of this transition area.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in East Point, Ga., on July 3, 1973.

W. J. MCGILL,
Acting Director, Southern Region.

[14 CFR Part 71]

[Airspace Docket No. 73–SW–45]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations to designate a 700-foot transition area at Falfurrias, Tex.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Chief, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Federal Aviation Administration, PO. Box 1689, Fort Worth, Texas 76101. All communications received on or before August 17, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Chief, Airspace and Procedures Branch. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, Fort Worth, Texas. An informal docket will also be available for

V 38 I 137 JUL 18 73 XUM

examination at the Office of the Chief, Airspace and Procedures Branch, Air Traffic Division.

It is proposed to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth.

In § 71.181 (38 FR 435), the following transition area is added:

FALFURRIAS, TEX.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Brooks County Airport (latitude 27°12'15" N, longitude 98°07'15" W) and within 3 miles each side of the 171°T (163° M) bearing from the Brooks County RBN (latitude 27°12'23" N, longitude 98°07'24" W) extending from the 5-mile radius area to 8 miles southeast of the RBN.

The proposed transition area will provide controlled airspace for aircraft executing the proposed NDB RWY 32 instrument approach procedure.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Fort Worth, TX., on July 11, 1973.

HENRY L. NEWMAN,
Director,
Southwest Region.

CALIFORNIA AIR QUALITY CONTROL

Approval and Promulgation of Implementation Plans; Correction

The proposed rule under the above heading in the July 2, 1973 issue of the FEDERAL REGISTER, page 17684 is corrected by changing the date for which all relevant comments are to be received from July 10, 1973 to August 4, 1973.

Dated: July 13, 1973.

ROBERT L. SANSOM,
Assistant Administrator
for Air & Water Programs.

[FR Doc.73-14708 Filed 7-17-73;8:45 am]

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF STATE IMPLEMENTATION PLANS

Notice of Opportunity for Public Comment on Proposed Transportation and/or Land Use Control Strategies

On June 15, 1973, pursuant to Section 110(a) of the Clean Air Act and 40 CFR Part 51, the Administrator announced his partial approvals and partial disapprovals of State transportation control plans for implementation of the national ambient air quality standards. This was published in the FEDERAL REGISTER on June 22, 1973 (38 FR 16550).

In accordance with the decision of the Court of Appeals for the District of Columbia Circuit in *Natural Resources Defense Council, Inc., et al. v. Environmental Protection Agency* (Civil Action No. 72-1522), the Administrator is required to promulgate a plan where a State plan is deficient, by August 15, 1973. If, prior to promulgation, a State has adopted and submitted a plan or revision which the Administrator determines to be in accordance with applicable requirements, the State plan will be approved in lieu of promulgation. Section 110(c) of the Clean Air Act.

In its order, the court stated that the Administrator shall permit the public to comment on the State transportation control strategies and on the request by the Governor of any State, pursuant to section 110(e) of the Clean Air Act, for an extension of the date for attainment of a primary ambient air quality standard.

This notice is issued to advise the public that revisions for the proposed implementation plan for the States of Minnesota, Maryland, Virginia, and the District of Columbia have been received by the Environmental Protection Agency and that comments may be submitted on whether the proposed plans, as revised, should be approved or disapproved by the Administrator under section 110(a) of the Clean Air Act. Public comment is also solicited on whether the request by the Governors of Maryland, Minnesota and Virginia, and the Mayor of the District of Columbia or an extension of time for meeting the primary standards should be granted by the Administrator under section 110(e) of the Act. Only comments received within 21 days from the publication of this notice will be considered. Notice of opportunity to comment on State plans has been published previously on April 24, April 27, May 4, June 1, and June 22, 1973.

More detailed descriptions of the plans are set forth below.

MINNESOTA

A control strategy for the attainment and maintenance of the national standards for carbon monoxide in the Minneapolis-St. Paul Intrastate Air Quality Control Region was submitted on June 15, 1973, by the Governor of Minnesota. It was adopted by the Minnesota Pollution Control Agency on June 11, 1973, after public hearings held on May 3, 1973, in Minneapolis.

The plan proposes to achieve the standards by May 31, 1975. The control strategy is designed to achieve a 40 percent reduction in carbon monoxide concentrations by construction of parking structures on the fringe of the central business district (CBD) served by mass transit, expanded mass transit facilities, completion of a freeway around the CBD, and traffic flow improvements.

Copies of the proposed plan are available at the Program Support Branch, Division of Air and Water Programs, Environmental Protection Agency, Region V, 1 North Wacker Drive, Chicago, Illinois 60606, and at the Division of Air Quality, Minnesota Pollution Control Agency, 717 Delaware Street, SE, Minneapolis, Minnesota 55440.

DISTRICT OF COLUMBIA

A control strategy for the attainment and maintenance of the national standards for carbon monoxide and photochemical oxidants in the National Capital Interstate Air Quality Control Region was submitted by the Mayor of the District of Columbia on April 20, 1973. The plan was approved in part on June 15, 1973. 38 FR 16550 (June 22, 1973). However, the absence of sufficient detail on regulatory, administrative, and enforcement aspects of some strategies, plus the unlikely availability of others, precluded full approval.

Supplemental information to correct the deficiencies has been received on July 9, 1973, including a request for a two-year extension of the date for attainment of the primary standards. The control strategy is designed to achieve reductions of 56 percent in carbon monoxide and 67 percent in hydrocarbons by means of an inspection system, the reduction of gas handling losses, elimination of dry cleaning losses, a ban on heavy duty deliveries during morning rush hours, the elimination of free parking in certain areas, the imposition of a two dollar per day surcharge on parking in certain areas, the establishment of a car pool locator system, the provision of a network of bus lanes, limitations on aircraft taxiing emissions, the expansion of the region-wide bus fleet by 750 buses in cooperation with Maryland and Virginia.

Copies of the supplemental information are available for inspection at Room 213, Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, at Room 329, EPA, 401 M Street, SW., Washington, D.C. 20460, and at the Bureau of Air and Water Quality Control, 25 K Street, NE., Washington, D.C.

MARYLAND

Control strategies for the attainment and maintenance of the national standards for carbon monoxide and photochemical oxidants in the Baltimore and National Capital Interstate Air Quality Control Regions were submitted by the Governor of Maryland on April 16, 1973, including a request for a two-year extension for attainment of the primary standards. The plan was approved in part on June 15, 1973. 38 FR 16550 (June 22, 1973). The absence of sufficient detail on regulatory, administrative, and enforcement aspects of some strategies, plus the unlikely availability of others, precluded full approval.

Supplemental information to correct the deficiencies has been received on June 15, June 22, June 28, and July 10, 1973. The control strategy is designed to achieve reductions of 57 percent in carbon monoxide and 70 percent in hydrocarbons for Baltimore and reductions of 56 percent in carbon monoxide and 67 percent in hydrocarbons by means of an inspection system, the elimination of gas handling losses, elimination of dry cleaning losses, catalytic reduction converters for heavy duty vehicles, the elimination of free parking in certain areas, the imposition of a two dollar per day surcharge on parking in certain areas, the establishment of a car pool locator system, the provisions of a network of bus lanes, limitations on aircraft taxiing emissions, the expansion of the region-wide bus fleet by 750 buses in cooperation with the District of Columbia and Virginia.

Copies of the supplemental information are available for inspection at Room 213, Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, at Room 329, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, and at the Bureau of Air Quality Control, 610 North Howard, Baltimore, Maryland.

VIRGINIA

A control strategy for the attainment and maintenance of the national standards for carbon monoxide and photochemical oxidants in the National Capital Interstate Air Quality Control Region was submitted by the Governor of Virginia on April 11, 1973, including a request for a two-year extension of the date for attainment of the primary standards. The plan was approved in part on June 15, 1973. 38 FR 16550 (June 22, 1973). However, the absence of sufficient detail on regulatory, administrative, and enforcement aspects of some strategies, plus the need for some additional measures, precluded full approval.

Supplemental information to correct the deficiencies has been received on July 9, 1973. The control strategy is designed to achieve reductions of 56 percent in carbon monoxide and 67 percent in hydrocarbons by means of an inspection system, the elimination of gas handling losses, elimination of dry cleaning losses, the elimination of free parking in certain areas, the imposition of a two dollar per day surcharge on parking in certain areas, the establishment of a car pool locator system, the provision of a network of bus lanes, limitations on aircraft taxiing emissions, the expansion of the region-wide bus fleet by 750 buses in cooperation with the District of Columbia and Maryland.

Copies of the supplemental information are available for inspection at Room 213, Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, at Room 329, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, and at the State Air Pollution Control Board, 7115 Leesburg Pike, Room 104, Falls Church, Virginia 22043.

Dated: July 12, 1973.

ROBERT L. SANSOM,
Assistant Administrator for
Air and Water Programs.

NATIONAL TRANSPORTATION SAFETY BOARD

[14 CFR Part 421]

RULES OF PRACTICE IN AIR SAFETY ENFORCEMENT PROCEEDINGS

Notice of Proposed Rule Making

Pursuant to 5 U.S.C. 553, the National Transportation Safety Board (NTSB) gives notice that it proposes to revise Part 421—Rules of Practice in Air Safety Enforcement Proceedings, Chapter III, Title 14, Code of Federal Regulations (14 CFR Part 421).

Section 5(b)(2) of the Department of Transportation Act (Public Law 89-673, 80 Stat. 935, 49 U.S.C. 1654(b)(2)) (DOT Act) authorizes the NTSB under the provision of section 602(b) Federal Aviation Act of 1958 (49 U.S.C. 1429) (The Act) to review, on petition, refusals by the Administrator of the Federal Aviation Administration (FAA) to issue or renew an airman certificate to an applicant therefor, and, under the provision of section 609, on appeal, to review orders amending, modifying, suspending, or revoking an airman certificate. The NTSB, pursuant to section 5(k) of the DOT Act now proposes a revision to the rules governing the above-described proceedings, which includes amending, modifying, revising, and republishing Part 421.

Provisions of sections 602(b) and 609 of The Act originally provided authority to the Civil Aeronautics Board (CAB) for these quasi-judicial proceedings. This authority was transferred to the NTSB by section 5(b)(2) (DOT Act). Prior to April 1, 1967, 14 CFR Part 301 governed proceedings based upon such reviews and appeals before the CAB. These rules, as amended and reissued, were continued by the NTSB, except for the elimination of the procedure for discretionary review and the institution of appeals from initial decisions as a matter of right. As so amended, Part 421, comprising the NTSB's procedural regulations for air safety proceedings, was issued, effective December 1, 1967, and it has remained unaltered since that date, notwithstanding statutory and regulatory changes, legal interpretations, and NTSB experience in operating under the rules.

The proposed revision reorganizes the rules by setting up sections covering general rules applicable to all reviews and appeals and special rules applicable to reviews, appeals, and emergency proceedings. Under this classification, duplication of provisions which formerly appeared, both in sections covering reviews and in sections covering appeals, is obviated.

Statutory changes, such as the change of title from "examiner" to "administrative law judge," and a requirement that transcripts of hearings be furnished parties upon payment of reasonable costs, are recognized.

The revised Part 421 updates the rules by deleting provisions which are no longer pertinent, such as a reference to Part 263 of the CAB Economic Regulations. Without such reference, proposed §421.6 permits intervention where there is a property or financial interest and a party may be bound by an order without adequate representation by the existing parties, provided that the intervention would not unduly broaden the issue or delay the proceedings.

Nine copies of certain documents have been required to be filed by the parties. This number of copies has proved to be excessive; therefore, the requirement is reduced to five in the interest of economy.

In a few instances, Part 421 was completely silent with respect to matters which would be better expressed, so that the proposed sections for example, on waivers, and on presumption of service, and the inclusion of "medical certificate" in the definition of "airman certificate," now fill the former gaps. Board experience, particularly with proceedings involving pro se respondents and petitioners, and the need to simplify, clarify, and present uniformity of expression prompted certain language changes. The sections covering burden of proof are now presented in the same format. The difference between an "appeal to the Board" and an "appeal from an initial decision" is stressed by spelling out the two phrases in each instance. The provision covering "computation of time" is clarified by expressing the method of calculation in positive rather than in negative terms.

The proposed revision also contains substantive changes by addition, deletion, or otherwise. NTSB experience has shown that the time within which appeal and reply briefs must be field is inadequate, so that the Board is deluged with requests for extensions of time. To obviate this situation, the time within which briefs are to be filed is doubled, except in the case of an appeal brief where there has been a written initial decision. In that case, the time has been increased from 20 to 30 days. The proposed revision provides the law judge with discretion, in cases where an answer to a complaint or a petition for review has not been timely filed, to permit a late answer or an answer at the hearing where good cause has been shown.

In many instances, petitions for reconsideration have been filed for the express purpose of delaying the effective date of a suspension or revocation. For that reason extensions of time to file such petitions will be granted only in extraordinary circumstances. Formrely, the date of filing documents with the Board depended upon the date of receipt of the document by the Board. This provision has not generally been understood. In addition, a party should not be penalized in the event that the mail has been unduly delayed. The proposed revision therefore makes uniform the date of filing with the Board and of serving documents upon parties and provides that

V 38 I 137 JUL 18 73 XUM

in both cases the date of mailing shall be the pertinent date (or the date of personal delivery where that method is employed).

Litigation has ensued as a result of the misuse of the alternate methods by which the FAA Administrator may file his complaint. The proposal is made that the Administrator be required to file his order of suspension or revocation as his complaint, to simplify the procedures, and to preclude the type of procedural issues brought before the Board on appeals of this subject.

With regard to appeals from initial decisions in emergency proceedings, Part 421 provided for the simultaneous filing of the appeal and reply brief. This has proved to be inadequate for the party replying. Accordingly, provision is made for filing the reply brief within 5 days after receipt of the appeal brief.

Public comment is invited on these proposals. Two written copies thereof should be sent to the Office of General Counsel, National Transportation Safety Board, Washington, D.C., 20591. The comments should specify the section of the rules to which they pertain. All comments received within 30 days from the day of publication of this proposal in the FEDERAL REGISTER will be considered in formulating the final rules. Further, copies of this document and of all written comments received will be available for public inspection and copying between the hours of 8:30 and 5:00 p.m., e.d.t., Monday through Friday in the Board's Public Reference Room No. 806D, Federal Office Building 10A, 800 Independence Avenue, SW., Washington, D.C.

In consideration of the foregoing, it is proposed to revise Part 421, so that it will read as follows:

PART 421—RULES OF PRACTICE IN AIR SAFETY ENFORCEMENT PROCEEDINGS

GENERAL PROVISIONS

Sec.
421.1 Definitions.
421.2 Applicability and description of part.

GENERAL RULES APPLICABLE TO PETITIONS FOR REVIEW, APPEALS TO THE BOARD, AND APPEALS FROM INITIAL DECISIONS

421.3 Appearances and rights of witnesses.
421.4 Filing of documents with the Board.
421.5 Service of documents.
421.6 Intervention.
421.7 Computation of time.
421.8 Extension of time.
421.9 Amendment and withdrawal of pleadings.
421.10 Waivers.
421.11 Motions.
421.12 Motion to disqualify a Board Member.
421.13 Appeals from law judge's interlocutory rulings on motions.
421.14 Motions to dismiss.
421.15 Motion for more definite statement.
421.16 Depositions.
421.17 Subpenas, witness fees, and appearances of Board Members, officers or employees.
421.18 Official notice.

SPECIAL RULES APPLICABLE TO PROCEEDINGS UNDER SECTION 602(b) OF THE ACT

421.19 Initiation of proceedings.
421.20 Burden of proof.
421.21 Motion to dismiss petition for review for lack of standing.

SPECIAL RULES APPLICABLE TO PROCEEDINGS UNDER SECTION 609 OF THE ACT

421.22 Initiation of proceedings.
421.23 Complaint.
421.24 Burden of proof.
421.25 Motion to dismiss stale complaint.

LAW JUDGES

421.26 Assignment, duties, and powers.

HEARINGS

421.27 Notice of hearing.
421.28 Evidence.
421.29 Argument and submissions.
421.30 Record.
421.31 Certification to the Board.

INITIAL DECISION

421.32 Initial decision by law judge.
421.33 Effect of law judge's initial decision, and filing an appeal therefrom.

APPEALS FROM INITIAL DECISIONS

421.34 Notice of appeal.
421.35 Briefs and oral argument.
421.36 Issues on appeal.
421.37 Petitions for rehearing, reargument, reconsideration, or modification of an order of the Board.

RULES APPLICABLE TO EMERGENCY ORDERS

421.38 General.
421.39 Appeal, complaint, answer to the complaint, and motions.
421.40 Hearing and initial decision.
421.41 Notice of appeal from initial decision; briefs, issues, and petitions for reconsideration.

GENERAL PROVISIONS

§ 421.1 Definitions.

As used in this part:

"Act" means the Federal Aviation Act of 1958 (49 U.S.C. 1301, et seq.);

"Administrator" means the Administrator of the Federal Aviation Administration (FAA);

"Airman certificate" means any certificate issued by the FAA and shall include medical certificates;

"Appeal from an initial decision" means a request to the Board to review a law judge's decision;

"Appeal to the Board" means a request to the Board for the review of an order of the Administrator by a law judge;

"Board" means the National Transportation Safety Board;

"Certificate" means any certificate issued by the Administrator under Title VI of the Act;

"Chief Law Judge" means the administrative law judge in charge of the Office of Administrative Law Judges.

"Complaint" means an order of the Administrator from which an appeal to the Board has been taken pursuant to section 609 of the Act;

"Emergency order" means an order of the Administrator issued pursuant to section 609 of the Act, which recites that an emergency exists and that safety in air commerce or air transportation and the public interest require the immediate effectiveness of such order;

"Initial decision" means the law judge's decision on the issue remaining for disposition at the close of a hearing before him and/or an order granting a motion to dismiss in lieu of an answer, as provided in §§ 421.19 and 421.23, and terminating the proceeding, except that "initial decision" does not include cases where the record is certified to the Board, with or without a recommended decision, or orders partly granting a motion to dismiss and requiring an answer to any remaining allegation, or rulings by the law judge on interlocutory matters appealed to the Board under § 421.13;

"Law judge" means the administrative law judge assigned to hear and preside over the respective proceedings;

"Petition for review" means a petition filed pursuant to section 602(b) of the Act for review of the Administrator's denial of an application for issuance or renewal of an airman certificate;

"Petitioner" means a person who has filed a petition for review;

"Respondent" means the holder of a certificate who has appealed to the Board from an order of the Administrator amending, modifying, suspending, or revoking such certificate.

Terms defined in the Act are used as so defined.

§ 421.2 Applicability and description of part.

The provisions of this part shall govern all proceedings before a law judge upon petition for review, or upon appeal from any order of the Administrator amending, modifying, suspending, or revoking any certificate, and upon appeal to the Board from any order or decision of a law judge.

GENERAL RULES APPLICABLE TO PETITIONS FOR REVIEW, APPEALS TO THE BOARD, AND APPEALS FROM INITIAL DECISIONS

§ 421.3 Appearances and rights of witnesses.

(a) Any party to a proceeding may appear and be heard in person or by attorney or other representatives designated by him. No register of persons who may practice before the Board is maintained, and no application for admission to practice is required. Upon hearing, and for good cause shown, the Board may suspend or bar any person from practicing before it.

(b) Any person appearing in person in any proceeding governed by this part, may be accompanied, represented, and advised by counsel and may be examined by his own counsel or representative.

(c) Any person who submits data or evidence in a proceeding governed by this part, may procure a copy of any document submitted by him, or a copy of any transcript made of his testimony on payment of reasonable costs. Original documents or data or evidence may be retained by a party upon permission of the law judge or the Board, upon substitution of a copy therefor.

§ 421.4 Filing of documents with the Board.

(a) *Filing address, date of filing, and airmail.* Documents to be filed with the Board shall be filed with the Office of Administrative Law Judges, National Transportation Safety Board, Washington, D.C. 20591, by personal delivery or by mail and shall be deemed to be filed on the date of actual personal delivery or of mailing, as the case may be. Documents mailed to the Board from a point in the United States more than 800 miles from Washington, D.C., shall be sent by airmail.

(b) *Number of copies.* Unless otherwise specified, an executed original and three true copies of each document shall be filed with the Office of Administrative Law Judges. Copies need not be signed, but the name of the person signing the original shall be reproduced.

(c) *Contents.* Each document shall contain a concise and complete statement of the facts relied upon and the relief sought.

(d) *Form.* Petitions for review or appeals to the Board may be in the form of a letter to the Board signed by the petitioner or the party appealing and shall be typewritten or in legible handwriting. Appeals from initial decisions shall be in typewritten or printed form.

(e) *Subscription.* Every document filed shall be signed by the person filing it or his duly authorized representative.

(f) *Designation of person to receive service.* The initial document filed shall state on the first page the name and post office address of the person or persons who may be served with documents in the proceeding.

(g) *Motions, request and documents.* All motions, requests, and documents in connection with petitions for review and appeals to the Board shall be filed with the chief law judge, until such time as he assigns a law judge to preside over the proceeding.

§ 421.5 Service of documents.

(a) *Service by the Board.* The Board will serve orders, initial decisions, motions, and similar documents which it issues upon all parties to the proceeding by registered or certified mail.

(b) *Service by others.* Copies of all documents filed with the Board must be served upon all parties to the proceeding by the person filing them.

(c) *How service may be made.* Service may be made by personal delivery, by regular mail, by registered mail, or by certified mail, except as provided in paragraph (a) of this section. When service is made by mail upon a party located more than 800 miles distant from the party effecting service (from Washington, D.C., in the case of service effected by the Board) airmail shall be used.

(d) *Who may be served.* Service upon a party or person may be made upon a person designated in accordance with § 421.4(f) to receive service. If no such person is designated, service may be made upon the party or person himself, if he is an individual, or upon an officer of a corporation or association, a member of a partnership, or an agent of an air carrier designated under section 1005(b) of the Act.

(e) *Where service may be made.* Service by regular or registered or certified mail shall be made at the address of the person designated in accordance with § 421.4(f) to receive service, or, if no such person is designated, at the usual residence or principal place of business of the party or person, or, if not known, at the address last furnished by him to the Federal Aviation Administration, except that an agent designated by an air carrier under § 1005(b) of the Act shall be served only at his office or usual place of residence. Service by mail on the Administrator shall be made at the office of his designee to receive service, or, if none, at the Federal Aviation Administration, Office of the General Counsel, AGC–32, Washington, D.C. 20591. Personal service may be made on any of the persons described in paragraph (d) of this section wherever they may be found, except that an agent designated by an air carrier under section 1005(b) of the Act may be served only at his office or usual place of residence.

(f) *Certificate of service.* A certificate of service shall accompany all documents when they are tendered for filing and shall consist of a certificate of mailing executed by the person mailing the document.

(g) *Presumption of service.* There shall be a presumption of lawful service in the following instances:

(1) Where acknowledgment of receipt is made by a person who customarily receives mail or receives it in the ordinary course of business at either the residence or principal place of business of a person designated in accordance with § 421.4(f) to receive service; or

(2) Where there is no designee, acknowledgment of receipt at the residence or principal place of business of the party himself, by a person who customarily receives mail or receives it in the ordinary course of business; or

(3) Where a properly addressed envelope, indicating that it had been sent by registered or certified mail, has been returned marked "undelivered" or "unclaimed."

(h) *Date of service.* Whenever proof of the service by mail is made, the date of mailing shall be the date of service, and where personal service is made, the date of personal delivery shall be the date of service.

§ 421.6 Intervention.

Any person may move for leave to intervene in a proceeding and may become a party thereto, if the law judge finds that such person may be bound by the order to be entered in the proceeding, or that such person has a property or financial interest which may not be adequately represented by existing parties: *Provided,* That such intervention would not unduly broaden the issues or delay the proceedings. Except for good cause shown, no motion for leave to intervene will be entertained if filed less than 10 days prior to hearing.

§ 421.7 Computation of time.

In computing any period of time prescribed or allowed by this part, by notice or order of the Board or a law judge, or by any applicable statute, the date of the act, event, or default after which the designated period of time begins to run is not to be included in the computation. The last day of the period so computed is to be included unless it is a Saturday, Sunday, or legal holiday for the Board, in which event the period runs until the end of the next day which is neither a Saturday, Sunday, nor a holiday. Saturdays, Sundays, and legal holidays for the Board shall be computed in the calculation of time in all emergency cases under § 421.38 of this part and shall be counted in the computation of time in all nonemergency cases where the period of time involves 7 days or more.

§ 421.8 Extension of time.

Upon written request filed with the Board and served upon all parties, and for good cause shown, the chief law judge, a law judge, or the Board, may grant an extension of time to file any document except a petition for reconsideration. Extensions of time to file petitions for reconsideration will be granted only in extraordinary circumstances.

§ 421.9 Amendment and withdrawal of pleadings.

(a) *Amendment.* At any time more than 15 days prior to the time of hearing, a party may amend his pleadings by filing the amended pleading with the Board and serving copies on the other parties. After that time, amendment shall be allowed at the discretion of the law judge. Where amendment to an answerable pleading has been allowed, the law judge shall allow the adverse party a reasonable opportunity to answer.

(b) *Withdrawal.* A party may withdraw his pleadings only upon approval of the law judge or the Board.

§ 421.10 Waivers.

Waivers of any rights provided by statute or regulation shall either be in writing, or by stipulation made at a hearing and entered into the record, and shall set forth their precise terms and conditions.

§ 421.11 Motions.

(a) *General.* An application to the Board or to a law judge for an order or ruling not otherwise specifically provided for in this part shall be by motion. Prior to the assignment of a law judge, all motions shall be addressed to the chief judge. Thereafter, and prior to the expiration of the period within which an appeal from the law judge's

V 38 I 137 JUL 18 1973 XUM

initial decision may be filed, or the certification of the record to the Board, all motions shall be addressed to the law judge. At all other times, motions shall be addressed to the Board. All motions not specifically provided for in any other section of this part shall be made at an appropriate time, depending upon the nature thereof and the relief requested.

(b) *Form and contents.* Unless made during a hearing, motions shall be made in writing, shall state with particularity the grounds for the relief sought and the relief sought, and shall be accompanied by affidavits or other evidence relied upon. Motions made during hearings, answers thereto, and rulings thereon, may be made orally on the record, unless the law judge directs otherwise.

(c) *Answers to motions.* Except when an answer is made during a hearing, any party may file an answer in support of or in opposition to a motion, accompanied by such affidavits or other evidence as he desires to rely upon, provided that the answer is filed within 7 days after the motion has been served upon him, or such other period as the Board or a law judge may fix. In the case of an answer to a motion made during a hearing, the answer and the ruling thereon may be made at the hearing, or orally or in writing within such time as the law judge may fix.

(d) *Oral argument; briefs.* No oral argument will be heard on motions unless the Board or the law judge otherwise directs. Written memoranda or briefs may be filed with motions or answers to motions, stating the points and authorities relied upon in support of the positions taken.

(e) *Disposition of motions.* Except as provided in paragraph (c) of this section for rulings on motions made at a hearing, the law judge shall pass upon all motions properly addressed to him, except that if he finds that a prompt decision by the Board is essential to the proper conduct of the proceeding, he may refer such motion to the Board for decision.

(f) *Effect of pendency of motions.* The filing or pendency of a motion shall not automatically alter or extend the time fixed in this part (or any extension granted thereunder) to take action.

§ 121.12 Motion to disqualify a Board Member.

A motion requesting a Board Member to disqualify himself shall be filed with the Board, supported by an affidavit setting forth grounds for disqualification. In nonemergency proceedings, where an appeal from an initial decision is filed, such motion shall be filed on or before the date on which the reply brief is due, pursuant to § 421.35. In emergency proceedings, where a notice of appeal has been filed, such motion shall be filed on or before the date the briefs are due, pursuant to § 421.41. Failure to file a timely motion shall be deemed a waiver of disqualification. Application for leave to file an untimely motion may be made accompanied by an affidavit setting forth in detail why the facts relied upon as grounds for disqualification were not known and could not have been discovered with reasonable diligence within the prescribed time.

§ 421.13 Appeals from law judge's interlocutory rulings and motions.

Ruling of law judges on motions may not be appealed to the Board prior to its consideration of the entire proceeding, except in extraordinary circumstances and with the consent of the law judge who made the ruling. An appeal shall be disallowed unless the law judge finds, either on the record or in writing, that the allowance of such appeal is necessary to prevent substantial detriment to the public interest or undue prejudice to any party. If an appeal is allowed, any party may file a brief with the Board within such time as the law judge directs. No oral argument will be heard unless the Board directs otherwise. The rulings of the law judge on motion may be reviewed by the Board in connection with its final action in the proceeding, irrespective of the filing of an appeal from the motion or any action taken thereon.

§ 421.14 Motions to dismiss.

(a) *General.* Motions to dismiss may be made within the time limitation for filing an answer, except as otherwise provided in paragraph (c) of this section. In case the motion is not granted in its entirety, the answer shall be filed within 10 days of service of the order on the motion.

(b) *Appeal of dismissal orders.* Where a law judge grants a motion to dismiss in lieu of an answer and terminates the proceeding without hearing, an appeal of such order to the Board may be filed pursuant to the provisions of §§ 421.19 and 421.22(a). Where a law judge grants a motion to dismiss in part, objections to such interlocutory order may be raised in an appeal only after the law judge has rendered his initial decision on the remaining issues, unless the law judge consents to an appeal to the Board in accordance with § 421.13.

(c) *Motions to dismiss for lack of jurisdiction.* A motion to dismiss on the grounds that the Board lacks jurisdiction may be made at any time.

§ 421.15 Motion for more definite statement.

The parties, in lieu of an answer, may file a motion requesting that the allegations in the complaint or the petition, as the case may be, be made more definite and certain. Such motion shall point out the defects complained of and the details desired. If the motion is granted and the law judge's order is not complied with within 15 days after notice, the law judge shall strike the allegation or allegations in any complaint or petition to which the motion is directed. If the motion is denied, the moving party shall file his answer within 10 days after the denial.

§ 421.16 Depositions.

After a petition for review or a complaint is filed, any party may file a motion with the chief law judge requesting permission to take the testimony of any person, including a party, by deposition, upon oral examination or written interrogatories. Service of a copy of the motion shall be made upon all other parties to the proceeding on 7 days' notice. If the motion is granted, the taking of the deposition shall be in compliance with the provisions of § 1004 of the Act.

§ 421.17 Subpenas, witness fees, and appearances of Board Members, officers, or employees.

(a) *Subpenas.* Subpenas requiring the attendance of witnesses or the production of documentary or tangible evidence for the purpose of taking depositions or at a hearing may be issued by the chief law judge prior to the assignment of a law judge, or by the law judge to whom the case is assigned, upon application by any party. The application shall show the general relevance and reasonable scope of the evidence sought. Any person upon whom a subpena is served may, within 7 days after service but in any event prior to the return date thereof, file with the chief law judge or the law judge, as the case may be, a motion to quash or modify the subpena, and such filing shall stay the subpena pending final action by the chief law judge or the law judge on the motion.

(b) *Witness fees.* Witnesses shall be entitled to the same fees and mileage as are paid to witnesses in the courts of the United States. The fees shall be paid by the party at whose instance the witness is subpenaed or appears.

(c) *Board Members, officers, or employees.* The provisions of paragraph (a) of this section are not applicable to Board Members, officers, or employees, or to the production of documents in their custody. Applications for the attendance of such persons or the production of such documents at a hearing or deposition shall be addressed to the chief law judge or the law judge, as the case may be, in writing, and shall set forth the need of the moving party for such evidence and its relevancy to the issues in the proceeding.

§ 412.18 Official notice.

Where any decision of the law judge or the Board rests on official notice of a material fact not appearing in the evidence in the record, any party shall, upon filing a petition within 10 days after notice thereof, be afforded a reasonable opportunity to show to the contrary.

SPECIAL RULES APPLICABLE TO PROCEEDINGS UNDER SECTION 602(b) OF THE ACT

§ 421.19 Initiation of proceedings.

(a) *Petition for review.* Where the Administrator has denied an application for the issuance or renewal of an airman certificate, the applicant may file with the Board a petition for review of the Administrator's action. Such petition shall be filed within 60 days from the time of service on the petitioner of the Administrator's action. The petition shall contain a short, plain statement of the facts on which petitioner's case rests and a statement of the action requested. The petition may be filed in the form of a letter to the Board signed by the aggrieved party.

(b) *Filing petition with the Board.* In accordance with the provisions of § 421.4(a), a petition for review mailed to the Board shall be deemed timely if postmarked before the end of the time limitation therefor, provided that if mailed from a point in the United States more than 800 miles from Washington, D.C., it is sent by airmail.

(c) *Answer to petition.* The Administrator shall file an answer to the petition for review within 20 days of service upon him by the petitioner of the petition for review. Failure to deny the truth of any allegation or allegations of the petition may be deemed an admission of the truth of the allegation or allegations not answered.

§ 421.20 Burden of proof.

In proceedings under § 602(b) of the Act, the burden of proof shall be upon the petitioner.

§ 421.21 Motion to dismiss petition for review for lack of standing.

Upon motion by the Administrator within the time limitation for filing an answer, a petition for review shall be dismissed for lack of standing in either of the following instances:

(a) If the petitioner's certificate at the time of the denial or renewal thereof was under an order of suspension; or

(b) If the petitioner's certificate had been revoked within one year of the date of the denial or renewal thereof, unless the order revoking such certificate provided otherwise.

SPECIAL RULES APPLICABLE TO PROCEEDINGS UNDER SECTION 609 OF THE ACT

§ 421.22 Initiation of proceedings.

(a) *Appeal.* A certificate holder shall file with the Board an appeal from an order of the Administrator amending, modifying, suspending, or revoking a certificate. Such appeal shall be filed with the Board within 20 days from the time of service of the order, along with proof of service upon the Administrator.

(b) *Contents.* Each appeal shall contain a concise but complete statement of the facts relied upon and the relief sought. It shall identify the Administrator's order and the certificate affected and shall recite the Administrator's action from which the appeal is sought. It shall likewise contain proof of service upon the Administrator.

(c) *Effect of timely appeal with the Board.* Timely filing with the Board of an appeal from an order of the Administrator shall postpone the effective date of the order until final disposition of the appeal by the law judge or the Board, except in emergency proceedings.

§ 421.23 Complaint.

(a) *Filing, time of filing, and service upon respondent.* The order of the Administrator from which an appeal has been taken shall serve as the complaint and shall be filed by the Administrator with the Board within 5 days after service by the Board upon the Administrator of an appeal from his order, along with proof of service upon respondent by the Administrator.

(b) *Contents of complaint.* If the Administrator claims that respondent lacks qualification as an airman, the order filed as the complaint, or an accompanying statement shall recite on which of the facts pleaded this contention is based.

(c) *Answer to complaint.* The respondent shall file an answer to the complaint within 20 days of service of the complaint upon him by the Administrator. Failure to deny the truth of any allegation or allegations of the complaint may be deemed an admission of the truth of the allegation or allegations not answered.

§ 421.24 Burden of proof.

In proceedings under section 609 of the Act, the burden of proof shall be upon the Administrator.

§ 421.25 Motion to dismiss stale complaint.

Where the complaint states allegations of offenses which occurred more than 6 months prior to the Administrator's advising respondent as to reasons for proposed action under § 609 of the Act, respondent may move to dismiss such allegations pursuant to the following provisions:

(a) In those cases where a complaint does not allege lack of qualification of the certificate holder:

(1) The Administrator shall be required to show by answer filed within 7 days of service of the motion that good cause existed for the delay, or that the imposition of a sanction is warranted in the public interest, notwithstanding the delay or the reasons therefor.

(2) If the Administrator does not establish good cause for the delay or for imposition of a sanction notwithstanding the delay, the law judge shall dismiss the stale allegations and proceed to adjudicate only the remaining portion, if any, of the complaint.
